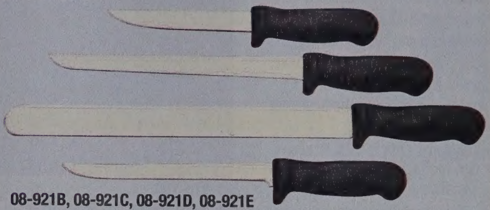
- Positive holding blade locks and nonslip grips
- Balanced for precision cutting

NCLUDES:
- 44 Blades
- 8 Handles
- Aluminum oxide wet/dry sharpening stone
- Plastic carrying case with magnets to keep blades in place

Cat. No.	Each
08-850-5	72.49

*Fisherbrand** Heavy-Duty Knives

Polypropylene handles are molded directly onto blade



08-921B, 08-921C, 08-921D, 08-921E

- Instruments of extremely hard, high-carbon, no-stain surgical-grade chromium steel (400 Series)
- Handles are chemical- and temperature-resistant
- Textured surface to ensure nonslip grip

COMPLIANCE:
Meet specifications of National Safety Foundation

Type	Blade Length	Cat. No.	Each

Brady* LABXPERT* Handheld Labeler

Increase labeling efficiency in your lab

11-878-100

Produce professional-looking labels for your lab samples and drastically reduce labeling time. Label vials, vial tops, slides, well plates and more, quickly and easily with durable materials designed specifically for the lab environment.

- Labels will not fall off or smear, can fit more information, and are always legible
- 300dpi print head for crisp, clear printing even on the smallest labels using the smallest fonts—from 1 to 32mm
- Auto-serialization lets you produce 40 labels in less than two minutes—80% faster than handwriting
- One-touch time and date stamping
- Barcoding—2D and linear (code 39 and 128)
- Over 140 lab-specific Greek, research, and safety symbols
- PC connectivity to download print jobs
- Drop, Lock & Go Smart Cartridge combines labels and ribbon for a quick and easy change
- "AA" battery or AC power operation
- Optional IdentiLab* Software enables you to create labels on your PC and download database information in three simple steps
  - Easy interface with spreadsheets and many other programs
  - Increase your text options with more fonts, symbols and sizes
  - Work in an easy "click and drag" environment

ORDERING INFORMATION:

Variety of LABXPERT labels for numerous lab applications are available separately.

INCLUDES:

Printer, AC power supply[†], PC cable, supply cartridge, and CD with manuals and driver

ACCESSORIES

Nylon Cloth Labels

- Withstand liquid nitrogen to -196°C (-321°F), freezer to -80°C (-112°F), and autoclave to +121°C (+250°F)
- Ideal for performance and general-purpose lab labeling
- Matte white with permanent adhesive; thicker construction makes this material durable, yet easy to handle
- Style: Freestanding

NOTE:

Not suitable for use on glass in liquid nitrogen.

Brady* TLS PC Link* Thermal Labeling System

Rugged desktop/portable printer with multiple labeling capabilities

Lightweight desktop/portable printer system has thermal transfer printing, bar coding, and multiple material configuration capabilities.

- Included Windows* drivers permit labels to be printed from LabelMark software (included), as well as BradySoft*, or any software that is Windows compatible; firmware may be upgraded through the mini-Din serial jack
- Printer utilizes TLS2200 printer materials and ribbons, plus bulk rolls of material
- Works with specialty lab materials which are sized to specific vial and tube sizes
- Withstands tough lab conditions including liquid nitrogen, freezer autoclave, xylene, ethanol and DMSO
- Prints up to 500 labels between charges
- Uses AC power or rechargeable battery pack

ORDERING INFORMATION:
Replacement power supply/battery charger and rechargeable battery pack available separately.

INCLUDES:
Comes complete with: Windows* drivers, LabelMark* labeling software, rechargeable battery pack, AC power supply/battery charger, R6210 ribbon, sample labels, Quick Start Guide, manuals, and communications cable.

Brady* TLS2200* Portable Printer

Handheld printer for toughest labeling challenges

Lightweight printer offers manual or PC-connected operation. Automatically serializes, and will also print two copies of each serialized label—one for each end of the run. Works with specialty labels sized to specific vial and tube sizes.

- Withstands tough lab conditions including liquid nitrogen, freezer autoclave, xylene ethanol and DMSO
- Thermal transfer printer delivers crisp, clear, nonsmearing labels
- Simple operation—just drop in labels and push PRINT
- Features memory for label storage, banner printing, built-in label cutter, and PC connectivity
- Provides high-quality 203 dpi resolution
- Adjustable for six different widths of labels
- Handles labels as wide as 2" (5.1cm)
- Prints over 500 labels between battery charges

ORDERING INFORMATION:
Weighs 2¾ lb. (1.2kg).

INCLUDES:
Hard case, R6210 ribbon, battery pack and charger, manual communications cable, test labels, and one cleaning card

COMPLIANCE:

Brady* Bradyprinter* Model 1344 Thermal Transfer Printer

Perfect for small- to medium-volume printing

- Compact and economical benchtop printer prints on a variety of materials including polyester, paper, and vinyl
- Offers 300 dpi print resolution, selectable print speeds
- Ideal for general-purpose product identification, wire and cable marking, and laboratory identification
- Prints labels from ¼ to 4¼" (6.4 to 10.8cm) wide, most linear and two-dimensional bar codes, and with many fonts
- Three-button control panel user interface and light indicators

ORDERING INFORMATION:
Net weight: 5¼ lb. (2.4kg). Electrical requirements: 90 to 264VAC, 48 to 62Hz. Optional media stand (22-500-545) available on our Web site.

INCLUDES:
A 32-bit microprocessor, 2MB RAM memory, and a 1MB flash drive

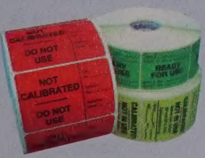
Corrosive	**15-933**	18.24	62.39
Flammable	**15-934**	18.18	62.18

*Fisherbrand** ACA Labels

Determine equipment status at a glance

- Designed for use with Automated Clinical Analyzers (ACA)
- Brightly colored, pressure-sensitive labels allow operators to check if equipment is calibrated or not
- Color-coded labels: red for "Not Calibrated—Do Not Use"; green for "Ready for Use"; and yellow for "Calibrated—Not in Use"
- Paper labels may be written on



Left to right: 15-944, 15-946 (top), 15-945 (bottom)

Message	L × W	Cat. No.	Pack of 1000
Not Calibrated—Do Not Use	3 × 1 15/16" (7.6 × 4.9cm)	**15-944**	37.01
Calibrated—Not in Use	1⅞ × 1⅞ " (4.8 × 4.8cm)	**15-945**	63.97
Ready for Use	1½ × 1 15/16" (3.8 × 4.9cm)	**15-946**	51.10

*Fisherbrand** HMIG and NFR Write-On Labels

Ideal for adding vital hazard information to surfaces of small bottles, cans, and other containers

- **HMIG paper labels** are large enough to include the chemical name, common name and manufacturer's name
- **NFR labels** let you write in the chemical name, owner, date, and hazard rating

18-999-789 (top);
18-999-788 (bottom)

ORDERING INFORMATION:

Both labels measure 3⅞L × 1½"W (98 × 38mm).

Description	Cat. No.	Pack of 1000
HMIG	**18-999-788**	40.95
NFR	**18-999-789**	35.12

*Fisherbrand** Biohazard Labels

Quickly identify biohazards

- Hazard communication labels ensure safety and efficiency
- Identify equipment, containers, rooms, materials, experimental animals or combinations of these items that may contain potentially infectious agents
- Easy peel-off labels with pressure-sensitive adhesive

15-920 Series

NOTE:

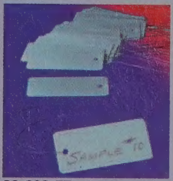
Use in accordance with applicable federal and state regulations.

L × W	Cat. No.	Pack of 1000
1 × 1" (2.5 × 2.5cm)	**15-926**	13.18
3 × 2" (7.6 × 5.1cm)	**15-927**	22.90
5 × 5" (12.7 × 12.7cm)	**15-928**	46.16

*Fisherbrand** Write-On* Metal Tags

Extremely durable aluminum tags

- Can be permanently engraved using an ordinary ballpoint pen
- Can be marked on one or both sides
- Suitable for use in hot, cold or moist environments
- Ideal for tagging samples, cylinders, valves, and tubing; come with wires



06-662-57

L × W	Cat. No.	Pack of 48
3⅛ × 1⅜" (79 × 35mm)	**06-662-57**	33.88

Micryo* Dots and Strips for Cryo Storage

Use in temperatures as low as -196°C (-320°F)

- Suitable for use on microcentrifuge tubes, cryovials, racks, boxes, and microtiter plates
- No need to self-laminate
- Thinner labels mean tubes will still fit most storage systems
- Easy to see—bold colors let you identify samples while in the box
- Unique adhesive formulation for extra staying power

ORDERING INFORMATION:
Available on rolls and laser sheets for inkjet and laser printers. Additional label sizes available at our Web site.

Scienceware* Protective Lab Labeling Tape

Holds up when other tapes give out

11-867 Series

- Clear polyester tape provides versatility for heavy-duty lab use
- Resists moisture, acids, alkalis and organic solvents
- Withstands liquid nitrogen at -196°C (-320°F) or boiling water
- Steam autoclavable at 121°C (250°F)

ORDERING INFORMATION:

Rolls are 36 yd. (32.9m) long. For use with Scienceware dispenser 11-867-50 (sold separately).

Width	Mfr. No.	Cat. No.	Each	Case of
1" (2.5cm)	13453-0010	**11-867A**	16.56	36/477.00
1½" (3.8cm)	13453-0015	**11-867B**	24.69	24/474.00
2" (5cm)	13453-0020	**11-867C**	30.63	24/588.00

Scienceware* Write-On* White Label Tapes

Autoclavable labels for identifying labware, bottles or samples

- For use with pencil, ballpoint pen, or solvent ink marker
- Stick to glass, metal, or plastic
- Resist moisture and most solvents
- Use from -73° to +80°C (-100° to +176°F)

ORDERING INFORMATION:

Supplied in 40 yd. (36.5m) rolls. Colored Write-on tapes available on our Web site.

Width	Mfr. No.	Cat. No.	Each	Case of 24
½" (13mm)	13463-0005	**11-865-28**	9.72	186.70

ACCESSORIES

Dispenser with Writing Platform

For Write-On* white label tapes

- Smooth, sturdy epoxy-coated steel writing platform suitable for right- or left-handed use
- Built-in cutting edge
- Weighted base with nonskid pads
- Accepts tape rolls with a maximum diameter of 5¼" (133mm)
- Maximum tape reel width: 1" (25mm)

ORDERING INFORMATION:

Writing platform: 4L × 6"W (10 × 15cm)

Mfr. No.	Cat. No.	Each

60 yd. (55m) tape	15-909	68.04

LAMPS

Fisher Scientific* Flexible-Arm Light

Three-point articulating arm allows lamp to be moved 360° and adjusted to any position

Ideal for inspection, sample examination and electronics quality control.

- Finger control pivots, raises and lowers lamp
- Light (35w halogen) closely resembles daylight for correct color detection
- Spring counterbalance for easy movement
- Weighted metal base for stability

15-077-66

ORDERING INFORMATION:

Base diameter: 7" (17.8cm). Total weight: 8 lb. (3.63kg). Electrical Requirements: 115V.

INCLUDES:

White reflector and 35w bright halogen white light bulb

CERTIFICATIONS:

UL listed

Arm Length	Cat. No.	Ea
20" (50.8cm)	15-077-65	54.
28" (78.7cm)	15-077-66	65.

LIGHT METERS

Fisher Scientific* Traceable* Dual-Range Light Meter

Measures both lux and foot-candles at a rapid sampling rate of 0.4 seconds

Display update rate is adjustable to 1 or 2 seconds.

- Lux measurements: three ranges from 0 to 1999, 2000 to 19,990 and 20,000 to 50,000 lux; resolution from 1 to 100 lux; accuracy of ±5% plus 10-100 lux
- Foot-candle measurements: three ranges from 0 to 199.9; 200 to 1999 and 2000 to 5000 ft-c.; resolution from 0.1 to 10 ft-c; accuracy of ±5% plus 1-100 ft-c
- Push-button access to highest, lowest, and average of recorded readings
- DATA HOLD function "freezes" display while analog output allows readings to be captured by a recorder
- Photodiode and color-correction filter provide cosine- and color-corrected measurements

ORDERING INFORMATION:

Dimensions: 6½L × 3W × 1½"H (16.5 × 7.6 × 3.8cm). Net weight: 10 oz. (283g).

INCLUDES:

2" diameter (5.1cm) photocell, 40" (1m) cable, 9V alkaline battery, recorder output

REQUIRED ACCESSORIES:

Easy-Use* accessory adapter (11-661-23) is available for conversion to 115V electrical power. Adapter sold separately.

06-662

CERTIFICATIONS:

Includes certificate verifying traceability to NIST*.

Cat. No.	Ea
06-662-63	113.

*Trademark. See Trademark Reference.

isher Scientific* Traceable* Dual-Display Light Meter

arge LCD shows separate readings for lux and oot-candles in 1⅜"H digits, plus selected source laylight, tungsten, fluorescent, or mercury)

ree Ranges

- Measures lux from 0 to 1999, 2000 to 19,990, and 20,000 to 50,000 (with resolutions ranging from 1 to 100 lux)
- Measures foot-candles from 0 to 199.9, 200 to 1999 and 2000 to 5000 (with resolutions ranging from 0.1 to 10 ft.-c)
- Accuracy is ±4.5% of full scale reading

atures

- Zero reference points for daylight, tungsten, fluorescent and mercury; can report percent differential from reference point
- Photodiode and color-correction filter provide cosine- and color-corrected measurements
- Push-button access to highest, lowest, and average readings
- HOLD function freezes display to capture readings
- Optional Data Acquisition System (11-661-22) or Data Logger System 06-662-72) required to transfer readings to computer

06-662-64

INCLUDES:

2" diameter (5.1cm) photocell, 40" (1m) cable, 9V alkaline battery, RS-232-C serial output for connection to IBM*-compatible computer or datalogger.

CERTIFICATIONS:

Includes individually serial-numbered ISO 17025 certificate indicating instrument traceability to standards provided by NIST*.

LUMINOMETERS

Promega* GloMax* 20/20 Luminometry System

Touchscreen interface simplifies operation

PR-E5311

PR-E5

Key Features

- Units are DLReady* certified for optimum results using Promega's Dual-Luciferase* Reporter Assays
- Promega protocols are preloaded into the software for easy start-up
- Optional automatic injectors enable measurement of flash reactions
- Proprietary circuitry and advanced photon-counting photomultiplier tube (PMT) provide superior signal-to-noise ratios
- Extended dynamic range permits measurement of both dim and bright samples without dilution and minimizes the chance of detector saturation

Additional Features

- Menu-driven prompts guide user through protocol setup
- Up to 18 protocols can be stored for future use
- Unit may be set to start measurement immediately after lid is closed
- Connections, priming, and flushing are simplified because optional injectors fit next to the detection module
- Completely visible plumbing allows inspection of all tubing and tips during flushing and priming
- Spreadsheet interface software allows data to be exported to Excel*
- Software can be programmed to subtract background from all measurements, calculate the average and standard deviation of replicate samples, and report kinetic measurements

ORDERING INFORMATION:

Models are available with a choice of zero, one, or two reagent injectors

Description	Cat. No.	Ea
Without injectors	**PR-E5311**	5965.
With single autoinjector	**PR-E5321**	7865.
With dual autoinjectors	**PR-E5331**	9027.

SPECIFICATIONS

Accepts	1.5mL tubes and 35mm Petri dishes
Photon Counter Spectral Range	350–650nm
Sensitivity	700 molecules of luciferase
Dynamic Range	>8 decades
Injection Volume	25–300μL in 5μL increments (up to 50μL) and 10μL increments (above 50
Measuring Time	1–10 sec. in 1 sec. increments
Interface	RS-232 port
Minimum PC Software Requirements	Windows* 98 or later
L × W × H	12⅞ × 10½ × 8⅜" (32.8 × 26.5 × 21.4cm)
Electrical Requirements	120V 50/60Hz

LOOKING REPORTER ASSAYS?

See Promego* Dual-Luciferase Reportor Assays in the Cell Biology section.

*Trademark. See Trademark Reference.

Promega* GloMax* 96 Microplate Luminometer

eads both the dimmest and the brightest samples without multiple sample dilutions

ey Features

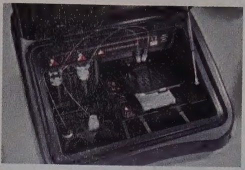
- DLReady* certified for optimum results using Promega's Dual-Luciferase* Reporter Assays
- High sensitivity and broad dynamic range are suitable for both flash- and glow-type luminescence assays
- Proprietary circuitry and advanced photon-counting photomultiplier tube (PMT) provide superior signal-to-noise ratios
- Models are available with a choice of zero, one, or two reagent injectors

dditional Features

- Preloaded protocols simplify operation
- Easy-to-use software guides user through protocol setup
- Software reports data directly to an Excel* spreadsheet
- Connections, priming, and flushing are simplified because optional injectors fit next to the detection module
- Injector arrangement minimizes dispensing problems and simplifies maintenance
- Open architecture enables user to inspect all tubing and tips during flushing and priming

NCLUDES:

ower cable; data cable; Quick Start Guide; five white 96-well microplates; ftware for instrument operation



PR-E6521

PR-E6501

PR-E6541	105.39

LOOKING MULTI-DETECTION MICROPLATE READERS?

To see a full range of Multi-Detection Microplate Readers, see the Microplate Instrumentation section of this book.

Zylux* FB15/Sirius Tube Luminometers

Ideal for all flash and glow assays including luciferase, ATP, aequorin (Ca^{++}), and acridium ester

12-200-18

Accommodate tubes up to 12mm in diameter and 75mm in height, microcentrifuge tubes, 35mm culture dishes, and scintillation vials up to 20mL.

Key Features

- Available with zero, one, or two automatic reagent injectors
- Use short reagent lines and pump-back option to guarantee economical use of reagents
- Begin measurement automatically when the sample door is closed
- Do not require cumbersome internal calibration or a gain switch

FB15/Sirius

- May be used with a PC or as stand alone
- Uses integral microprocessor software for instrument control, data presentation, and user interface
- Supports single- and dual-assay evaluations as well as cut-off calculations
- Provides Windows*-based PC software with the Quick Measurement function for spreadsheet output and database management

APPLICATIONS:

Ideal for all flash and glow assays including luciferase, ATP, aequorin (Ca^{++}), and acridium ester

INCLUDES:

Built-in thermal matrix printer

Description	Cat. No.	Each
With printer	**12-200-17**	6415.00
With printer and one injector	**12-200-18**	8170.00
With printer and two injectors	**12-200-19**	9260.00

SPECIFICATIONS

Type	Single-tube
Photon Counter Spectral Range	300 to 600nm
Sensitivity	Better than 1000 molecules luciferase; ATP limited only by reagents
Dynamic Range	More than 6 decades
Injectors	
Design	Microprocessor controlled bellow-type injectors
Injection Volume	20 to 300μL in 10μL increments
Precision (SD in one series)	20μL: 1%; 100μL <0.5%; 300μL <0.1%
Accuracy	±3μL
Microprocessor Mode of Operation	3 soft keys
Measuring and Delay Time	0.1 sec. increments
Interfaces	RS-232-C, 9-pin male plug
Minimum PC Software Requirements	IBM* compatible PC with Pentium* processor; serial port; Windows 95, 98, or NT 4.0; 8MB RAM (32MB recommended)
Printer	Thermal matrix printer, 40 characters/line
L × W × H	8 × 13 × 9½" (20 × 32 × 23cm); with no injectors
Net Weight	3.9kg (6.8 lb.); with 2 injectors
Electrical Requirements	12V, 2.5A supplied through main adapter (included)

ORION L-Series
NEW

Zylux* Orion L Microplate Luminometer

Provides flexibility and power

Versatile, robot compatible and compact luminometer accepts any luminescence grade 96-well microplates. Powerful and reliable, it incorporates high quality materials and advanced technologies.

- Offers high sensitivity and excellent linear range
- Available with up to two automatic reagent injectors
- Reads any combination of wells: all, columns, rows, rectangles, or individual
- Provides instrument control and data analysis through the included Simplicity PC software for Microsoft* Windows*
- Presents data as a spreadsheet that may be exported to Microsoft Excel* with a single mouse click with standard Simplicity Basic Module
- Provides qualitative and quantitative immunoassay data reduction throug the optional KIM software for Microsoft Windows
- Connects to PC via USB port

APPLICATIONS:

Suitable for all bio-and chemiluminescent applications such as: Reporter Gene Assays, DNA probe Assays, Immunoasssays, ATP Assays, Phagocyte Function Assays, Aequorin-based Ca2$^+$ Assays, Mycoplasma Contamination and Dioxin Contamination

INCLUDES:

Simplicity PC software for Microsoft Windows. Optional: KIM software for Microsoft Windows is also available; contact your Fisher Customer Service Representative.

HOW TO SHIP CRITICAL SAMPLES AND SUBSTANCES

Shipping Diagnostic and Infectious Substances:

In 2007, there were substantial changes regarding transport of infectious substances (UN2814 and UN2900) and biological products (UN3373). These materials are assigned to one of two categories: Biological Substance, Category A or B. In addition, the Dangerous Goods Regulations of the International Air Transport Association (IATA) apply to materials shipped by air. Ready-to-use diagnostic and infectious substance packaging, designed and certified to meet these regulations, takes the guesswork out of shipping biological and infectious substances.

Look for:

Packaging kits that are designed, tested, and certified to comply with US government and international air carrier regulations including:

- 49 CFR, Parts 171 to 178
- IATA Packing Instruction 602 or 650

Storage and Transport of Blood and Tissue Products:

Blood and tissue products have specific time and temperature requirements for operating room storage and blood bank transport, and onsite collection. Maintaining correct temperatures means the difference between usable blood and tissue products and adulterated products that must be discarded.

Look for:

- Containers that are lab pre-qualified to maintain 1°C-6°C while in storage for six hours or more, and 1°C-10°C for up to 24 hours for the temporary storage and transport of packed red blood cells
- All required components and qualification report included
- Stain and impact-resistant, lightweight, insulated storage and transport containers with polyethylene liners that simplify cleanup
- Ergonomic design features such as luggage-style wheels and retractable handle for easy mobility

As a pioneer in hazardous specimen ackaging and recognized expert in emperature assurance, ThermoSafe rands can help you identify compo-ents from our wide selection of con-ainers, foam cushioning, absorbents, nd insulated bio-shippers; or design, est and certify a custom package for ransport of almost any hazardous ubstance. That's how we make the orld ThermoSafe.*

BEFORE YOU BUY SHIPPERS & MAILERS

APPLICATION	PRODUCT MODEL(S)
Transport of UN 3373 biological substances in 95 kPa-certified tubes or 90mL containers	ThermoSafe Brands Models 472 and 473, Model 578 with specified 95 kPa-certified tubes and containers
Transport of UN 3373 biological substances in generic primary receptacles (tubes, vials, cups, etc.)	Thermosafe Brands Models 570 and 571 kits with 95 kPa-certified specimen envelopes
Pre-qualified storage and transport of blood, blood products, vaccines, specimens, medications, tissues and organs	ThermoSafe Medical Transporter Model 930
Transport of specimens and samples without specific temperature requirements	ThermoSafe Medical Transporter Models 931 and 932
Temperature Critical Shipments - +2° to +8°C for 24 up to 48 hours	Nomadic Pre-Qualified Shippers – Models E24A, E48 and E280C
Temperature Critical Shipments - Frozen temperatures for up to 48 hours	Nomadic Pre-Qualified Shippers – Models E48 and E280C

sponsored by:

ThermoSafe®
Temperature Assurance Solutions

Temperature Critical Shipments:

Products that require precise temperature protection for refrigerated and frozen pharmaceuticals, biological specimens, and samples need to be shipped in packaging that will maintain critical product temperatures for specified periods of time – regardless of the in-transit weather conditions. Universal pre-qualified packaging configurations take the guesswork out of finding the right packaging for your products.

Look for:

- Pre-qualified shipping systems that have passed comprehensive thermal and transit testing using ISTA 2A and ISTA 7D standard test protocols
- Qualification reports, including testing criteria and results
- Shipping systems that arrive complete with all components, refrigerants and easy-to-follow pack-out instructions

For a full selection of ThermoSafe® Shippers and Mailers, see pp. 1022–1025.

MAILERS

Fisher*brand** Cardboard Mailing Cartons

Heavy cardboard containers have metal bottoms and screw caps

- Water testing mailers
- For bottles and samples; can also be used for shipping medical and dental apparatus
- Fully assembled with corrugated pads in cover and bottom of tube

03-520 Series

Diameter × Height	Cat. No.	Case of
1¾ × 7" (4.4 × 18cm)	**03-520B**	24/78.00

Fisher*brand** Biohazard Mailers

Double-mailing containers with inner aluminum screw-cap receptacle and outer fiberboard screw-cap mailing case

- For etiologic agents, biohazard specimens, TB and HTLV-3 confirmatory test samples, laboratory and slide specimens, reagents and chemicals, glassware and bottles, urine specimen collection
- Both caps have Type SC safety edges
- Mailer 03-523-4 will accommodate different-sized containers used for specimen collection, including 50mL conical bottle and disposable, screw-cap centrifuge tubes

03-523 Series

COMPLIANCE:

Meet static pressure test 95kPa. Conform with the Interstate Quarantine Regulations for Etiologic Agents (42CFR, Part 72.25) when appropriate labeling and absorbent packing materials are used.

ThermoSafe* ShipSafe* Compliance Shippers for Hazardous Liquids

Each has all the components needed to ship dangerou liquids, excluding Classes 6.2 and 7

Available in four 2.4L (80 oz.) bottles or one 4L (1 gal.) bottle.

03-522-30

INCLUDES:

Glass bottle(s) with Teflon*-lined screw cap(s), enough absorbent material to contain all the liquid in the bottle(s), polybag with wire twist tie, expanded polystyrene foam cushion packaging, 200 lb. test corrugated shipping carton with UN markings, packing instructions.

COMPLIANCE:

Certified for transport of hazardous materials in compliance with UN recommendation Chapter 9, 4G, Packing Group 1; and repetitive shock vibration requirements DOT 49-178.608.

NOTE:

Compliance with UN/DOT regulations using these shippers is contingent upon use of all supplied components (along with packing materials not supplied) and strict adherence to packing instructions.

ThermoSafe* Insulated PUR Shippers

Durable polyurethane-foam–molded shippers have twice the insulation value of EPS

Manufactured using a proprietary process that laminates polyurethane insulation to inner and outer walls of corrugated cardboard, forming a rigid, one-piece, three-layer container.

- Economical, lightweight, reusable, CFC- and HCFC-free
- Protect contents under all ambient temperature environments—from 48 to 72 hours for refrigerated products, 48 to 96 hours for frozen samples
- Flexible polyurethane closure seals the top, cushions and insulates contents, and vents dry ice

MELTING POINT

Fisher-Johns Melting Point Apparatus

Handles materials with melting points from 20° to 300°C

- Excellent temperature control and reproducibility (±0.5°C) achieved with variable transformer graduated in percent power
- Observe melting through convenient, adjustable magnifier
- Integral lens focuses a light beam on the stage to aid observation
- Unit is heated with a replaceable 100-watt heating cartridge
- Unit doubles as a microhotplate
- Handles evaporations and small preparations of organic compounds
- Base has recess for extra beakers

WARNING

The products indicated contain mercury. Don't put products containing mercury in the trash. Products containing mercury are to be recycled or disposed of as hazardous waste. Products containing mercury may be regulated by Local, State, or Federal Laws. Some products containing mercury are not available for sale in some states.

Thermo Scientific* Electrothermal Mel-Temp* Digital Melting Point Apparatus

Compact, programmable units automatically determi precise melting points up to 400°C

Ideal for pharmaceutical, R&D, and QC laboratory applications—specificat for determining the identity or purity of organic compounds.

Operating Features

- Built-in temperature display
- Microprocessor-controlled temperature ramping for reproducibility to 0.2°C
- Ramp rate is selectable from 0.1°C to 10°C per minute in increments of 0.1°C
- 6X lens and integrated light for sample observation
- High-speed fan for rapid cooling
- Accepts up to three samples simultaneously using glass capillary tube
- Temporary memory for storing/recalling the melting point temperature range
- Dual digital LEDs display temperature parameters for melting point determination
- Audio-visual signals minimize instrument supervision and sample observation time
- Unit heats to 250°C in 24 minutes; cools from 400° to 100°C in three minutes—minimizing time between melts
- Touch keypad controls

Design Features

- Sturdy aluminum housing
- Precision-machined aluminum block conducts and radiates heat unifor without the use of oils or volatile heat transfer fluids
- High-tolerance capillary holes and specially designed precision capilla facilitate precise melting range determinations

INCLUDES:
Unit, power cord, and vial of 100 precision capillaries.

COMPLIANCE:
Conforms to U.S. Pharmacopeia requirements; each instrument is individu calibrated using USP-certified melting point standards.

CERTIFICATIONS:
CE marked, CSA approved

SPECIFICATIONS

Temperature Range	Ambient to 400°C
Accuracy	±0.5°C from ambient to 250°C; ±1°C from 250° to 400°C
Resolution	0.1°C
Reproducibility	±0.2°C
Capacity	Accommodates 3 capillaries simultaneously
Dimensions	6⅛L × 4⅝W × 12⅞"H (15.5 × 11.7 × 31cm)

Electrical Requirements	Mfr. No.	Cat. No.	E
120V, 100w	1401	**12-144-69**	3588

*Trademark. See Trademark Reference.

hermo Scientific* Electrothermal Mel-Temp* Manual Melting Point pparatus

rovides precise melting point determinations p to 500°C

asy-to-operate apparatus is designed for educational applications—pecifically for determining the melting point of organic compounds.

- Compact, versatile, durable and safe
- Accepts three samples at once in glass capillary tubes
- Heats to 400°C in five minutes, cools down rapidly
- Resolution to 0.1°C; reproducibility: 1°C
- Adjust the heating rate via built-in variable transformer; excellent temperature control
- Precision 6X magnifying lens and integrated light enhance viewing
- Sturdy aluminum top, compact heater housing, etched panel markings
- Aluminum casting conducts and radiates heat uniformly to capillaries and thermometer without oils or volatile fluids
- Integrated heat guard protects against hot internal components

RDERING INFORMATION:

mensions: 5½L × 4¼W × 9"H (14 × 11 × 23cm)
0V units available: see our Web site.

CLUDES:

odel 1001 is the standard unit; Model 1101D includes precision digital ermometer and stand, thermocouple kit, 100 capillaries, spare bulb and are fuses; Model 1201D includes 0° to 400°C mercury thermometer, 100 pillaries, spare bulb and spare fuses.

ERTIFICATIONS:

 marked, CSA approved.

ACCESSORIES

Melting Point Capillaries and Tubes

12-141-1 and 12-141-8

Pyrex* Capillaries

- Made from Code 7800 glass
- I.D. range for all tubes, 1.1–1.2mm
- Packaged 100 capillaries per vial

Length	Wall Thickness	End Treatment	Mfr. No.	Cat. No.	Pack of 100	Case of 20 Vials
100mm	0.2mm	Both ends open	9530 1	**08-261-2A**	13.50	134.80
100mm	0.25mm	Both ends open	9530 2	**08-261-2B**	13.41	134.77
90mm	0.2mm	One end sealed	9530 3	**08-261-2C**	8.76	134.77
90mm	0.25mm	One end sealed	9530 4	**08-261-2D**	8.76	134.77

Kimax-51* Capillaries

- Made from Kimax-51 borosilicate glass
- Approximate O.D., 1.5 to 1.8mm
- Thickness of wall, 0.2mm
- Packaged with 100 capillaries per vial

Length	End Treatment	Mfr. No.	Cat. No.	Case of 20 Vials
100mm	Both ends open	34500 99	**12-141-1**	135.00
90mm	One end sealed	34505 99	**12-141-8**	158.40

Kimax-51* Capillaries with Smaller I.D.

- Made from Kimax-51 borosilicate glass
- Approximate I.D., 0.8 to 1.1mm
- Thickness of wall, 0.25mm
- Packaged 100 capillaries per vial

COMPLIANCE:

Comply with U.S. Pharmacopeia XXI.

Length	End Treatment	Mfr. No.	Cat. No.	Case of 20 Vials
100mm	Both ends open	34502 99	**12-141-2**	137.20
90mm	One end sealed	34507 99	**12-141-10**	160.00

Borosilicate Glass Capillaries

- Thin-walled capillaries
- O.D., 1.5 to 2.0mm
- Packed 100 capillaries per vial

Length	End Treatment	Cat. No.	Pack of 100	Case of 12 Vials
100mm	Both ends open	**12-141**	8.73	87.25
90mm	One end sealed	**12-141-5**	11.35	120.58

Millipore* Immobilon* Transfer Membranes

Choose from Immobilon-Ny+, Immobilon-NC, Immobilon-P, Immobilon-P^{SQ}, and Immobilon-FL

Select from a variety of polymeric materials with a broad range of pore sizes and surface chemistries. For membrane selection and specifications, see charts below.

illipore* Immobilon* Transfer Membranes, Contd.

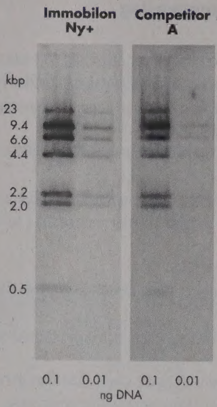
mmobilon-Ny+ and Immobilon-NC Transfer Membranes
or nucleic acid blotting and screening

mmobilon-Ny+ (Charged Nylon)

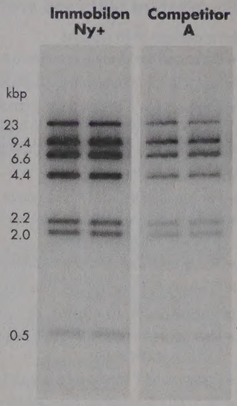
- Optimized for radioactive, chemiluminescent and fluorescent detection systems
- Perform multiple stripping and reprobing without cracking or curling
- Yield strong signals after 13 reprobing cycles
- Compatible with alkaline transfer and fixation

mmobilon-NC (Nitrocellulose/Cellulose Acetate)

- Immobilon-NC (HATF) surfactant-free membranes for colony hybridization, plaque lifts, and analysis of protein secreted from animal cells—grow 10,000 colonies per membrane
- Immobilon-NC (HAHY) for capillary blotting of DNA and RNA and electrophoretic protein transfer



Detection of picogram amounts of DNA



After 13 cycles of stripping and reprobing

Millipore* Immobilon* PVDF Transfer Membranes

For Western blots and protein sequencing

IPVH 000 10

Immobilon-P (0.45µm)

- Optimized for binding proteins transferred from a variety of gel matricies
- Suitable for chromogenic, chemiluminescent, and radioactive detection
- Compared to nitrocellulose, Immobilon-P has improved handling characteristics and staining capabilities, increased solvent resistance, and higher signal-to-noise ratio
- Rapid Immunodetection Method reduces detection time by two hours

Immobilon-P^{SQ} (0.2µm)

- For sequencing low-abundance or low-molecular weight (<20,000 Daltons) proteins
- Produce high protein sequencing yields by high internal surface area for protein adsorption (repetitive yields typically >90%)
- No contaminating support polymers or surfactants
- Eliminates "blow through" that occurs when blotting low-molecular-weight proteins with larger pore size membranes

Immobilon-FL (0.45µm)

- Low fluorescence membrane designed specifically for use with fluorescent detection systems in Western blotting applications
- Background fluorescence is approximately 10 times lower than that of other PVDF membranes and two times lower than nitrocellulose membranes
- No protocol changes required for standard Western blotting procedures
- Suitable for use with fluorescent dyes and detection and imaging systems from major manufacturers

PVDF MEMBRANES FOR WESTERN BLOTTING APPLICATIONS

Application after Western Blot	Membrane of Choice (for most proteins)†
General Immunodetection	Immobilon-P, Immobilon-FL
Low-molecular-weight protein or low-abundance protein blotting	Immobilon-P^{SQ}
Amino acid analysis	Immobilon-P, Immobilon-P^{SQ}, Immobilon-FL
Sequencing low-molecular-weight or low-abundance proteins	Immobilon-P^{SQ}

† *All proteins may not behave the same on a membrane surface; variability in properties such as charge, density, conformation, or hydrophobicity may necessitate use of another Immobilon PVDF membrane for Western blotting.*

*Trademark. See Trademark Reference.

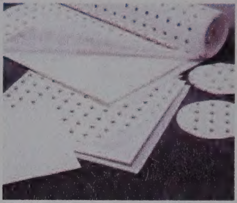
Prices subject to change.

E* Hybridization and Transfer Membranes

trocellulose Membranes

quire vacuum baking to fix DNA

kaged in a wide variety of precut circles and sheets to fit Petri dishes and transfer/hybridization apparatus. o available in rolls for cutting custom-sized membranes.



EP2HY and related series

trocellulose Unsupported Membrane (EP)

- ighest sensitivity for protein blotting and immunoblotting, or other procedures requiring optimum resolution
- asily blocked
- Vets out naturally and does not require methanol like PVDF membranes

trocellulose Supported Membrane (WP)

- igh sensitivity but with added strength of a polyester matrix
- urfactant-free membranes have no additives to interfere with binding capacity

PVDF Membranes

Designed for Western transfers, amino acid analyses, and protein sequencing procedures

PVDF (PV) polyvinylidene fluoride

- Compatible with most commonly used stains
- Won't degrade, distort or shrink in presence of high concentrations of methanol
- Efficient protein transfer from 5 to 700kDa
- Detection limit, 0.005µg/cm²

CONSIDER ESSENTIAL QUALITY

Requirements to meet your stringent laboratory and quality standards to ensure con reproducible results

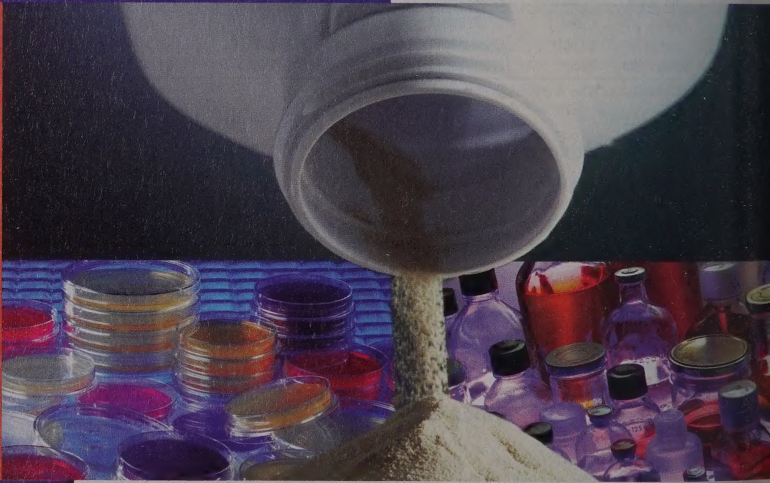
- ISO-certified manufacturing facilities
- Vendor documented quality control program and procedures
- Lot specific Certificates of Quality available upon request
- Animal product components of US origin or imported in compliance with USDA/APHIS regul
- Non-animal based products available

CONSIDER EXCELLENT SERVICE

Knowledgeable, dedicated support available to assist you from produ selection to application

- Technical sales representatives available at the local level
- Customer Service and Technical Service to assist with ordering, deliver and specific product usage
- Multiple delivery options including next-day
- 24/7 support at **www.remel.com**

BEFORE YOU BUY MICROBIOLOGY PRODUCTS



CONSIDER BREADTH OF PRODUCT LINE

Products required for microbial limits, sterility, environmental monitoring, preservative effectiveness, and pathogen testing

- Dehydrated and Prepared Culture Media (plates, bottles, tubes, and bags)
- Collection and Transport systems
- Diagnostic and Rapid Direct Specimen tests
- Quality Control products
- Environmental Monitoring products including Contact and Settling Plates
- Custom product solutions and formulations made to your specifications

sponsored by:

Part of Thermo Fisher Scientific

For a full selection of Remel products, see pp. 1034-1055, 1064, 1067-1068, 1072-1080, 1084-1 1088-1090, 1093-1094, and 1102.

Agar, Miller anular)	Contains 10g of tryptone, 5g of yeast extract, 10g of sodium chloride, 15g of granulated agar per liter	500g 2kg	**BP1425-500** **BP1425-2**	89.33 339.40
Broth, Lennox wder)	Contains 10g of tryptone, 5g of yeast extract, 5g of sodium chloride per liter	500g 2kg	**BP1427-500** **BP1427-2**	46.01 158.94
Broth, Miller wder)	Contains 10g of tryptone, 5g of yeast extract, 10g of sodium chloride per liter	500g 2kg	**BP1426-500** **BP1426-2**	44.97 156.37

sher BioReagents* OptiGrow* eweighed Media

ur classic media, in convenient, preweighed pouches

BP1420 Series

- ptimized for superior yield of acterial culture
- reblended medium components ave time and preparation costs
- ach pouch contains enough aterial for 1L of liquid media
- o more weighing of dusty owders
- igh quality—assured by stringent esting procedures

DERING INFORMATION:

plied as 10 pouches per box.

dia Type	Cat. No.	Each
Agar Miller	**BP1425-10P1**	56.58
Broth Miller	**BP1426-10P1**	57.00
Broth Lennox	**BP1427-10P1**	57.00
rific Broth	**BP2468-10P1**	82.22

Fisher BioReagents* OptiGrow* Liquid Microbiological Media

Four classic media in ready-to-use liquid form

- Sterilized by autoclaving
- Optimized for superior yield of bacterial culture
- Save time and preparation costs
- No dusty powders to cause environmental concerns
- Fully automatic manufacturing process
- Excellent lot-to-lot consistency and traceability
- **LB Broth**-standard bacteriological nutrient medium for the propagation of *E. coli* for purposes of strain maintenance (sub-culturing), cloning, plasmid propagation, and protein expression
- **Super Broth**-specifically developed to increase the yield of high copy number plasmids derived from suspension cultures of *E. coli* strains
- **Terrific Broth**-supports higher cell densities than LB medium, increases plasmid DNA yield

Media Type	Size	Cat. No.	Each
LB Broth Miller Liquid	10 × 1L	**BP143010B1**	250.13
LB Broth Lennox Liquid	10 × 1L	**BP143110B1**	250.13
Super Broth Liquid	10 × 1L	**BP143210B1**	279.42
Terrific Broth Liquid	10 × 1L	**BP143310B1**	279.42

Remel* RapiDCM* Media

Convenient, preweighed pouches of dehydrated culture media

- Supplied in heavy-duty white foil pouch
- Pouch is heat sealed for maximum protection

Media Type	Rehydrates to	Cat. No.	Each
m-Endo Broth MF	3L	**R4539503**	325.29
Standard Methods Agar	1L	**R4547001**	109.30
Tryptic Soy Agar	1L	**R4550001**	143.50
Tryptic Soy Broth	1L	**R4550501**	79.71
	3L	**R4550503**	109.73
Violet Red Bile Agar	1L	**R4552801**	193.02

Remel* Dehydrated Media

Each lot of dehydrated culture media is tested against previous lot numbers to assure unformity and consistency from lot to lot

- Each raw material component is pretested before being used to manufacture the finished product
- Each medium is tested against a battery of organisms to assure that it performs as it should
- Media are supplied in bottles

Remel* Prepared Media

Many media formulations available

- Plated and tubed media formulations ensure the best media possible
- For the isolation and/or differentiation of microorganisms from samples or specimens
- Most are ready for immediate use with no further preparation necessary
- Remel also manufactures media on a contract basis; for more information, contact your Fisher Scientific Customer Service Representative
- Products designated "Not Intended for IVD Use" have not been cleared by the FDA for in vitro diagnostic use

Oxoid* Dehydrated Culture Media

High-quality dehydrated media

STORAGE CONDITIONS:

The sealed, unopened containers should be stored at room temperature from 15° to 20°C (59° to 68°F). Opened containers should have the cap carefully and securely replaced and be stored in a cool dry place away from direct sunlight. Shelf life: one to five years.

NOTE:

Many media require or can be used with supplements; see Oxoid Selective Supplement and Sterile Reagents for more information.

BD* Dehydrated Culture Media

More than 400 different media formulations in convenient dehydrated form

- Media with a proven record of performance backed by over 180 years of combined Difco* and BBL* expertise
- Manufactured with ISO 9000:2001-certified processes

Remel* Contact and Settling Plates

Monitor surfaces, air, and personnel in clean areas

Standard Contact I (single bag), Contact II (double bag), and Settling Plates (single and double bag) have a validated Sterility Assurance Level (SAL) of at least 10^{-3}. Sterile Pack Contact Plates and Settling Plates receive an additional validated gamma ray irradiation treatment such that the resulting Sterility Assurance Level (SAL) is better than 10^{-6}, which is the pharmaceutical industry's operationally accepted definition of sterility.

R11805

- Manufactured in a cleanroom environment to ensure the highest level of sterility without compromising growth characteristics
- Each lot is tested to ensure consistent, reproducible results
- Sterile Pack contact plates and settling plates are double bagged and come with a third bag for customer use
- Validated sterile by gamma radiation

INCLUDES:
Lot-specific certificates of quality.

LOOKING FOR MORE MONITORING PRODUCTS?

Remel's Sanicult* Transport Swabs can be used to sample almost any surface or substance. The ready-to-use kits are sterile and individually wrapped — ideal for environmental monitoring, cleaning validation or personnel surface monitoring. To order

Visit www.fishersci.com and search for Sanicult

Prices subject to change.

koid* Dry-Bags

e-weighed dehydrated media in transparent plastic g—just add water

- lo need to weigh, measure, and prepare media in individual bottles
- imply add 20L deionized water through attached filter and media is ady to use
- liminates the need for glassware, saving time and improving lab safety
- ledia is supplied sterile—no autoclaving required
- mpty bags are disposable with regular laboratory waste

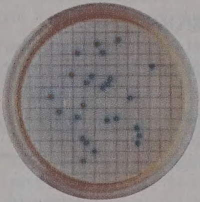
OXDB0509M

Description	Cat. No.	Pack of 10
Buffered Peptone Water	OXDB0509M	1483.68

)* BBL*/Difco* Chromogenic Media

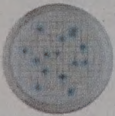
lture media tests water with the membrane ration method

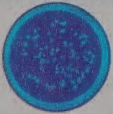
ects degree of water quality erioration in drinking distribution em enumerates, and monitors the gress in remediation. Provides ise and quantifiable results; also time-consuming and costly than er techniques.



co MI Agar

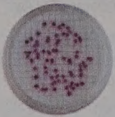
- hromogenic-fluorogenic medium r detecting total coliforms and *scherichia coli* in 24 hours or less
- se for ambient and potable water, treatment plant ffluents, and beverage and pharmaceutical anufacturing
- nder ambient light, *E. coli* exhibits a bluish-gray ppearance; under long-wave UV light, it displays a ue-green fluorescence
- oliform are cream under ambient light, and display ue-white fluorescence under long-wave UV light
- onforms to EPA Method 1604 for monitoring drinking ater under the Total Coliform Rule and source water nder the Surface Water Treatment Rule





co Modified mTEC Agar

- se for testing and monitoring thermotolerant *coli* in fresh and recreational waters
- ny colonies present will exhibit a red or magenta olor within 24 hours of the test
- onforms to EPA Method 1603



Difco mEI Agar

- Tests for *Enterococci* as an indication of fecal pollution and presence of enteric pathogens in fresh and salt waters
- Any colonies present will exhibit a blue halo within 24 hours of the test
- Conforms to EPA Method 1600
- Store at 5° to 25°C (41° to 77°F)

ORDERING INFORMATION:

Available dehydrated or in prepared 15 × 60mm plates

STORAGE CONDITIONS:

Plates must be stored at 2° to 8°C (36° to 46°F). Store mEI Agar at 5° to 25°C (41° to 77°F) up to one year.

Medium	Quantity	Cat. No.	Each
MI Agar	100g	B14882	339.94

	Pack of 20 plates	B15045	86.00
	Pack of 100 plates	B15047	395.85

Media for water quality testing can be found on pp. 1086-1088.

BD* BBL* Isolator Pack Plated Media

Plated media in gamma-irradiated packs for isolator systems

Multiwrap packaging protects media from vaporized hydrogen peroxide exposure. Plate types include Rodac* (Replicate Organism Detection and Counting) for surface sampling and Finger Dab* for sampling gloved hands.

B29 Series

To use:

- Place wrapped package of plates in the isolator before running the vaporized hydrogen peroxide decontamination cycle
- When the isolator aeration cycle has finished, remove the two outermost wrappings, then the sterile inner wrapping
- Use the included inner bag to transport plates from your critical environment

STORAGE CONDITIONS:

Store at 2° to 8°C (36° to 46°F).

COMPLIANCE:

For performance and sterility according to Association for the Advancement of Medical Instrumentation (AAMI) guidelines

Medium	Plate Type	Cat. No.	Pack of
D/E Neutralizing Agar	Rodac	**B292645**	10/111.46
Sabouraud Dextrose Agar, w/Lecithin & Polysorbate 80	Rodac	**B299937**	10/38.66
	Rodac	**B4392337**	100/331.33

	100 × 15mm Finger Dab	**B292652**	100/329.62
Trypticase Soy Agar, w/Lecithin & Polysorbate 80	Rodac	**B299896**	10/53.83
	Rodac	**B4392335**	100/319.86
	100 × 15mm Finger Dab	**B292649**	100/324.35

BD* BBL* Sterile Pack Plated Media

- Validated to 10^{-5} SAL
- Outer Tyvek*/polyethylene wrapping minimizes risk of false contamination, provides fiber-free bacterial barrier, and allows for gas exchange
- To use, remove the outer wrapping in the noncritical environment; then remove the sterile inner wrapping in the clean area—the included inner bag may be used to transport plates from your critical environment

Available in many formulations and plate types

- Rodac* (Replicate Organism Detection and Counting) for personnel and surface sampling
- Settling for active and passive air sampling
- Finger Dab* for sampling gloved hands
- Contact for direct surface sampling

STORAGE CONDITIONS:

Storage temperature: 2° to 8°C (36° to 46°F).

COMPLIANCE:

Plated media in gamma-irradiated packs are validated for performance and sterility according to Association for the Advancement of Medical Instrumentation (AAMI) guidelines

For analytical and precision balances, see pp. 59–80.

ADDITIVES/SUPPLEMENTS

emel* Reagents for Microbiology

oad offerings for a variety of procedures

- 0% Formalin is ideal for preservation, concentration, and recovery f intestinal parasites
- elatin Reagent is used in detection of gelatinase activity of micro-rganisms
- Mineral Oil is recommended for biochemical test procedures requiring il overlay
- xalic Acid reduces contamination in mycobacterial cultures
- odium Citrate is used for digestion and decontamination procedures for FB and fungal cultures
- B Base Digestant is suitable for decontamination procedures for FB cultures
- riton X-100 is a mucolytic reagent for fecal concentration procedures

DERING INFORMATION:

% Formalin is supplied as single vials packaged in partioned boxes with ent collection instructions. Caps are colot coded to match industry ndards colors, and have an attached spork. Triton X-100 is supplied in a yproplene dropper dispenser vial.

Oxoid* Selective Supplements and Sterile Reagents

Add supplements to broth or agar base for the isolation of specific organisms

- Supplied as dehydrated powder in vials unless otherwise specified
- Supplements quantities as specified in table

STORAGE CONDITIONS:
Store supplements and reagents away from light in temperatures from 2° to 8°C (36° to 46°F).

OXSRO Series

Description	Supplements	Cat. No.	Pri
A			
Ampicillin	500mL	**OXSR0136E**	Pk. of 10/73.
B			
Bacillus cereus	500mL	**OXSR0099E**	Pk. of 10/130.
BCYE w/o L-Cysteine	500mL	**OXSR0175A**	Pk. of 10/126.
Bolton's	500mL	**OXSR0183E**	Pk. of 10/148.
Bordetella	500mL	**OXSR0082E**	Pk. of 10/67.
Broad Spectrum Beta Lactamase Mixture	500mL	**OXSR0113E**	Pk. of 10/481.
Brucella	500mL	**OXSR0083A**	Pk. of 10/90.
Burkholderia cepacia	500mL	**OXSR0189E**	Pk. of 10/213.
C			
Campylobacter (Blaser-Wang)	500mL	**OXSR098E**	Pk. of 10/140.
Campylobacter (Butzler)	500mL	**OXSR0085E**	Pk. of 10/141.
Campylobacter (Karmali)	500mL	**OXSR0167E**	Pk. of 10/109.
Campylobacter (Preston)	500mL	**OXSR0117E**	Pk. of 10/96.
Campylobacter (Skirrow)	500mL	**OXSR0069E**	Pk. of 10/141.
	2L	**OXSR0069H**	Pk. of 10/393.
Campylobacter Growth Supplement (FBP)	500mL	**OXSR0084E**	Pk. of 10/112.
CAT	500mL	**OXSR0174E**	Pk. of 10/131.
CCDA	500mL	**OXSR0155E**	Pk. of 10/143.
	2L	**OXSR0155H**	Pk. of 10/373.
CDMN	500mL	**OXSR0173E**	Pk. of 10/175.
Cefixime/Tellurite (CT)	500mL	**OXSR0172E**	Pk. of 10/169.
	2L	**OXSR0172H**	Pk. of 10/400.
CFC	500mL	**OXSR0103E**	Pk. of 10/118.
Chloramphenicol	500mL	**OXSR0078E**	Pk. of 10/90.
	2L	**OXSR0078H**	Pk. of 10/149.
Clostridium difficile	500mL	**OXSR0096E**	Pk. of 10/175.
CN	500mL	**OXSR0102E**	Pk. of 10/62.
E			
Egg Yolk Emulsion	100mL	**OXSR0047C**	Ea./42.
Egg Yolk Tellurite Emulsion	100mL	**OXSR0054C**	Ea./43.
F			
Fildes Extract, 100mL	----	**OXSR0046C**	Ea./49.
Fraser	500mL	**OXSR0156E**	Pk. of 10/90.
G			
Gentamycin	500mL	**OXSR0185E**	Pk. of 10/104.

LAB PREPARATIONS

Remel* Equivalence Turbidity Standards

Used as standards to adjust densities of bacterial suspensions

STORAGE CONDITIONS:

Store in original container at room temperature, 20° to 25°C.

Description	O.D. × L	Qty.	Cat. No.	Price
Colorimeter Standard Set for use with Vitek*	12×75mm	Set	**R20343**	74.99

Oxoid* Laboratory Preparations

Range of peptones, hydrolysates, and biological extracts manufactured for those who wish to create their own media or supplement existing formula

STORAGE CONDITIONS:

Store in closed containers, in a cool, dry place, and away from direct light.

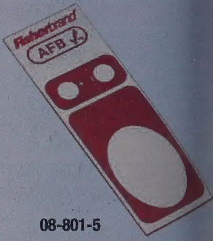
QUALITY CONTROL

*Fisherbrand** AFB√* Control Slides

Help ensure accurate control results from acid-fast testing procedures



08-801-5

- Acid-fast positive organisms will stain red
- Acid-fast negative organisms will stain blue or green, depending on counterstain used
- The positive control will contain red-stained, rod-shaped or coccobacillary bacteria (measuring from 0.5 to 5.0 × 0.2 to 0.6µm)
- The negative control will have no red-stained bacteria
- Use an oil immersion lens when examining under a microscope

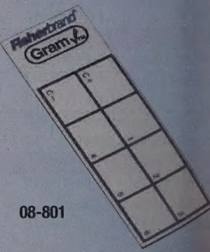
Slide contains:

- Circle-shaped area (+) heat-fixed with a positive control (*Mycobacterium kansasii*)
- Circle-shaped area (-) heat-fixed with a negative control (*Escherichia coli*)
- Blank oval area for the specimen to be examined

Description	Cat. No.	Pack of 50
AFB√ Control Slides	**08-801-5**	90.17

*Fisherbrand** Gram√* Control/Test Slides

Each slide can do the work of six regular slides through its grid of eight separate staining sections



08-801

- Six sections are blank, for staining unknowns
- Two sections contain fixed smears of gram-positive *Staphylococcus aureus* and gram-negative *Escherichia coli*
- Function with **any** standard Gram stain reagent set

ORDERING INFORMATION:

Packaged in individual foil envelopes with instructions.

Description	Cat. No.	Pack of 50
Gram√ Control/Test Slides	**08-801**	128.71

LOOKING FOR THE LAB AUTOMATION SECTION?

It has moved and is now called Microplate Instrumentation.

*Trademark. See Trademark Reference.

Prices subject to change.

emel* Quality Control RapID* Panels

nventional chromogenic substrates contained in ique multiple well panels

ture one-step inoculations, distinctive color reactions, and definitive ults within four hours.

ailable panels include:

- **apID CB Plus** panel with 18 substrates for identification of over 0 organisms such as *Corynebacterium, Actinomyces,* and other regular, gram positive coryneform bacteria
- **apID NF Plus** with 17 substrates for identification of over 70 organ- sms such as *Aeromonas, Burkholderia, Oligella,* and *Pseudomonas*
- **apID NH** (Neisseria/Haemophilus) with 13 substrates for identification f over 30 organisms, such as *Neisseria, Haemophilus, Moraxella* nd *Kingella*
- **apID ONE** (Oxidase Negative Enterobacteriaceae) with 19 substrates r identification of over 70 organisms, such as *Citrobacter, Escherichia, lebsiella* , and *Proteus*
- **apID SS/u** panel with 11 substrates for identification of over 12 ommonly isolated urinary tract microorganisms from human specimens
- **apID STR** panel with 14 substrates for identification of over 33 beta emolytic and viridans streptococci.
- **apID Yeast Plus** panel with 18 substrates for identification of over 40 rganisms such as *Candida, Cryptococcus,* and *Rhodotorula*

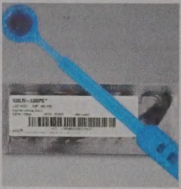
LOOKING FOR THE MICROARRAYS SECTION?
It has moved and is now called Array Analysis.

LOOKING FOR THE TISSUE CULTURE SECTION?
It has moved and is now called Cell Culture.

Remel* Culti-Loops* Organisms and Kits

Ready-to-use, disposable inoculating loops containing stabilized, preserved, viable microorganisms



R4607050

Recommended for use in performance testing of media, stains, reagents, and identification kits, for maintenance of stock cultures, and for the evaluation of bacteriological procedures.

- Patented, gentle-gel organism preservation provides enhanced recovery of over 600 reference strains
- Derived from ATCC® isolates
- Loop contents may be dissolved in re-hydration fluid or streaked directly onto an appropriate media
- Safe to transport and use for both Quality Control and Proficiency testing
- CLIA '88 Kits contain positive and negative control organisms
- Supplied as five loops/organism; sets contain several organisms, five loops/organism
- Also available for many manual and automated I.D. systems; contact your Fisher Scientific Customer Service Representative

Remel Quality Control ANA MIC Set

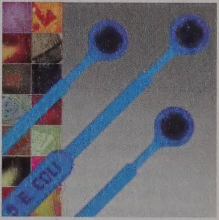
Description	Cat. No.	Pack of
ANA MIC Panel	R4653055	3/219.22
API Sets		
20A Anaerobe System Kit	R4653058	4/347.80
20C Clinical Yeast System Kit	R4653059	3/232.59
20E Kit	R4651003	5/203.58
50 CHB. P. polymyxa ATCC® 43865™† Kit	R4601234	5/117.42
Coryne Kit	R4653063	4/344.45
NFT Kit	R4653064	4/328.79
NH Kit	R4653070	1/375.78
Staph Kit	R4653065	4/234.89
20 Strep Kit	R4653062	4/281.83
BDB Enterotube II* Kit	R4652001	4/219.20
CLIA '88 Compliance		
Antibiotic Susceptibilities on Mueller Hinton (Kirby Bauer)	R4651101	3/140.92
Beta-lactamase	R4651109	2/187.89
Catalase	R4651104	2/109.58
Coagulase	R4651106	2/109.59
Novobiocin	R4651110	2/180.06
Optochin	R4651108	2/156.56
Oxidase	R4651103	2/140.92
Throat Cultures w/Bacitracin	R4651100	2/125.27
MicroScan* Kits		
Gram Negative Panel	R4661000	4/250.50
Gram Positive Panel	R4661001	4/281.85
Rapid Anaerobe ID Panel	R4661003	4/344.45
HNID Panel	R4661004	5/469.70

Remel* Culti-Loop* Kits for Vitek* Test Cards

Designed for use with Vitek and Vitek 2 instruments

INCLUDES:

Five loops per package of each organism required to QC a specific Vitek card.



RH6252 Series

Description	Cat. No.	Pack of
Anaerobe ID Card (ANI)	R4652005	6/563.67
Bacillus	R4653067	2/342.22
Gram Negative ID (GNI)	R4652011	7/501.06
Gram Negative ID Plus Card (GNI+)	R4652014	8/663.64
Gram Negative ID, Vitek 2 (ID-GNB)	R4652015	9/771.63
Gram Negative (GNS-)	R4652007	4/187.90
Gram Positive ID (GPI)	R4652010	7/542.81
Gram Positive ID, Vitek 2 (ID-GPC)	R4652016	8/657.61
Gram Positive Susceptibility (GPS-)	R4652008	4/187.88
Gram Positive, Vitek 2 (AST-GP)	R4652019	5/375.78
Neisseria/Haemophilus ID (NHI)	R4652006	6/501.05
Yeast Biochemical Card (YBC)	R4652009	4/469.75
Yeast, Vitek 2 (ID-YST)	R4652017	7/822.02

Remel* BactiDisk Organisms

Lyophilized mixtures of charcoal, gelatin, and microorganisms in a stable disk format

Disk is dissolved in 0.1mL of appropriate culture broth, inoculated onto an appropriate culture medium, and incubated at the appropriate temperature, atmosphere, and time.

- Recommended for use in performance testing of media, stains, reagents, and identification kits, for maintenance of stock cultures, and for the evaluation of bacteriological procedures
- Packaged 10 disks/vial

ACCESSORIES

Aerobic Set Rehydration Fluid

For rehydration of Culti-Loop* organisms

Cat. No.	Pack of
R4631000	16

Remel* CFUrine Kit* Quality Control Kits

Quality control for determination of urine colony counts for dipslides, tube screening methods, and calibrated loops

- ▸ Film of preserved microorganisms on inside of cap on plastic vial
- ▸ Ready for rehydration

INCLUDES:

One preserved organism vial with high CFU count; one preserved organi
vial with low CFU count; two rehydration vials; two × 99mL dilution bla

Description	Cat. No.	E
E. coli ATCC® 25922™†	R4701000	69
P. mirabilis ATCC® 12453™†	R4702000	69
S. aureus ATCC® 25923™†	R4703000	69

Remel* Quanti-Cult* and Quanti-Cult Plus*

Unique systems in which a film of preserved microorganisms is attached to the inside of a cap on a plastic vial

R4730000 Series

The film contains a specific number of organisms and when rehydrated is used in quality control procedures, eliminating the need to perform serial dilutions.

- ▸ Easy: 15-minute preparation time
- ▸ Quantitative: delivers specific range of colony-forming units (CFUs)
- ▸ Economical: saves time and money, eliminates growth period, no more dilution of suspensions, and eliminates stock culture maintenance
- ▸ Quanti-Cult delivers 10-100 CFU per 0.3mL in a single inoculum and is supplied 10 vials per kit, 1 test per vial, 10 tests per kit
- ▸ Quanti-Cult Plus delivers 10-100 CFU per 0.1mL inoculum and is supplied as 10 vials per kit, 10 tests per vial, 100 tests per kit

INCLUDES:

Ten preserved organism vials and 10 rehydration vials per kit

STORAGE CONDITIONS:

18-month shelf life from date of manufacture for most organisms when stored at 2-8°C

licroBioLogics* QA/QC Organisms

selection of microorganisms commonly used for quality control, lucation, personnel proficiency programs, and regulatory compliance. simple hydration step is all that is needed before use. It comes with a lection of microorganism strains and requires no pre-incubation.

Organisms listed are derivatives of strains from the American Type Culture Collection (ATCC®)

Shelf life of 10–24 months

Certificate of Analysis included

Traceable to reference cultures

Other strains and packaging options are available; for details, contact your Fisher Scientific Customer Service Representative

icroorganisms Preparations in Kwik-Stik* Canisters

clude 10 self-contained units with a lyophilized icroorganism

ch Kwik-Stik unit comes in a f-contained package that includes yophilized microorganism pellet, ervoir of hydrating fluid, and culating swab.

MicroBioLogics* EZ-CFU* One Step Microorganism Preparations

Assayed microorganism preparations for USP quantitative microorganism challenges

Lyophilized microorganism preparations delivering the desired 10 to 100CFU/0.1mL of challenge material (following hydration and dilution of 1.0mL of hydrated suspension in 9.0mL of pH 7.2 phosphate buffer).

- Traceable to reference cultures

ORDERING INFORMATION:
Supplied as two vials of a single assayed microorganism (10 lyophilized pellets in each vial) and 10 vials of hydrating fluid (2.0mL in each vial)

INCLUDES:
Product warranty and have a peel-off certificate of assay

STORAGE CONDITIONS:
Shelf life of 10 to 20 months

MicroBioLogics* EZ-FPC* Microorganism Preparations

Lyophilized microorganism preparations delivering a predetermined assay value for qualitative or quantitative daily process controls

- Available in 100 to 1000 CFU per preparation (qualitative) or 1000 to 10,000 CFU per preparation (quantitative)
- Traceable to reference cultures
- Daily process controls for food quality labs

ORDERING INFORMATION:

Packaged in a vial of a single assayed microorganism (10 lyophilized pellets in each vial), with an attached certificate of assay.

INCLUDES:

Product warranty and peel-off certificate of assay

STORAGE CONDITIONS:

Shelf life of 10 to 20 months

MicroBioLogics* EZ-PEC* Microorganism Preparations

Add convenience to pharmaceutical and cosmetic testing labs needing to meet antimicrobial effectiveness or preservative efficacy testing

- Predetermined mean assay value results in a final challenge concentration of 100,000 to 1,000,000CFU/1.0mL of product tested.
- Traceable to reference cultures

ORDERING INFORMATION:

Supplied as two vials of a single assayed microorganism strain (10 lyophilized pellets in each vial) of 100 to 1000CFU/preparation or 1000 to 10,000 CFU/preparation plus two vials of a single assayed microorganism strain (10 lyophilized pellets in each vial)

INCLUDES:

Product warranty and peel-off certificate of assay

STORAGE CONDITIONS:

Shelf life of 10 to 20 months

RAPID TEST KITS

Remel* XPect* Test Kits

Detection of constantly shed antigen reduces number of specimens required

- Three-step procedure provides results within 15 minutes
- Two-reagent system requires less than one-minute hands-on time
- Sensitivity: 95.8–97.9%
- Specificity: 97.1–98.5%
- Specimen/Transport: fresh, formalin, SAF, Cary-Blair
- CLIA Complexity: Non-waived

ORDERING INFORMATION:

Positive and negative controls available separately

STORAGE CONDITIONS:

12 month shelf-life if stored at 2° to 8°C

Cryptosporidium Test Kit

oid* Dryspot Tests

N refrigeration needed; can be shipped and stored o r a wide temperature range

U ue dried latex slide agglutina- ti tests on disposable cards pro- vi rapid culture confirmation with re ble performance in the clinical or dustrial microbiology lab.

OXDR Series

- IA Complexity: Non-waived
- ear results in one minute or less
- ilt-in controls
- mping of latex particles icates a positive result
- liquid reagents needed
- ique blue latex on white cards provides clear end point and easy visual erpretation of results
- ch card contains three test and three control areas
- action cards and test sticks are packaged in resealable moisture-proof uches

IN UDES:

Co ols to ensure correct test performance; moisture-absorbent sachet; pl ic pouch clip; buffers (except OXDR0100M, 120M) and mixing paddles; (ex pt OXDR0100M), instruction leaflet

ST RAGE CONDITIONS:

St at 2° to 25°C (36° to 77°F). If stored in a cold environment, all pouches to reach room temperature before opening to prevent co ensation. No refrigeration needed; can be shipped and stored over a v e temperature range. Reagents have a two-year shelf life from the ate of manufacture.

Oxoid* Industrial Dip Slides

Rapidly measure the microbial load in industrial fluids, including those not miscible with water

OXDS Series

Plastic paddle coated with two different agar-based media for the simultaneous determination of bacteria and/or fungal growth; paddles have raised edges to ensure an even thickness of media and a molded grid to simplify colony counting. Paddle is attached to the cap of a screw-capped container for easy, contaminant-free handling.

- Eliminate need for swabs and transport medium
- Colonies will appear as red dots on an otherwise clear and colorless medium for easy identification
- Transparent container allows colonies to be viewed and counted safely
- Terminal spike facilitates sample draining
- Nutrient Agar with TTC/Nutrient Agar with TTC has nonselective media for isolation of relatively all bacteria
- Nutrient Agar with TTC/Malt Extract supports the growth of fungi and yeasts

APPLICATIONS:

Test water, water-soluble paints, oil and lubricants, cooling agents, environmental samples, viscous raw materials, or end products in the cosmetic and beverage industries; monitor the efficacy of biocides and bacteriostatic components; surface monitoring required of health, safety, quality assurance and HACCP programs.

ORDERING INFORMATION:

Slide dimensions: 19 × 50mm (950mm^2 surface area)

Description	Cat. No.	Pack of 10
Nutrient Agar with TTC (both sides)	OXDS146	26.15
Nutrient Agar with TTC (side one) plus Malt Extract (side two)	OXDS154	26.10

Oxoid* Toxin Detection Kits

Simple-to-use kits detect toxins in food, fecal, or culture samples

OXTD Series

Manual assays rely on Reversed-Passive Latex Agglutination (RPLA) to identify various enterotoxins direct from food or culture filtrates.

- For use in industrial and clinical applications
- No special equipment required; include built-in controls

STORAGE CONDITIONS:

Should be stored at 2° to 8°C (36° to 46°F); bring all components and reagents to room temperature before use.

Description	Detects	Cat. No.	Pack
Reversed-Passive Latex Agglutination (RPLA)

C. difficile Toxin A Stool Filtration System	Toxin A from fecal samples for use with *C. difficile* test	**OXTD0975A**	20/209.8

Oxoid* Rapid Food Tests

Rapidly identify various food pathogens from a wide range of samples—results provided in two days

Left: OXFT0203A Right: OXFT0401A

- Reliable and easy to use with minimal handling and no automation required
- Choice of tests available

Listeria Rapid Tests

- Sample cultured in two sequential enrichments
- Lateral flow immunoassay test takes 42 hours to complete
- Consist of a Listeria test panel with a line of antibody specific to *Listeria flagella* antigen
- Contain 50 vials of Half Fraser Selective Supplement (choice of 2.25L or 225mL batches), 50 of Clearview Devices, and three vials of positive controls

Salmonella Rapid Test

- Designed for the detection of Salmonella in raw foods, finished food products, factory environmental samples, and for culture screening or confirmation

Salmonella Latex Test

- Latex agglutination test for the confirmation of Salmonella from colonies grown on culture or selective media
- Includes comprehensive somatic (O) and flagellar (H) polyvalent latex reagent for accurate screening of a greater number of *Salmonella*
- 12-month shelf life (refrigerator storage) from date of manufacturing
- Includes test latex, control latex, positive control suspension, and test cards for 30 tests

LOCATE *Salmonella Test*

- 96-well ELISA-based test
- Can detect one Salmonella in 25g of raw and processed food
- Results available in 42 hours
- Consist of a microtiter plate with eight breakable strips to allow flexibil for use in many applications
- Results can be read visually or automatically

INCLUDES:

One 96-well microtiter plate, two freeze-dried conjugates, one positive control, one negative control, two wash buffer concentrates, one conjugat diluent buffer, one TMB reagent, one stopping solution, one record sheet

CERTIFICATIONS:

AOAC-RI approved

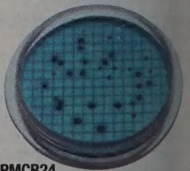
WATER QUALITY TESTING

Millipore* m-ColiBlue24* Broth Culture Media

Simultaneously detects total coliforms and *E. coli* in water and beverages using standard membrane filtration equipment[1]

- Ready-to-use medium comes prepared and packaged in single-test 2mL plastic ampules
- Combination of enzymatic indicators in the medium differentiates *E. coli*, which form blue colonies, from non-*E. coli* coliforms, which form red colonies



M00PMCB24

ORDERING INFORMATION:

Come prepared and packaged in single-test 2mL plastic ampules.

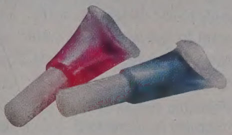
Description	Cat. No.	Pack of 5
m-ColiBlue24 Broth1	**M00PMCB24**	102.

[1] Is a patented product of Hach Company, U.S. Patents 5,650,290 and 5,849,515.

▽ Refrigerate as detailed on label.

llipore* Nutrient Media

D veloped specifically for culturing microorganisms on m mbrane filters; select media type to match organism ty e and analytical test needs



- ch dry powder lot for media eparation assayed for purity and mpared to satisfactory lot
- ch m-Endo broth for total iform lot and m-FC broth for al coliform analysis lot tified in accordance with the fe Drinking Water Act
- QC certificates included in each package as added assurance for ical procedures
- trient media comes in liquid form, packaged in plastic or glass pules, vials, or glass test tubes

OI ERING INFORMATION:

Lic d media packaged in plastic ampules.

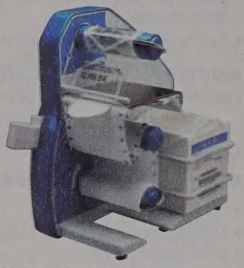
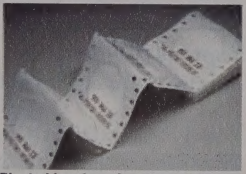
Millipore* EZ-Pak* Membranes and Dispenser

Sterile, ready-to-use membranes eliminate contamination risk, save time

Press lever to uncover half of membrane surface for easy retrieval with forceps; other half remains in protective packaging. Unused membranes remain safely packed in pleated band.



09-719-9 Dispenser with EZHAWG474 membranes.



Pleated band carries 150 individually sealed EZ-Pak membranes.

Dispenser

- Stainless-steel casing with epoxy-based paint finish and Ultem* rollers; cast-aluminum
- Eliminates contamination risk of opening and detaching peel-back envelopes of sterile membranes
- Membranes load easily
- Dispenser dimensions (L × W × H): $9^1/_4 \times 6^1/_3 \times 9^1/_2$" (23.5 × 16 × 24cm); weight: $5^1/_2$ lb. (2.4kg)

EZ-Pak Membranes

- Mixed ester cellulose membranes are 47mm in diameter with 0.45 or 0.8µm pore sizes
- White membranes ideal for particle counting
- Black membranes facilitate colony counting by improving contrast of lactic bacteria colonies in beer and wine analysis and yeast colonies in soft drink testing
- Suitable for testing according to international standards for drinking, bottled, and mineral water analysis
- No special precautions needed, even for extended times between uses
- Used packaging film and paper are collected on spool for easy discarding

ORDERING INFORMATION:

Membranes are individually wrapped and come in pleated-band formatted cartridges of 150. Each pack includes four cartridges (600 membranes in all). Membrane catalog number, lot number, sterilization date, pore size, and sequential number from 1 to 150 for each membrane cartridge are printed on clear, protective cover.

COMPLIANCE:

Meet guidelines for *Standard Methods for the Examination of Water and Wastewater.*

Millipore* Samplers

Self-contained dip testers

- Mixed cellulose filter mounted on a polyethylene paddle
- 0.45µm pore size filter is gridded to facilitate colony counting
- Easy to use—simply sample, incubate and count

REQUIRED ACCESSORIES:
Incubator

STORAGE CONDITIONS:
Stable for 12 months from date of manufacture if stored at 15° to 30°C

Coli Count*

Monitor coliforms in liquids

- Color: Blue
- Coliform colonies are blue or blue/green; non-coliform colonies may be green, gray, or cream
- Requires 22 to 24 hour incubation

Cat. No.	Pack of 25
MC0010025	104.39

Yeast and Mold Samplers

Monitor yeasts and molds in food, beverages

- Color: Yellow
- Results after 24 to 72 hours of incubation

Cat. No.	Pack of 25
MY0010025	104.00

Corning* Coliform Sample Container

Automatically dechlorinates sample

- Sterile-by-process, disposable container comes with a tablet of sodium thiosulfate for dechlorination
- Snap-tight lid with locking arrow assures sterility has not been compromised; leaktight when sealed properly
- Tie-down leash on the cap assures it will stay closed during transit

09-730-91

ORDERING INFORMATION:
Also available without the sodium thiosulfate tablet for samples that do not require dechlorination

INCLUDES:
Labels (09-730-91 only)

COMPLIANCE:
Fill line meets U.S. EPA tolerance requirements

Description	Mfr. No.	Cat. No.	Case of 100

Colitag* Presence/Absence (P/A) Water Test Kit

Definitive water test system for coliforms and *E. coli*

Ready-to-use dehydrated media packet for use with 100mL water sample; yields results after just 22 hours of incubation

- Patented system of injury cell recovery resuscitates *E. coli* injured by chlorination, eliminates false negatives
- ONPG/MUG-based test detects 1 CFU of total coliform or *E. coli* bacteria per 100mL sample
- Dramatic yellow color change indicates the presence of coliform bacteria
- Bright blue fluorescence eliminates questionable positive *E. coli* results
- Dramatic yellow color change indicates positive result
- Provides selectivity with growth inhibitors
- Time-saving alternative to traditional membrane filtration
- Color reference standard (Comparator) is available to confirm *E. coli* positive results
- USEPA approved for both Presence-Absence and MPN enumerations

STORAGE CONDITIONS:
May be stored at 4° to 30°C; however, recommended storage is 4° to 7°C. Store away from light. Shelf life: 12 months.

COMPLIANCE:
EPA approved for TCR Compliance Monitoring

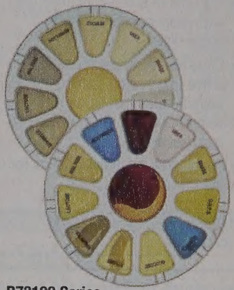
	21143	**R21143**	374.75

Remel* N/F System

For presumptive identification of medically important glucose-nonfermenting, gram-negative bacteria which do not belong to the family *Enterobacteriaceae*

System requires the use of three components: two N/F Screen* tubes, GNF and 42P, and a Uni-N/F Tek* Plate.



R73100 Series

- Tubes contain solid media for the determination of five reactions and are intended for the identification of pigmented strains of *Pseudomonas aeruginosa* and *P. Fluorescens*/putida group
- The Uni-N/F-Tek plate is composed of 11 independently sealed wells and a central well, all containing solid media for the determination of 13 different biochemical parameters
- All components are supplied ready-to-use

ORDERING INFORMATION:

System components are sold separately. GNF and 42P tubes are supplied in packs of 20; plates are supplied in packs of 10.

REQUIRED ACCESSORIES:

Inoculating loops/needle and collection containers; Incubators or alternative environmental system; Supplemental media; Quality control organisms; Kovacs Indole Reagent, R21522; Oxidase Reagent, R21540; Longwave ultraviolet light

STORAGE CONDITIONS:

Store components at 2° to 8°C as directed on the label.

Description	Cat. No.	Pack of
GNF Tube	**R7310055**	20/56.92
42P Tube	**R7310056**	20/56.92
Uni-N/F-Tek Plate	**R7310050**	10/119.68

Remel* r/b* Enteric Differential System

Provides rapid characterization of members of the family *Enterobacteriaceae*

Basic system requires r/b_1* and r/b_2* tubed media. After sample inoculation and incubation, organism identification is interpreted by the location and type of color reaction.

- Presence or absence of gas formation and motility are observable from physical changes in the media
- The Cit/Rham expander tubes contain carbohydrates, casein digest, magnesium sulfate, and a pH indicator for further organism differentiation

ORDERING INFORMATION:

Components are sold separately. Each is supplied 20 tubes per pack.

REQUIRED ACCESSORIES:

Inoculating Needle; Incubator; Oxidase test reagents

STORAGE CONDITIONS:

Store tubes upright at 2 to 8°C.

Description	Cat. No.	Pack of 20
r/b_1	**R7310010**	75.73
r/b_2	**R7310011**	75.72
Citi/Rham Expander	**R7310003**	75.72

Remel* Micro-ID* Listeria System

Rapid biochemical test kit designed to identify *Listeria* isolates to genus level in four hours, and to the species level in 24 hours

- Consists of a self-contained unit with reagent impregnated paper disks
- Color reactions correspond to a five- digit code; species identification can be derived using the Micro ID Code Book (sold separately)
- Enables 15 biochemical tests for identification of *Listeria*

MICRO-ID Listeria

R38370

ORDERING INFORMATION:
Supplied 10 units/pack

Cat. No.	Pack of 10
R38370	187.71

ACCESSORIES

Remel* Micro-ID* Code Book

Used to interpret the color reactions obtained in various Micro-ID systems to derive species identification

R3814

Cat. No.	Each
R38146	95.08

Remel* Uni-Yeast Tek* Plate

For identification of yeast

- Contains 11 sealed peripheral wells of solid media for urea, carbohydrate assimilation and nitrate tests
- Central well contains Cornmeal-Tween* agar for the morphological examination of yeast

R7310040

Cat. No.	Pack of 1
R7310040	118.5

Oxoid* Identification Disks

Reagent-impregnated disks for the detection and differentiation of various microorganisms

)* Difco* Adjuvants

e to prepare antigen-adjuvant emulsions for use in munological studies with laboratory animals

djuvants are mixed with aqueous antigen solution or suspension

nce injected, they provide a pool of emulsified antigen at the injection te and allow the antigen to be released over an extended period of me; thus, the immune response to antigens (especially soluble antigens) enhanced and prolonged

se incomplete adjuvant (DF0639-60-6) to avoid the use of acid-fast acilli; however, the antibody response is not as marked as with the mplete adjuvant

TE:

intended for human or therapeutic use.

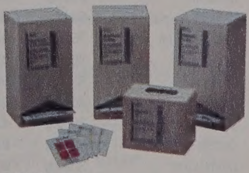
BD* DrySlide* Reagent Slides

A convenient method for bacterial biochemical analysis



B43317 Series

Self-contained, ready-to-use test slides consist of coated, 35mm film or impregnated paper, which operates as a carrier matrix for microbiological testing reagents.

- One-step procedure—no need for rehydrating
- No thin paper strips to manipulate and no glass slides are involved
- Each individual slide contains four reaction areas
- **DrySlide Indole** is a 30-second, spot indole test that uses DMABA (5% p-dimethylaminobenzaldehyde) formulation to test for indole-producing bacteria
- **DrySlide Nitrocefin** is a qualitative test to detect the presence of bacteria that produces β-lactamase and meets NCCLS guidelines; each slide contains a reagent cassette impregnated with nitrocefin
- **DrySlide Oxidase** with each slide is film-coated with an oxidase reagent (N, N, N′,N′-tetramethyl-p-phenylenediamine dihydrochloride) to test for the presence of cytochrome C oxidase activity in bacteria; a positive result produces a purple color within 20 seconds
- **DrySlide PYR Kit** has L-pyrrolidonyl-β-naphthylamide that is used for the rapid presumptive identification of Group D *Enterococci* and Strep Group A; includes 15 slides and 15, 0.5mL crush ampules

ORDERING INFORMATION:

Slides are individually wrapped and supplied in convenient dispenser packs

Description	Cat. No.	Pack of

Fisher Diagnostics PROTOCOL* Gram Stain Sets

Reusable tray provides secure bottle storage

Decolorizer is acetone/isopropanol (1:4) unless otherwise specified as 1:1

- Manufactured with traditional formulations used by most laboratories
- Complete stain sets provide convenient staining

ORDERING INFORMATION:
All sizes come in polyethylene bottles, except for the gallon-size Lugols Iodine, which comes in a glass bottle. Dispenser caps are provided with the 8 oz. and 16 oz. sizes. Gallon-size Iodine is available as traditional diluent/concentrate or as ready-to-use Lugols (23-270-184)

Description	Cat. No.	Pri
Set with 16 oz. bottle of each: Gram Crystal Violet, Iodine, Decolorizer and Safranin	**23-255-959**	Cs. of 4/63.
Set with 8 oz. bottle of each: Crystal Violet, Iodine, Decolorizer and Safranin	**23-291-471**	Cs. of 4/45.
Set with one 250mL bottle of each: Gram Crystal Violet, Stabilized Iodine, Decolorizer and Safranin	**23-005-83**	Ea./54.

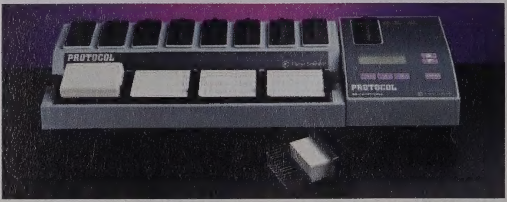
Fisher Diagnostics PROTOCOL* MicroProbe* Staining System

Allows for multi-step staining procedures on up to 20 slides simultaneously



Probe-On Plus* slides fit securely into the patented slide holder, creating the precise gap required for capillary action. The technology ensures complete and consistent staining by exposing all tissue samples to the same volume of fresh reagents and identical incubation conditions.

- Compact unit occupies minimal bench space and can perform all tissue processing and staining steps, including deparaffination, hydrating, staining and counterstaining
- Spent reagents and stain can be removed from the capillary gap by blotting the slides on the absorbent pads

Probe-On Plus Slides

- High-quality microscope slides are painted at the upper and lower ends to a specified thickness
- When pressed together the painted surfaces create a capillary gap that easily accommodates tissue sections up to 5µm thick on each slide
- Placing a control slide with a specimen ensures that the tissues receive identical treatment throughout the staining and incubating process
- Enhanced Probe-On Plus slides provide superior tissue adhesion, eliminating the need for water bath additives or polylysine pretreatments

Isolon* Reagent Isolators

- Wells in reusable, silicon rubber isolators hold reagents in proper alignment for contact with the capillary gap of the slide pairs in the holder
- Available with three wells for milliliter volumes (each well treating slides with the same reagent) or with 30 smaller wells for microliter volumes of antibodies or DNA probes (each well treats a slide pair individually)
- Disposable, 30-well glass are available for hybridization procedures requiring a flatter surface

Slide Holder

- Features a lightweight, chemical-resistant handle with numbered positions and an indexing bump
- Clips, located on the underside of the holder, securely hold slide pairs in the vertical position
- For immunostaining and special stain procedures, insert the prepared Probe-On Plus slides face-to-face to form the capillary gap and touch the ends of the slides to the reagent buckets or Isolon reagent isolators; For traditional staining procedures, use standard slides with the specimens facing outward and dip the slide into the reagent buckets

Staining Station

- Eight reagent buckets with removable lids are arranged along the back of the stainer
- Removable tray in the front of the system holds up to four plastic holders that accept the Isolon Reagent Isolators or absorbent blotting pads

MicroProbe Incubator

- Using advanced microprocessor technology, incubator provides tight control of temperature between 30° and 110°C (±0.5°C) [86° and 230°F (±0.5°F)]
- Anodized aluminum incubation chamber is designed so that the top of the slide holder completely covers the opening, maintaining the desired temperature and humidity
- Cork-lined lid is also provided to reduce the preheating times
- Removable tray beneath the chamber catches any drips from the slides
- Incubator control panel allows the user to program three temperature settings into memory for later access; display panel shows the operating mode, actual temperature and any error messages
- Calibration block, which holds a calibrated thermometer, is also provided to recalibrate the incubator if needed

INCLUDES:

Eight reagent buckets and lids, a locator tray for the Isolon holders, four Isolon holders, five 30-well and five 3-well Isolon plates, six blotting pads, one slide holder, 72 Probe-On Plus microscope slides, an incubator with lid, calibration block, a power cord, a user's manual, and an application guide

WARRANTY:

GAS GENERATING SYSTEMS

oid* Atmosphere Generating Systems

ange of dry gas generating systems designed to fely and speedily create optimum conditions for the owth of a variety of organisms

- reate the desired atmospheric nditions without the dangerous ccumulation of hydrogen: no water catalyst needed
- esulting carbon dioxide level ill be within 9% to 13%, an portant element when performing aerobic sensitivities
- vailable in two convenient rmats: For use in a jar (2.5 and 5L sizes), or for use in a bag naeroGen*, CampyGen*, and $_2$Gen Compact products)

Top (left to right): OXCN0052A, OXAG0025A, OXAN0025A; Bottom (left to right): OXAN0020C, OXCD0025A, OXAN0010C, OXCD0020C

custom-designed jar (AnaeroJar*), along with a number of pouch oducts, provide incubation of small numbers of Petri dishes.

RAGE CONDITIONS:

e in a cool, dry place between 2° and 25°C (36° to 77°F).

BD* BBL* GasPak 100* Jar Systems

Choice of vented and nonvented models

Nonvented model for anaerobic procedures; vented model can be used with evacuation-replacement systems that use tank gases (nonvented model [and vented model if tank system is not used] require a disposable gas generator envelope)

- Hold twelve 100 × 15mm Petri dishes or 13 culture tubes
- Vented and nonvented

CampyPak Plus
BBL GasPak Plus

Vented GasPak 100 System (11-814-22) and nonvented GasPak 150 System (11-816) with 11-816-15 and B71040 gas generator envelopes.

APPLICATIONS:
Use the economical nonvented model for anaerobic procedures; vented model can be used with evacuation-replacement systems that use tank gases.

INCLUDES:
5 O.D. × 9"H (13 × 23cm) polycarbonate jar; lid with O-ring gasket (vented or nonvented depending on model); clamp and thumbscrew assembly; catalyst reaction chamber; two catalyst charges; autoclavable, stainless-steel Petri dish rack with clips; and culture tube holder; vented model also supplied with rubber hose and tubing clamp

REQUIRED ACCESSORIES:
Gas generator envelopes

Model	Mfr. No.	Cat. No.	Each

olds thirty-six 100 × 15mm Petri dishes, twelve 0 × 15mm Petri dishes, or 13 culture tubes.

ICLUDES:

0½ O.D. × 11"H (27 × 28cm) lycarbonate jar; lid with O-ring asket (vented or nonvented depending amp and thumbscrew assembly; ree catalyst reaction chambers;) catalyst charges; autoclavable, ainless-steel Petri dish rack with ips; culture tube holder; vented odel also supplied with rubber se and tubing clamp

Vented GasPak 100 System (11-814-22) and nonvented GasPak 150 System (11-816) with 11-816-15 and B71040 gas generator envelopes.

EQUIRED ACCESSORIES:

as generator envelopes

odel	Mfr. No.	Cat. No.	Each
nted	260629	**11-816-2**	869.40
onvented	260628	**11-816**	772.50

ACCESSORIES

For BD* BBL* GasPak* Jar Systems

Disposable Anaerobic Indicator

- Consists of a foil envelope containing a pad saturated with methylene blue solution
- Pad changes from blue to colorless in the absence of oxygen

Mfr. No.	Cat. No.	Pack of 100
270504	**11-814-36**	83.70

Disposable Gas Generator Envelopes

- Use in GasPak Jar Systems to produce anaerobic, microaerophilic, or CO_2-supplemented aerobic atmospheres
- Each specially designed foil envelope emits its gases when 10mL of water is added

GasPak Plus* Hydrogen + CO_2

- Comes with Safety-Shielded Integral Palladium Catalyst Strip
- For CO_2-enriched anaerobic environment
- Assures accurate quantities of fresh, active catalyst for every run
- Identical contents to 11-814-32, plus palladium catalyst strip

CampyPak Plus* Hydrogen + CO_2

- Comes with Integral Palladium Catalyst
- Produces microaerophilic environment for growth of *Campylobacter* and *Campylobacter-like* strains
- Assures accurate quantities of fresh, active catalyst for every run
- Produces atmosphere approximately 5 to 12% CO_2; residual atmosphere approximately 5 to 15% oxygen
- Safety ensured by delayed release of hydrogen gas via a paper wick system

Description	Mfr. No.	Cat. No.	Pack of 10
GasPak Plus Hydrogen + CO_2	271040	**B71040**	30.40
CampyPak Plus Hydrogen + CO_2	271045	**11-816-15**	38.50

** Because Campylobacter jejuni produces hydrogen sulfide that poisons the palladium catalyst, fresh catalyst should be placed in the catalyst chambers of the GasPak lid each time the jar is used with a CampyPak* envelope.*

† Includes two catalyst charges.

‡ With three catalyst reaction chambers and six catalyst charges.

Dry Anaerobic Indicator Strip

Recommended for use with BD* BBL* GasPak Plus* B71040 anaerobic envelopes

- Also usable in gas-generating pouch systems
- Convenient strips change from blue to colorless in the absence of oxygen

STORAGE CONDITIONS:

No refrigeration needed

Mfr. No.	Cat. No.	Pack of 100
271051	**B71051**	86.40

BD* BBL* Bio-Bag* Environmental Chambers

Disposable systems for cultivation and isolation of specific bacteria and cultures

- Create anaerobic, microaerophilic, or CO_2-enriched aerobic environments, depending on bag type
- Transparent pouches allow observation without disturbing the environment

Bio-Bag Type A

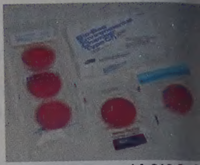
- Maintains anaerobic conditions for 96 hours
- 100 Pack comes with 100 anaerobic generators, 100 anaerobic indicators, 100 palladium catalyst containers, and 100 Type A bags; holds one 100 × 15mm Petri dish or MIC microdilution plate
- 25 Pack comes with 25 anaerobic generators, 25 anaerobic indicators, 25 palladium catalyst containers, and 25 Type A bags, ideal for smaller workloads
- Type A Multi-Plate holds three 100 x 15mm multi-plate dishes or two API ID strips

Bio-Bag Type C

- Maintains CO_2-enriched aerobic environment for 48 hours
- Holds one 100 × 15mm Petri dish or MIC plate
- Comes with 50 CO_2 gas generators and 50 Type C bags
- Gas generators (14-910-33, also sold separately) have a two-year shelf life

Bio-Bag Type Cfj

- For microaerophilic environment
- Supports growth and isolation of *Campylobacter jejuni*
- 100 Pack comes with 100 microaerophilic generators and 100 Type Cfj bags; holds one or two 100 × 15mm Petri dishes or MIC plates
- 25 Pack comes with 25 microaerophilic generators and 25 Type Cfj bags for smaller workloads; media and plates not included



14-910 Seri

SAMPLE PREP DEVICES

Fisher Scientific* Inoculating Turntables

Choice of two sizes fits 100 and 150mm Petri dishes

- Hand-operated turntables produce nearly concentric circles of evenly distributed bacterial colonies from edge of dish to center.
- Baked-on acrylic enamel finish with black enamel weighted base
- Raised gripper lip and recessed center disc covered with nonskid rubber
- Choose from two sizes: 4½" dia. (11cm) with tripod (included) for 100mm Petri dishes, and 6" dia. (15cm) (tripod not included) for 100 and 150mm Petri dishes
- 1¼" (3cm) high turntable allows you to steady your forearm on the work surface while plating

08-758Q

8-758-10Q

Diameter × Height	Cat. No.	Each

6 × 1¹/4" (15 × 3cm)	**8-758-10Q**	176.25

LOOKING FOR SPREADERS?

We carry a wide variety of cell lifters and spreaders including new Fisherbrand* L-shaped spreaders. For more details,

Visit www.fishersci.com and search for 03392150

*Fisherbrand** Disposable Loops and Needles

No need to flame metal loops and expose to airborne pathogens

13-075 Ser

- Disposable, sterile plastic loops and needles for quantitative procedures such as sampling, serial dilutions and urine counts, as well as for bacterial inoculation
- Molded from biologically inert polymer
- Flexible enough to facilitate streaking, yet rigid enough to penetrate the media for subsurface inoculation
- Gamma-irradiated for sterility in accordance with U.S. Pharmacopoeia, Volume XX
- Combi Loop has a 10μL loop on one end and a 1μL loop on the othe
- All loops and needles are 9" (23cm) long
- Color coded for easy identification

ORDERING INFORMATION:

Loops available individually wrapped or in zip-seal packs of 10; needles are available in zip-seal 10-packs only

Type	I.D.	Color	Packaging	Cat. No.	Pack of	Ca

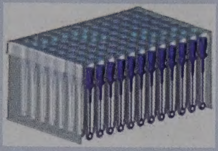
*Trademark. See Trademark Reference.

Prices subject to change.

*Fisherbrand** Astral* Inoculation Device System

Economical, disposable inoculation system designed for safety and dependable sterility

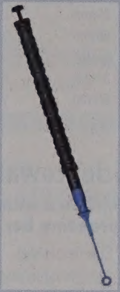
- Calibrated using Evans Blue Dye spectrophotometric procedure and gravimetric method
- Free of DNA, RNase, DNase, Pyrogens, and PCR inhibitors
- Astral loops, needles, and Clone-Piks are packaged static-free into individual tubular chambers, which are then hermetically sealed with aluminum film
- A dust cover is heat-shrunk onto the unit before it is irradiation-sterilized
- Use on an individual basis; or for quantitative procedures such as sampling, urine counts, or serial dilutions



Rack with 10µL Loops (05-664-81)

o use:

- Puncture aluminum film with the handle, pushing down until it attaches to the loop, needle, or Clone-Pik
- Withdraw handle; inoculation device is ready for many applications



05-664-81 Loop with 05 664-83 Handle

RDERING INFORMATION:

vailable 96 to a rack and 10 racks to a case

INCLUDES:

utoclavable handle with every case

Type	Color	Cat. No.	Case of
Astral Loop, 1µL	Yellow	**05-664-80**	960/230.45
Astral Loop, 10µL	Blue	**05-664-81**	960/230.45
Streaking Needle	White	**05-664-82**	960/230.45
Clone-Pik	White	**05-664-84**	960/248.08
Handle	----	**05-664-83**	1/15.22

Oxoid* Disposable Inoculating Loops and Spreaders

Designed for most inoculating applications

Loops

- Available in 1 or 10µL sizes
- Color coded to differentiate between flexible or rigid styles
- Plastic, sterilizable by gamma radiation
- 7 1/2" (19.1cm) in length
- Packaged 25 per resealable bag in packs of 1000

Spreaders

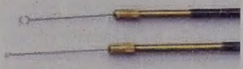
- L-shaped, violet blue plastic, sterilizable by gamma radiation
- 5 1/2" (14cm) in length
- Packaged five per unresealable peel bag in packs of 1000

Type	Color	Packaging	Cat. No.	Pack of 1000
1µL Flexible Loop	Light Green	25 per bag	**OXCOPS1**	89.46
1µL Rigid Loop	Dark Green	25 per bag	**OXCOPH1**	89.46
10µL Flexible Loop	Light Blue	25 per bag	**OXCOPS10**	89.46
10µL Rigid Loop	Dark Blue	25 per bag	**OXCOPH10**	89.46
Spreaders	Violet Blue	5 per bag	**OXCOP174CS0**	181.35

Decon* LeLoop* Inoculating Loops

More economical than platinum or disposable plastic loops

Reusable loops are made of high-quality twisted nichrome wire.



22-032-088 (top); 22-032-089

- Loops slide smoothly across agar surfaces without tearing or gouging
- The nichrome wire cools rapidly, saving time
- Loops are available calibrated or noncalibrated
- Calibrated in accordance with ASM/APHA via Evan's Blue Test and include calibration certificates
- LeLoop loops come without holders, which are available separately

Type	Cat. No.	Pack of	Case of
1µL, Calibrated	**22-032-089**	5/198.50	5 Pk./848.28
10µL, Calibrated	**22-032-088**	5/189.05	5 Pk./807.89
Small, Noncalibrated	**22-032-090**	25/65.17	----
Medium, Noncalibrated	**22-032-092**	25/65.17	----
Large, Noncalibrated	**22-032-091**	25/65.17	----

LOOKING FOR MORE INOCULATING LOOPS AND NEEDLES ?

For a wide range of Remel* sample prep products, including calibrated, reusable, and disposable inoculating loops and needles and colony spreaders,

Visit www.fishersci.com and search for Remel Loops

Decon* LeLoop* Holder

For LeLoop Inoculating Loops

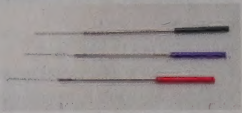
- Nickel-plated brass with insulated handles
- Available in 6 and 8" lengths

Description	Cat. No.	Each	Case of 10
6" Loop Holder	**22-032-093**	37.92	324.08
8" Loop Holder	**22-032-095**	54.07	462.13

Decon* LeStreak* Microstreakers

Perfect for inoculating or transferring microbiological samples

- Use to inoculate or transfer microbiological samples
- Made of high-quality twisted nichrome wire permanently attached to lightweight insulated aluminum handles
- Slide smoothly across agar surfaces without tearing or gouging
- Nichrome wire cools rapidly after flaming
- 1 and 10µL loops are individually calibrated in accordance with ASM/APHA via Evan's Blue Dye Test
- Noncalibrated microstreakers are color coded for easy identification



22-032098 Blue; 22-032097 Green; 22-032096 Red

CERTIFICATIONS:

Calibration certificates provided for 1 and 10µL loops

Description	Color	Cat. No.	Each	Pack of 5
1µL, Calibrated	----	**22-032100**	45.33	193.72
10µL, Calibrated	----	**22-032101**	39.27	167.81

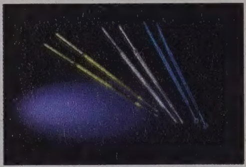
Medium, Noncalibrated	Green	**22-032097**	----	47.93
Large, Noncalibrated	Red	**22-032096**	----	25.61

Nunc* Disposable Loops and Needles

Ideal for semiquantitative inoculating procedures

- Disposable polystyrene loops and needles are radiation-sterilized, eliminating need for flame sterilization
- Hydrophilic treatment is applied to loops and needles during manufacturing to give them liquid adherence properties which prevent accidental discharge of droplets
- Loops are available in 10 and 1µL sizes and color coded for easy identification



Left to right: Needles, 1µL Loops, 10µL Loops

Type	Color	Mfr. No.	Cat. No.	Pack of	Case of 4 Pk.

DILUTION VIALS

Remel* Dilution Bottles NEW

Leakproof, break-proof wide mouth bottles

- Accurate testing assured by pre-filled, buffered (pH 7.2 ±0.2) solution
- Convenient hinged cap opens and closes with one hand
- Sterile contents ensured by gamma sterilization and shrink wrap seal
- Color-coded labels provide quick recognition
- Capacity: 150mL
- Manufactured using ISO 9001:2000-certified processes

INCLUDES:

Certificate of Quality with each box

Description	Label Color	Media Volume	Cat. No.	Case of 7
Butterfield's Medium	Green	90mL	**R23700**	57.58
Butterfield's Medium	Blue	99mL	**R23701**	57.58

Phosphate Buffer w/MgCl	Red	99mL	**R23703**	57.58

ilu-Lok* Dilution Vials

esigned for testing in the food, dairy, pharmaceutical, ater and cosmetic industries

02-686-200 Series

efilled dilution vials with either 90 or mL of Butterfield's Buffer, Peptone ater (1%), or Phosphate Buffer.

Hinged lid provides leak-resistant, airtight seal and allows for easy one-handed opening

Tamper-evident seal ensures sample integrity

Flat surface on cap top ideal for marking sample identification

All diluents have a pH of 7.2 ±0.2

Wide 45mm opening accommodates larger samples and utensils

Made with optically clear polypropylene allowing for easy visualization of sample

Each lot meticulously tested for sterility, fill volume, pH and toxicity

Certificates of Analysis are available

MPLIANCE:

ution vials meet APHA, AOAC, FDA and USDA guidelines

LOOKING FOR PLATINUM LOOPS?

To find platinum loops in several sizes,

visit www.fishersci.com and search for Platinum Loops

Reichert* Darkfield Quebec* Colony Counter

Counts bacterial colonies quickly and accurately

RE-3325

Exclusive darkfield design provides even, glare-free illumination. Contrasted against darkfield background, colonies are bright—readily distinguished from other structures in agar. Each probing action into the colony completes a circuit and is automatically recorded (Electronic Register model only).

Key Features:

- Highly polished, annular reflector spreads light from 40-watt bulb uniformly over entire culture plate
- Operating switch conveniently mounted on front of instrument case
- Hinged door provides easy access to change light bulb—just remove two screws
- Container holder adapts for centering round dishes up to 100mm diameter or square culture plates up to 100 × 100mm
- Adjustable focusing rod allows 1.5X lens to be raised or lowered for magnified viewing
- Lens rotates 360° for ready access to culture plates
- Reset bar provides immediate zeroing of five-digit counter
- Built-in tilt leg may be mounted in front or rear; allows convenient tilt angle or may be locked flat to instrument base
- Electronic register model is operated by needle-point probe with magnetic ground; when ground and counting probes both touch conductive agar in dish or plate, an electrical circuit is completed through the integral amplifier to activate the digital counter.

ORDERING INFORMATION:

Dimensions (L × W × H), 10$^{1}/_{2}$ × 9$^{1}/_{4}$ × 10" (27 × 23 × 25cm). Net weight: 12 lb. (5.5kg). With three-wire cord and 1.5X lens,115V 60Hz.

INCLUDES:

White-ruled Wolffheugel guide plate; three-wire cord and 1.5X lens; Electronic Register model also includes probe and ground

CERTIFICATIONS:

UL listed

Model	Mfr. No.	Cat. No.	Each

Electronic Register	13332700	**07-908-7**	1728.00

Bel-Art* ScienceWare* Electronic Colony Counter System

Convenient and economical unit — small enough to store in a drawer between uses

- Touch an item, and it's marked by pen and counted at the same time—electronic beep verifies each entry
- Cumulative total appears on easy-to-read, four-digit 1" (25mm) LCD
- Selector switch can be set to count up or down, letting you correct errors or back-count to check total

INCLUDES:

System includes: 7-910-15 Colony Counter, plus Mini Light Box with one counting grid (07-910-11); Mini Magnifier (07-910-13); one 3V battery; Two oil- and water-resistant pen tips (one black, one red) that work on plastic or glass (use ethyl alcohol for easy cleanup); AC Adapter (07-910-20) to provide a convenient, economical system

EQUIPMENT

BD* BBL* Crystal ID* Systems

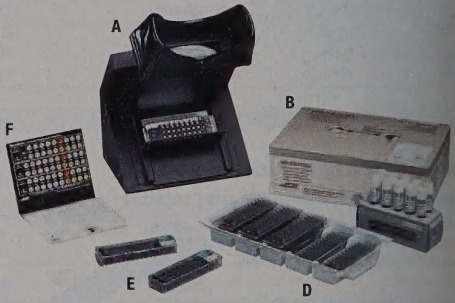
Miniaturized microbial ID systems use modified conventional, fluorogenic and chromogenic substrates

Intended for identification of clinically significant aerobic and anaeorobic gram-negative and gram-positive bacterial pathogens isolated from human specimens. During incubation, the stackable 10-device trays save space and prevent incubator mess. Following incubation, distinct chromogenic and fluorogenic reactions generate a profile number, which is keyed directly into the BBL Crystal MIND Software installed on a laboratory computer.

- Onscreen display identifies the organism, reports on epidemiology, and conveys other pertinent information
- Easy-to-use systems require no pipetting or reagent addition
- Culture colonies are suspended in Crystal Broth; then inoculum suspension is poured directly into the Crystal device
- Wells fill automatically by rocking base
- Lid is snapped onto the device for safety and handling ease
- **Enteric/Non-Fermenter (E/NF) Kit** performs overnight identification of clinically significant aerobic gram-negative *Enterobacteriaceae* isolates, as well as frequently isolated glucose nonfermenting gram-negative bacilli from human origin
- **Anaerobe ID (ANR) Kit** is a four-hour test that identifies clinically significant anaerobes. Separate databases for Schaedler Blood Agar, CDC Anaerobe Blood Agars are included for improved specificity and increased flexibility
- ***Neisseria/Haemophilus* (N/H) ID Kit** identifies *Neisseria, Haemophilus, Moraxella, Gardnerella vaginalis* and other fastidious bacteria in a four-hour test
- **Gram-Positive (GP) Kit** identifies 121 gram-positive bacteria isolated from clinical specimens including both cocci and bacilli in an overnight test
- **Rapid Gram-Positive (RGP) Kit** identifies gram-positive bacteria isolated from clinical specimens including both cocci and bacilli in a four-hour test

INCLUDES:

Lids, bases, inoculum fluid and incubation trays sufficient for 20 determinations



[A] Crystal Panel Viewer [B] BD Crystal Kit [C] Inoculum Fluid [D] Panel Lids and Bases [E] Report Pad (Contact your Fisher Scientific Customer Service Representative to order.) [F] Color Reaction Chart (Contact your Fisher Scientific Customer Service Representative to order.)

STORAGE CONDITIONS:

All systems except the Enteric/Nonfermenter should be refrigerated at 2° to 8°C (36° to 46°F).

xoid* Turbidometer

oculum density standardization device for use in disc
sceptibility testing (Kirby-Bauer)

OXAU0108A

s in improving reproducibility of
culum suspension and in acquiring
urate and reliable Antimicrobial
sceptibility Testing (AST) results.

/leasures optical density of a
acterial suspension using 620nm
nfrared light source, comparing
ensity to a 0.5 McFarland turbidity
tandard

ccepts clear glass or plastic 10 to
5mm I.D. tubes

ne-button calibration using prepared McFarland standard—illuminated
isplay will confirm calibration

asy to operate, just insert prepared bacterial suspension into reading
/ell—display will indicate inoculum density

ilute or concentrate inoculum and repeat steps as necessary until
ensity is equivalent to the 0.5 McFarland standard

DERING INFORMATION:

ensions (L × W × H): 7¼ × 5⅜ × 3½" (18 × 13.5 × 9cm). Weight:
2 lb. (0.7kg). Electrical requirements: 110-220V; 47 to 63Hz; output
age: 5V

LUDES:
r manual

COMPLIANCE:
UL listed. CSA approved.

Bacti-Cinerator* IV Sterilizer

Safely sterilizes loops and needles by infrared heat

02-544-157

Complete sterilization occurs in only five to seven seconds at optimum temperature of 1500°F. Heat is contained in deep ceramic tube to safeguard laboratory personnel—no open flame. No need to wait for instruments to turn red.

- Prevents infectious spatter and/or cross-contamination
- Ideal for use in anaerobic chambers
- Base is weighted for stability and provides convenient storage for six needle holders

Mfr. No.	Cat. No.	Each
8889004002	**02-544-157**	282.51

Argos* Nova Microcinerator

Burner assembly can be adjusted to five different positions for improved user comfort

03-391-190

- Unit sterilizes metal inoculating loops or needles in five to seven seconds, after reaching optimum sterilization temperature, 815°C (1500°F)
- Infrared heat inside a ceramic tube eliminates the need for dangerous gases and flames, as well as the aerosaling of microorganisms
- Stainless-steel cowl protects the heating element
- Suction cup feet secure the base from moving or tipping

CERTIFICATIONS:
UL listed

Pyrex* Microchemistry Kits

Microchemistry requires smaller volumes than traditional organic chemistry, produces faster reactions and results in less waste

11-300-Series

Kit 11-300-71 has components with $ 5/5, $ 7/10, $ 14/10 and $ 14/20 joints for experiments described in the first edition of *Microscale Organic Laboratory* by Drs. Mayo, Pike and Butcher (John Wiley & Sons, New York). Components in kit have $ 14/10 threaded joints for experiments in that text's second edition. Both kits are foam-packed in 11L × 14½W × 2½"H (28 × 37 × 6cm) sturdy, drawer-size cases.

ORDERING INFORMATION:

Catalog numbers for all kit components are listed in the chart; contact your Fisher Scientific Customer Service Representative to order replacement parts. Items without a catalog number in the chart are not available separately. Case color, orange.

MICROPLATE INSTRUMENTATION

MICROPLATE DISPENSERS

ioTek* NanoQuot* Microplate Dispenser

ow volume dispensing solution for life science
esearch and drug discovery

ıb-microliter dispensing provides increased assay throughput and lower agent expense.

eatures:

- Non-contact dispensing
- Precise dispensing down to 100nL
- Multiple formats: 96-, 384-, and 1536-well microplates
- Small footprint conserves benchtop space
- Variable microplate heights
- Organic solvent compatible including 100% DMSO
- Simple setup
- Ideal for handling buffers, protein solutions and cells
- Compatible with Bio-Stack* microplate handler (Cat. No. BTBIOSTACK)

PPLICATIONS:

ISA, Cell-based assays, PCR setups, Diluent dispensings, Compound orage

MPLIANCE:

TL Safety Agency marked.

odel	Cat. No.	Each
ANOQUOT	**BTNANOQUOT**	13,900.00

SPECIFICATIONS

Processing Speed	1uL into 384 wells = 35 seconds; 1uL into 1536 wells = 65 seconds
Volume Range	100nL to 40uL with aqueous solutions
Fluid Delivery	Precision solenoid valves with pressurized dispense system
Dispense Accuracy	±5% at volumes ≥1uL; ±10% at 500nL; ±10% at 100nL
Dispense Precision	<5% at volumes ≥1uL; <10% at 500nL; <10% at 100nL
Number of Channels	8
Number of Reagents	1
Dead Volume	<2mL
Sterilization	Chemical
Interface	RS-232
Electrical Requirements	115/230V 50/60Hz
W × D × H	12 × 12.5 × 8" (31 × 32 × 20.3cm)
Weight	15.7 lb. (7.1kg)

---

ioTek* µFill* 96-/384-well licroplate Dispensers

tandard and autoclavable models provide accurate
nd precise dispensing without time-consuming
ecalibration and maintenance

BT-AF1000

eliable, economical dispensing unit incorporates a microprocessor-ontrolled syringe pump for optimal performance. Dispense flowrates e user controlled, allowing low- to high-velocity dispensing for any pplication. Robot-compatible carrier accommodates 24-, 96- or 384-well icroplates in standard or deepwell formats. Small footprint allows easy fit thin a laminar flow cabinet.

ey Features

- Volume range is selectable in 1µL increments from 5 to 6000µL per well
- 20µL can be dispensed into a 384-well plate in 12 seconds; into a 96-well plate in four seconds
- Multi-language memory stores up to 75 programs at the touch of a button
- User interface has 2 × 24 LCD character screen, 25 alphanumeric soft keys

odel BT-AF1000A

- Includes autoclavable fluid path for guaranteed sterility

ICLUDES:

-channel manifold for 96- and 384-well microplates, Aerosol cover, perator's Manual, Priming trough self-draining kit

Description	Cat. No.	Each
µFill Microplate Reagent Dispenser	**BT-AF1000**	6600.00
µFill Autoclavable Microplate Reagent Dispenser	**BT-AF1000A**	8229.17

SPECIFICATIONS

Accommodates	24-, 96- and 384-well standard and deepwell microplates; 1 × 8 and 1 × 16 microstrips; flat, U-bottom, and V-bottom microwells
Volume Range (selectable in 1µL increments)	384-well plates, 5 to 1500µL per well; 96-well plates, 10 to 3000µL per well; 24-well plates, 20 to 6000µL per well
Dispense Precision	For 100µL, ≤2% CV typical; for 20µL, ≤5% CV typical
Dispense Accuracy	±1µL typical
Net Weight	20 lb. (8.9kg)
Dimensions (L × W × H)	18 × 15 × 7" (46 × 38 × 18cm)
Electrical Requirements	100–250VAC 50/60Hz, 40A

BioTek* Precision* Microplate Pipetting System

Innovative replacement for manual pipetting

Features

- Available with multichannel manifold for continuous reagent dispensing
- Ideal for routine liquid deliveries such as reagent addition, plate replication, serial dilutions, sample transfer, and mixing within a well
- Configurable multistation platform and XY transport design provide effortless 96- to 384-well plate transfers
- Proprietary pipet technology provides reliable way to pick up and seal standard tips with controlled force
- Open design guarantees compatibility with robotic plate handlers
- Accommodates BioTek and other standard 50 to 250µL pipet tips; and 96- and 384-well flat-, round-, and V-bottom plates

Software

- Preinstalled software enables user to copy existing demonstration protocol and modify it; memory stores up to 80 program files
- User can create, edit, copy, and delete files using external keypad and 24-character LCD—virtually any liquid transfer parameter can be customized
- Configurable aspiration depth ensures that tips don't touch bottom of wells while performing sensitive cell assays
- Programs can be created and run from a PC, or downloaded and run from onboard microprocessor

COMPLIANCE:

CAN/CSA approved

Description	Cat. No.	Each
8-channel Precision	**BT-PRC384**	14,800.00

Prices subject to change.

ioTek* Precision* XS Microplate Sample Processor

ur liquid transfer technologies in one instrument

mbines a single-channel pipetting/dispense head, an 8-channel pipetting ad, and an 8-channel bulk reagent dispenser in one compact unit.

y Features

- ffordable alternative to high-end liquid handlers
- Jser-configurable, multi-station platform provides flexible experiment design
- ntuitive Precision Power* PC software simplifies programming of applications from hit-picking to multi-well serial dilutions
- Compatible with a variety of labware including test tubes, reagent eservoirs, and microplates
- /olume ranges from 1µL
- Fits into most biological safety cabinets and chemical fume hoods

---

ioTek* Bio-Stack* Microplate Stacker

mpact, flexible unit is compatible with BioTek's icroplate washers, dispensers, and detection systems

ndles up to 30 standard-height microplates in the interchangeable input d output stacks; plates can be added to the input stack while the unit is nning for continuous operation. To ensure reliable transport, sensors rify microplate presence and gripper mechanism lifts plates from below. livers or retrieves a microplate in eight seconds.

y Features

- Restacking feature allows plates to be placed in the output stack in their original order instead of the reverse order
- Can be operated without an external computer when used with the ELx405* Microplate Washer, µFill* Microplate Dispenser, or NanoQuot* Microplate Dispenser
- Vhen used as a batch processor for detection equipment, interfaces seamlessly with BioTek's Gen5* Data Analysis Software
- Small footprint fits easily in most standard laboratory hoods

RDERING INFORMATION:

mensions with microplate stacks: 18½L × 7W × 25"H .9 × 17.8 × 63.5cm). Weight: 24 lb. (10.9kg).

ease indicate desired accessory kit when ordering.

INCLUDES:

Communication cable; two microplate stacks (30-plate capacity); operator's manual; one instrument accessory kit

CERTIFICATIONS:

MICROPLATE WASHERS

Fisher Scientific* Wellwash* 4 Mk2 Automatic Microplate Washer

Complete user programmability—four "smart cards" for routine protocols

Compatible with all styles of 96-well plates. Programmable card enables user to set volume, wash cycles, wash type, soak time, and mode of dispensing in as little as 10 seconds. Allows up to three no-soak washes after processing program. Or select one of the four standard program cards with routine protocols, included.

Unique coaxial wash-head design

- Ensures washing with low residual volumes
- Large-diameter outer aspiration tubes improve liquid removal from the walls and well periphery
- Inner dispense needles avoid microwell contact and provide a clean profile to reduce carryover
- "Top washing" capability allows removal of proteinaceous material; vortex effect increases effective dilution and removal of floating conjugate

Inexpensive, plastic 8- and 12-way wash heads

- Interchangeable
- Wash/Waste bottle caps release quickly for easy buffer changes
- Unit is completely sealed against spills
- Inline liquid trap helps prevent washing solvents from reaching the pump
- Shut off automatically if a leak is detected or if not in use for more than 30 seconds

LOOKING FOR A FILTER BOTTOM PLATE WASHER?

BioTek ELx50 Filter Microplate Washer.

Visit www.fishersci.com and search for 12-566-700

INCLUDES:

8- and 12-way wash heads; Two wash/waste bottles; Four standard program cards; One programmable card; One replacement tubing pack; Spare fuses; Operation manual

Each	5047.00

[1] *Manufacturer recommends use with flat-bottom microplates for best results.*

BioTek* ELx405* Microplate Washers

Reliable, versatile microplate washers for applications from basic ELISA to cell and bead washing

Key Features

BT-ELX405 Series

- All models include overfill protection, priming trough (no prime plate is needed), unique fluid/flow detection, crosswise aspiration, and a built-in positive displacement pump
- Flexible software provides 75 programs with Pre/AutoPrime, 10 cycles/wash, and control of dispense height, aspiration height, aspiration delay, soak, shake, aspiration rate, and horizontal aspirate and dispense position
- Built-in positive displacement pump requires no pressure containers and features a sealed pump, unlimited reservoir options (standard or user-supplied), and variable dispense volumes and flowrates
- Vacuum pump is external
- Can be interfaced into standard robotic systems with ActiveX component
- Valve modules available for connection of up to four buffer solutions
- Models with Ultrasonic Advantage* offer an ultrasonic self-cleaning feature for effortless washer manifold maintenance

Auto Plate Washers

- Superior, cost-effective 96-well plate washing
- Features lower background absorbance values and higher signal-to-noise ratio than typical ELISA assays

ELx405 Select Plate Washers

- Unique design washes both 96- or 384-well plates without hardware changes
- Ideal for hard to wash or loosely adherent cell-based assays
- Dual-Action manifold provides independent control of both dispense and aspirate manifolds

ELx405 HT Plate Washer

- High-speed washer designed for 384-well microplates
- Dual-Action manifold provides independent control of aspirate and dispense positions
- Customized routines provide simple maintenance, true overfill washing and overflow protection capability
- Angled dispense tubes and variable dispense rates allow gentle cell washing

ELx405 Magna Plate Washer

- Washes 96-well plates for standard protocols, but is also specially designed for use with magnetic bead assays
- Second carrier positions the magnet plate close to the microplate bottom, holding beads tightly during the aspiration step
- Fully programmable washer provides controlled shaking and soaking for superior magnetic bead washing; can be integrated into automated systems

BioTek* ELx50* Microplate Strip Washer

Syringe-drive fluid delivery system for precise control

Key Features

BT-ELX508

- Washes single strips or full plates
- Efficient washing ensures low background absorbance and small residue volumes
- Self-contained and programmable
- Micro-controlled, syringe-drive positive-displacement pump fluid delivery system for precise control
- Safety features include aerosol cover, built-in decontamination routine, and isolation of electronics from fluidics
- Choice of 8-, 12-, 16-channel manifold models with and without valves

APPLICATIONS:

Suitable for EIA, fluorescence, chemiluminescence, RIA, DNA probe, and cellular assays

INCLUDES:

QC report and Performance Verification Data Sheet; Aerosol cover; Built-in pumps; Accessory package including bottles, tubing, and maintenance kit

CERTIFICATIONS:

CE marked, ETL listed

For in vitro diagnostic use

SPECIFICATIONS

MICROPLATE READERS

Fisher Scientific* Multiskan* Microplate Readers

Advanced photometric readers provide fast measurements and excellent response

Units can be computer controlled or run with the onboard Windows*-based Ascent* software. Software also allows you to set up assays and manipulate the results with curve-fitting, user-defined spreadsheets, and automatic data processing tools.

- Read 96-well plates in only five seconds
- Can be easily connected to a robotic system for increased throughput
- Provide onboard shaking for added flexibility
- Utilize a high-quality optical system that ensures excellent accuracy and reproducibility

Additional Features

- Accept up to eight filters
- Available with an integral printer (Model MCC/340)

Software Features

- Offers limitless assay and data storage capabilities
- Features endpoint, kinetic, and agglutination reading modes
- Allows flexible cutoff calculations and curve-fit algorithms for data manipulation
- Stores up to 64 assay protocols in extended memory

LOOKING FOR ASSAY SYSTEMS?

Check out Promega* Dual-Luciferase Reporter (DLR) Assay Systems in
the Cell Biology section.

BioTek* Gen5* Data Collection and Analysis Software

Compatible with BioTek microplate readers

- Contemporary interface provides easy access to all major functions of the software including reading parameters, plate layout, data reduction, online help, wizards, tutorials and sample protocols
- Quick launch buttons on the welcome screen provide links to recently used files, pre-programmed protocols and other key functions such as Quick Read and System Test
- StepWise* tools allow limitless combinations of procedural steps and data reduction criteria for a wide variety of applications in a logical and clearly defined sequence that is easily viewed on the screen
- Analyze data on a single plate or across multiple plates in an experiment
- Report and PowerExport* builders are fast and flexible output tools to produce publication-ready reports using data matrices, statistics tables, protocols and plate information
- For compliance to 21 CFR Part 11, Gen5 Secure provides system, data and protocol protection
- Multiple user definitions and permission levels make it easy to comply with laboratory policies.

ORDERING INFORMATION:

System Requirements:

- Windows* XP or Windows 2000 (Professional Editions)
- Pentium* III-Class PC (or compatible) processor (500MHz or higher)
- 512 MB RAM or higher
- 2 GB hard drive space or higher
- Designed for XGA resolution at 1024 × 768 or higher
- CD-ROM readable drive
- Keyboard
- Mouse
- Microsoft* Internet Explorer* v 5.0 or higher (for online help)
- Microsoft Excel* 2000 or later (for PowerExport feature)

Model	Application	Cat. No.	Each
Gen5	For all life science research needs	**11-120-510**	2500.00
Gen5 ELISA	For basic routine assays	**11-120-511**	1500.00
Gen5 RC	For fast, easy data collection and export	**11-120-512**	750.00
Gen5 Secure	For 21 CFR Part 11 Compliance	**11-120-513**	3500.00

BioTek* Synergy* HT Multidetection Microplate Reader

Integrates fluorescence, time-resolved fluorescence, absorbance, and luminescence

Key Features

- Reads 6- to 384-well plate formats, including PCR trays and Terasaki plates
- Offers automatic top and bottom epifluorescence read modes, user-controlled shaking, 4-Zone* temperature incubation to 50°C, and optional reagent dispensers
- Adjusts probe height automatically
- Scans entire well to provide accurate quantification of cellular contents on 6-, 12-, 24-, or 48-well plates
- Utilizes user-specified optical matrix to provide data appropriate to well size
- Compatible with automated systems

Additional Features

- Fluorescence determinations performed using a tungsten halogen lamp and PMT detector, increasing sensitivity and repeatability
- Interference filters prevent light leakage from excitation to emission wavelengths, increasing wavelength specificity—ideal for compounds with small Stoke's shifts
- Powerful Gen5* reader control and data analysis software automatically runs the reader, analyzes results, and generates a customized report—all with one mouse click
- Optional Gen5 Secure software meets 21 CFR Part 11 requirements for electronic signatures and audit-trail documentation, such as multilevel user password protection and protocol/data audit trails and is available at an additional charge
- Unit conforms to regulatory requirements for in vitro diagnostic use

INCLUDES:

Four default excitation filters (360/40, 485/20, 530/25, 590/20); Four default emission filters (460/40, 528/20, 590/35, 645/40), Gen5 software; Serial cable (null modem, 9- to 25-pin female)

NOTE:

Default wavelength filters other than those listed can be specified at ordering

CERTIFICATIONS:

CE marked, ETL Listed

BT-SIAFR Series

Features	Cat. No.	Each
3mm top probe, 5mm bottom probe, incubation to 50°C, time-resolved fluorescence capability	**BT-SIAFRT**	27,605.00
3mm top probe, 5mm bottom probe, incubation to 50°C, time-resolved fluorescence capability, two reagent dispensers	**BT-SIAFRTD**	34,687.50

SPECIFICATIONS

Excitation Range	200–700nm
Emission Range	300–700nm (800nm with red extended option)
Dynamic Range	0–99,999 (fluorescence, luminescence); 0–4.0 O.D. (absorbance)
Absorbance Range	200–999nm (1nm increments)
Accuracy	±1% at 2 O.D., typical
Linearity	<1% from 0–3.0 O.D., typical
Repeatability	<0.5% at 2 O.D., typical
Bandpass	2.4nm (absorbance)
Sensitivity	2.5pg/mL SF, typical
Filter Wheel	4-position wheel with four excitation filters (360/40, 485/20, 530/25, 590/20) and four emission filters (460/40, 528/20, 590/35, 645/40)
Detection Method	Fluorescence, time-resolved fluorescence, absorbance, luminescence
Read Methods	Endpoint, kinetic, well-area scanning
Light Source	Tungsten halogen and xenon lights
Interface Connections	Bidirectional RS-232
L × W × H	16 × 15 × 10" (41 × 38 × 25cm)
Electrical Requirements	100–240V 50/60Hz

LOOKING FOR MICROPLATES?

Check out the Microplates section for a wide selection of microplates, including assay plates.

ioTek* FLx800* Microplate Fluorescence Readers

ioose from models with top probe or top and bottom probes

- All models read 6-, 12-, 24-, 48-, 96-, and 384-well plates
- Onboard software stores 55 programmable protocols, up to 75 custom programs, and eight microplate assay results
- Two-line, 24-character LCD and menu-driven software simplify operation and programming
- Onboard diagnostic testing utilizes three methods—an optical self-test, a universal test plate, and a "wet test"—to check instrument performance and optical specifications, and provides either soft or hardcopy results
- Fiber-optic probes provide excellent sensitivity over a wide range
- All units feature convenient front-panel access to accessories

ftware Features

- Make the microplate reader fully computer controllable with optional BioTek Gen5* software (for more information about Gen5 software, see page 1118, at left.)
- Onboard data analysis provides curve-fitting options, including linear egression, polynomial, point-to-point, cubic spline, and four-parameter ogistic curve fits

odel Features

- Top probe is ideal for reading solid black plates
- Bottom probe reads covered plates
- Combination of top and bottom probes offers the most flexibility and ncludes automated probe switching for added convenience
- Extended-range photomultiplier tube (PMT) extends emission ange to 800nm
- Shaking and incubation options are ideal for temperature-sensitive assays
- Single reagent injector is suitable for ion-uptake assays and lash luminescence

RDERING INFORMATION:

tional Gen5* software (11-120-510) automatically runs the reader, alyzes the results, and generates a customized report. Or choose Gen5 cure software (11-120-513) to meet requirements of 21 CFR Part 11.

CLUDES:

5 and 360nm excitation filters, 528 and 460nm emission filters, rial and printer cables, Power cord

MPLIANCE:

nforms to UL 3101-1

RTIFICATIONS:

marked and ETL Listed. Certified to CAN/CSA C22.2 No. 1010.1-92 and 61010-1, including amendments 1 and 2.

BT-FLx800 Series

NOTE:

Supplied filters can be exchanged for other filters at time of purchase at no extra cost so that you can configure the unit to meet your specific application.

Model	Features	Cat. No.	Each
FLx800T	Top probe	**BT-FLX800T**	12,700.00
FLx800TB	Top and bottom probes	**BT-FLX800TB**	14,300.00
FLx800TBI	Top and bottom probes, incubation to 50°C, and shaking	**BT-FLX800TBI**	15,300.00
FLx800TBID	Top and bottom probes, incubation to 50°C, shaking, and single reagent dispenser	**BT-FLX8TBID**	18,000.00
FLx800TBIE	Top and bottom probes, incubation to 50°C, shaking and (extended range PMT)	**FLX800TBIE**	15,347.00

SPECIFICATIONS

Excitation Range	300–650nm
Emission Range	340–650nm (340–800nm for FLX800TBIE)
Dynamic Range	5 decades (0–99,999)
Sensitivity (Top)	160pg/mL methylumbelliferone (0.13 picomoles/well)
Sensitivity (Bottom)	10pg/mL sodium fluorescein (5.3 femtomoles/well)
Microplate Capability	6-, 12-, 24-, 48-, 96- and 384-well
Filter Arrangement	4-position wheel; 485 and 360 excitation filters, 528 and 460 emission filters supplied
Detection Method	Fluorescence, luminescence
Light Source	Quartz halogen, 1000-hour life
Display	Two-line, 24-character LCD
Program Capacity	55 programmable protocols (up to 75 custom programs) and 8 assay results
Curve Fits	Linear regression, polynomial, point-to-point, cubic spline, and 4-parameter logistic curve fits
Interface Connections	RS-232-C serial interface; parallel printer interface
L × W × H	16 × 15½ × 9" (41 × 39 × 23cm)
Electrical Requirements	100-240VAC 50/60Hz, 24V external transformer

BioTek* PowerWave* Microplate Spectrophotometers

Designed to run 24 hours a day, seven days a week

Key Features

- Suitable for any UV/Vis application between 200 to 999nm including direct DNA/RNA quantitation, and DNA purity
- Feature monochromator with xenon flash lamp, 5nm bandpass, user-programmable shake timing and frequency, and 4-Zone* natural convection incubation to 50°C
- Quickly and accurately read 96- or 384-well microplates, depending on model
- With PowerWave and Gen5* software, use automatic pathlength correction for direct nucleic acid quantification or to convert cuvet-based assays into microplate format
- Also accept 1cm Bio-Cell* vessels for standard spectrophotometer uses when used with optional adapter (BT-7270512)

Additional Features

- Select wavelengths in 1nm increments—without the use of filters
- Read endpoint, kinetic and spectral scans, and well scans in three read modes (normal, rapid, and sweep)
- Quickly perform spectral scans and analysis of multiple wells with overlay scans for fast comparisons
- Allow automatic pathlength correction to 1cm values for high throughput nucleic acid analysis
- Compatible with automated systems
- Conforms to regulatory requirements for in vitro diagnostic use

Software Features

- Powerful Gen5 control and analysis software automatically runs the reader, analyzes the results and generates a customized report, all with one mouse click
- Choose optional Gen5 Secure software (11-120-513) when compliance to 21 CFR Part 11 is essential

INCLUDES:

Gen 5 data analysis software, Serial cable (null modem, 9- to 95-pin female), Bidirectional RS-232 interface

Prices subject to change.

ioTek* PowerWave* XS Spectrophotometer

rformance and versatility in an economical unit

BT-MQX200R

y Features

- rovides 4-Zone* temperature control, user-programmable shaking, robotic ompatibility, and ultrafast sweep read mode as standard features
- ccepts any microplate type from 6- to 384-well plates
- lso accepts 1cm Bio-Cell* vessels for standard spectrophotometer uses vhen used with optional adapter (BT-7270512), at left
- onserves bench space through its compact design

ditional Features

- ffers tunable wavelength selection from 200 to 999nm in 1nm increments vithout the need for filters
- ncorporates a natural-convection heating system to reduce evaporation rom the microplate
- urrounds the microplate with four independently controlled heaters in ne reading chamber to allow no more than ±5°C variation across the nicroplate at 37°C
- llows access from three sides of the microplate for robot compatibility
- owerful GEN5* data analysis software (included) enables automatic athlength correction for direct nucleic acid quantification or to convert uvet-based assays into microplate format
- leets 21 CFR Part 11 requirements when used with optional GEN5 ecure software (11-120-513)

BioTek* ELx808* Absorbance Microplate Readers

Store up to 55 user-programmable protocols

Key Features

- Precise, accurate, and repeatable units read 96-well microplates
- Readers can perform multiple assays per plate
- On-board diagnostic self-test may be used with an optional calibration test plate to easily confirm and document performance
- Kinetic rate, R^2, or onset time is reported without a PC
- Linear well scanning is ideal for agglutination assays

Additional Features

- Staggered optical design eliminates channel-to-channel crosstalk
- Reference channel rolls optical signal for uniform channel-to-channel signal
- Curve fitting options include linear, 4-P, 2-P (logit/log), cubic, quadratic, cubic spline, and point-to-point
- Measurements can be read in intervals as short as six seconds
- ETL listed

Model ELx808

- Data analysis options include data transformation formulas, assay validation, and control validation
- Optional 4-Zone* Temperature Control improves reproducibility in enzyme kinetic reactions

Models ELx808IU and EL808IU-PC

- Additional data analysis options include cutoff formulas, endpoint and kinetic analysis
- Supplied with 4-Zone Temperature Control
- Extended dynamic range
- EL808IU-PC includes Gen5* data analysis software

BTELX808 Series

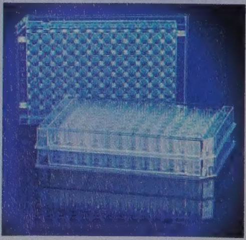
MICROPLATES

ASSAY PLATES — 96-WELL CLEAR

*Fisherbrand** 96-Well Plates

For EIA and other applications



21-377-204

- Polystyrene
- Results with CV of <5% between wells and replicate values within ±10% of the mean
- Background of wells is within 0.005 absorbance units from mean
- Small lip at each well top and ridges between wells prevent well-to-well contamination
- Flat well bottom surface provides greater area for binding
- Rows and columns are labeled alphanumerically; plates stack for easy storage
- Specially treated to ensure high binding of hydrophobic or partially hydrophobic molecules like viral antigens and proteins

ORDERING INFORMATION:
Nonsterile microplates are supplied in bulk packs of 50 plates. Sterile microplates come individually wrapped with lids in packs of 40 plates.

CERTIFICATIONS:
Cat. No. 21-377-203 is supplied with a certificate attesting to its high-binding capabilities.

*Fisherbrand** Clear Polystyrene 96-Well Plates

Designed for compatibility with automated equipment

12-565-501

- Polystyrene
- Plates stack easily with or without lids
- Available in flat or round well shapes
- Nonsterile
- Untreated, provides uniform surface properties
- Use 12-565-511 lid (sold separately)

Description	Well Shape	Working Volume	Cat. No.	Case of
Clear polystyrene plate	Round	250µL	**12-565-500**	80/110.53
Clear polystyrene plate	Flat	350µL	**12-565-501**	80/115.10
Lid	----	----	**12-565-511**	180/199.62

Costar* 96-Well EIA/RIA Plates

Provide uniform binding, high optical clarity, and low background absorption

07-200-35

- Medical-grade polystyrene
- Available with Easy-Wash*, flat, or round well shapes
- Easy-Wash wells have tapered bottoms, eliminating the "dead zone" that can be missed by automatic plate washers
- High- or medium-binding surfaces

NOTE:
For information on Corning* EIA Certification, see below.

Well Shape	Well Volume	Packaging	Mfr. No.	Cat. No.	Case
Medium Binding					
Easy-Wash	360µL	25/pack	3368	**07-200-641**	100/200.6
Flat	360µL	1/tray	3591	**07-200-36**	50/138.7
Flat	360µL	25/pack	9017	**07-200-98**	100/132.9
Round	360µL	25/pack	3797	**07-200-105**	100/133.0
High Binding (with Corning Certified Surface Chemistry)					
Easy-Wash	360µL	25/pack	3369	**07-200-642**	100/269.6
Flat	360µL	1/tray	3590	**07-200-35**	100/280.8
Flat	360µL	25/pack	9018	**07-200-39**	100/269.5
Round	360µL	25/pack	3366	**07-200-640**	100/289.6

Corning* EIA Certification

Costar* EIA/RIA plates and strip plates have surface chemistries designed for research and in vitro diagnostic assays; are treated for uniform binding and provide consistent, reproducible results. High-binding surface has 500ng mouse IgG/cm^2 capacity; medium-binding surface, 250ng IgG/cm^2. Strip plates are certified to have the properties shown below.

Binding Property	Well-to-Well Coefficient of Variation	Average High and Low Wells from the Mean	Background Absorbance Units from the Mean
High	≤3%	±8%	±0.005
Medium	≤5%	±15%	±0.005

Costar* Clear Polystyrene 96-Well Plates

Ideal for serial dilutions, hemagglutination, or precipitation assays

07-200-656

- Medical-grade polystyrene
- Flat, round, or V-shaped bottoms
- Untreated or tissue culture treated

Nunc* Immunology Transferable Solid Phases (TSP)

Similar to a microplate lid but with 96 sterile, built-in pins

- Polystyrene
- Position of pins matches well positions in 96-well microplate or module
- Usable when replating and screening microplates of transformants or library clones, screening hybridoma cultures or expression libraries, or adsorbing mixed proteins or antibodies directly from cultures
- Precoat pins with antigen or antibodies to assay specific analyte from cultures
- With reservoir tray

12-565-143 (microplate not included)

Nunc* MicroWell* F96 Plates for Automation

Skirt design facilitates manipulation by robotic arm

- Clear polystyrene
- High plate flange and identical lid height allow automated handling without changing the setting
- Lids feature condensation rings to reduce evaporation and prevent well-to-well crosstalk (not available with all plates)
- Bar coding available
- 96 flat-bottom wells, except Cat. No. 12-565-720, which features round-bottom wells
- Working range: 50–250µL/well
- Plates available treated or untreated
    - **Untreated plates** for enzymatic determinations, storage, dilutions, and general applications
    - **Collagen I**, **Nunclon*Δ**, and **Poly-D-Lysine** plates optimized for cell based assays
    - **MaxiSorp***, **MediSorp***, **MultiSorp***, and **PolySorp*** for solid phase immunoassays

12-565 Series

Corning* 96-Well Clear-Bottom Nonbinding Surface (NBS*) Microplates

Enhanced signal-to-noise ratio

07-200-779 (top), 07-200-73

- Ideal for homogenous assays such as Scintillation Proximity Assays (SPA) and fluorescent assays
- Modified polymer surface is nonionic hydrophilic, minimizing bio-interaction within wells to reduce nonspecific binding and reagent costs
- Significantly reduces protein and nucleic acid binding to polymers, maintains enzyme activity, and inhibits adhesion of a number of cell lines
- Stable to aqueous solutions containing EtOH
- Use at temperature range of 4° to 37°C (39° to 99°F)
- Flat-bottom wells
- Compatible with a wide range of plate readers, liquid handlers, and robotic systems

Color	Well Volume	Lid	Sterile	Mfr. No.	Cat. No.	Case of 100

Corning* 96-Well Nonbinding Surface (NBS*) Microplates

Enhanced signal-to-noise ratio

- Ideal for homogenous assays such as Scintillation Proximity Assays (SPA) and fluorescent assays
- Modified polymer surface is nonionic hydrophilic, minimizing bio-interaction within wells to reduce nonspecific binding and reagent costs
- Significantly reduces protein and nucleic acid binding to polymers, maintains enzyme activity, and inhibits adhesion of a number of cell lines
- Stable to aqueous solutions containing EtOH
- Use at temperature range of 4° to 37°C (39° to 99°F)
- Compatible with a wide range of plate readers, liquid handlers, and robotic systems

Costar* 96-Well Half-Area Plates

Save on expensive reagents—4.5mm bottom diameter uses less reagent per well

07-200 Series

- Polystyrene
- Flat wells
- Surface area per well: 0.16cm^2
- Alphanumeric grid
- Standard external dimensions compatible with most plate readers
- Choice of four surfaces: **untreated** for homogenous assays, **high-binding** for EIA applications, **non-binding surface (NBS*)** for the minimization of protein and nucleic acid binding, or **tissue culture treated** for cell growth

Nunc* 96-Well Polystyrene Plates

Ideal for fluoroimmunoassay (FIA) and immunofluorometric assay (IFMA) techniques

- Available with flat-bottom or C-shaped wells
- Black format reduces back scatter light which may be encounteredin epifluorescence
- White format gives highest possible signal reflection with low background fluorescence; recommended for epifluorescence and luminescence
- Transparent or clear format for Time Resolved Fluorescence applications only
- **Untreated**, **MaxiSorp*** (high protein affinity), **Nunclon* Δ** (anchorage dependent cell attachment), or **PolySorp*** (high hydrophobic molecule affinity) surfaces

12-565-290A, 12-566-07

CERTIFICATIONS:

Cat. Nos. 12-565-290A and -290D are certified for adsorption of IgG; CV of <5% between wells; all well results ±10% from mean; and background of all wells ±0.005 absorbance units from mean.

Nunc* White 96-Well Polystyrene Plates

Emit minimum autoluminescence and autofluorescence while providing maximum reflection

- Special white polystyrene is optimized for fluorescent and luminescent detection
- Wells permit minimal light transfer through walls
- Designed to reduce the risk of cross-contamination
- Dimensions fit standard equipment
- Available untreated and with three surface treatments
  - **MaxiSorp*** (high protein affinity)
  - **Nunclon* Δ** (anchorage-dependent cell attachment)
  - **PolySorp*** (high hydrophobic molecule affinity)

Nunc* Immobilizer* Amino Plates and Modules

Provide instant covalent coupling of peptides, proteins, enzymes and antibodies

- Choice of polystyrene 96-well plates or 8-well × 12 strip modules
- Ideal for antigen ELISA, FIA, LIA, NA hybridization assays
- Ready to use—no activation steps or blocking steps
- Long-term stability at room temperature (two years)
- Reaction site easily accessible
- Form covalent bond with nucleophilic groups, e.g., amines
- Immobilize molecules that bind poorly to passive surfaces
- Low reagent consumption
- High signal-to-noise ratio

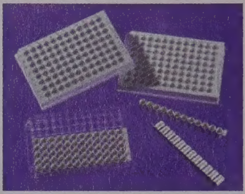
Thermo Scientific* Microlite* White Microtiter* Plates

Maximum sensitivity white increases signal reflectivity without increasing crosstalk and background

- Polystyrene plates with flat-wells designed for use in luminescence reactions
- Available in three formulations:
  - Nonirradiated **Microlite 1** provides medium binding, high reflectivity, and low crosstalk for use in PCR quantitation, reporter gene detection, phagocytosis, and luminescent immunoassay applications
  - Irradiated **Microlite 2** provides high binding, high reflectivity, and low crosstalk for use in PCR quantitation, reporter gene detection, phagocytosis, and luminescent immunoassay applications
  - Sterile **Microlite TCT** for use in luminescent tissue culture assays
- Available in plates or 12-well Removawell Strips



12-245 Series

NOTE:

Other configurations are available in Microlite 1 and 2 formulations; contact your Fisher Scientific Customer Service Representative.

Whatman* 96-Well Black or White UNIPLATE* Microplates

One-piece molded collection plates

- Polystyrene
- Designed for fluorescence and chemiluminescense applications
- Withstand low temperatures (-20°C) for long-term storage
- Conforms to ANSI/SBS (American National Standards Institute, Society of Biomolecular Screening) standards for compatibility with most microplate readers and automated plate-handling devices
- Untreated

NOTE:

Clear UNIPLATE microplates also available, see p. 1127

Corning* Black 384-Well Polypropylene Assay Plate

Lower compound sticking and higher solvent resistance than polystyrene plates

07-200-765

- Ideal for fluorescence assays and for compound storage
- Round-bottom wells
- Untreated

Color	Well Volume	Lid	Sterile	Mfr. No.	Cat. No.	Case of 100
Black	95µL	No	No	3658	**07-200-765**	404.74

Corning* 384-Well Nonbinding Surface (NBS*) Microplates

Enhanced signal-to-noise ratio

07-201-102

- Ideal for homogenous assays such as Scintillation Proximity Assays (SPA) and fluorescent assays
- Modified polymer surface is nonionic hydrophilic, minimizing bio-interaction within wells to reduce nonspecific binding and reagent costs
- Significantly reduces protein and nucleic acid binding to polymers, maintains enzyme activity, and inhibits adhesion of a number of cell lines
- Stable to aqueous solutions containing EtOH
- Use at temperature range of 4° to 37°C (39° to 99°F)
- Flat-bottom wells
- Compatible with a wide range of plate readers, liquid handlers, and robotic systems

Color	Well Volume	Lid	Sterile	Mfr. No.	Cat. No.	Case of 100

White/clear bottom	112µL	No	No	3653	**07-201-105**	982.59

Corning* 384-Well Low-Volume Solid Microplates

Same low reagent volumes as 1536-well plates without the need for new instrumentation.

Polystyrene plates feature a unique square-to-round well design with a conical-shaped bottom that provides easier access and imaging for superior assay performance.

12-565-461 (top), 07-200-331

- Bottom reduces fluid and air entrapment, greater signal-to-noise ratio and reduced FP signal (mP) when working with very low volumes
- Each well has a raised rim to reduce cross-contamination during assay and liquid-handling process
- Choose black plates for fluorescence applications or white for luminescence applications

High-Binding Surface Plates

- Ideal for immunoassays
- Can bind medium (>10kDa) and large biomolecules that possess ionic groups and/or hydrophobic regions
- Working volume: 2 to 20µL

Medium-Binding Surface Plates

- Designed for a wide variety of HTS applications, including TR-FRET, HEFP and receptor binding
- Working volume: 2 to 20µL

Nonbinding surface (NBS*) Plates

- Designed for fluorescence polarization, scintillation proximity assay (SPA), and any assay that requires enhanced signal-to-noise ratio
- Coating allows for increased signal-to-noise ratio and remains stable with aqueous solutions containing up to 20% ethanol, 20% isopropyl alcohol, 20% DMSO, 1% SDS, or 10M urea
- Working volume: 2 to 15µL

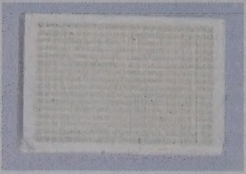
Nunc* 384-Well Polypropylene Plates

Resist many alcohols and solvents and offer minimal binding properties

- Polypropylene
- Withstand low-speed centrifugation
- Rounded square-well geometry for reduced wicking
- Working volume range: 10 to 100µL/well
- Conform to ANSI*-standard footprint
- Compatible with robotics and automated systems



12-565-386

- Opaque plates for fluorescence and luminescence applications
- White plates provide maximum reflection of signal
- Black plates offer low background and minimize backlight scatter

Color	Sterile	Mfr. No.	Cat. No.	Case of 120

Nunc* DeepWell* 384-Well Plates

Store samples containing DMSO, ethanol, or other strong chemicals and solvents

- Chemical-resistant polypropylene
- Wells have square openings with conical bottoms
- Raised rims are ideal for heat or adhesive sealing
- Withstand exposure to temperatures from -80° to +80°C
- Footprint conforms to SBS (Society of Biomolecular Screening) standards
- Automation compatible

12-565-229

Color	Well Volume	Working Volume	Sterile	Mfr. No.	Cat. No.	Case of 60
Natural	252µL	5–240µL	No	269390	**12-565-229**	368.50

Nunc* Sealing Tapes

Effectively seal all microplate formats

- Withstand temperatures from below freezing to 100°C
- Thin, lightweight tapes are sealed onto the plate with a convenient, handheld applicator (available separately, 12-565-463)
- Pressure-sensitive adhesive is not tacky to the touch, but forms a strong bond to the plate upon application of pressure

ACCESSORIES

hermo Scientific* ABgene* 96-Cap Sealing Mats

6 round- or square-capped mats for sealing 96-well torage plates

- Alphanumeric grid-referencing
- Autoclavable or pierceable formats
  - Pierceable are solvent resistant (including DMSO)
  - Autoclavable are not DMSO resistant

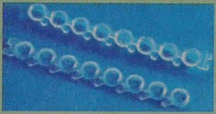
AB-0566 shown with microplate (sold separately)

escription	Closure	Cat. No.	Case of 50
ierceable, nonautoclavable	Round	AB-0566	136.75
erceable, nonautoclavable	Square	AB-0662	130.79
utoclavable	Round	AB-0674	153.45
utoclavable	Square	AB-0675	153.45

hermo Scientific* Storage Plate Cap Strips

ermit simultaneous sealing of eight wells

- Strips of eight caps for sealing storage plates and racked cluster tubes
- Each cap individually numbered, with low profile for increased well volume and end tabs for easy removal



AB-0981

- Use with microplates, 0.8mL storage plates, 1.2mL round-well storage plates, or 1.2mL cluster tube range

t. No.	Case of 120
-0981	49.32

ermo Scientific* Plate Covers

revent contamination or spillage of samples

- Polystyrene covers are suitable for all 96-well plates
- Polypropylene covers are suitable for use with Thermo-Fast* 384 plates
- Nonridged covers are for use with automated systems
- Ridged covers permit stacking of covered plates

aterial	With Stacking Ridge	Cat. No.	Case of 50

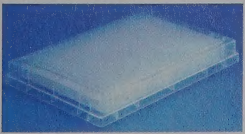
ermo Scientific* ABgene* 384-Well rage Plates, 120µL

ot compatible

- are wells with pyramidal well tom for easy sample retrieval
- crete raised rims around each l for effective sealing also uce risk of cross-contamination
- litional raised corner rims ect edges of seals
- l with heat or adhesive



AB-0781

	Well Volume	Cat. No.	Case of 50
al	120µL	AB-0781	270.94

Thermo Scientific* ABgene* 384-Square, Deep-Well Storage Plates, 250µL

With alphanumeric grid referencing

- Square wells with conical bottom for ease of sample retrieval
- Discrete raised rims for effective sealing also reduce risk of cross-contamination
- Higher raised corner rims protect edges of seals
- Seal with heat or adhesive
- Maximum well volume of 250µL

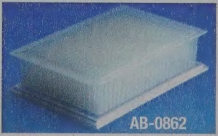
AB-1178

Color	Well Volume	Cat. No.	Case of 50
Clear	250µL	AB-1178	428.24

Thermo Scientific* ABgene* 384-Square, Deep-Well Storage Plates, 300µL

Seal with heat or adhesive

- Pyramid well bottom for ease of sample retrieval
- Discrete raised rims around each rim for effective sealing also reduce the risk of cross-contamination
- Higher raised corner rims protect edges of seals



AB-0862

Color	Well Volume	Cat. No.	Case of 50
Natural	300µL	AB-0862	380.31

Thermo Scientific* Grid-Referenced Twist-Lock Tube Rack

For sample collection and storage of DNA, blood, cell lines, and tissue

- Suitable for storage at -20°C; -80°C and in vapor phase liquid nitrogen
- Alphanumeric grid reference corresponding to tube position in the 96-format rack, facilitating sample tracking and identification
- Encapsulated 2D Matrix* code on each tube base provides robust sample management and tracking; all codes guaranteed to be unique
- Tube features dual seal—"locks in" with the cap in two distinct positions
- Low profile maximizes freezer space
- Caps made of a proprietary inert polymer that increases seal strength at cold temperatures
- Caps can be applied and removed from tubes while in the rack with Twist-Lock Cap-It (included) or Twist-Lock Tool (available separately through your Fisher Scientific Representative)
- Working volume 900µL when capped (810µL recommended when freezing)
- Complies with SBS guidelines
- All components cleanroom produced and contamination free

AB-1258

Cat. No.	Pack of 10
AB-1258	509.19

WARNING

Immersion of tubes and racks in liquid nitrogen introduces safety and contamination risks. Racks should be stored in vapor-phase liquid nitrogen only.

Whatman* 24- and 48-Well UNIPLATE* Microplates

Natural polypropylene plates with 24- or 48-well formats

- High chemical resistance
- Withstand low temperatures (-80°C) for long-term storage
- Conform to ANSI*/SBS standards for compatibility with most microplate readers and automated plate-handling devices

No. of Wells	Well Shape	Well Capacity	Mfr. No.	Cat. No.	Pack of 25
24	Round	10mL	7701-5102	**PF77015102**	170.31
48	Flat (Rectangular Well)	5mL	7701-5500	**PF77015500**	170.95

Whatman* 96-Well UNIPLATE* Microplates

Withstand temperatures to -80°C for long-term storage

- Chemical-resistant polypropylene
- One-piece molded collection plates
- Choose from V-shaped or round well shapes
- Conform to SBS (Society of Biomolecular Screening) standards for compatibility with most microplate readers and automated plate-handling devices
- Untreated

PF77015250

Whatman* Deep 384-Well UNIPLATE* Microplates

Unique "square-to-round" wells

- Manufactured from chemically-resistant and inert natural polypropylene
- Usable for both compound storage and cell cultivation
- Autoclavable
- Well design maximizes volume-to-height ratio for efficient sample recovery
- Wicking is restricted by slightly rounded well corners
- Meet SBS (Society for Biomolecular Screening) standard dimensions

PF77015400

Color	Well Volume	Cat. No.	Pack of 2
Natural	400µL	**PF77015400**	181.7

BD Falcon* Deep 96-Well Plates

Innovative conical-well bottom design localizes sample volume

- Chemical-resistant polypropylene
- Well design improves sample concentration, reconstitution, and centrifugation
- Both 1 and 2mL volume plates have identical external footprints (86 × 128mm) for minimal equipment adjustments between runs
- Designed for flexibility and use in automated liquid-handling equipment

08-772 Series

Well Volume	Sterile	Mfr. No.	Cat. No.	Case of 5
1mL	No	353964	**08-772-117**	195.60

BD Falcon* Multiwell Library Storage Plate and Lid

Ideal for storing, archiving, and transporting of pharmaceutical drug candidates

- Plate and lid are manufactured from high-quality medical-grade polypropylene formulated for low DMSO extractables
- 96-well plate with round-bottom well shape
- Solvent-resistant lid has a generous stacking ring—keeps plates stable during use or storage
- Comes with white marking area for sample identification; usable with ink-jet bar coding
- Usable with robotic equipment

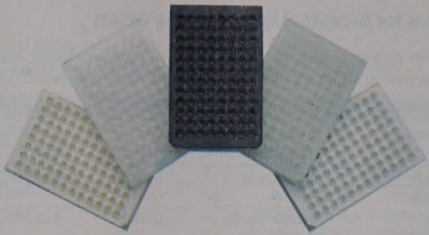
SPECIALTY PLATES—FILTERING

llipore* MultiScreen* 96-Well Assay Plates



atile separation system combines a microplate with Millipore's
brane filtration to simplify and optimize drug discovery techniques,
emical assays, and traditional sample preparation.

e with a vacuum manifold, automated liquid-handling system, or
croplate scintillation counter—entire assays can be performed on
e plate

embrane-to-plate seal ensures no reagent crosstalk and limited optical
sstalk

tented underdrain support structure allows liquid volumes to be maintained for incubation times of up to 21 days; also ensures quantitative
rate transfer to a receiver plate placed in bottom of manifold

ice of filter materials

high protein binding applications, use plates with Immobilon*-P
DF or mixed cellulose esters

high nucleic acid binding, use plates with mixed cellulose esters,
ss fiber, or positively charged DEAE membranes

charged biomolecule separations, choose from positively charged
AE or negatively charged phosphocellulose membranes

low biomolecule binding, use plates with hydrophilic Durapore*
DF, Biopore* PTFE, or polycarbonate membranes

assays that require **solvent resistance**, use plates with hydrophilic
FE membranes

E:

microporous membrane interacts distinctly with different proteins or
olecules, therefore, it may be necessary to test different membrane
for each assay.

MultiScreen plates for: Caco-2 Permeability Plasma bound vs. free drug
MultiScreen plates for: ELISPOT assays

tes for ADME Assays

de tools to perform high-throughput studies of ADME processes—the investigation of the adsorption, distribution, metabolism, and excretion of
tial drugs.

cation	Description	Color	Material	Membrane Type	Pore Size	Sterile	Cat. No.	Pack of
PA	MultiScreen-IP w/Underdrain	Clear	Acrylic	Immobilon*-P PVDF	0.45µm	No	**MAIP N45 50**	50/701.00

Millipore* MultiScreen* 96-Well Assay Plates, Contd.

Plates for Receptor Ligand Binding Assays

Ideal for performing receptor binding assays involving whole cells, membrane fragments, or purified receptors; also suitable for Scatchard analysis, as has been demonstrated in numerous receptor-binding assays including Interleukin I, Angiotensin II, and C5a studies. Nontoxic.

Application	Description	Color	Material	Membrane Type	Pore Size	Sterile	Cat. No.	Pack of

ACCESSORIES

acuum Manifold Basic Kit

ilters to drain standard multiwell plate, deep-well late, or undersized plate

- Has no internal parts subject to wear or damage
- Automation-friendly—robotic arm can remove ring, access the plate, and then replace ring

RDERING INFORMATION:

imensions (without MultiScreen* plate; with standard ring):
13⁄16L × 6W × 2⅝"H (12.2 × 15.2 × 6.6cm)

NCLUDES:

ase, standard ring, gasket pair, support grid, vacuum gauge, N/OFF valve, vacuum control, and external tubing

escription	Cat. No.	Each
acuum Manifold Basic Kit	**MAVM 096 0R**	1250.00
eplacement Parts		
eep-well ring with gaskets	**MAVM 096 0T**	232.00
eplacement gasket set (1 each, top and bottom)	**MAVM XXA 04**	78.00
eplacement support grid	**MAVM XXA 05**	232.00
eplacement tubing set	**MAVM XXA 06**	62.00
eplacement ON/OFF valve, acuum control valve, and tee assembly	**MAVM XXA 07**	217.00
eplacement standard ring	**MAVM XXA 08**	149.00

entrifuge Alignment Frame

llows easy and accurate transfer of samples

- Transfer samples filtrate to the wells of a 96-well collection plate
- Prevents spillage or cross-contamination

or Application Type	Cat. No.	Each
queous	**MACF 096 04**	38.23

Column Loaders

No need to pipet slurries, gels, or resins

- Load all 96 wells simultaneously and uniformly
- Constructed of aluminum with an abrasion-resistant, chemically inert, nonstick coating
- Beveled acrylic scraper is tailored to fill wells and remove excess material back to a loading tray

Description	Cat. No.	Price
25µL Column Loader	**MACL 096 25**	Ea./301.38
45µL Column Loader	**MACL 096 45**	Ea./301.38
80µL Column Loader	**MACL 096 80**	Ea./301.38
100µL Column Loader	**MACL 096 00**	Ea./301.38
Replacement Scraper for all Column Loaders	**MACL OSC 03**	Pk. of 3/72.75

Sealing Tape

Choose from opaque or clear

- Opaque sealing tape is used to seal 100µL plate bottoms read in TopCount* instruments
- Clear sealing tape can be used to seal all manufacturers' 300µL plate tops and plate bottoms for MicroBeta* readers
- Precut to size

Description	Qty.	Cat. No.	Each
Opaque Sealing Tape	100	**MATA HOP 00**	42.25
Clear Sealing Tape	100	**MATA HCL 00**	42.25

LOOKING FOR MILLIPORE* MULTISCREEN* CACO-2 96-WELL ASSAY SYSTEMS?

The MultiScreen Caco-2 System is ideal for performing growth, feeding, and analysis in one plate. For complete details, see the Cell Culture section.

Millipore* MultiScreen$_{HTS}$* Solubility Filter Plate

96-well filter plate designed and optimized for aqueous solubility assays

- High throughput system to classify or quantify the aqueous solubility of compound libraries stored in solvent as a concentrated solution
- Analysis time in under four hours using <100µg of sample per test
- Automation compatible, with space for barcoding
- Validated for high drug recovery
- Low-binding membrane and low-binding plate materials

Filter Material	Cat. No.	Pack of
Polycarbonate	**MSSL BPC 10**	10/270.34
Polycarbonate	**MSSL BPC 50**	50/1248.00

MSSL BPC 10

Millipore* MultiScreen$_{HTS}$* 96-Well Filter Plates

Innovative plate design for full automation compatibility

Ideal for use in a broad range of drug discovery and life science applications, including receptor-ligand binding, general sample preparation, ELISPOT, enzyme activity, bead-based assays, whole organism visualization, and radioisotope detection.

- Standardized dimensions allow full compatibility with automated gripper arms, stackers, barcode labels, and plate readers; aligned, rigid sidewalls permit easy handling by robotic gripper arms
- Unique two-piece plate design eliminates surface contact with individual well "drip directors," prevents crosstalk between wells, and provides easy, contamination-free stacking and improved seal with vacuum manifolds
- Extended skirt enables stacking directly with collection plates, protects recessed underdrain, provides ample surface for barcode labels, and improves vacuum seal
- Removable underdrain allows membrane access for ELISPOT assays, whole organism visualization, and radioisotope detection
- Isolated well design and individually sealed filter discs eliminate potential for reagent flow from well to well
- Meet ANSI*/SBS 2004 plate specifications
- Available in clear, or opaque plastic to prevent light transfer between wells during direct scintillation counting

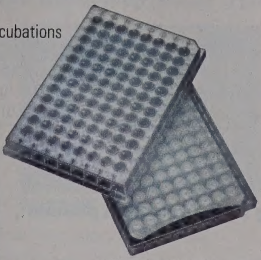
llipore* MultiScreen* Solvinert Filter Plates

vent-compatible plates optimized for drug discovery applications

- ear polyolefin base plate offers broad solvent compatibility
- e-piece design eliminates aking and allows for extended incubations
- w binding and low extractables
- commodate aqueous and naqueous samples with emically resistant hydrophilic hydrophobic membranes
- tomation compatible
- ailable in 96-well deep well nL) format (with or without filter) and standard (500µL) mat



MSRP and MSRL series

rning* Filtr*EX** Filter Plates

vidual filter discs eliminate liquid cross-contamination

- ented plate design features rigid, virgin polystyrene construction
- al for automated liquid handling, centrifugation and vacuum filtration
- de skirt easily accommodates bar code labels
- ividual filter discs are sealed in the wells to ensure 100% integrity of h well
- nchtop-safe design prevents contamination of bottom filtration nings while allowing plates to rest on the lab bench
- well plates hold a standard 350µL per well; high-throughput 384-well tes feature a 180µL working volume that simplifies protocol transition n the 96-well format
- ltiple filter media and pore sizes available to meet a variety of lications
- rophilic PVDF membrane in 0.2–0.45µm pore sizes for omatography support
- ss fiber membrane in 0.25–0.66mm thickness for PCR purifications
- ier membrane can be used for Plasmid DNA purification and n-throughput screening such as receptor-ligand binding and -based assays
- S standard dimensions

ORDERING INFORMATION:

Sterile plates are wrapped in packs of 5; 10 packs per case. Lids are not included, but may be ordered separately.

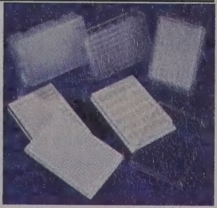
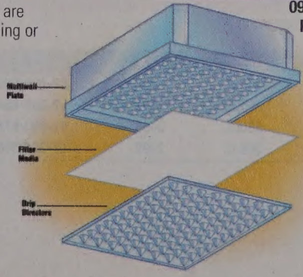
- Unique drip director design on the bottom of the plates controls filtrate placement
  - Long drip directors eliminate well-to-well contamination during the filtration process
  - Short drip directors are effective for screening or filtering to waste
- Standard footprint is compatible with most plate readers, autosamplers, and robots



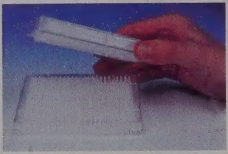
09-003 and PF770028 Series



Whatman* UniFilter* 384-Well Microplates

Long drip directors eliminate well-to-well contamination during filtration

- Clear polystyrene construction
- Ideal for use in DNA template cleanup, cell capture, and the removal of unwanted debris
- 384-well format microplates with a 100µL well volume allow a large enough sample for recovery after filtration



09-003-49

Membrane Type	Mfr. No.	Cat. No.	Pack of
0.45µm Hydrophilic PVDF	7700-2106	**09-003-49**	1136.

Whatman GF/C	7700-1101	**PF77001101**	1136.

Whatman* 96-Well Lysate Clarification Plate

Ideal for the removal of cellular debris from lysates during high-throughput plasmid DNA purification

- Polystyrene plate with a proprietary filter membrane
- Processes 96 lysates in <10 min.
- Compatible with vacuum filtration or centrifugation
- Produces recovery rates 10 to 30% higher than manual centrifuge methods
- Recovers an average of 6Rg DNA/well when used with the Whatman DNA Binding Plate (Cat. No. PF77002810, see previous page)
- Adaptable to automated platforms

05-714-035

Clear	800µL	No	7720-2830	**05-714-035**	502.

Whatman* Fast Flow Protein Precipitation Microplate

Fast, easy and automatable protein precipitation

- Prepare 96 samples up to 150µL for plasma and 200µL for serum in less than 10 minutes
- Minimal liquid handling—precipitation and filtration performed in one well
- Utilizes acetonitrile precipitation and vacuum filtration to remove protein contaminants from samples before downstream analysis
- Unique oleophobic membrane configuration retains acetonitrile/sample mixture during mixing or inoculation steps
- Vacuum filtration allows mixture to pass through the membrane while precipitated proteins remain in well
- Filtrate is then ready for HPLC injection or target UV quantitation
- Conforms with ANSI*/SBS size standards

09-923-14 with vacuum manifold (sold separately)

SPECIALTY PLATES — NUCLEIC ACID LABELING

Costar* DNA-BIND* 96-Well Plates

Convenient method for covalently immobilizing ssDNA by either the 5' or 3' end

- Ready to use without surface preparation, prehybridization, or addition of expensive crosslinking reagents or highly purified oligos
- Ideal for hybridization and amplification
- Surface provides binding with high specificity and extremely low background
- Flat-bottom wells

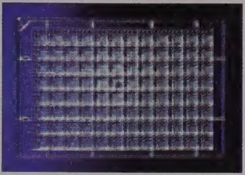
SPECIALTY PLATES — PROTEIN CRYSTALLIZATION

orning* 96-Well Next Generation Crystal*EX** Protein Crystallization Microplates

ptimized for high-throughput sitting-drop protein crystallization

- hoice of two materials: cyclic lefin copolymer (COC) and zero olarization polymer (PZero) for zero ackground polarization and non-irefringence
- ach of the 96 reservoir wells is lanked by either one, three, or five rotein wells—with SBS-standard pacing between the centers of djacent well clusters



07-201-830 Series

- igh-clarity protein wells offer optimal microscopic crystal viewing
- rystal cup well design facilitates centering and collecting of rotein crystals
- eservoir working volume: 25 to 150µL
- Vithout lids; use optical sealing tape (05-539-107)
- lphanumeric markers in each well cluster for easy identification under he microscope
- onform to SBS specifications for full compatibility in automated rystal screening
- vailable with hydrophilic-treated well surfaces for improved nicrodrop mixing

SPECIALTY PLATES — STREPTAVIDIN COATED

hermo Scientific* Microtiter* Streptavidin-Coated Plates

iversal binding surface

- ight-well strips assembled in a eusable, stackable, vented frame
- uitable for DNA hybridization ssays, binding of small hydrophilic nolecules, and molecules that adsorb oorly to polystyrene or denature pon adsorption
- ligh-binding capacity, stability for ntibodies and antigens, high optical uality and excellent binding haracteristics with low background bsorbance and fluorescence

21-377-2 Series

- Alphanumeric labeling
- Compatible with all standard microplate instrumentation

NOTE:

Breakable strips are ideal for processing a small number of samples.

SPECIALTY PLATES — TUBES AND STRIPS

Corning* Stripwell* Microplates

For in-vitro diagnostic assays

07-200-3 Series

- Designed and treated to provide uniform binding, high optical clarity, and low background interference
- Contain twelve 1 × 8 strips pre-assembled in an "egg crate" style holder
- Strips fit in frame in only one direction, eliminating the chance of misorientation
- Flat-bottom wells can be easily snapped apart to allow for radiometric analysis
- Hydrophobic **medium-binding surface** has a binding capacity of ~250ng IgG/cm^2 and is suited for large hydrophobic biomolecules
- Hydrophobic and ionic (negatively charged) **high-binding surface** has a binding capacity of ~500ng IgG/cm^2 and is ideal for use with positively charged biomolecules (>10kDa)
- Available in standard volume or low volume to save antibody and reagent costs
- Nonsterile

ORDERING INFORMATION:
Bulk packed. Cat. No. 07-200-97 individually packaged with lid. Cat. No. 07-200-24 has individual 1 × 8 strips without frame.

CERTIFICATIONS:

Surface Modified Stripwell* Microplates

Five surface chemistries suit every type of assay

- Same features as standard volume Stripwell microplates with choice of surface chemistries.
- Hydrophilic and ionic **amine** surface is ideal for small negatively charged biomolecules
- Benzophenone-coated **universal-BIND** surface is suited for use with biomolecules with an extractable hydrogen and covalent immobilization via UV crosslinking
- **DNA-BIND** surface allows covalent immobilization to amine groups an is ideal for use with DNA, proteins, and small peptides
- **Carbo-BIND** surface permits covalent immobilization to CHO moieties and works well with antibodies and Fab fragments
- **Sulfhydryl-BIND** surface enables covalent immobilization to sulfhydry groups and is perfect for use with biomolecules possessing an accessib sulfydryl group
- Volume per well, 360µL

Thermo Scientific* Immunlon* Immunoassay Plates and Strip Assemblies

Choice of three binding surfaces and two well shapes for reproducible results in immunoassay applications

14-245-78

- Available in clear polystyrene 96-well plates, Removawell* assemblies of 8- or 12-well strips preassembled into a form, individual 12-well Removawell strips, or Dividastrips* assemblies of two strips of eight wells preassembled into a form
- **Immulon 1 B** "binding" products have a consistent medium binding affinity for hydrophobic proteins and complexes
- **Immulon 2 HB** "high binding" products are irradiated to provide increased binding affinity for hydrophilic proteins and complexes
- **Immulon 4 HBX** "extra-high binding" products are also irradiated and offer maximum hydrophilic protein uptake and guaranteed coefficient of variation

PHYSICAL BASIS OF FLUORESCENCE

Fluorescence is the emission of photons by atoms or molecules whose electrons are transiently stimulated to a higher excitation state by radiation from an outside source.

In other words, light of a specific wavelength (the excitation wavelength) hits a sample that has been stained with fluorescent dye and, as a result, the sample then gives off light of a specific wavelength (the emission wavelength).

Excitation and emission of light is almost simultaneous: the emission is $<10^{-6}$ seconds after end of excitation.

Because energy is given up in this process, the emission wavelength will always be long.

arl Zeiss* Fluorescence Microscopes

The Axioskop 40 FL and Axio Imager D1 are upright microscopes used primarily to view either covered or uncovered slides and occasionally specimens in small vessels.*

The Axiovert 40 CFL is an inverted microscope/tissue culture microscope and is used to view cells in various vessels, i.e., Petri dishes, roller bottles, multi-well plates and flasks.*

ILLUMINATION TECHNIQUE REVIEW

Contrast is defined as the:

$$\frac{\textbf{Brightness of Specimen - Brightness of Background}}{\textbf{Brightness of Specimen + Brightness of Background}}$$

Many things that are otherwise invisible to us can be made visible with added contrast.

Fluorescence Illumination is defined as the luminous phenomenon of substance after illumination. In other words, a dye, specifically a fluorochrome, is used to make a specific structure "glow" when illuminated by a specific wavelength of light—the excitation wavelength.

IMPORTANT APPLICATIONS

- **Immunostaining or Immunohistochemistry**
  Antibody - Antigen - Reaction
  High specific staining of molecules in tissues and cells
- **Injection of vital dyes**
  Observation of live cells or components of cells
- **Ca^{2+} Imaging**
  Observation of intracellular molecular activities during changes of pH, electrical stimulation, drug application
- **FISH = Fluorescence In Situ Hybridization**
  Staining of parts or even genes on a chromosome
- **GFP = Green Fluorescent Protein**
  Detection of location and time point of a gene expression in a living specimen

For a full selection of Zeiss® Fluorescence Microscopes, see pp. 1156–1157, 1161.

MICROSCOPES

COMPOUND MICROSCOPES

Carl Zeiss* Axio* Imager* D1 Digital Imaging Microscopes

Innovative, modular microscopy platform for both routine and research requirements and applications

Ideal imaging solution:

- Uncompromising focus on digital microscopy
- IC2S Principle optics for highest resolution, more information in all contrast methods
- Higher-contrast fluorescence option
- Modular, intelligent stand architecture with integrated software to control all of your work steps
- Imaging cell and closed loop z-focus for highest precision
- Extremely comfortable ergonomics and operation

Superb Optics

- IC2S Principle for high contrast in all techniques: apochromatically corrected beam path
- New ergotube provides ideal viewing posture
- Optional high-performance/high-resolution objectives: EC Plan-Neofluar* universal for minimized stray-light, improved contrast; Plan-Apochromat 63X/1.4 Oil for outstanding point spread function, improved chromatic correction; LCI Plan-Neofluar 25X/0.8 and 63X/1.3 1mm Korr for live cell imaging techniques; calculated for certain temperature intervals
- Brilliant darkfield from 2.5X to 100X combined with brightfield in one condensor

Superior Fluorescence

- Fluorescence model provides up to 70% higher excitation intensity with high-performance filter sets and optimized reflected light path
- Up to 50% shorter exposure times
- Fast 6X and 10X reflector turrets

Built-In Intelligence

- Standard interfaces for direct communication internally or externally
- Light manager for fast and easy change between contrast methods

Stand architecture

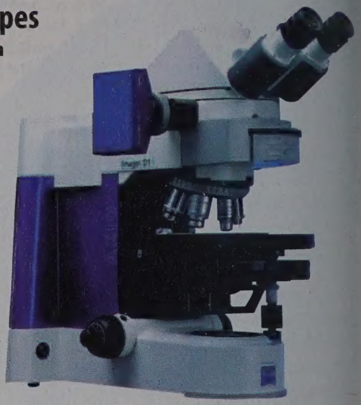
- Extremely flexible; modular expansion
- Imaging Cell isolated from stand to prevent vibrations
- Accessible planes in reflected and transmitted light path, as well as infinity light path

Imaging

- AxioVision* versatile, integrated software for such needs as z-stack, multichannel fluorescence, or time lapse images
- Rapid image acquisition with outstanding quality in up to six dimensions
- Perfectly harmonized system components
- Up to 40% faster experiments

Axio Imager D1 Pathology Microscope for transmitted light Brightfield

- **Eyepiece:** 10/X25 focusing with folding eyecup
- **Head:** Binocular, with phototube
- **Nosepiece:** 7X
- **Objectives:** Achroplan 10X/0.25 N.A., 20X/0.45 N.A., 40X/0.65 N.A., 100X/1.25 N.A. Oil
- **Stage:** Mechanical stage, 75 × 50mm; with 76 × 26mm single specimen holder, stage condenser carrier
- **Condenser:** 0.9 H; conversion filter, 3200° to 5600°K; filter wheel and 25mm filter set
- **Illumination:** 12V 100w Halogen Illuminator



Axio Imager D1 12-070-611

Axio Imager D1 Microscope for Brightfield and Epi Fluorescence

- **Eyepiece:** 10X/25 focusing with folding eyecup
- **Head:** Binocular, with phototube
- **Nosepiece:** 7X
- **Objectives:** Achroplan 10X/0.25 N.A Ph1, 20X /0.45 N.A., 40X /0.64 N.A., 100X /1.25 N.A. Oil
- **Stage:** Mechanical stage, 75 × 50mm; with 76 × 26mm single specimen holder, stage condenser carrier
- **Condenser:** 0.9 H; conversion filter, 3200° to 5600°K; filter wheel and 25mm filter set
- **Illumination:** 12V 100w Halogen Illuminator and HBO burner

ORDERING INFORMATION:

Additional components available; contact your Fisher Customer Service Representative for details.

INCLUDES:

Stand, Ergo phototube, eyepieces, 75 × 50mm mechanical stage, right-hand z-drive, specimen holder, objectives listed above, condenser, 12V 100w bulb, light manager, conversion and white balance filters, filter wheel and filter set, dust cover, manual. AxioImager D1 Microscope for Brightfield and Epi-Flourescence adds: fluorescence shutter, slider with fie disphragm, attenuator, 6X turret; fluorescence cube and filter sets 01 EX B 365/12, 10 EX BP450-490, 15 EX BP 546/12; antiglare screen, HBO burner† lamp and power supply.

lagnifications of 10X, 20X, 40X and 100X: Achroplan lenses
arge 23mm field of view to facilitate recognition of structures
latching condenser for objective magnifications down to 1X
omogeneous illumination of the field of view
ertically and laterally reversed images meet pathologists' standard
olor fidelity in brightness change due to special neutral density
lter rings
ontrast techniques: brightfield transmitted light; fluorescence for
upplementary immunohistochemical examinations (molecular pathology)

Carl Zeiss* Basic Image Analysis Systems

Available with digital color or monochrome camera

Complete package: computer, software, digital camera

- AxioVision* Light Software
- Zeiss computer
- PixeLink* monochrome or color camera
- Viewsonic 19" flatscreen LCD monitor

PixeLink IEEE-1394 Digital Color or Monochrome Video Camera

- High-resolution, low-latency video streams and digital still images
- Output signal: IEEE-1394
- 1.3 megapixels; 1280 × 1024 pixels; pixel size: 6µm × 6µm
- Chip size:7.68mm × 6.14mm, 9.8mm diagonal
- Spectral sensitivity: 400 to 700nm
- Resolution options: 1280 × 1024, 1024 × 768, 800 × 600, 640 × 512, 640 × 480, 320 × 240 pixels
- Digitization: internal: 10bit, limited to 8 bit by twain driver
- Dynamics: 54db
- Exposure time: 1ms to 300ms
- Interface: Firewire*/IEEE 1394, 6-pin socket; 400Mb/sec.
- Optical interface: C-mount
- Max. file size per image: ~ 3.9MB with 1280 × 1024 at 3 × 8 bit
- Operating systems: Windows* 2000, XP
- Housing: magnesium with ¼" threaded camera adapter
- Mounts to any microscope

Viewsonic VP191B 19" Flat LCD

- Color TFT active matrix SXGA LCD
- Display area: 14.8" horizontal × 11.9" vertical; 19.0" diagonal
- Optimum resolution: 1280 × 1024
- Contrast ratio: 700:1 typical
- Viewing angles: 170° horizontal, 170° vertical
- Response time: 16ms typical
- Brightness: 250 cd/m² typical
- Glass surface: anti-glare
- Video inputs two RGB analog (75 ohms, 0.7/1.0V P-P); DVI-D (TMDS, 100 ohms)
- Frequency: FH, 30 to 82kHz; FV, 50 to 85Hz
- Sync: h/v separated (TTL), composite, sync-on-green
- Compatibility: PC VGA up to 1280 × 1024

12-070-616

Axiovision 4.X LE Image Acquisition Software

- For light microscopy under Windows* 2000 SP4 and Windows XP* SP
- Image acquisition with any TWAIN camera
- Create scalings for different magnifications; view complex ZVI images with 3 × 8 bit, 3 × 12 bit, 3 × 14 bit, and 3 × 16 bit cut view
- Image export to bmp, jpg, j2k, tif, tga, png, psd, img, cmp formats
- Image enhancement of brightness, contrast, gamma, shading; change image dimensions
- Annotations as text, boxes, scale bars
- Interactive measurement of length, area, perimeter, angle
- Built-in image browser

extensive laboratory use in clinical and research settings

-quality Carl Zeiss optics deliver optimal performance at an economical
. Medium-sized pyramid design offers high stability. Condenser accommo-
s brightfield, phase-contrast, darkfield, polarized light and fluorescence
niques. Four complete packages are listed below.

finity Color-Corrected Optics System (ICS): Objectives and binocular
be form color-corrected primary image; needs no additional correction;
ss glass provides more light transmission, greater clarity

yepieces: E-PL 10X/20mm FOV eyepieces are supplied; eyepieces may
used by spectacle wearers

ead: Ergonomic binocular tube provides viewing angle of 30° or 45°,
terpupillary distance correction and adjustable eyepiece height

osepiece: Rotatable four- or five-position nosepiece with precision
ll-bearing mechanism; positive click stops

bjectives: Packages include A-Plan objectives in magnification factors
5X, 10X, 40X, 40X Ph2, 50X and 100X oil immersion

tage: 75 × 30mm mechanical stage has adjustable height, controllable
ction, coaxial x/y stage control for smooth movement, precise specimen
ljustment, even at high magnifications; ceramic-coated plate

ocus: Coarse and fine controls with coaxial knobs on both sides of
and, comfortable for right- or left-hand use; planetary gear drive is
aintenance-free, self-adjusting, has positive end stops

ondenser: Abbe-type 0.9/1.25 condenser for routine brightfield, phase-
ntrast and darkfield; aperture diaphragm included for Koehler illumination

ght source: Brightfield, Brightfield/Ph2 and Hematology packages
ave built-in UL-listed 6V, 20w halogen illumination for optimum image
ightness even with phase-contrast techniques; fluorescence package
cludes 50w HBO mercury burner

DERING INFORMATION:

itional packages and accessories are available; contact your
er Scientific Customer Service Reperesentative for details.

LUDES:

packages include stand, head, eyepieces, stage, objectives, condenser,
ninator, filter, dust cover, immersion oil, power supply and cord.

ghtfield Package (12-072-400) offers binocular phototube, 30°,
00/100; 10X/20mm E-PL eyepieces, 1 fixed, 1 focusable; right-hand stage
specimen holder; luminous field diaphragm with iris; five-posiiton
lving nosepiece; four A-Plan objectives (5X/0.12, 10X/0.25, 40X/0.65,
X/1.25 oil); contrast enhancement filter.

ghtfield/Ph2 Package (12-072-401) includes binocular phototube, 30°,
00/100; 10X/20mm E-PL eyepieces, 1 fixed, 1 focusable; right-hand stage
specimen holder; four-positon revolving nosepiece; three A-Plan
ctives (10X/0.25, 40X/0.65 Ph2, 100X/1.25 oil); condenser slider for Ph2;
m dia. pinhole diaphragm, contrast enhancement filter.

rescence Package (12-072-402) features binocular phototube, 30°,
00/100; 10X/20mm E-PL eyepieces, 1 fixed, 1 focusable; right-hand stage
specimen holder; luminous field diaphragm with iris; four-positon
lving nosepiece; three A-Plan objectives (10X/0.25, 40X/0.65 Ph2, 100X/1.25
contrast enhancement filter; FL reflected light illuminator; FL cube and FITC
r set; HBO mercury burner with digital meter and power supply.

natology Package (12-070-442) offers binocular phototube, 45°,
00/100; 10X/20mm focusable E-PL eyepieces; right-hand stage with
cimen holder; five-positon revolving nosepiece; four A-Plan objectives
/0.25 WD 4.4mm, 40X/0.65 WD 0.43mm, 50X/0.9 oil WD 0.29mm,
X/1.25 oil WD 0.22mm); rotatable polarizer D.

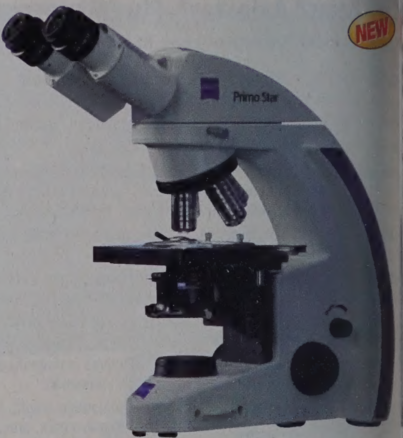
Carl Zeiss* Primo Star* Microscopes

High performance for a variety of applications

Robust, easy to operate, equipped with good optics and reasonably priced. Zeiss designed the Primo Star to provide long-term use and great durability. Available in ten different preconfigured packages, you'll find a version for every set of requirements. This microscope, together with its many practical accessories, can be used for education, in the laboratory, doctors' practice and in the field.

- **Head:** Binocular or Binocular with phototube (50%:50%); 30° viewing angle; Siedentopf tube rotates 360°, has two positions, with upper position that offers approximately 40mm extra viewing height); adjustable interpupillary distance, 48–75mm; tube length, 180mm
- **Optics:** Color-corrected, infinity optics; parfocal distance: 45mm
- **Eyepieces:** 10X widefield, 18mm or 22mm FOV; antifungal treatment; suitable for eyeglass wearers; setscrew mount guards against theft; optional eyepiece pointer accessory available (included with two models)
- **Objectives:** Plan-Achromat 4X/0.1 N.A., WD, 6.50mm; Plan-Achromat 10X/0.25 N.A., WD, 4.39mm; Plan-Achromat 40X/0.65 N.A., WD, 0.48mm or Plan-Achromat 40X/0.65 N.A. Ph2, WD, 0.48mm; Plan-Achromat 100X/1.25 N.A., WD, 0.13mm
- **Stage:** Right- or left-hand drive; long-life, scratch- and impact-resistant surface; area, $5\frac{5}{16} \times 5\frac{1}{2}$" (135mmD × 140mmW); travel range, $2\frac{15}{16}$"W (75mm) × $1\frac{11}{64}$"D (30mm); vernier scale
- **Illumination:** Choice of fixed or full Koehler illumination, halogen or LED light source
- **Stand:** Broad-based, stable stand with built-in carrying handle; 5-step blue LED display on both sides of stand is legible at several meters, monitors use, protects light source
- **Condenser:** Abbe condenser 0.9/1.25; holder for phase contrast and darkfield sliders; two variants for fields of view 18mm (Fixed-Koehler) and 20mm (Full-Koehler)



Primo Star Series

- **Power Supply:** Integrated into the stand, with space for stowing cable; external and easy to replace in event of damage; wide-area unit with 3 country-specific plug adapters; IEC adapter for conversion to a table-top power unit
- **Focusing:** Coarse, 4mm/rotation; fine, 0.3mm/rotation; 15mm total travel range

INCLUDES:

All packages include: stand, eyepieces, objectives, illumination module and condenser.

rl Zeiss* Axiovert* 40 CFL Inverted Microscope

erted design for microscopic study of large ecimens by transmitted light/brightfield, phase ntrast and epi-fluorescence techniques

apable and expandable, with a perfect range for routine gh-throughput applications

eal for routine examination of specimens in all kinds of culture vessels, ass and plastic vessels, including cell culture vessels

se with microtest and microtitration plates, too

tegrated lightpath for photo and video documentation is standard

ptional PlasDIC* Contrasting Technique components available

nponents and Specifications

yepieces: 10X wide-field with high eyepoint, 20mm field of view; djustable for interpupillary distance and dioptric drift

ead: Binocular with 45° viewing angle; integrated lightpath for photo d video documentation (100/100) while maintaining an unobstructed ew of the image

osepiece: Five-position, with precision ball bearings and click stops

bjectives: Axiovert 40 CFL, A-Plan 10X/0.25 Phase 1; LD A-Plan X/0.30 Phase 1, LD A-Plan 40X/0.50 Phase 2; Invertoskop 40 C, A-Plan /0.12, 10X/0.25 Phase 1, LD 20X/0.30 Phase 1; LD objectives have long orking distance, produces high-contrast brilliant images and corrects for fferent container thicknesses up to 3mm

tage: 210 × 290mm black fixed stage with specimen guide, sturdy and nveniently placed

ocus: Mounted toward the front in a low, ergonomic position.

ondenser: Axiovert 40 CFL, 0.4 N.A.; Invertoskop 40 C, 0.4 NA with mm normal working distance; with two-position slide for brightfield d Phase 1

lumination: Continuously variable 12V 35w halogen lamp provides mogenous illumination even with large vessels and specimens

DERING INFORMATION:

ional mechanical stage (12-070-311) is available; must be used with cimen holders. Wide variety of supporting frames available for easy unting and exchange of different specimen holders. Contact your er Scientific Customer Service Representative for details.

Fisher Scientific* Micromaster* Infinity Optics Microscopes

Unsurpassed in optical quality and affordability

Exciting research grade microscopes feature infinity corrected optics and extra wide field of view, in standard and digital versions.

- Choice of brightfield and phase contrast models
- Infinity corrected optics for consistent image flatness up to F.N. 22
- Extra-large 22mm field of view
- Ergonomically designed inverted Y stand for efficiency, comfort and balanced stability
- Swing-out condenser, five-position reversed nosepiece on brightfield models
- 1.25 N.A. five-position condenser and four-position nosepiece on phase contrast models

Digital Models

- Digital head with ⅓" color CCD image sensor
- USB 2.0 connection and cable, fast plug-and-play setup
- Software to capture, save, print and email images
- Micron software for on-screen calibrated measurements: point to point, circle, radius, ellipse, rectangle, 3-point and 4-point angle, and polygon area
- Select units of measurement: µm, mm, inches
- Annotation functions include freehand line, polyline, and hollow or solid polygon
- Plus cropping tool, vertical and horizontal scale rulers, and multi-window viewing

Fisher Scientific* Micromaster* II Microscopes

The versatility of laboratory-grade microscopes at an affordable price—ideal for education and general laboratory use

Eyepieces

- 10X wide-field, DIN standard; binocular and trinocular models are equipped with two eyepieces

Head

- Monocular, binocular, trinocular or dual-viewing configurations; all are interchangeable, rotatable 360°, and inclined at 30°
- Binocular and trinocular heads adjust for interpupillary distance (55 to 75mm) and dioptric differences

Nosepiece

- Quadruple reversed nosepiece with precision click stops

Objectives

- 4X/0.10 N.A., 10X/0.25 N.A., 40X/0.65 N.A. retractable DIN standard achromatic objectives produce true color images with sharp focus, are parfocal, parcentered, and coated

Stage

- Precision-machined 125 × 135mm mechanical stage, chemical-resistant finish, removable spring-clip slide holder

Focus

- Ergonomically positioned coaxial coarse/fine controls; adjustable safety stop and tension adjustments prevent slide damage and contamination

Condenser

- 1.25 N.A. Abbe, iris diaphragm, rack-and-pinion mechanism for precise focusing of light beam
- Swing-in filter holder and blue filter included

Illumination

- Variable-intensity 6V 20w quartz halogen lamp; solid-state dimmer

Finish

- Chemical-resistant baked-on paint with stipple finish to resist fingerprints and smudges

ORDERING INFORMATION:

Dimensions: 9½L × 7W × 14"H (24 × 18 × 35.5cm). For 110V 50/60Hz. Digital/Video models and additional optional eyepieces, objectives and other accessories available.

Micromaster
Fisher Scientific

12-561-4B

INCLUDES:

Dust cover, immersion oil, spare fuse, spare halogen lamp, heavy-duty three-prong cord for use on 110VAC; can be factory converted for use with 220VAC

Body	Objectives	Cat. No.	Each
Monocular	4X, 10X, 40X	**12-561-3M**	828.76

sher Scientific* Micromaster* I and II Digital/Video Microscopes

siest, most affordable ways to attach a microscope your computer or video display

nbine selected Micromaster I or II microscope with digital ligital/video head.

:yepiece: 10X wide-field, 18mm field of view

lead: 30° inclination; adjusts for interpupillary and dioptric differences

losepiece: Reversed quadruple nosepiece

)bjectives: Brightfield Micromaster I, Plan Achromatic X/10X/40X/100X oil DIN standard; Brightfield Micromaster II, \chromatic 4X/10X/40X/100X oil DIN standard; Phase Contrast Micromaster I, Phase Contrast Plan Achromatic 10X/20X/40X/100X il DIN standard; Phase Contrast Micromaster II, Phase Contrast \chromatic 10X/20X/40X/100X oil DIN standard

;tage: Micromaster I, 140 × 160mm mechanical stage with removable pring-clip slide holder; Micromaster II, 125 × 135mm mechanical stage vith removable spring-clip slide holder

ocus: Coaxial focus system with tension adjustment and up-limit oarse focus

;ondenser: 1.25 N.A. Abbe condenser, fitted with an iris diaphragm

llumination: Built-in Koehler illumination (Micromaster I) or halogen Micromaster II), 6V/20w variable

;tand: Rugged metal stand, chemical-resistant baked-on enamel stipple inish that resists fingerprints and smudges

B 1.1 Digital/Video Micromaster I and II Series

'rovide both digital (640 × 480 pixel resolution) and NTSC video output

our models include a 5.0" TFT LCD

;hoice of Micromaster I or II models in brightfield or phase contrast onfigurations

;amera is built into microscope head for fast plug-and-play setup

Aicron software included to capture, save, print, and email images; rovide on-screen calibrated measurements: point to point, circle, radius, llipse, rectangle, three-point and four-point angle, and polygon area

;elect units of measurement: µm, mm, inches

\nnotation functions include freehand line, polyline, and hollow r solid polygon

;ropping tool, vertical and horizontal scale rulers, and multi-window viewing

'iew images comfortably on your computer monitor, LCD screen select models), an external monitor, through the eyepieces, or all at he same time

B 2.0 Digital Micromaster I Series

)eliver sharp 1280 × 960 pixel still or real-time images

;hoice of Micromaster I models in brightfield or phase contrast onfigurations

nclude all software features of USB 1.1 models plus Live-Overlay* unction that lets you create your own graphic image template within he Micron application, and then overlay it onto a live image to use as n image comparator or reference

DERING INFORMATION:

jital Heads for retrofitting Micromaster I and II Microscopes are available parately to convert existing models. See p. 1167.

CLUDES:

Fisher Scientific* Micromaster* Digital Inverted Microscope with Infinity Optics

Infinity-corrected optics; integrated digital camera

12-575-252

The latest addition to the Micromaster Series of microscopes: new digital inverted microscope with infinity corrected optics, brightfield and phase contrast illumination techniques, integrated digital camera with software.

- Extra large 22mm field of view
- Ergonomic, compact design
- Bright 30w variable illumination
- Digital camera integrated in microscope body
- 1280 × 960 pixel resolution for both live and captured images
- USB 2.0 connection
- Micron* software included

SPECIFICATIONS:

- **Optical system:** Infinity-corrected optical system
- **Objectives:** Infinity plan achromatic LWD objectives: 4X brightfield, 10X phase and 20X phase
- **Head:** Binocular with integrated digital camera
- **Eyepiece:** Plan 10X/22mm FN, high-eyepoint eyepieces
- **Illumination:** Variable 6V/30w halogen bulb, precentered.
- **Stage:** Size, 160W x 250mmL; height, 200mm from table
- **Working Distance:** With condenser, 72mm; without condenser, 150mm

ORDERING INFORMATION:

Optional accessories include attachable mechanical stage, auxiliary stage extensions, and many types of microplate vessel holders. Contact your Fisher Scientific Customer Service Representative for details.

WARRANTY:

Two years

Leica* CM E Microscope Systems

Three preconfigured systems, brightfield and phase contrast capabilities

Provide durability, flexibility, and high-quality optics for educational applications.

- Compact, tamperproof design with instant setup
- Cast-aluminum stand minimizes vibrations
- Serial-number plate for tracking purposes
- Three packages: Binocular achromatic and plan achromatic for brightfield microscopy, and phase-contrast for phase-contrast microscopy
- Optical parts protected by fungus- and mold-resistant coatings
- Accessories are available to create a system tailored to your specific needs (see note below)

SPECIFICATIONS:

- **Eyepieces:** Widefield 10X/18mm FOV; all glass for quality, high-contrast imaging and compatibility with E2 series optics; pointer built into one eyepiece; high eyepoints; rubber eyeguards reduce glare; 10X/18mm without pointer and 15X/15 eyepieces accommodate 21mm reticles for measuring and counting applications
- **Head:** Monocular, binocular, and trinocular available (see note below); 45° inclination, rotate 360°; binocular and trinocular models have 54 to 74mm interpupillary adjustment range; trinocular model has prism to deflect 80% of light into phototube
- **Nosepiece:** Quadruple rear-facing nosepiece with positive stops provides comfortable and convenient operation; rubber grip on turret
- **Objectives:** 10X, 40X (retractable), 100X (retractable); fourth objective exclusive to model you purchase; brightfield models feature a 4X scanning objective; phase-contrast model includes 20X retractable objective; all objectives are parcentered and parfocal to minimize focusing procedures
- **Stage:** Graduated, mechanical, right-handed stage; all-metal rack and Vernier scales for precise control; 150 × 136mm stage moves vertically over 40mm range; rack-and-pinion x-y drive ensures smooth movement; low-mounted coaxial control for easy, comfortable use; front-loading specimen holder for one standard slide
- **Focus control:** Coarse- and fine-focus controls allocated next to stage for easy adjustments; knurled knob is graduated in microns; self-adjusting and maintenance-free focus mechanism prevents stage drift for the life of the instrument; dual eyetube focus adjustments for interpupillary distance (IPD) assure parfocality
- **Illumination:** 20w high-intensity tungsten-halogen lamp; 2000-hour life; maintains color and intensity throughout life; 1.25 N.A. slider condenser allows for oil immersion; built-in blue filter; angled lamp door prevents breakage; low heat output provides comfortable viewing and prevents injury; meets international safety standards

LOOKING FOR LEICA* REPLACEMENT PARTS AND ACCESSORIES?

Many replacement parts and accessories are available to create a Leica CM E Microscope System tailored to your specific needs, including: Abbe slider condenser, darkfield/phase-contrast sliders, phase-contrast slider kit, polarizer/analyzer kit, eyepieces, eyepiece micrometer, objectives, Koehler illumination kit, green and blue Koehler undiffused filters and critical diffused filters, 20w tungsten halogen lamp, attachable mirror, stage micrometer, stands, 120V and 230V line cords, cordwrap/lock, dust cover, video viewing bodies, video adapters, and monocular, binocular and trinocular viewing bodies.

To order any of these products, contact your Fisher Scientific Customer Service Representative or

Visit www.fishersci.com and search for Leica Accessories

12-589 Series

ORDERING INFORMATION:

Dimensions (L × W × H): 10½ × 8⅜ × 15" (27 × 22 × 38cm).

INCLUDES:

Illumination stand, right-handed mechanical stage, 10X/18 eyepiece, 10X/18 eyepiece with pointer, eyeguards, binocular viewing body, 20w tungsten-halogen illuminator, slider condenser, four objectives, blue filter, dust cover, multilingual instruction manual, and immersion oil.

Plan achromatic system includes plan achromatic objectives and binocular observation tube.

Phase-contrast microscopy system includes Plan phase objectives, binocula observation tube, and phase condenser with light ring sliders.

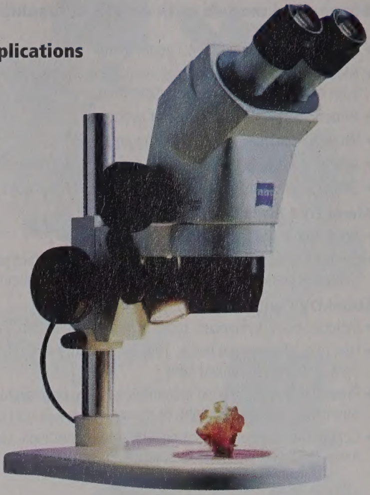
STEREO MICROSCOPES

arl Zeiss* Stemi* 2000/2000C Stereo Microscopes

r education, industrial testing, life sciences and materials research applications

- Both models feature tapered front optics, convenient operating controls nd a rounded base
- 5° angle binocular tube for convenient sample viewing while providing oom for specimen manipulation
- Working distance: 110mm without additional objectives; 31 to 285mm vith additional objectives
- Built-in magnification changer for manual adjustment with a 1 to 7 ontinuous zoom range (see Magnification Range chart for appropriate ange with each available optic and eyepiece)
- Front lenses can be interchanged to alter the magnification range
- For photodocumentation, the Stemi 2000C includes a port for photo ccessories or video camera
- Both models are mounted onto a heavy metal base stand with 1¼" diameter (32mm) post for optical adjustment



12-070-280

Carl Zeiss* Stemi* DV4 Series Stereo Microscopes

Economical models with excellent resolution

- Double-lens Vario zoom, 4:1 zoom factor
- Mechanical correction for high resolution, definition, and brightness with minimal reflection throughout range
- Widefield 10X/20 high-eyepoint eyepiece
- Working distance, 92mm; viewing angle, 60°
- Can be used with optional 0.3, 0.4, 0.63, and 2.0X auxiliary objectives
- Sound, sturdy design; easy operation of essential controls

Stemi DV4 Body Only

- Body with eyepieces and zoom objective only
- Comes without stand or illumination system; contact your Fisher Scientific Customer Service Representative for information about options

Stemi DV4 with Model C Stand

- Includes body, eyepieces, zoom objective, stand and illumination system
- Has two 12V halogen bulbs: 10w for transmitted light, 20w for reflected light; use both for mixed light
- Press a button to choose illumination mode: brightfield reflected light, brightfield transmitted light, or mixed light
- Continuous control of electronic brightness settings, separate for each mode for fast adaptation to specimens

sher Scientific* Stereomaster* Digital Zoom Microscopes

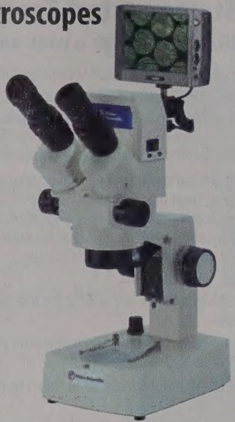
gh optical performance plus the convenience of digital imaging

ree systems for every application

- **tereomaster Digital Zoom Microscopes** have binocular digital head for optical iewing or video display, 10X super-widefield eyepieces with interpupillary adjustment nd diopter adjustment, zoom range of 7.5X to 45X; video outputs include NTSC via CA jack and mini-DIN connection for optional 6.4" or 5.0" color TFT LCD (12-564-141, 2-564-140); permits viewing of live images on a PC, external video monitor, optional CD, through eyepieces, or all of the above at the same time
- **tereomaster Digital Zoom LCD Viewing Systems** have a 6.4" color TFT LCD/ amera head for extended monocular viewing without fatigue, 5.6X to 52X zoom range, 3m to 2.3mm FOV, 100µm to 12.5µm resolution; image capture device with USB 1.1 able connection to computer; boom and pole stand models have 3-position turret for ptional supplementary lenses
- **tereomaster High-Resolution Digital Imaging Systems** are equipped with .3 megapixel color digital camera head for direct real-time viewing via a computer nonitor, 11XZ to 88X zoom range, 27m to 3.35mm FOV, 100µm to 7.7µm resolution; JSB 2.0 cable connection to computer; boom and pole stand models have three- osition turret for optional supplementary lenses

mplete Packages with choice of stands

- ystems are configured with your choice of multipurpose, boom or pole stand
- Dual 20w halogen lamps included with multipurpose stands, 150w fiber-optic light ource with boom and pole stands
- arfocal zoom control via dual side-mounted knobs marked with the nagnification value
- Aicron Software included to capture, save, print and email images; provide n-screen calibrated measurements: point to point, circle, radius, ellipse, rectangle, -point and 4-point angle, and polygon area, plus more
- ower supply, cables, and user guides included



12-563-411 with optional 12-564-140 LCD Monitor

Fisher Scientific* Stereomaster* Zoom Microscopes

The highest level of optical clarity with a wide variety of configurations

Sensitive optical elements produce high-resolution, three-dimensional images. Large magnification range, easily increased via supplementary lenses. Illumination options let you customize to match your needs.

Choose models with multipurpose, boom stand or industrial pole stand.

- **High-Quality Zoom Optics:** parfocal zoom for continuous changing of magnification without refocusing; total magnification ranges of 7X to 45X or 6.5X to 60X wide angle; supplementary lenses and additional eyepieces are available to produce different magnification ranges; 88mm working distance with standard configuration; smooth-turning, side-mounted control knobs
- **Eyepieces:** 10X super-widefield eyepieces, adjustable for interpupillary distance and dioptric differences
- **Head:** Binocular and trinocular models available; all come with paired 10X eyepieces; heads are rotatable 360°
- **Finish:** Chemical-resistant baked-on paint with stipple finish to resist fingerprints and smudges

Microscope with Multipurpose Stand: ideal for general laboratory use

- Stand/Illumination: has oversized focusing knobs, frosted-glass stage plate, removable stage clips; high-intensity variable-halogen upper and lower illumination; ON/OFF switch allows for use either or both lamps at once; dust caps and cover
- Dimensions of trinocular configuration: 10½L × 7W × 17"H (27 × 18 × 43cm)
- For 110V 50/60Hz

Microscope with Boom Stand: perfect for work with large objects or on user's preferred work surface

- **Stand:** has 23" (58cm) extension range; tilting adjustment; rack-and-pinion focusing mechanism; easy-to-use levers for quick and positive adjustment; includes dust caps and cover
- **Illumination:** Available with integrated 150w fiber-optic illumination system; 360° annular ring lamp provides shadowless illumination exactly on point of inspection; removable bolt-on light source features two-speed fan for ultralow noise operation
- Dimensions: 10L × 29W × 17"H (25 × 74 × 43cm)
- For 110V 50/60Hz

Microscope with Industrial Pole Stand: large work surface, with or without illumination

- **Stand:** Ideal for large or tall objects; heavy-duty, low-vibration design; oversized anodized work surface; rack-and-pinion focusing mechanism; easy-to-use levers for quick and positive adjustment; dust caps and dust cover
- **Illumination:** Optional dual light guides, each with gooseneck sheath; variable 150w fiber optic light source; two-speed fan for ultralow noise use; bolts on for convenience
- Dimensions: 10L × 17W × 17"H (25 × 43 × 43cm)
- For 110V 50/60Hz

sher Scientific* Stereomaster Microscopes

sic stereo microscopes for routine macro work

t-in incident and transmitted lighting complements a two-magnification cal system and a rugged design.

ad:

- inocular heads are rotatable 360° and feature interpupillary adjustment nd diopter adjustment

dy:

- ll come equipped with upper and lower illumination
- pper illuminator is a directable high-intensity variable-halogen lamp
- ower transmitted illumination comes from a fluorescent lamp designed r low-heat output
- hree-position ON/OFF switch allows for use of each lamp individually or oth lamps simultaneously
- emovable stage clips and frosted-glass stage plate (black-and-white eversible stage plate is available)
- yepieces: 10X or 15X wide-field, locked on
- ptional eyepiece/reticle also is available (visit our Web site).

cus Controls

- ack-and-pinion focus controls with oversized knobs and slip-clutch echanism

Finish:

- Chemical-resistant baked-on paint with "stipple" finish to resist fingerprints and smudges

ORDERING INFORMATION:

Overall dimensions:
10L × 7½W × 14"H (25 × 19 × 35.5cm).

INCLUDES:

Dust caps, dust cover and spare lamp.

Leica* StereoZoom* S8 APO Series Microscopes

Ideal for specimens with fine, low-contrast structures

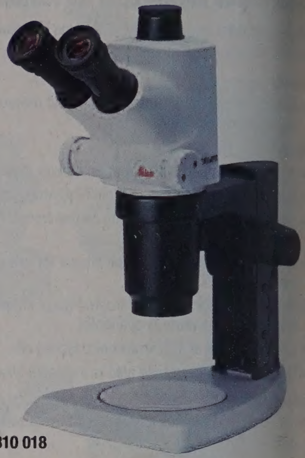
- Offer 8:1 zoom, standard magnification of 10X–80X and high performance Greenough-style optics
- Fully apochromatic corrected zoom lens: ideal for specimens with fine, low-contrast structures, such as large animal cells, plant cilia or metallic microelectronic structures
- Deliver 600 lp/mm resolution and a maximum magnification of 640X (with 2.0X auxiliary objective)
- Unsurpassed contrast, brilliance, sharpness, resolution, color fidelity and reproduction accuracy
- Perfect for exacting applications, especially digital documentation, image archival and analysis
- Integrated video/phototube allows easy and rapid mounting of Leica digital cameras
- Conventional film and analog video cameras can also be mounted for outstanding results

Modular Design:

- Optional objectives, eyepieces, stands, and illumination systems are available
- Several packages are listed below; for more options, contact your Fisher Scientific Customer Service Representative

Components:

- **Eyepieces:** 10X/23 widefield; standard high eyepoint (for eyeglass wearers) or optional low eyepoint; zoom range, 10X–80X (standard objective); 2.9–23mm FOV; interpupiliary adjustment, 55–75mm for comfortable binocular 3D viewing; packages come with one fixed, one adjustable eyepiece for easy parfocal adjustment; accepts optional reticles
- **Head:** Binocular, inclined 38° from horizontal; built-in photo/video tube for optional viewing and documentation accessories; optional lenses permit magnification up to 256X; call your Fisher Scientific Customer Service Representative for details
- **Zoom Objective System:** Patented magnetic mounting system is standard for improved alignment and smooth action; achromatic color correction, 1.0–8.0X zoom magnification; working distance is 75mm; three Apochromatic supplemental objectives are available; contact your Fisher Scientific Customer Service Representative for information
- **Stand/Stage:** Listed models come with A Stand (standard incident-light base) and focus column; B Stand (incident-light base and focus column plus sub-base with transmitted-light reflector); or rectangular S stand (boom and mountable focus arm); standard base has reversible black/white stage for incident light; measures 11L × $8\frac{1}{16}$"W (27.8 × 20.5mm)
- **Focus Control:** Coarse controls mounted on standard focus column; mountable focus arm is tiltable; all focus controls have variable friction for ease of adjustment



LM10 810 018

- **Illumination:** Optional L2 cold-light source, made of ZeroStat antistatic polymer, couples directly to microscope, making a perfect combination for electrostatic-sensitive work; optional Nicholas Illuminator is also available

ORDERING INFORMATION:

Approximate dimensions with standard base: 11L × $8\frac{1}{16}$W × $13\frac{7}{8}$"H (27.8 × 20.5 × 35.1cm). Models come with head, standard eyepieces and objectives listed above and dust cover. Models listed below operate on 120V. Optional accessories include eyepieces, objectives, bases, stages, illumination systems, reticles, videography and photography systems. Call your Fisher Scientific Customer Service Representative for information.

INCLUDES:

- **S8 APO with A-Stand Package** comes with standard incident-light base and focus column
- **S8 APO with B-Stand Package** comes with standard incident-light base, sub-base with reflector and focus column
- **S8 APO with S-Stand Package** comes with rectangular S stand and mountable focus column

Description	Mfr. No.	Cat. No.	Each
S8 APO A-Stand Package	10 810 018	**LM10 810 018**	3446.00

ica* StereoZoom* S6/S6 E/S6 D Series Microscopes

romatically optimized for clear, sharp images every time

dular, ergonomic design

- ffer a large, flat (planar) field of view of 36.5mm, long working distance f 110mm
- ptional ergonomic objectives permit fine adjustments of working istance and viewing height
- ptional objectives, eyepieces, stands, and illumination systems are available
- everal packages are listed below; for more options, contact your Fisher cientific Customer Service Representative

mponents:

- **yepieces:** 10X/23 widefield; standard high eyepoint (for eyeglass earers) or optional low eyepoint
- oom range, 6.3X–40X (standard objective); 5.8–36.5mm FOV; interpupillary djustment, 55–75mm for comfortable binocular 3-D viewing; packages ome with one fixed, one adjustable eyepiece for easy parfocal adjustment; ccept optional reticles
- **lead:** S6 has binocular head, 60° inclination from horizontal; S6 E and S6 D ave trinocular head, inclined 38° from horizontal
- **oom Objective System:** Patented magnetic mounting system is tandard for improved alignment, smooth action; achromatic color orrection, 0.63X–4.0X zoom magnification; working distance is 110mm; djustable upper and lower zoom magnification stops; six achromatic upplemental objectives are available; contact your Fisher Scientific ustomer Service Representative for information
- **tands/Stage:** Listed models come with A Stand (standard incident-ght base) and focus column; B Stand (incident-light base and focus olumn plus sub-base with transmitted-light reflector); or rectangular stand (boom and mountable focus arm); standard base has reversible lack/white stage for incident light; measures 11L × 8$\frac{1}{16}$"W (27.8 × 20.5mm)
- **ocus Control:** Coarse controls mounted on standard focus column; nountable focus arm is tiltable; all focus controls have variable friction or ease of adjustment
- **llumination:** Optional L2 cold-light source, made of ZeroStat* antistatic olymer, couples directly to microscope, making a perfect combination or electrostatic-sensitive work; optional Nicholas Illuminator* is also vailable

DERING INFORMATION:

proximate dimensions (standard base): 11L × 8$\frac{1}{16}$W × 13$\frac{7}{8}$"H .8 × 20.5 × 35.1cm). Optional accessories include eyepieces, objectives, ses, stages, illumination systems, reticles, videography and photography stems. Call your Fisher Scientific Customer Service Representative for tails.

CLUDES:

odels come with head, standard eyepieces and objectives listed above d dust cover. Models listed below operate on 120V.

Leica* StereoZoom* S4 E Microscopes

Offer a large, flat field of view and a long working distance of 110mm with clear, sharp images

Modular, ergonomic design combines high-quality optics, robust and reliable mechanics, and comfortable user interfaces at a reasonable price.

Modular Design:

- An assortment of objectives, eyepieces, stands, and illumination options are available; several packages are listed below; for additional options, contact your Fisher Scientific Customer Service Representative
- **Eyepieces:** 10X/23 wide-field eyepieces, standard low or optional high eyepoint; zoom range of 6.3X to 30X with standard zoom objective, and 7 to 36.5mm FOV; interpupilary adjustment, 55 to 75mm; packages come with one fixed and one adjustable eyepiece; accepts optional reticles
- **Head:** Binocular, inclined 38° from horizontal; optional accessories permit magnification up to 128X
- **Zoom Objective System:** Patented magnetic mounting system for improved alignment and smooth action; achromatic color correction, 0.63X to 3.0X magnification; working distance is 110mm
- **Stand/Stage:** Models listed come with A stand (incident-light base) and focus column, B stand (incident-light base and focus column plus sub-base with reflector for tramsmitted light), or rectangular S stand and mountable focus arm; standard base has reversible (black/white) stage for incident light; measures approximately 11L × $8\frac{1}{16}$"W (27.8 × 20.5cm)
- **Focus Control:** Coarse controls mounted on standard focus column; mountable focus arm is tiltable; controls have variable friction for ease of adjustment
- **Illumination:** Optional L2 cold light source couples directly to microscope, uses UL/CE approved 100–240V volt-sensitive power supply, is constructed of ZeroStat antistatic polymer; optional Nicholas Illuminator

ORDERING INFORMATION:

Dimensions with standard base, 11L × $8\frac{1}{16}$W × $13\frac{7}{8}$"H (27.8 × 20.5 × 35.1cm). All models operate on 120V.
Optional accessories include eyepieces, objectives, bases, stages, illumination systems, reticles, videography and photography systems.
Call your Fisher Scientific Customer Service Representative for information.

INCLUDES:

All models come with S4E head, standard eyepieces and objectives listed above and dust cover; models listed below operate on 120V.

- **S4E with A-Stand Package** comes with standard incident-light base and focus column
- **S4E with B-Stand Package** comes with standard incident-light base, sub-base with reflector and focus column
- **S4E with S-Stand Package** comes with rectangular S stand and mountable focus column

LOOKING FOR LEICA* REPLACEMENT PARTS AND ACCESSORIES?

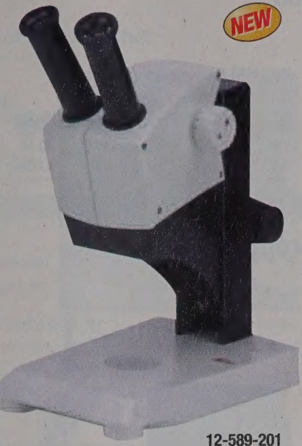
Many replacement parts and accessories are available to create a Leica CM E Microscope System tailored to your specific needs, including: Abbe slider condenser, darkfield/phase-contrast sliders, phase-contrast slider kit, polarizer/analyzer kit, eyepieces, eyepiece micrometer, objectives, Koehler illumination kit, green and blue Koehler undiffused filters and critical diffused filters, 20w tungsten halogen lamp, attachable mirror, stage micrometer, stands, 120V and 230V line cords, cordwrap/lock, dust cover, video viewing bodies, video adapters, and monocular, binocular and trinocular viewing bodies.

To order any of these products, contact your Fisher Scientific Customer Service Representative or

Visit www.fishersci.com and search for Leica Accessories

eica* EZ4 StereoZoom* Microscope

hoice of eyepieces and zoom ranges in a compact, gged package



12-589-201

ee-way incident light hnology plus world-owned Leica quality and cision, in an educational reomicroscope offering the st value for the money.

- High image quality, color nd detail fidelity
- Mechanical precision or decades of naintenance-free use
- Precise magnification hange and focusing ystems for the most xact control
- Power LED illumination ystem for incident and ransmitted light; diodes ast longer than ncandescent lamps, use ess energy, stay cool and equire no maintenance

ree-way dimmable LED illumination

- Unique Leica three-way incident light technology (patent pending) allows bservation of a wide variety of objects, from strongly structured objects o flat probes
- Optimal illumination to obtain a maximum of information; integrated EDs can be switched individually, dimmed and combined with ransmitted light.
- Choose maximum intensity with five LEDs, angled incident light with hree LEDs, side light with three LEDs
- Membrane switch controls illuminator; integrated into base with watertight seal
- Automatic shutoff after 60 min.; approximate LED life, 25,000 hr.

pecifications:

- **Stand:** integrated head, stage and stand
- **Head:** Binocular, 60° inclination
- **Optics:** 10° Greenough, parfocal; 100mm WD; 170 Lp/mm maximum resolution; 0.057 N.A.; 100% visual beam path
- **Eyepieces:** Available with 10X/20mm fixed or 16X/15 fixed eyepieces (suitable for eyeglass wearers, or without eyepieces; 50 to 75mm interpupillary adjustment; replaceable eyecups
- **Objectives:** 8X to 35X magnification with 10X eyepieces; 12.8X to 56X magnification with 16X eyepieces; 5.37 to 25mm and 4.3 to 18.8mm field diameters
- **Focusing:** Individually adjustable ease of movement, 75mm travel
- **Illumination:** LED incident light and transmitted light; integrated, independent or combined; maximum, angled or side lighting modes; dimmable

RDERING INFORMATION:

mensions: 10$\frac{1}{32}$L × 7$\frac{3}{16}$W × 14$\frac{3}{8}$"H (255 × 18 × 365mm). Net weight: $\frac{3}{8}$ lb. (3.82kg). Integrated 100 to 240V universal power supply.

odel	Mfr. No.	Cat. No.	Each

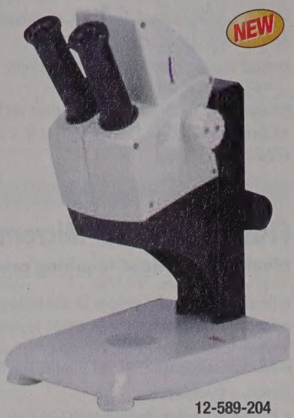
Leica* EZ4D StereoZoom* Microscope

Integrated digital camera and software for image data storage and enhancement



12-589-204

Combines the Leica EZ4 StereoZoom Microscope with an integrated three-megapixel CMOS camera and Leica application software, allowing:

- Direct storage of image data on 128 MB SD card
- Connection to PC, Mac*, video recorder or beamer
- Control of image capture and storage, live image display on connected PC or Mac*, and the archiving and optimization of image data using supplied software.

Leica quality and precision

- High image quality, color and detail fidelity
- Mechanical precision for decades of maintenance-free use
- Precise magnification change and focusing systems for the most exact control
- Power LED illumination system for incident and transmitted light; diodes last longer than incandescent lamps, use less energy, stay cool and require no maintenance

Three-way dimmable LED illumination

- Unique Leica three-way incident light technology (patent pending) allows observation of a wide variety of objects, from strongly structured objects to flat probes
- Optimal illumination to obtain a maximum of information; integrated LEDs can be switched individually, dimmed and combined with transmitted light.
- Choose maximum intensity with five LEDs, angled incident light with three LEDs, side light with three LEDs
- Membrane switch controls illuminator; integrated into base with watertight seal
- Automatic shutoff after 60 min.; approximate LED life, 25,000 hr.

Specifications:

- **Stand:** integrated head with digital camera, stage and stand
- **Head:** Binocular, 60° inclination, with camera port and integrated camera
- **Optics:** 10° Greenough, parfocal; 100mm WD; 170 Lp/mm maximum resolution; 0.057 N.A.; 50% visual/50% photo/video beam path
- **Eyepieces:** 10X/20mm fixed (suitable for eyeglass wearers); 50 to 75mm interpupillary adjustment; replaceable eyecups
- **Objectives:** 8X to 35X magnification with 10X eyepieces; 5.37 to 25mm field diameter
- **Focusing:** Individually adjustable ease of movement, 75mm travel
- **Illumination:** LED incident light and transmitted light; integrated, independent or combined; maximum, angled or side lighting modes; dimmable

ORDERING INFORMATION:

Dimensions: 10$\frac{1}{32}$L × 7$\frac{3}{16}$W × 14$\frac{3}{8}$"H (255 × 18 × 365mm). Net weight: 8$\frac{3}{8}$ lb. (3.82kg). Integrated 100 to 240V universal power supply.

POCKET MICROSCOPES

Fisher Scientific* Illuminated Pocket Microscopes

A single mechanism generates a smooth and rock-solid focus

Ideal for quality control, field use, electronics, metal analysis, clinical analysis and plant study applications.

- View at high magnification in bright light, true color, high contrast, and with a sharply defined focus
- Case is chemical- and shock-resistant ABS plastic
- Dimensions: 5½L × 1½W × ⅞"H (140 × 38 × 22mm)
- Weighs 3 oz. (85g)

INCLUDES:
Two "AA" batteries

Magnification	Cat. No.	Each
30X	**12-071-6E**	43.58
60X to 100X zoom	**12-071-6D**	47.04

12-071-6D and 12-071-6E

PHOTODOCUMENTATION AND VIDEO SYSTEMS

Fisher Scientific* Micromaster* Videomicroscopy Systems

Ideal for situations requiring presentation

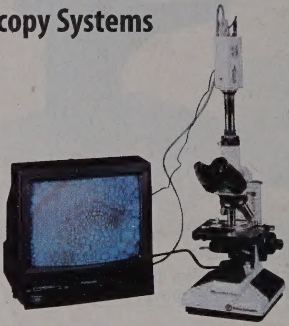
- Ready-to-use configurations fit any biological microscope
- Systems include everything needed to configure new systems or retrofit existing systems
- Adapter has 23mm O.D. and slip-fits into most microscope eyetubes

Camera Systems

- **High-Resolution System** with 500 lines of color, ½" chip, Y/C (SVHS) and composite outputs
- **Standard-Resolution System** with 350 lines of color, ⅓" chip, and composite output

INCLUDES:
Camera, 12V power supply, microscope adapter, video cable

REQUIRED ACCESSORIES:
Microscope compatible with 23mm O.D. adapter; color monitor with appropriate input jacks for system (S-video or RCA)



Fisher Micromaster Trinocular Phase-Contrast Microscope, 12-561-3FAZ (available separately), 12-563-3 Camera and optional 12-478-14 Color Monitor (available separately).

NOTE:
Adapter cannot be used with a reticle.

System	Cable/Connector	Cat. No.	Each
High Resolutiion	S-Video	**12-563-3**	2412.09
Standard Resolutiion	BNC-RCA	**12-563-1**	943.98

Carl Zeiss* Accessory Canon* PowerShot* A640 Digital Color Camera

Photo and video documentation with antirotation adapter

Camera features:

- 10.0-megapixel CCD, 3648 x 2736 effective pixels
- 4X optical zoom, F/2.8 to F/4.1, 7.3 to 29.2mm (35mm film equivalent: 35-140mm)
- 2.5 inch flip-out-and-twist LCD monitor with wide viewing angle
- Optical viewfinder
- 21 shooting modes, 9-point AiAF plus manual modes
- ISO 800 and High ISO Auto to reduce image blur and expand low-light shooting capability
- DIGIC* II Image Processor and iSAPS Technology for superior image quality, fast operation and low power consumption
- Movie Mode recording with sound at 30 fps VGA (640x480)
- Print/Share Button for easy direct printing and downloading
- ID Photo Print and Movie Print with Canon Photo Printers
- Remote control possible via USB, live image via USB or Video Out (Pal/NTSC in full composite quality)
- Slot for SD-Card or MMC

Zeiss extras include:

- Zeiss exclusive adapter design allows for a rotation-free camera mount
- Extra USB cable extension
- Power supply for continuous use
- Optional AxioVision* Software

NEW

Canon Camera 12-171-226

INCLUDES:
PowerShot A640, SD Memory Card 32MB, filter adapter 52mm, 4 "AA" batteries, power supply 100-240V with country-specific power cord, A/V connection cable, USB cable + 3m extension, TWAIN/WIA driver, PhotoStitch, RemoteCapture, ZoomBrowser EX, Basic User Booklet, Advanced Guide on CD.

Aadpter included in 12-171-226

REQUIRED ACCESSORIES:
Camera mount for your specific microscope; computer with USB 2.0 connector for Windows* 98/2000/ME/XP (not NT), or Mac*. Optional: AxioVision Rel. 4.6 or later.

FILTERS

mega* Optical Filter Sets for uantum Dots

NEW

ptimized for imaging of all UV-excited dot* conjugates

09-120-1 Series

- Utilize emission filters centered on quantum dot emission center wavelengths
- Produce bright signal and excellent signal-to-noise
- Unique quantum dot technology provides large Stokes shift for cost-effective imaging—no expensive filter components needed
- Wide-band excitation filters provide maximum signal or narrower bandpass design to minimize photodamage
- Single dichroic functions for all colors
- Bandpass design for emission filters yields high discrimination; AR coated and precision-polished

RDERING INFORMATION:
ailable in standard sizes as follows: exciters and emitters in 18, 20 or mm diameter; dichroics in 18 × 26, 21 × 29 or 25.7 × 36mm. Specify es when ordering. See Selection Guide below for a list of sizes for lected microscopes. Custom sizes available; contact your Fisher ientific Customer Service Representative for details.

ICLUDES:
citer, single dichroic, emitter

ILLUMINATORS

12-563-501

Fisher Scientific* LED Light Source

Ideal for a wide variety of applications including microscopy, gemology, industrial, hobby and task lighting

Utilize ultrabright LEDs, mounted on two adjustable light guides. Lamp intensity and color temperature provide illumination that appears 20 to 25% brighter than traditional fiber-optic light sources. Long lamp life, compared to the 200 hour life of halogen bulbs, translates into decades of use.

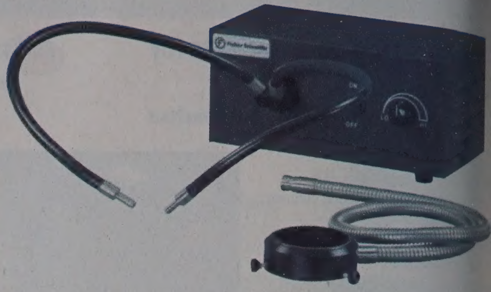
- 24 LEDs for ultra-intensity illumination
- Bright white color temperature
- Variable intensity control
- 50,000 hour LED bulb life
- Cool, quiet, vibration-free operation
- Small footprint

ORDERING INFORMATION:
Models available with weighted base or table edge clamp.

INCLUDES:
Illuminator, light guides, hardware, user guide and power supply.

SPECIFICATIONS

Light Source	24 Ultrabright LEDs
Color Temperature	6500°K
Lamp Life	50,000 hr.
Light Guides	Two 25" gooseneck
Dimensions (L x W x H)	3⅝ × 4¼ × 14$\frac{15}{16}$" (9.0 × 10.8 × 38cm)
Rated Power Output	18mW at 2"
Electrical Requirements	100 to 240V
With Weighted Base	
Cat. No.	**12-563-501**
Each	361.68
With Edge Clamp	
Cat. No.	**12-563-502**
Each	328.11



12-562-21 with 12-562-22 and 12-562-23

Fisher Scientific* Stereomaster* Microscope Fiber-Optic Light Sources

Fiber-optic illumination accessory for microscopes

Stand-alone fiber-optic illuminator is ideal as a retrofit for existing microscopes, as a valuable addition to the Fisher Scientific multipurpose stand, or as general laboratory illumination.

Light Source

- Uses 21V, 150w halogen lamp (EKE type)
- Lamp life, 200 hours at full power; practical lamp life up to 500 hours if dimmed when not in use
- Color temperature, 3250°K
- Dimmer circuit provides continuously variable light level
- Two-speed fan provides choice between maximum lamp life and near-silent operation

Light Guides

- For use with fiber-optic Light Source
- Choose self-supporting dual-light guide or 360° annular ring lamp
- Ring-lamp system uses nylon set screws, eliminating need for a microscope-specific adapter

ORDERING INFORMATION:
Light Source dimensions: 7L × 6½W × 5"H (18 × 16.5 × 13cm).

Description	Cat. No.	Each

eica* L2 Cold-Light Source Systems

eally suited to industrial d scientific applications

L2 light source attached to stand (sold separately)

- **Provide cool, intense, optimal llumination** to improve optical erformance and reduce error. deally suited to industrial and cientific applications. Accept ttachments for classically angled ghting with one or two light uides, plus coaxial, vertical, and ransmitted illumination methods.
- **owerful and affordable.** /olt-sensitive network component alibrates itself automatically to pplicable voltage of 100–240V, uaranteeing stable illumination uring functions. Exhibit no 100Hz licker which is particularly listracting during image processing. otal light stream at light guide utput: 54 lumens at 4.5mm diameter, 63 lumens at 5mm diameter. owerful illumination with no light dispersion, no noise.
- **asy to maintain and safe.** Use 8V/20w halogen reflector lamp with ife expectancy of 250 to 5000 hours. Lamp casing is designed to make hanging lamp simple: snap off lamp cover and lamp turns off automatically; hange lamp, and snap cover back on. The Leica L2 has been tested and pproved against applicable international safety regulations.
- **ttach directly to microscope stand,** requiring minimal space and permitting easy mobility. Illumination retains constant orientation toward pecimen when microscope is moved.
- **ight guides for various illumination methods.** Light guides are made f glass fiber optics with excellent optical properties, for fastest ransmission and optimal light distribution. High-quality coating of alogen-free, self-erasing Megolon and heat-resistant light guide nterface guarantee an extraordinarily long fiber-optic life.

RDERING INFORMATION:

odest footprint. Measure just 4 15/16 × 4 3/8 × 5 7/8" (125 × 110 × 150mm); eighs only 1 lb. and 2 oz. (0.5kg). Choice of packages with Dual Flex light ides, Universal Single and Dual light guides and six-point Ringlight guides.

CLUDES:

l packages listed include: L2 fiber-optic light source, bulb, power supply d electrical cord; appropriate adapter to connect L2 to microscope stand; ht guides as listed and all necessary mounts. Additional guides for axial and near-vertical lighting, and single and double goosenecks, as ell as freestanding L2 base packages are available. Call your Fisher ientific Customer Service Representative for details.

Leica* KL Series Cold-Light Sources

Ergonomically designed for quick access to control buttons and exchange of light bulbs, lamp sockets, fuses and filters, even when units are stacked

LM10 810 Series

- **High-performance cold-light sources** to fit Leica stereomicroscopes or macroscopes in demanding applications. LCD presents current color temperature, operating status and mode at a glance. Light intensity is electronically stabilized and can be electronically dimmed from 10% to 100%, or dimmed mechanically from 6 to 100%. Lightweight and handgrip mean easy transport.
- **KL 1500 LCD** features a 150w light source for maximum light intensity of 600 lumens, with single-filter holder insert; accepts light guides up to 9mm diameter.
- **KL 2500 LCD** expands your choice of applications—including fluorescence applications—with approximately twice the light output (250w) of the KL 1500 LCD, for 1300 lumens maximum light intensity. Accepts light guides up to 15mm diameter, and has built-in five-hole filter wheel. Includes connector for optional accessories including remote control of intensity, power switch and RS-232 interface, allowing operation in cleanrooms and difficult-to-access areas.

ORDERING INFORMATION:

Choice of popular packages. Listed below are selected combinations of light sources and light guides. Many additional guides, filters, holders and other accessories are available; contact your Fisher Scientific Customer Service Representative for more information.

Dimensions (W x D x H)	10 3/8L × 7 7/8W × 6 11/16"H (265 × 200 × 170mm)	10 3/8L × 7 7/8W × 6 11/16"H (265 × 200 × 170mm)
Weight	11 lb. (5kg)	13 3/4 lb. (6kg)

Leica* Nicholas Illuminator with Transformer, Linkage and Adapter

Designed for stereomicroscopy

BL 31-33-05-28

- With transformer, linkage and adapter
- Provides a whiter light for better images and sharper photomicrographs
- Use as an external illuminator for direct lighting, or with substage mirrors
- Can be inserted in ports of StereoZoom* A Stands† for prealigned oblique lighting, or in the back of Type B Stand bases† to backlight transparent specimens
- The three-step transformer serves as the base for adjustable jack-knife linkage when used as an external illuminator
- At full 6V intensity, the lens system projects a 35mm spot of white light with a color temperature of 2800°K

ORDERING INFORMATION:

For 120V 50/60Hz. Transformer has 6½' (2m) 3-wire cord. With tungsten lamp (replacement BL 31-31-75).

CERTIFICATIONS:

UL listed

Mfr. No.	Cat. No.	Each
13313305 28	**BL 31-33-05-28**	219.47

† For information about Leica StereoZoom Model A and B Stands, contact your Fisher Scientific Customer Service Representative.

Illuminator Only

- Features illuminator lamphouse with lamp, condenser lens system and cord to connect to transformer (not included)

ORDERING INFORMATION:

Uses replacement lamp BL 31-31-75.

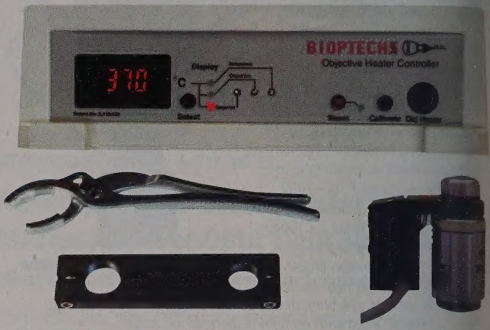
CELL ENVIRONMENT SYSTEMS

Bioptechs* Live-Cell Microscopy Systems

Open and closed systems for live-cell micro-observations and time-lapse imaging



Top: Objective Heater Controller. Lower left: Objective Wrench and Pliers. Lower right: Standard Objective Heater. Order all separately.

Objective Heater and Controller

For use with high-numeric-aperture objectives

Use with the Delta T* Culture Dish System (above) or FCS2 Closed System.

- Accommodates objectives from 16 to 34mm diameter
- Controller slowly heats objective over 15-min. warmup period, then holds objective at setpoint within 0.2°C
- Safety shutdown and audible alarm circuit protect objective if objective sensor deviates more than 0.9°C after the setpoint temperature is reached
- Features large backlit LCD; built-in calibration; and auto reset

ORDERING INFORMATION:

Dimensions: 17L × 9W × 9"H (43.2 × 22.9 × 22.9cm). For 120–240V 50/60Hz. Objective wrench and pliers also available (see ordering table)

Description	Mfr. No.	Cat. No.	Each
Heaters			
Standard 16–28mm	150819	**12-071-25**	675.00
Large 26–35mm	150812	**12-071-26**	735.00

ptechs* Live-Cell Microscopy Systems, Contd.

lta T* Culture Dish System

en-dish, live-cell environmental/optical ntainment system

Top: Delta T Controller. Bottom: Nikon* and Olympus* Round Stage Adapter with Delta T Dish and Hinged Perfusion Adapter Set.

micro-observation and applications uiring physical access to cells or ue: microinjection, electrostimulation, unding, micromanipulation, mechanical bing, recording, and stimulation

ccurate temperature control, uniform eat distribution, and high-numeric- perture compatibility

Vorks in confocal applications; adapts specimens from monolayered dherent cells to tissue preparations, ith inverted, water-immersion, and pright microscopes

ystem passes ~0.9w electrical charge through thin indium tin-oxide oating on underside of glass substrate where cells are grown, ansferring heat through glass to cells

hermal regulation via instantaneous analog control of a feedback loop

lo peripheral heating: cells are unaffected by surface evaporation, heat not lost to the atmosphere

fter plating, cells are ready for incubation or time-lapse imaging

ontroller has real-time temperature display (ambient to 50°C, accuracy 0.1°C); compensates for surface evaporation

larmed protection circuit safeguards cells

imensions: 15½L × 6W × 3"H (39.4 × 15.2 × 7.6cm), operates on 00–240V 50/60Hz or 24V battery

lta T Culture Dish options

isposable polystyrene/glass dishes are available plain (when temperature ontrol is not needed) or with electrically conductive, optically transparent oating and silver bus bars; 6mm depth optimizes access for microinjection nd manipulation. O.D., 35mm, tapering to 23mm optical aperture

ishes with 0.50mm thick bottoms or clear 0.17mm coverslip bottom re available

or fluorescence imaging, select black culture dishes

CLUDES:

ntroller includes Internal reference for user-adjustable calibration and TTL erface for confocal application. Delta T Starter Set includes controller, pack of clear culture dishes, cover glass lid and heated lid. Both require propriate stage adapter; order separately.

QUIRED ACCESSORIES:

rter Kit and Controller require appropriate stage adapter; order separately.

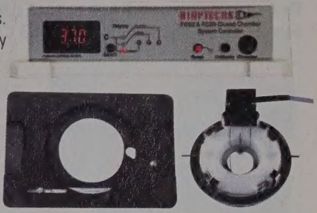
equires stage adapter. Order separately.

FCS2 and FCS3 Closed Systems

Integrated solution for closed-system microenvironmental control with near-laminar perfusion

Systems offer compatibility with all microscopy techniques. New FCS3 system is specifically optimized for use with upright microscopes. Both consist of controller, chamber, microaqueduct slides and stage adapter.



FCS2 Controller (top) and FCS2 Chamber (lower right) are supplied as part of a Starter Set (12-071-14). Order Zeiss (K), Ludl and Prior Stage Adapter (lower left), separately.

- Parallel-plate flow cell provides uniform tempera ture control, user-definable flow cavity; works with all illumination modes
- Easily modified for time-lapse micro-observation of living cells; especially suited for stopped-flowthrough high-rate flow procedures requiring rapid media exchange and where discrete control of cell surface shear is adjustable
- Controls cell temperature uniformly across entire field, from ambient to 50°C ±0.1°C; bicarbonate or organic buffers can be used in chamber
- Separate channels for microaqueduct slide and chamber frame
- Backlit LCD, user calibration, and auto reset
- Patented microaqueduct slide ensures proper Koehler illumination with high-numeric-aperture optics in transmitted and reflected modes
- Cover slip is 40mm dia. × 0.16 to 0.19mm thick; slide is 75 O.D. × 13mmH (3 × ½")
- Imaging aperture: 22mm
- Volume (min./max.): 6.6/706mm^3; maximum volume exchange rate: 1/sec.
- Separation between optical surfaces, 50 to 1000µm; minimum fluid aperture, 0.63mm^2

ORDERING INFORMATION:

System dimensions: 17L × 9W × 9"H (43.2 × 22.9 × 22.9cm). For 120/240V 50/60Hz. Require Objective Heater and Controller for high NA objectives.

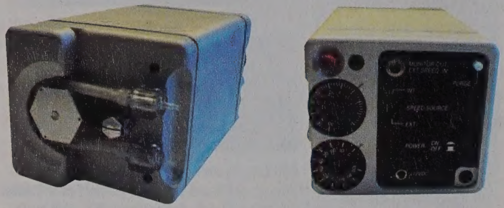
LOOKING FOR CO$_2$ INCUBATORS?
See the Incubators section pp. 977-1000.

Bioptechs* Live-Cell Microscopy Systems, Contd.

Bioptechs* Live Cell Microscopy Perfusion System

Required for use with Bioptechs Delta T* Culture Dish System and with FCS2 and FCS3 Closed Systems



Front (left) and back (right) of Microperfusion Pump (12-071-22)

- Delta T open-dish system requires hinged perfusion adapter set, perfusable cover glass lid, microperfusion pump, and double tube pump set
- FCS2 and FCS3 closed systems require microperfusion pump and single tube pump set

Microperfusion Pump

- Single- or dual-channel peristaltic pump designed specifically for low flowrates of 2 to 75mL/hr.
- Pump base is threaded for easy mounting to a stand or fixture near the microscope
- Driven by a tachometer-regulated, multistage DC gear motor for smooth analog rotation of the roller spindle to prevent instantaneous steps
- Regulated by internal control circuitry (adjustable from 2 to 75mL/hr.) or by computer via computer-controlled analog port

ORDERING INFORMATION:

Pump measures 4L × 2½W × 2¼"H (10 × 6 × 6cm); weighs 1 lb. (0.45kg).

INCLUDES:

9V AC adapter; contains an internal 9V battery that can function as primary power; single 1⁄16" I.D. tube for use as a single-channel pump and a dual tube with two 1⁄16" I.D. tubes for use as a dual-channel pump; tubes are terminated with a 1⁄16" tubing barb

MICROSCOPE SUPPLIES

SLIDES

Fisherfinest* Premium Microscope Slides

Highest purity, corrosion-resistant water-white glass

Fisher Scientific's finest quality microscope slides

- Made from highest purity, corrosion-resistant water-white glass
- Flat, ripple-free
- Specimens observed in true color, without distortion—exceed requirements of Fed. Spec. NNN-S-450
- Precleaned twice to eliminate debris and improve wettability
- Slides are packed in an airtight wrapper to keep out dust and moisture that can cause sticking
- Premium-grade slides are available: plain; frosted on one end with Superfrost* coating that won't smudge, rub or wash off during normal handling; or fully frosted for cytology use
- Slides frosted on one end come in standard or extra-thick widths
- Superfrost slides offer high visibility, opaque white writing surface
- Raised coating separates slides in box to help prevent sticking and scratching
- Handy dispenser box of 72 slides is dated to aid inventory control, stock rotation, assure freshness
- Holds slides upright for one-at-a-time dispensing

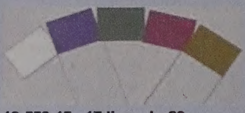
*Fisherbrand** Superfrost* Plus and ColorFrost* Plus Microscope Slides

An ideal choice for frozen sections, cytocentrifuge preparations and standard Papanicolaou smears



12-550-15, -17 through -20

Feature the same outstanding performance as regular Superfrost and ColorFrost slides, except with a special treatment process that electrostatically adheres tissue sections and cells to the glass without need for special adhesives or protein coatings.

- Special treatment virtually eliminates tissue loss during staining; saves hours of slide preparation
- Chemical-resistant white marking surface on Superfrost Plus slides and colored marking surface on ColorFrost Plus slides for easy identification throughout procedures

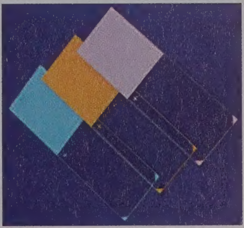
Fisherfinest* Capillary-gap Slides

NEW

For Ventana* TechMate*, MicroProbe* and Code-On* stainers

Made with a revolutionary adhesive technology. Attract and chemically bond fresh or formalin-fixed frozen tissue sections to the surface of the slide.



12-548-6A, 12-548-6C, 12-548-6B

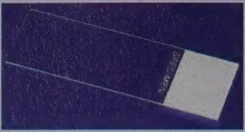
- Ideal for special stains, immunocytochemical and *in situ* DNA hybridization
- Compatible with toluidine blue and hematoxylin and eosin rapid frozen section stains
- Use 100µm slides when increased drainage is needed
- Use 130µm slides when specimen is mounted on a non-capillary-gap slide
- Extra gap width allows slide pair to function as a standard pair of capillary-gap slides

Capillary Gap Width	Color	Cat. No.	Pack of 144	Case of 10 Pack
75µm	Aqua	**12-548-6A**	84.55	735.31
100µm	Lilac	**12-548-6B**	84.50	734.64
130µm	Gold	**12-548-6C**	119.40	1038.23

*Fisherbrand** Superfrost* Clipped Corner Microscope Slides

NEW

45° clipped corner slide offers exceptional cleanliness and resistance to sticking



12-550-14

- Designed specifically for the Sysmex SP-100 slide prep unit
- Tight tolerances for the length and width help to reduce accumulation of glass chips within the instrument
- Corners are safer, less prone to chipping during handling
- Draws specimens away from edges
- Durable, opaque printed surface inert to common laboratory chemicals and reagents
- Autoclavable
- Size: 25 × 75mm, 1mm thick

Cat. No.	Pack of 144
12-550-016	58.35

Thermo Scientific* Erie* Gold Seal* Microslides

Plain, Precleaned Slides

Colorless, noncorrosive glass

- Ground and polished edges
- Thickness: 0.97 to 1.07mm for 3 × 1" and 75 × 25mm slides; 1.1 to 1.3mm for 75 × 50mm slides
- Precleaned to ensure spotless appearance
- Packing box conveniently doubles as slide file

ORDERING INFORMATION:

Full case quantity packaged in Moistur-Barrier* carton

*Fisherbrand** Microslide Holder

Heavy cardboard

- Holds two 3 × 1" or 75 × 25mm slides, with or without cover glasses
- Thumb groove allows easy removal
- Can be mailed in additional packaging (not supplied)

12-587-16

Cat. No.	Pack of 36	Case of 12 Pack
12-587-16	39.60	427.70

*Fisherbrand** Color-Coded ABS Plastic Boxes for 25 or 100 Slides

Provide dust-free storage; available in five colors

Sturdy, color-coded ABS plastic boxes accommodate either 25 or 100 slides.

- Hold 3 × 1" and 75 × 25mm slides
- Numbered slide partitions correspond to numbered index card in lid
- Stackable
- 100-slide box comes with hinged lid

MILLS

BASIC

IKA* A11 Basic Mill

Stainless-steel analytical mill is ideal for batch processing

14-260-61

Supplied with impact blade for crushing hard and brittle materials such as bone, teeth, tissue, coal, limestone and frozen samples.

- Chamber capacity: 80mL
- Manual control of grinding head in chamber ensures complete sample grinding
- High-speed action (up to 28,000rpm)
- Electronic overload protection

ORDERING INFORMATION:
Chamber dimensions: 3⅜L × 3⅜W × 9½"H (8.4 × 8.4 × 24cm); Accessories include 250mL grinding chamber, cutting blade for grinding fibrous substances and tungsten carbide blade for grinding materials with a hardness greater than 4Mohs (all sold separately online)

INCLUDES:
Impact blade

CERTIFICATIONS:
CE marked, UL listed

Electrical Requirements	Mfr. No.	Cat. No.	Each
115V 50/60Hz	2900000	**14-260-61**	913.30
230V 50/60Hz	2900001	**14-259-145**	913.30

LOOKING FOR A11 BASIC MILL ACCESSORIES?

A 250mL Grinding Chamber (14-259-146) and stainless-steel or tungsten carbide cutting blades can be found online.

Visit www.fishersci.com and search for A11 Basic Mill

IKA* M20 Universal Mills

Ideal for grinding hard, brittle materials and soft, frozen materials with brittle characteristics

14-259-053

Typical samples include dried vegetation, soil, frozen meat, and plastic granulates.

- Grinder capacity, 1 to 250mL
- Maximum feed particle size, 20mm (Output rate depends upon length of operation, type and amount of sample in chamber)
- Large, removable, 250mL stainless-steel grinding chamber provides easy cleaning and efficient processing
- Chamber is double-walled with cooling jacket; can be water-cooled using hose nozzles on back of chamber
- Motor, with speeds up to 20,000rpm, can alternately operate two grinding chambers
- Supplied with stainless-steel cutting blade/beater suitable for crushing most brittle materials up to hardness of 5Mohs
- Blade removes easily for cleaning

ORDERING INFORMATION:
Mill dimensions: 6¹¹⁄₁₆L × 6¹¹⁄₁₆W × 13¾"H (17 × 17 × 35cm)

INCLUDES:
Stainless-steel cutting blade/beater

Electrical Requirements	Mfr. No.	Cat. No.	Each
115V 50/60Hz	1603603	**14-259-053**	2988.30

Bel-Art* Scienceware* MicroMill* Grinde

For rapid, high-speed grinding of small samples from 20 to 50mL

08-

Stainless-steel or hard-faced blade rotates up to 12,000 rpm to grind wide range of samples, including rocks, minerals, bone, muscle tissue, plant matter, ceramics, glass, grain, kaolinites, pharmaceuticals, plastics, and seeds.

- High torque, ⅕hp (150w) motor delivers 30 oz.-in. (2.2kg-cm) torque at 12,000rpm
- Operates only when cover is latched to provide safety and prevent sample loss
- Built-in heat exchangers maintain temperature
- Control panel features overload protection, reset buton, and pilot light
- Epoxy-coated aluminum housing has nonskid rubber feet
- Housing and cover each have ¼" (6mm) tubing connection for circulati water, methanol/dry ice liquid, or liquid nitrogen
- Cover, grinding assembly and milling blade head are removable for clear

ORDERING INFORMATION:
Dimensions (L × W × H), overall: 5½ × 7 × 11" (14 × 18 × 28cm); grinding chamber: 2⅛" dia. × 1"D (54 × 25mm)

INCLUDES:
Unit and standard 6' (1.8 3-wire cord and plug, stainless-steel blades

Electrical Requirements	Mfr. No.	Cat. No.	E
110VAC 60Hz	37252-0000	08-335	149

Foss Tecator Cyclotec* Sample Mill

Self-cleaning, flow-through design for fast, uniform grinding of feeds, grains and leaves

TC1093-002

- Grinds samples with up to 10% moisture and oil content
- Maximum throughput: 4g/second, 40 samples/hour
- Maximum sample size: 10mm
- Hopper capacity: 100mL
- Motor: ½hp
- Maximum speed: 20,000rpm
- High-volume airflow enables self-cleaning and minimizes heat increase, thermal degradation, and cross-contamination

Operation

- High-speed action rolls the sample against the inner surface of a durable grinding ring, then passes it through a fine mesh screen
- Resulting grist size depends on size of screen used

ORDERING INFORMATION:
Dimensions: 11¾L × 8W × 15¾"H (29.8 × 20.3 × 40cm); Accessories including 150mL Bottle (TC1000-3679), Replacement Grinding Rin (TC1000-4463), and screens are available online

INCLUDES:
Two 125mL sample bottles with snap-on caps; 0.5 and 1.0mm screens; Allen keys; and addition grinding ring and seal for grindin chamber

Electrical Requirements	Cat. No.	E
110V 60Hz, 570w	**TC1093-002**	480

LOOKING FOR MORE CYCLOTEC* PARTS AND ACCESSORIES?

Large Inlet Assembly (TC1000-2485), replacement Grinding Ring (TC1000-4463), 125mL replacement Sample Bottles (TC1000-3679) and dust collection covers and screens can be found online.

etsch* Grindomix Laboratory Knife Mill

ind and homogenize samples with high water, oil, or t content

ckly and efficiently batch process a variety of dry, t and medium-hard foodstuffs such as fresh fruits, ats, cheese, oilseeds, grains, breads and pastries.

- rocesses batches up to 700mL
- /laximum initial sample size: 40mm
- ample output is <300µm in size
- 50w motor with 1200w peak power
- ulse mode for pregrinding and mixing
- 'ariable speed control from 2000 to 10,000rpm in 00rpm increments

08-417-01

- ▸ Cutting chamber has two straight knives in the center of the grinding vessel
- ▸ Integrated memory function for storing frequently used time/speed combinations
- ▸ Automatic safety interlock prevents accidental opening during operation
- ▸ Replaceable knife and grinding chamber
- ▸ Free-floating cover adjusts chamber size to sample volume and provides for a perfect degree of homogenization

ORDERING INFORMATION:
Dimensions: 14½L × 8W × 10⅝"H (37 × 20 × 27cm); For 100–110V 50/60Hz

INCLUDES:
Mill, knife and 1L polypropylene container with cover

Description	Mfr. No.	Cat. No.	Each
Test Sieve	202510003	**08-417-01**	2871.39

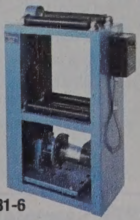
r Mills

ace-saving roller mills grind algae, crystalline emicals, coal, inks, paints, pigments, plant aggregates, cks, soils

- 'ariable speed from 20 to 300rpm
- oller design keeps jars centered, eliminates creepage
- ubber roller construction eliminates static electricity
- C motor with solid-state controls
- Velded construction, with roller chain drives and sealed ball bearings
- ingle- or multi-tier models
- hree-position adjustment on all rollers except bottom one on two- and hree-tier models
- /letal pans on multi-tier mills contain jar contents in case of breakage or pillage

ORDERING INFORMATION:
For 115V 60Hz; Dimensions, Roller: 13L × 2" dia. (33 × 5.1cm); Roll guard cover available for 08-381-8 Mill, sold separately online

REQUIRED ACCESSORIES:
Collection jar and grinding media (sold separately online)



08-381-6

LOOKING FOR JARS AND GRINDING MEDIA?

SPECIALTY

amplePrep* 6770 Freezer/Mill* Cryogenic Grinder

NEW

cryogenic laboratory impact mill capable of processing many normally ungrindable samples

ed to prepare samples for DNA/RNA extraction, pharmaceuticals, ieralogical studies, medical research, plastics, polymers, plant and mal tissue, bone, and heat-sensitive materials. With a self-contained uid nitrogen tub and insulated case.

- iample size: 0.1 to 5.0g
- 'hills samples to liquid nitrogen temperatures
- 'ouch-screen interface with removable control panel
- /lagnetically driven impactor is the only moving part; no mechanical inkages
- ieparate closed grinding vials prevent cross-contamination and maintain ample temperature during grinding cycle
- Iolds one sample vial (6751 or 6771) for grinding, with the capacity to iold two additional vials in a pre-cooling chamber
- iafety interlock

ORDERING INFORMATION:
Dimensions: 19½L × 13⅜W × 11"H (49.5 × 33.6 × 27.9cm); Net weight: 18 lb. (8.2kg); For 115V 60Hz; grinding containers and other optional accessories sold separately (see next page)

6770-115

INCLUDES:
Grinder, Extractor/Vial Opener (6754), one Vial Rack (6755), 8" (20.3cm) controller interconnect cable and power cord

REQUIRED ACCESSORIES:
Liquid nitrogen (order separately)

Accessories Contd. on next page.

SPEX SamplePrep* 6770 Freezer/Mill* Cryogenic Grinder, Contd.

ACCESSORIES

For use with SPEX SamplePrep* Freezer/Mill Cryogenic Grinder

Vial Set 6751

- Makes one complete vial plus three spare center sections
- Sample capacity: 0.5 to 4.0mL
- Includes stainless-steel impactor, two end plugs, and four polycarbonate center cylinders (6751C4)
- Individual components available

Microvial Set 6753

- Sample capacity: 0.1 to 0.5mL per vial
- Includes three 6753V microvials with holder
- 6753V microvials have stainless-steel end plugs, center cylinder and impactor

Chromium-free Vial Set 6771

- Sample capacity: 0.5 to 4.0mL per vial
- Includes chromium-free impactor, four polycarbonate center cylinders and two end plugs
- Transparent plastic allows visual check of grinding process

SPEX SamplePrep* Geno/Grinder* Tissue Pulverizer/Shaker Mill

Automated grinder/mill performs mechanical disruption of plant and animal tissue for the isolation of nucleic acids (RNA and DNA), proteins, enzymes, and yeast

Designed for vigorous up-and-down shaking of deep-well titer plates.

- Variable grinding speed from 500 to 1600 strokes per minute
- Handles two standard deep-well titer plates (5L × 3W × 2"H [12.7 × 7.6 × 5cm])
- Sample preparation is completed in about two minutes with the addition of 1-2 grinding balls to the sample along with a buffer solution (balls and buffer not included)
- Digital 99 min., 59 sec. timer displays both full timer setting and time remaining in the grinding cycle
- Two safety interlocks, a lockdown latch, and a pneumatic cylinder stabilize the lid for safe operation
- Clamping mechanism has secondary locking tabs for additional safety

2000-115

ORDERING INFORMATION:

Dimensions: 17L × 20½W × 22"H (43 × 52 × 56cm); net weight: 110 lb. (50kg); for 115V 60Hz, 10A; grinding media sold separately

INCLUDES:

Mill, Grinding Ball Dispenser (2100), four 96-well Titer Plates (2200), and 16 height-adjustment spacers for different titer plates (four of each: 1/32", 1/16", 1/8", 1/4"), three-wire grounded cord and plug

Large-Capacity Freezer Mill Accessories

For use with SPEX SamplePrep* Large-Capacity Freezer/Mill Cryogenic Grinder

Grinding Vial Set 6801

- Exclusively for 6850 SPEX Large Capacity Freezer/Mill
- Makes one complete vial plus three spare center sections
- Sample capacity up to 50mL
- Transparent plastic allows visual check of grinding process
- Includes stainless-steel impactor, two end plugs, and four polycarbonate cylinders (6801C4)
- Components available separately

Grinding Vial Set 6751

- Makes one complete vial plus three spare center sections
- Sample capacity: 0.5 to 4.0mL
- Includes stainless-steel impactor, two end plugs, and four polycarbonate center cylinders (6751C4)

Accessory Packages

- Include extractor/vial opener and vial rack
- Order 6800A when using only 6751 vial set
- Order 6800C when using both 6751 and 6801 vial sets

AutoExtractor*

- Electrically powered version of 6804 Extractor/Vial Opener
- Easily opens cold 6751 and 6801 vials
- For 115V 60Hz

Autofill System

- Automatically maintains proper level of liquid nitrogen in 6850 mill during operation
- Provides safe, efficient liquid nitrogen handling
- Minimizes fluid loss, saves refill time
- Requires cryogenic transfer hose (not included; contact your Fisher Scientific Customer Service Representative for details)

SPEX SamplePrep* 8000D Dual Mixer/Mill*

Efficient two-clamp laboratory mill for pulverizing hard, brittle samples

8000 D

Also called a shaker mill or high-energy ball mill. Reduces samples to analytical fineness. Can be used for mechanical alloying.

- Sample size: 10g per vial (for grinding), up to 60mL (for blending or mixing)
- Two-sample capacity increases sample throughput
- Accepts grinding/mixing vials from 2⅜ to 3⅛" in length and up to 2¼" in diameter
- Speed: 1060 cycles/min. (back and forth)
- One or two samples can be processed simultaneously; however, if one sample is processed, a second empty vial must be inserted to maintain the balance of the system
- Features include a variable-range 100-min. electronic timer, START/PAUSE/STOP buttons, ⅓hp motor, dual clamps for multiple sample capacity, digital display, safety interlock system, and forced-air cooling
- Optional adapters (8010 and 8011) permit processing of multiple samples in ½ × 1", ½ × 2", and ¾ × 2" vials

ORDERING INFORMATION:
Dimensions: 24 × 17 × 11" (61 × 43 × 28cm); Weight: 82 lb. (37kg); for 115V 60Hz; accessories sold separately, at right.

INCLUDES:
Mill and power cord

Cat. No.	Each
8000-D	6200.00

SPEX SamplePrep* 8000M Mixer/Mill*

A high-energy ball mill, shaker mill, or laboratory grinder used to grind, pulverize, or mix samples to analytical fineness

8000M-115

Also used in mechanical alloying applications.

- Sample size range: 10g (grinding); 60mL (blending and mixing)
- Speed: 1060 cycles/min.
- Features include a variable-range 100-min. electronic timer, safety interlock system, START/PAUSE/STOP buttons, and shock-mounted ⅓hp electric motor for tabletop operation
- Accepts grinding/mixing vials from 1¾ to 3⅛" in length and up to 2¼" in diameter
- Adapters (8010 and 8011, order separately) permit processing of multiple samples in ½ × 1", ½ × 2", and ¾ × 2" vials

ORDERING INFORMATION:
Dimensions: 19 × 14 × 18" (48 × 36 × 46cm); Weight: 76 lb. (35kg); for 115V 60Hz; accessories sold separately, at right.

INCLUDES:
Mill and power cord

Retsch* MM 301 Mixer Mill

Ideal for dry, wet and cryogenic grinding of small amounts of sample

08-417-79

Excellent for disrupting biological cells as well as the isolation of DNA and RNA. Mixes and homogenizes powders and suspensions in seconds.

- Two grinding stations
- Max. sample volume: 40mL (2 × 20mL)
- Max. jar size: 50mL
- Feed size: up to 8mm (based on feed material)
- Final size (approx.): 5µm
- Touch keypad controls with digital display
- Adjustable time setting from 10 seconds to 99 minutes
- Three-setting memory for repeatable runs
- Parameters retained in standby memory for subsequent processes
- Self-centering mechanism precisely and consistently places grinding jars for optimal reproducibility
- Self-locking clamping device secures jars

APPLICATIONS:
Reproducible dry, wet, cryogenic and cell disruption grinding

ORDERING INFORMATION:
L × W × H: 18½ × 11⅞ × 9" (47 × 30 × 23cm); Weight: 44 lb. (20kg); for 120V 50/60Hz; accessories sold separately.

INCLUDES:
Mill and quick-clamping device

REQUIRED ACCESSORIES:
Grinding jars and grinding balls (sold separately online)

WARRANTY:
Two years

CERTIFICATIONS:
CE marked

LOOKING FOR MM 301 MIXER MILL ACCESSORIES?

Grinding jars and grinding media are available online.

Visit www.fishersci.com and search for MM 301 Mixer

Retsch* Models PM 100 and PM 200 Planetary Ball Mills

Benchtop ball mills are ideal for wet or dry grinding applications requiring the highest degree of fineness

- Energy and speed control enables reproducible results
- Graphic display and one-button operation for setting speed, time, energy input, grindingdirection reversal
- Powerful, maintenance-free drive maintains constant controlled speed for continuous use
- Memory stores up to 10 combinations of grinding parameters for repetitive tasks
- Maximum timed run: 99 hours, 59 minutes, 59 seconds
- Built-in automatic fan ventilates chamber for safe wet grinding with solvents
- Low vibration rates allow unattended operation
- With serial interface

Model PM 100

- Single grinding station
- For grinding jars from 12 to 500mL (nominal volume)
- Feed size: <10mm
- Grind size: <1µm (normal grinding based on feed material); <0.1µm (colloidal

Model PM 200

- Two grinding stations
- For grinding jars from 12 to 125mL (nominal volume)
- Feed size: <4mm
- Grind size: <1µm (normal grinding based on feed material); <0.1µm (colloidal)

APPLICATIONS:

Agriculture, biology, biotechnology, ceramics and glass, chemicals, construction materials, environmental, medicine, mineralogy, new materials testing

Retsch
PM 200

08-418-162

ORDERING INFORMATION:

Dimensions: 16½ × 24⅞ × 18½" (42 × 63 × 47cm); Weight, PM 100: 176 lb (80kg); PM 200: 159 lb. (72kg); grinding jars and balls sold separately

INCLUDES:

Mill only

MIXERS

sher Scientific* Vortex Mixers

ırable, rugged vortexers offer ceptional versatility and value

02-215-375

ıilable in fixed and variable-speed models as well an advanced pulsing vortexer. A wide range of essories allow these mixers to handle vessels n microtubes to flasks.

ed-speed Mixer

- ne-touch unit for high-speed mixing at 3200rpm
- ctivated by applying pressure to mixing head
- upplied with cup head and 3" head with cover

alog Mixer

- ariable analog speed control from 100 to 3200rpm for gentle to igorous action
- ontinuous mode for use with accessory attachments
- ouch mode activated when depressing the cup head
- hree-way power switch
- upplied with cup head and 3" head with cover

ital Mixer

- leal for applications demanding repeatable results
- ariable speed control from 500 to 3000rpm
- ouch keypad controls and LED display for speed and time
- licroprocessor control maintains set speed for consistent mixing
- imer displays elapsed time; auto shutoff at end of cycle
- ontinuous or touch modes
- hree-way power switch
- upplied with cup head and 3" head with cover

lsing Mixer

- owerful pulsing vortexer provides excellent cell disruption in minutes
- ulse feature reduces heat generation while delivering more effective mixing
- ariable speed control from 500 to 3000rpm
- ouch keypad controls and LED display for speed and time
- licroprocessor control for consistent mixing
- ontinuous or touch modes; pulse key
- imer displays countup during continuous run; countdown during timed runs
- ıcludes holder for 12 × 1.5/2.0mL microtubes

DERING INFORMATION:

ıensions: 6⅞L × 4⅞W × 4⅞H (17.3 × 12.2 × 12.2cm); Weight: 11 lb. g); accessories sold separately

CLUDES:

ed-speed, analog and digital mixers are supplied with cup head and 3" ber head with cover; Pulsing mixer includes microtube holder

ACCESSORIES

Multi-Vessel Holders and Kits

Holders†

- **Microtube Holder** mixes 48 × 2.0/2.5mL microcentrifuge tubes
- **Microwell Plate Holder** mixes 96-well plates or deepwell blocks
- **20-25mm Tube Holder** mixes up to 8 × 50mL centrifuge tubes
- **14-19mm Tube Holder** mixes up to 8 × 15mL tubes
- **9-13mm Tube Holder** mixes 5mL culture tubes and microvials
- **Vessel Holder** mixes Erlenmeyer flasks and media bottles
- **Ampule Tube Holder** mixes storage vials and test tubes

Accessory Kits

- **Tube Holder Kit with Retainer** includes three tube holders (for 9-13mm, 14-19mm, and 20-25mm tubes), one flat foam insert, two vessel harnesses and one insert retainer
- **Microtube and Microwell Plate Holder Kit with Retainer** includes one microtube holder, one microwell plate holder, and one insert retainer

Other Accessories

- **Insert Retainer** secures vessel harness and foam inserts
- **3" Head** permits easy-touch mixing of beakers and flasks
- **3" Head Cover** slides over top of head—ideal for odd-shaped containers
- **Cup Head** secures test tube to prevent slippage

Fisher Scientific* Multi-Tube Vortexers

Mix up to 50 samples at once

02-215-452

02-215-450

Vortexing action is created by holding the top tray of the vessel securely in place while the bottom tray moves freely in a defined, 3.6mm eccentric orbit.

- Powerful permanent, continuous-duty motor delivers quiet, rattle-free mixing
- Top plate adjusts along two stainless-steel posts; removable for easy sample access
- Rugged corrosion-resistant, stainless-steel base
- Suction-cup feet dampen motion and prevent sliding

Digital Multi-Tube Vortexer

- Microprocessor-controlled for precise, repeatable results
- LED display for speed and time
- Speed range: 500-3500rpm (25rpm increments)
- Programmable timer (1 sec. to 9999 hrs.)
- Timed or continuous-run modes
- Pulsing program can be operated in either mode

Analog Multi-Tube Vortexer

- Speed range: 1200-2400rpm
- Automatic timer (0 to 60 sec. for simple repeat procedures)

ORDERING INFORMATION:

Dimensions: 9¼L × 15W × 15½"H (23.5 × 38.1 × 39.4cm). Accessory test tube and centrifuge racks and post extension kit are available separately.

INCLUDES:

One 50-place foam rack for 12mm test tubes, one tray pad set for mounting and support plates, 92" (234cm) detachable three-wire cord and plug (230V models supplied with European type plug)

WARRANTY:

Two-year limited

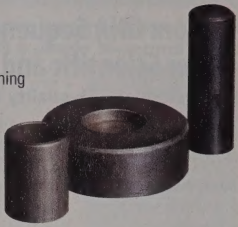
Alloy Tool Steel Mortar and Pestle Set

Plattner's diamond mortar and pestle set for crushing small ore samples

- Mortar has flat-bottomed cylindrical cavity
- Fitted with removable sleeve for retaining crushed material in cavity
- Pestle fits snugly inside sleeve



12-990

ORDERING INFORMATION:
Cavity, 1 dia. × ¼" deep (25 × 6.4mm). Mortar O.D., 3" (76mm). Pestle diameter, 1" (25mm). Pestle length, 3" (76mm).

Cat. No.	Each
12-990	251.30

Agate Mortar and Pestle Sets

Thick, heavy wall

- Octagonal agate mortars
- Come with matching pestle

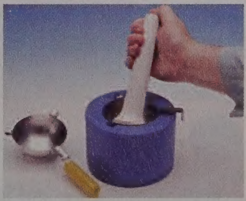
Scienceware* Liquid Nitrogen-Cooled Mortar

For safe grinding of frozen tissue samples

- Stainless-steel mortar is suspended by brackets above stainless-steel bowl of liquid nitrogen
- Bowl rests in insulated polyethylene housing
- Eliminates hazard of flying liquid nitrogen droplets when grinding frozen tissue samples
- Mortar has detachable 4" (10cm) insulated handle



12-947-1

ORDERING INFORMATION:
Housing measures 6½ dia. × 4½"H (16.5 × 11.4cm).

Mortar only†	37260 0001	**12-947-2**	75.38

† Without handle, cooling bowl or housing. Handy spare when grinding differing samples.

NUCLEIC ACID RESEARCH

SERVICES

Custom DNA Sequencing Services from Fisher Scientific and SeqWright*

Fast, reliable, high-quality services

From large-scale genome projects to FDA submissions, we offer a complete range of cost-effective solutions with a guaranteed accuracy of 100%.

Featured Services Include:

- DNA Sequencing
- SNP Discover
- Shotgun Library Construction
- Genotyping
- Quantitative PCR and DNA Synthesis

ORDERING INFORMATION:

To order, visit **www.fishersequencing.com.**

DNA Synthesis Services from Fisher Scientific and Operon*

Offering a wide variety of affordable, high-quality oli

Choose from a full range of longmers and modified oligos in a variety of scales, formats, and purification levels.

Featured Services Include:

- Custom Oligos
- Array Ready Oligo Sets

ORDERING INFORMATION:

Visit our Web Site, **www.fisheroligo.com**, for more information

NUCLEIC ACID PURIFICATION—DNA

Millipore* Montage* Plasmid Miniprep$_{96}$ Kits

Generate high-quality plasmid DNA in 50% less time than traditional methods

LSKP 096 Series (vacuum manifold and pipetter not included)

- Typical yield from 1mL of bacterial culture is 4 to 6µg
- 96-well kit uses unique separation technology
- Simple, 25-minute protocol yields clean and reproducible DNA for sensitive downstream applications
- Collection of purified sample from the top of the plate and lack of centrifugation steps allow compatibility with automated systems

INCLUDES:

All necessary reagents and disposables

REQUIRED ACCESSORIES:

MultiScreen* Vacuum Manifold with underdrain support grid (MAVM 096 0R)

No. of Preps	Cat. No.	Each
1 × 96	**LSKP 096 01**	165.00
4 × 96	**LSKP 096 04**	497.00
24 × 96	**LSKP 096 24**	2572.00

ACCESSORIES

Replacement Solutions for Montage* Plasmid Miniprep$_{96}$ Kits

Description	Quantity	Cat. No.	Each
Cell Lysis Solution	500mL	**LSKC LS5 00**	71.00
Cell Resuspension Solution	500mL	**LSKC RS5 00**	71.00
Neutralization Solution	500mL	**LSKN S05 00**	71.00

Millipore* Montage* SEQ$_{96}$ and SEQ$_{384}$ Sequencing Reaction Cleanup Kits

Fully automatable kits rinse away unincorporated dye terminator without the need for binding and eluting protocols

LSKS 0 Series

Utilize 96- or 384-well filter plates with proprietary size-exclusion membranes to retain sequencing products while excess dye terminator is removed quickly and efficiently. Recovered sequencing products are highly purified and result in long, accurate sequencing reads.

- Protocols are optimized for use with BigDye* Terminator version 3.0, 3.1, 1.1 and ET Terminator sequencing chemistries
- Sequencing products may be resuspended in any aqueous electrokinetic injection buffer
- Plates are suitable for use with ⅛ sequencing reactions, reducing reagent costs by miniaturization

INCLUDES:

Clear polystyrene 96- or 384-well plates, optimized injection solution (96-well kits only)

REQUIRED ACCESSORIES:

MultiScreen* 384 Vacuum Manifold with underdrain support grid (MAVM 096 0R)

LOOKING FOR EMSA ASSAYS OR TRANSCRIPTION FACTOR ASSAYS?

isit www.fishersci.com and search for EMSA

Millipore* Micropure*-EZ Enzyme Remover

Removes restriction or modifying enzymes from double-stranded (ds) DNA with a simple 30-second spin

42528

- Delivers >85% recovery of dsDNA; higher with a quick 5 to 10µL rinse
- Utilizes an adsorptive, hydrophilic membrane with a high affinity for protein, but not for dsDNA
- Requires less hands-on time than precipitation or "bind and elute" purification procedures
- More effective than heat inactivation
- Can be used with a Microcon* concentrator for nucleic acid purification, concentration, and desalting in a single unit

Device	Sample Volume	Hold-up Volume	Cat. No.	Pack of
Micropure-EZ with vial	250µL	5µL	**42528**	8/11.07

In tests, all enzymes were removed from solutions containing DNA and 5µg BSA. Removal was indicated by undetectable or inconsequential enzyme activity in the filtrate.

5 PRIME* FastPlasmid* Mini Purification System

Isolates plasmid DNA from bacterial culture in as little as nine minutes

NEW
5 PRIME
5 PRIME
FP2300000

- Yields up to 20µg of high-copy and up to 10µg of low-copy plasmid DNA from 1.5mL of bacterial culture
- Utilizes one-step lysis in conjunction with an efficient DNA binding membrane, reducing the number of steps and number buffers required for purification
- Requires no specialized equipment
- Produces high-quality DNA that is suitable for demanding downstream applications, including automated sequencing, transformation, in vitro transcription, and PCR

No. of Preps	Sample Size	Cat. No.	Each
100	1.5 to 3mL	**FP2300000**	119.65
250	1.5 to 3mL	**FP2300010**	260.07

5 PRIME* Perfectprep* Plasmid 96 VAC Direct Bind Kit

Isolates ultrapure plasmid DNA in a 96-well format

FP2300210

- High yields up to 15µg plasmid DNA per isolation
- Consistent plasmid concentration
- Reproducible elution volumes
- Excellent sequencing data; average PHRED Q20 scores greater than 600 bases
- Average read lengths 700 bases with 98.5% accuracy
- A high-throughput method of purifying plasmid DNA from 1 to 1.25mL *E. coli* bacterial cultures grown and processed in a 96-well plate format
- Processes 96 samples in just 30 minutes using the rapid protocol; 4 × 96-well plates take approximately 45 minutes
- Designed and optimized for use with vacuum manifolds and compatible with most liquid handling and pipetting stations
- No alcohol precipitation required
- Produces ultrapure plasmid DNA that is free of RNA or chromosomal DNA contamination and is suitable for all downstream applications

Quality Assurance: Each lot of the Perfectprep Plasmid 96 VAC Direct Bind is tested in plasmid DNA isolation as described in the protocol. The isolated plasmid DNA is then evaluated for quantity and quality by agarose gel analysis, successful digestion with a variety of restriction endonucleases, automated fluorescent DNA cycle sequencing, and transfection of cultured cells.

INCLUDES:
Filter plates, culture plates, collection plates, plate seals, reagents

STORAGE CONDITIONS:
Store at room temperature.

NOTE:
50 plate kit (4800 preps) is supplied without culture plates and collection plates. (For replacement plates, see FP2300230 and FP2300240, below.)

5 PRIME* ArchivePure* DNA Kits

Liquid-phase, genomic DNA purification for over 200 sample types

FP23007

- Virtually foolproof protocols yield recoverable DNA at every step, even after a procedural error
- Protocols are scalable for a wide range of sample sizes
- Isolate high molecular weight DNA, from 100 to 200kb
- Convenient kits include all required reagents, premixed and ready-to-use, right out of the box
- Exceptional purity, A260/A280 ratios from 1.7 to 2.0
- Remove PCR inhibitors and other contaminants
- Purify archival-quality DNA
- Gentle, nontoxic detergents and salts
- No toxic chemicals, phenol, or organic chemicals

APPLICATIONS:
Southern blotting, PCR, sequencing, SNP analysis, archiving

5 PRIME* ArchivePure* Blood Kits

Suitable for fresh or frozen whole blood, bone marrow, packed cells, or buffy coat

- Ideal for clinical molecular diagnostics, gene hunting, pharmacogenetics clinical trial labs
- Typical yield: 35µg/mL blood
- Sample volumes from 150µL to 20mL collected in common coagulants (EDTA, citrate, or heparin)
- Typical preparation time: 25 to 60 minutes
- Purified DNA is stable for at least 12 years when refrigerated at 2° to 4°C

INCLUDES:
RBC lysis solution; cell lysis solution; protein precipitation solution; DNA hydration solution; RNase A solution

5 PRIME* Stop RNase Inhibitor

NEW

Nonhuman-origin protein inhibits greater than 90% of RNase activity in reactions where human placental RNase inhibitors (HPRI) inhibit only 50%

- Inhibits the same types of ribonuclease as HPRI, including RNases A, B, and C, without interfering with RNases T1, T2, H, U1, U2, or CL3
- Remains stable under a broad range of pH, DTT concentrations, and temperatures; best activity occurs in the absence of DTT
- Supplied at a concentration of 30 units/µL, with 30 units being required to process 30µL of sample
- Sterile, DNase- and RNase-free

STORAGE CONDITIONS:

Store at –20°C in constant temperature freezer.

15,000U	FP2500110	207.34

Promega* Maxwell* 16 Purification Instrument

Efficient, automated genomic DNA purification from a wide range of sample types

Purifies samples using MagneSil* Paramagnetic Particles, allowing optimal capture, washing, and elution of the target material. The magnetic-particle-handling instrument vigorously mixes samples with enough force to grind tissue in reagent cartridge, preventing clogged tips and partial reagent transfers that can cause suboptimal results.

- Superior mixing reduces total time spent from sample collection to purified nucleic acid and improves consistency of yield and purity
- Supplied preprogrammed with sample-specific automated methods
- Processes up to 16 samples in about 30 minutes, depending on sample type
- Suitable for up to 400µL blood samples, 50mg tissue or cells
- Integrated tissue grinding eliminates preprocessing of mouse tails or tissue samples

REQUIRED ACCESSORIES:
Maxwell 16 Purification Kits

STORAGE CONDITIONS:
Store at 5° to 40°C.

PR-AS1000

Cat. No.	Eac
PR-AS1000	24,500.0

For Laboratory Use.

Promega* Maxwell* 16 DNA Purification Kits

Used with the Maxwell 16 Instrument (PR-AS1000 above) to provide an easy method for efficient, automated purification of genomic DNA

- Blood DNA Kit is designed to process up to 400µL of whole blood per reagent cartridge
- Tissue DNA Kit is recommended for processing of up to 50mg of tissue per cartridge
- Each Cell DNA Kit cartridge accommodates either bacterial and mammalian cells in up to 400µL liquid or as a cell pellet

PR-AS1010

INCLUDES:
48 Maxwell kit-specific cartridges, 50 purification plungers, 50 elution tubes, 20mL elution buffer

REQUIRED ACCESSORIES:
Maxwell 16 DNA Purification Instrument

STORAGE CONDITIONS:
Store kits at room temperature (22° to 25°C).

ACCESSORIES

Vac-Man* 96 Vacuum Manifold

Manifold allows Wizard* SV 96 DNA Purification System to be a true in-line filtration procedure

PR-A2291 (in use)

- Direct lysate clearing is coupled to DNA binding without the need to disassemble the manifold
- Waste solutions are drawn out of the manifold to an external trap (not included), eliminating the need to disassemble the manifold to discard waste
- An additional collar is required for some laboratory workstations

escription	Cat. No.	Each
ac-Man* 96 Vacuum Manifold	**PR-A2291**	299.37
ollar for Vac-Man 96 Vacuum Manifold	**PR-A2311**	77.39

Promega* PureYield* Plasmid Maxiprep System

Isolates transfection-quality plasmid DNA

PR-A2392 (vacuum manifold not included)

- Provides a rapid method for purification of up to 1mg of plasmid DNA from a 250mL bacterial culture
- High purity and concentration of plasmid DNA gives proven performance in transfection, in vitro expression and other molecular biology applications
- Vacuum protocol simplifies purification of multiple samples at one time
- Simple protocol eliminates tedious, gravity-drip columns and post-elution alcohol precipitation
- Membrane column allows purification of large amounts of plasmid DNA
- Designed for use with a vacuum source and vacuum manifold such as the Vac-Man* Laboratory Vacuum Manifold

No. of Preps	Cat. No.	Each
10	**PR-A2392**	169.63
25	**PR-A2393**	392.49

Promega* PureYield* Plasmid Midiprep System

Isolates high-quality plasmid DNA from bacterial cultures

- Designed to purify 100 to 200µg of plasmid DNA from 50mL bacterial culture
- May also be used with up to 250mL of bacterial culture using an alternative protocol
- Utilizes a silica-membrane column which allows for the purification of large amounts of plasmid DNA
- Incorporates an Endotoxin Removal Wash to remove substantial amounts of protein, RNA, and endotoxin contaminants
- Compatible with a variety of protocols—centrifugation, vacuum, or a combination of centrifugation and vacuum
- Provides rapid purification—no need for high-speed centrifugation, gravity-drip columns, or post-elution alcohol precipitation
- Produces purified DNA suitable for sensitive applications such as eukaryotic transfection, in vitro transcription, and coupled in vitro transcription/translation

INCLUDES:

Cell lysis solution, cell resuspension solution, column wash, endotoxin removal wash, neutralization solution, nuclease-free water, PureYield binding columns, PureYield clearing columns

STORAGE CONDITIONS:

Store at room temperature (22° to 25°C).

No. of Preps	Cat. No.	Each
25	**PR-A2492**	185.40
100	**PR-A2495**	675.30

U.S. Patent 6,194,562, Australian Patent 740145, Canadian Patent 2,329,067 and other patents pending.

Promega* Wizard* Genomic DNA Purification Kits

Totally scalable, column- and resin-free system

- Isolate genomic DNA from whole blood, cultured cells, yeast, mouse tissue or numerous other cell sources
- Utilize unique nuclei lysis and protein precipitation solutions to produce high-purity DNA with average $OD_{260/280}$ of 1.6 to 2.0 in approximately 60 minutes†
- Eliminate the need for organic extractions and high-speed centrifugations

PR-A1120

INCLUDES:

Cell lysis solution, nuclei lysis solution, protein precipitation solution, DN
rehydration solution, RNase solution‡

No. of Preps	Sample Size	Yield	Cat. No.	E
100	300µL	5–15µg/300µL	**PR-A1120**	131.
500 (5 × 100)	300µL	5–15µg/300µL	**PR-A1125**	318.
100	10mL	5–15µg/300µL	**PR-A1620**	805.

† To fully rehydrate DNA, allow an additional hour at 65°C (149°F) or overnight at room temper

‡ PR-A1620 does not include RNase Solution.

Promega* Wizard* SV Genomic DNA Purification System

One system for tissue, cultured cells, or mouse tails

PR-A2360

- Permits fast, simple preparation of genomic DNA without centrifugation of the lysate prior to purification
- Processes up to 20mg of tissue, 1.2cm mouse tail, or 5 × 10^6 cultured cells in a single prep
- Can be used in either a microcentrifuge (spin) or vacuum protocol
- Processes up to 24 samples at once in the microcentrifuge format; up to 20 samples in the vacuum format with the Vac-Man* Laboratory Vacuum Manifold (PR-A7231) and the Miniprep Vacuum Adapters (PR-A1331, see below)
- Isolates genomic DNA from cultured cells in about 20 minutes and from tissue or mouse tails using an overnight (16–18 hour) digest with Proteinase K, followed by a 20-minute isolation
- Produces high-quality purified DNA that is suitable for agarose gel analysis, restriction enzyme digestion, and PCR

INCLUDES:

Collection tubes, 0.5M EDTA (pH 8.0), nuclease-free water, nuclei lysis solution, RNase A solution, Wizard SV lysis buffer, Wizard SV minicolumns, Wizard SV wash solution

No. of Preps	Cat. No.	Each
50	**PR-A2360**	96.49
250	**PR-A2361**	382.75

Australian Patent 730718 and other patents and patents pending.

ACCESSORIES

Vac-Man* Vacuum Manifold

For use with any Wizard* DNA Purification System or SV Total RNA Isolation system

PR-A7231

- 20 sample capacity
- Supplied with 20 individual One-Way Luer-Lok* stopcocks for individual port control

Description	Cat. No.	Each
Vac-Man Vacuum Manifold	**PR-A7231**	114.43
Vacuum Adapters, 20 each	**PR-A1331**	11.08

Promega* Wizard* SV 96 Genomic DNA Purification System

For 96-well processing using manual or automated protocols

PR-A237 Se

- Provides fast, simple purification of intact DNA from tissue and cultured cells
- Processes up to 20mg of tissue, 1.2cm mouse tail, or 5 × 10^6 cultured cells per well
- Purifies genomic DNA from tissue or mouse tails in 45 to 60 minutes following an overnight digest with Proteinase K, and from cultured cell in about 30 minutes
- Eliminates the need for a centrifugation step
- Produces high yields of high-quality genomic DNA that can be used in demanding downstream analysis, including PCR

INCLUDES:

96-well deep-well plate; binding plate; 0.5M EDTA (pH 8.0); nuclease-fre water; nuclei lysis solution; RNase A solution; Wizard SV wash solution; Wizard SV lysis buffer

REQUIRED ACCESSORIES:

Manual, benchtop purification requires the Vac-Man* 96 Vacuum Manifold (PR-A2291) or a similar 96-well manifold; use with an automat liquid-handling workstation may require vacuum manifolds specific to the workstation.

No. of Preps	Cat. No.	E
1 × 96	**PR-A2370**	175.
4 × 96	**PR-A2371**	650.

Australian Patent 730718 and other patents and patents pending.

Promega* Wizard* DNA Clean-Up System

Purifies linear and circular DNA from 200 to 50,000 bp

- Removes contaminants
- Uses a quick and easy batch column procedure
- Produces purified DNA in 15 minutes or less
- Does not require phenol extractions or ethanol precipitations

PR-A7280

INCLUDES:

Wizard DNA Clean-Up Resin, 100mL; Wizard minicolumns, 100; 3cc syringe barrels, 100

STORAGE CONDITIONS:

Store at room temperature (22° to 25°

No. of Preps	Cat. No.	Ea
100	**PR-A7280**	122.

U.S. Patents 5,658,548 and 5,808,041; Australian Patents 689815 and other patents and patents pending.

*Trademark. See Trademark Reference.

Prices subject to change.

)mega* Wizard* Magnetic DNA rification System for Food

purification of DNA from a variety of food samples, uding corn seeds, cornmeal, soybeans, soy flour, and milk

es MagneSil* Paramagnetic Particles (PMPs), which permit the binding cleic acids to occur in solution, resulting in increased binding kinetics inding efficiency. The particles can also be completely resuspended g the wash steps of a purification protocol, enhancing contact with emoval of contaminants and increasing nucleic acid purity.

npatible with processed foods, such as corn chips, chocolate, lecithin, l vegetable oils, when used with suggested protocol variations

quires only one-third the time of other methods

quires minimal centrifugation and eliminates organic extractions

duces purified DNA that can be used in PCR-based testing for netically Modified Organism (GMO) DNA sequences

INCLUDES:

MagneSil Paramagnetic Particles; lysis buffer A, food; lysis buffer B, food; precipitation solution, food; RNase A solution

REQUIRED ACCESSORIES:

MagneSphere Technology Magnetic Separation Stand (PR-Z5332 or PR-Z5342)

STORAGE CONDITIONS:

Store at room temperature (22° to 25°C).

No. of Preps	Cat. No.	Each
200	**PR-FF3750**	703.00
400	**PR-FF3751**	1265.00

U.S. Patents 6,027,945 and 6,368,800, Australian Patent 732756 and other patents and patents pending.

Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.

NUCLEIC ACID PURIFICATION—RNA

RIME PerfectPure* RNA Blood rification Kits

luce pure, concentrated RNA from up to 10mL whole od

NEW

ification complete in under 90 utes

C lysis in 15 minutes

venient on-column DNA atment (DNase included)

ntains sufficient reagents for up 0 purifications

5 PRIME
5 PRIME

FP2302100

LICATIONS:

R and real-time RT-PCR, quantita- T-PCR, microarray analysis/gene expression, Northern ng, ribonuclease protectionassays, cDNA synthesis, in vitro cription

UDES:

kits include: RBC lysis, lysis, wash 1, wash 2, elution, DNase buffer, Nase wash solutions; TCEP reducing agent; purification columns; microfuge tubes; DNase 1

02120 also includes: PRECLEAR* columns, additional RBC lysis CEP

Preps	Sample Size	Cat. No.	Each
	0.05-3mL	**FP2302100**	134.58
	0.05-3mL	**FP2302110**	335.93
	3-10mL	**FP2302120**	446.15

5 PRIME* PerfectPure* RNA 96 CellVac Kit

Column-based technology eliminates the most common problems of RNA purification, such as overloading and clogging

NEW

- Produces high quality RNA from cultured cells
- Suitable for use with 10,000 to 5 × 10^6 cells
- Utilizes a vacuum-based method
- Processes 96 samples in less than 45 minutes
- Generates RNA suitable for RT- PCR, microarray analyses, Northerns, dot blots, in vitro translations, ribonuclease protection assays and other downstream analyses

INCLUDES:

Lysis solution, wash 1 solution, wash 2 solution, DNase buffer solution, lyophilized DNase I, elution solution, purification plates, waste plates, collection plates, and pierceable adhesive seals

No. of Preps	Cat. No.	Each
8 × 96	**FP2302540**	1850.00

5 PRIME* PefectPure* RNA Cell and Tissue Kits

Isolate RNA from 0.5 to 40mg tissue or from 1 × 10⁴ to 5 × 10⁷ cells

- Allows purification of a wide range of sample sizes, in as little as 20 minutes
- Produces high purity, ready-to-use RNA, ideal for sensitive downstream applications
- Kits come complete with all components, including DNase
- Unique chemistry uses nonchaotropic reagents
- High sample success rate with no DNA, RNase, protein, or chaotropic salt contamination

APPLICATIONS:

Real-Time PCR, RT-PCR, Microarray

INCLUDES:

FP2302330, FP2302340, and FP2302350 kits:

Lysis solution, purification columns, wash 1 solution, wash 2 solution, elution solution, transfer tubes, 1300 units of lyophilized DNase I, DNase buffer solution, DNase wash solution

FP23023

FP2302400, FP2302410, and FP2302420 kits also include:

Preclear* columns, TCEP

FP2302430 and FP2302440 kits also include:

Proteinase K solution, Preclear columns, TCEP

Description	No. of preps	Cat. No.	Ea
PerfectPure RNA Cell Kit	10	**FP2302330**	103.3

5 PRIME* PerfectPure* RNA 96-Well Cell Kits

Produce up to 100μg of purified RNA in about 90 minutes

- Accommodates cell densities up to 5 million cells per well, using either adherent or suspension cell lines
- Convenient, easy-to-use kits come with premixed reagents
- Bind cellular RNA to a high-capacity glass fiber matrix in a 96-well plate
- Samples can be processed at room temperature, without a fume hood
- No time-consuming incubation steps
- Contain no harsh organic solvents, reducing agents, or reactive cyanide salts—no hazardous waste disposal needed
- Resulting RNA is essentially free of genomic DNA, protein, and other enzymatic inhibitors; suitable for experiments or long-term storage
- Purified RNA can be frozen, thawed, and refrozen without degrading

APPLICATIONS:

RT-PCR and real-time RT-PCR, Quantitative RT-PCR, microarray; Northern, dot, and slot blotting; ribonuclease protection assays, cDNA synthesis, in vitro transcription, poly-A RNA selection

FP2302500 Seri

INCLUDES:

Lysis, wash 1, wash 2, and elution solutions; DNase buffer; purification, waste, and elution plates; lyophilized DNase 1; sterile reagent reservoirs; sterile adhesive seals

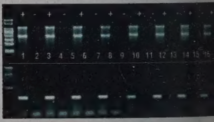
Promega* Maxwell* 16 Total RNA Purification Kit

Use with the Maxwell 16 instrument to provide high yields of DNA-free total RNA using a novel approach that selectively removes all detectable genomic DNA prior to automated walkaway RNA purification.

- No detectable contaminating genomic DNA means fewer repeated experiments or unexplained variable results
- Efficient processing, superior sample capacity
- For most sample types, eluted RNA concentration is directly ready for QRT-PCR; no post-purification concentration required



STORAGE CONDITIONS:

Store at room temperature (22°C to 25°C).

Cat. No.	Ea
P1S105	290.

Promega* PureYield* RNA Midiprep System

Isolates intact total RNA with no detectable genomic DNA carryover using a novel, non-DNase technique designed for sensitive analysis methods

- Yields up to 1mg of total RNA with undetectable levels of genomic DNA contamination
- Uses a protocol compatible with a variety of sample types, including tissues, cultured cells, bacteria, yeasts, plants, and white blood cells; can be modified for other sample types
- Designed for use with centrifugation or vacuum
- Enables rapid purification of total RNA without DNase treatment, organic solvents, protease digestions, or alcohol precipitations
- Produces RNA suitable for use in sensitive downstream applications

INCLUDES:

PureYield binding columns; PureYield clearing columns; RNA dilution buffer; RNA lysis buffer; RNA wash solution; clearing agent; β-mercaptoethanol; nuclease-free water

PR-Z3740

STORAGE CONDITIONS:

Store RNA lysis buffer with added β-mercaptoethanol at 4°C; store othe components at room temprature (22°-25°C)

No. of Preps	Cat. No.	Ea
10	**PR-Z3740**	100.5
50	**PR-Z3741**	450.5

U.S. Patent 6,194,562, Australian Patent 740145, Canadian Patent 2,329,067 and other patents pending.

*Trademark. See Trademark Reference.

Prices subject to change.

omega* SV Total RNA Isolation System

mbrane-based system purifies intact total RNA from ues, cultured cells, and white blood cells in as little one hour

- orporates a DNase I treatment to substantially reduce genomic DNA ntamination without detectable DNase carryover in the final eparation
- ocesses up to 60mg of tissue per purification, depending on tissue type
- ay be used with micro-centrifugation (spin) or vacuum protocol; requires niprep Vacuum Adapters (PR-A1331) for the vacuum protocol
- mpatible with the Vac-Man* (PR-A7231) and Vac-Man Jr. (PR-A7660) cuum Manifolds
- oduces purified RNA that is suitable for routine molecular biology plications, including RT-PCR and Northern blotting

INCLUDES:

Spin column assemblies and elution tubes, DNase I (lyophilized), SV RNA lysis buffer, SV RNA dilution buffer, β-mercaptoethanol, $MnCl_2$ (0.09M), Yellow core buffer, SV DNase stop solution, SV RNA wash solution, nuclease-free water

PR-Z3100

No. of Preps	Cat. No.	Each
10	**PR-Z3101**	60.20
50	**PR-Z3100**	191.40
250	**PR-Z3105**	876.00

Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.

Australian Patent 730718 and other patents and patents pending.

omega* SV 96 Total RNA Isolation System

the preparation of intact, purified total RNA from tissue culture cells

- ostantially reduces genomic DNA contamination through a DNase atment step
- ifies 96 samples at once, in less than one hour with the walk-away omated protocol
- npatible with automated liquid-handling workstations
- ninates the need for phenol/chloroform extraction or ethanol cipitation

UDES:

ng plate; DNA elution plate; DNase I (lyophilized); β-mercaptoethanol; Nase stop solution; $MnCl_2$ (0.09M); nuclease-free water; SV RNA wash on; SV RNA lysis buffer; Yellow core buffer; plate sealers

REQUIRED ACCESSORIES:

Requires the use of the Vac-Man* 96 Vacuum Manifold (PR-A2291) or similar 96-well manifold for manual purification.

PR-Z3500

No. of Preps	Cat. No.	Each
1 × 96	**PR-Z3500**	248.93

Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.

NUCLEIC ACID LABELING

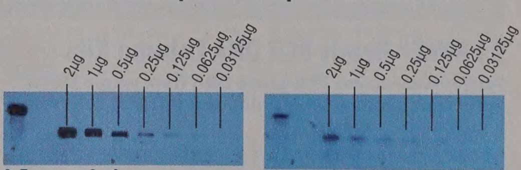
rmo Scientific* Pierce* SuperSignal* RPA III Chemiluminescent Detection Kit

sitive method for the detection and quantitation of specific mRNA transcripts in a complex mixture of total or mRNA molecules

- ose in minutes instead of overnight
- lengthy probe purification necessary
- bles detection of rare message transcripts
- ne of the disposal or safety hassles associated with radioactivity
- gle-tube reaction with no phenol extraction or proteinase K digestion
- uires minimal hands-on time. Nonisotopic probes are stable for years ead of weeks

UDES:

dization III Buffer (1mL); RNase Digestion III Buffer (15mL); Yeast RNA L from torula yeast, sheared to ~300 bases); RNase Inactivation/ itation III Solution (22.5mL); Gel Loading Buffer II (1.4mL); Elution Buffer (8mL); PTRI-Actin-Mouse Linearized DNA Template in TE 0.5mg/mL); Mouse Liver RNA (100µL in 0.1mM EDTA 0.5mg/mL); e A/RNase T1 Mix (300µL); RNase T1 (cloned, 5,000 units/mL 300uL) mmonium Acetate (1mL); Reagents: Thermo Scientific Pierce Signal RPA III Stabilized Streptavidin-Horseradish Peroxidase Conjugate); SuperSignal RPA III Luminol/Enhancer Solution (80mL); SuperSignal I Stable Peroxide Solution (80mL); SuperSignal RPA III Blocking Buffer L); SuperSignal RPA III 4X Wash Buffer (500mL); SuperSignal RPA III rate Equilibration Buffer (500mL)



A. Exposure: 6 min **B. Exposure: 16 h (no screens)**

Figure A. Thermo Scientific Pierce SuperSignal RPA III Kit vs. Figure B. a radioactive RPA using the positive β-actin control: sensitivity and efficiency. RPAs using the positive control system contained within the kit. Lanes 1 and 2: hybridized using 80pg/10,000cpm of β-actin probe and 2µg of yeast torula RNA. Lanes 3-9 : hybridized using 80pg/10,000cpm of β-actin probe and the indicated amount of target (mouse liver total RNA). Lanes 2-9 : were digested using a 1:100 dilution of RNase A/T1. Hybridization was performed at 42°C.

Mirus Bio *Label* IT* Nucleic Acid Labeling Kits

Efficient, direct, nonenzymatic labeling of DNA and RNA

- Kits label any DNA or RNA template—suitable for a wide range of applications
- One-step chemical method provides easy and consistent control of the labeling reactions
- Adjustable labeling density permits DNA and RNA to be optimally labeled for high sensitivity results
- Covalent mechanism provides permanent, nondestructive modification of nucleic acid residues—labels do not impact hybridization performance

Labeling Kits Containing Reagents

INCLUDES:
Sufficient reagents for labeling either 25 (Trial Size Kits) or 100µg (Full Size Kits) of nucleic acid

Description	Qty. Labeled	Cat. No.	Each
CX-Rhodamine Labeling Kit	25µg	**MIR 3125**	166.40

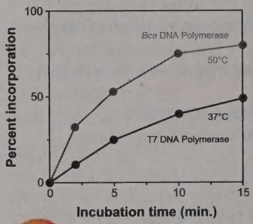
Takara* Ladderman* DNA Labeling Kit

Thermostable polymerase and longer primers increase DNA labeling efficiency up to 80%

- Polymerase isolated from *Bacillus caldotenax* YT-G allows polymerization through templates with high GC content (highly structured regions)
- Random priming is accomplished in no more than 10 minutes
- Designed for use with $[\alpha\text{-}^{32}\text{P}]$, $[\alpha\text{-}^{35}\text{S}]$, or $[^{3}\text{H}]$ dCTP labels, but can also be used with biotin, digoxigenin or DNP-labeled dUTPs by replacement of the dNTP mixture
- A probe with specific activity of $>10^{9}$ dpm/µg DNA can generally be obtained with $[\alpha\text{-}^{32}\text{P-}]$ dCTP (approximately 3000 Ci/mmol; 111 TBq/mmol)

Description	Quantity	Cat. No.	Each
Ladderman DNA Labeling Kit	40 rxns	**TAK 6046**	151.53



Random priming on a template with high GC content. Probes were prepared with various extension times using the Ladderman Labeling Kit (TAK 6046) or with T7 DNA Polymerase. The percent incorporation of radioactive label was measured for each time point.

Whatman* FTA* Cards

Collect, store, and transport DNA at room temperature

Patented FTA technology simplifies the isolation, storage, and processing of nucleic acids from biological sources including whole blood, buccal cells, and plant material. Sample is applied to the FTA card and allowed to dry; the cells are lysed on contact. The released DNA is captured, stabilized, and protected from nucleases, oxidation, and UV damage as well as microbial and fungal attack.

Clockwise from top left: 09-923-340, 09-923-341, 09-923-345, 09-923-346, 09-923-346, 09-923-344

- ▸ FTA cards inactivate organisms, including bloodborne pathogens, since all cells and viruses are lysed and proteins are denatured upon contact
- ▸ DNA can be recovered quickly—go from sample to PCR in less than 30 minutes
- ▸ DNA from blood stored at room temperature on FTA cards exhibits no loss in PCR efficiency after 14 years and counting
- ▸ Indicating FTA cards change color from pink to white upon sample addition to easily identify sample location, making them ideal for colorless samples
- ▸ FTA Gene Card is housed in a chipboard frame for compatibility with most automatic dispensing/pipetting systems when used with the FTA Gene Card Tray (09-923-349)
- ▸ CloneSaver* Cards capture BAC and plasmid DNA from bacterial culture, resuspended colony, or glycerol stock in a 96-well format and are stable at room temperature for at least four years
- ▸ PlantSaver* Cards capture a variety of plant DNA including transgenic species, and feature a laminated flap that allows the plant sample to be pressed into the FTA matrix without damaging the card

ACCESSORIES

FTA* Purification Reagent

Nontoxic, hypoallergenic solution for rapid purification of DNA stored on FTA Cards

- Reagent prepares DNA from a wide variety of specimens including whole blood, epithelial cells, cell cultures, solid tissues, yeast, and bacteria
- Simple washing procedure ensures complete removal of contaminants

FTA Reagent
Whatman

09-923-348

Description	Quantity	Mfr. No.	Cat. No.	Each
FTA Purification Reagent	500mL	WB12-0204	**09-923-348**	185.82

FTA* Card Applicators

For the collection of buccal cells

- Nonabrasive foam head is the same size as the sample area on indicating Classic, Mini, and Micro FTA Cards for easy sample application
- Sterile
- Individually packaged

09-923-375

Mfr. No.	Cat. No.	Pack of 100
WB10-0032	**09-923-375**	56.33

Harris Micro Punch

Sharp cutting edge provides quick and easy sampling from FTA* and CloneSaver* Cards with precise punching and ejection, uniform sampling, and no carryover between punches

- Polished-steel tips are precision tooled, heat treated, rust resistant, and case hardened
- Self-healing inert cutting mat ensures clean sample cuts and extends the life of the punch
- 2.0mm size is recommended for CloneSaver Cards
- Replacement tips and cutting mats are available separately

09-923-35 Series

Description	Mfr. No.	Cat. No.	Each
1.2mm Punch with Mat	WB10-0005	**09-923-352**	245.48

Replacement Mat	WB10-0020	**09-923-356**	43.72
Replacement Plunger, 1.2mm	WB10-0025	**05-713-921**	31.59
Replacement Plunger, 2.0mm	WB10-0026	**05-713-922**	31.59

FTA* Card Storage and Shipping Supplies

Multi-Barrier Pouches

- Seven-layer pouch protects cards from environmental contamination
- Tamper-evident seal maintains sample security
- Resealable pouch is available for CloneSaver* Cards

FTA Card Mailer

- Rigid protective cardboard mailer is used to transport FTA Cards in accordance with U.S. Postal Service requirements

09-923-359

Desiccant Packet

- 1g packet ensures that FTA Cards remain dry during transport or storage
- Color changes from blue to pink to indicate absorption of moisture

Combo Pack

- Combination of 1000 FTA Cards, Multi-Barrier Pouches, and Desiccant Packets in one convenient package

Description	Mfr. No.	Cat. No.	Pack of
Multi-Barrier Pouch for FTA Classic Cards	WB10-0037	**05-715-112**	100/75.43

OSMOMETRY

OSMOMETERS

Osmette A Model 5002 12-827-5

Osmette XL Model 5007 12-827-33

Multi-Osmette Model 2430 12-827-30

Micro-Osmette Model 5004 12-827

Osmette* Osmometers

Automatic digital osmometers measure osmolality in mOsm/kg H_2O

Use the freezing point depress ion method to provide a quick, accurate indication of total concentration. Instruments measure freezing points of solutions to 0.001°C, then directly translate them to measure of concentration.

Easy to Use

- Add sample tube to well, lower operating head to insert wire and thermistor temperature probe into the sample
- Freezing point is detected by the probe, with accuracy of ±0.001°C
- Digital display shows results directly in mOsm/kg H_2O
- Entire cycle takes between 1½ minutes per sample

Speedy and convenient

- Fast cooldown, completely zero-stable meter
- Reach operating temperature in <15 min. vs. 40 to 60 min. for other cryoscopic devices
- Eliminate Dewar flasks, ice baths, calculations
- Generate precise results in just 50 to 70 sec.; process 40 to 60 samples per hour
- Minimal training; simple two-step calibration takes less than five minutes
- All models hold calibration, eliminating daily calibration

Osmette A, Model 5002

- Automatic Operation
- Small 2 oz. (59mL) bath allows faster results with better control

Osmette XL, Model 5007

- Microprocessor-controlled calibration
- Includes built-in printer, keypad, statistical software and RS-232-C port
- Small 2 oz. (59mL) bath allows faster results with better control

Micro-Osmette, Model 5004

- Automatic Operation
- Features electronic cooling instead of a bath

Multi-Osmette, Models 2430 and 2430E

- 24-position sample turntable for true walk-away operation
- Feature electronic cooling instead of a bath
- Model 2430E features extended range
- Self-calibrating

APPLICATIONS:

Food and beverage industries, chemical manufacturing, pharmaceutical labs, research and quality control; clinical applications include diagnosis renal activity, disease electrolyte imbalance, hyper- and hyponatremia, measuring osmolality of body fluids.

mette II* and Osmette III* Osmometers

simplicity and dependability of Osmette* nometers in a small, lightweight size

Osmette III 12-827-35

l for freezing-point measurement smolality. One-step measurement.

nette II offers:

ito operation from 0 to 00mOsm/kg H_2O, ±<2mOsm/kg O (±1 S.D.)

itocalibration in <5 min.; ierent stability minimizes daily libration checks

ermoelectric heat sink for oldown time of ~2 to 3 min.

ecise results displayed digitally just 60 to 90 sec.

e self-filling disposable plastic mple tubes

-232-C output

nette III features all of above plus:

sy-to-use keypad

ilt-in printer and itistical software

APPLICATIONS:
Pediatric, neonatal, geriatric, and other applications where sample volume is limited.

ORDERING INFORMATION:
Weigh only 9 lb. (4.1kg). Measure 14L × 8½W × 5"H (35.6 × 21.6 × 12.7cm). Electrical requirements: 115V 50/60Hz, 0.5A.

Precision Con-Trol* Osmometer Reference Standards for Osmette*, Osmette II* and Osmette III* Osmometers

Carefully measured concentrations aid in quality assurance programs

CON-TROL
CON-TROL

13-287-25 Series

- Verify bottled calibration standards, preventing use of diluted or contaminated standards
- Verify instrument calibration, pinpoint deviations in instruments exhibiting nonlinear response

All standards are:

- Aqueous solutions of NaCl, gravimetrically prepared to provide labeled values, ±2mOsm
- Stabilized with trace amounts of inert ingredients

Con-Trol 290

- 290mOsm standard provides a check of test accuracy
- Concentration value is near the center of normal human serum range (278 to 305mOsm)

Con-Trol 100 and Con-Trol 500

- 100mOsm and 500mOsm standards
- Values bracket normal human serum range required in instrument calibration

ORDERING INFORMATION:
Each standard comes in 5mL glass ampule, packaged 12 per box. Con-Trol 290 contains ten 5mL ampules of Con-Trol 290 plus one each of Con-Trol 100 and Con-Trol 500. Shelf life of sealed ampules is three years at room temperature.

COMPLIANCE:
Verified by comparison to reference standards prepared from NIST* material.

OVENS

GENERAL PURPOSE

Fisher Scientific* Isotemp* Programmable Ovens

Offer exceptional performance, safe operation and precision control

Can be used for programmed tasks or simple, routine heating tasks. Digital control delivers superior temperature control and faster drying times.

- Temperature range: 50° to 325°C (122° to 617°F)
- Forced-air correction for uniform heating
- Digital display with intuitive menu options
- Program up to 12 ramp and 12 soak periods
- Automatic restart
- Indicator lights for operating parameters
- Backup temperature control
- Overtemperature alarm
- Durable enamel-painted steel panels with stainless-steel interior
- Long-lasting, low-density heating elements
- Exterior and door handle remain cool
- Exhaust port on top
- Adjustable shelf heights
- Door opens 180°
- Fiberglass gasket with stainless-steel mesh core prevents heat loss
- Nonslip black synthetic rubber feet

sher Scientific* Isotemp* Premium Lab Ovens

l-feature ovens available as gravity-flow or forced-air models in a variety of sizes

erating Features

tuitive microprocessor controls with touch keypad, LED digital display d on-screen prompts

riable temperature control from 50° to 275°C in 1°C increments

tomatic overtemperature protection at 5°C above setpoint with sual alarm

st settings retained in memory

ilt-in safety backup and circuit breaker to protect oven from power rges

inet Features

sy-to-clean stainless-steel chambers

amel-painted steel exterior with coated aluminum trim

w-watt-density, longlife heating elements

ick 2½" (6.4cm) all-around fiberglass insulation keeps exterior cool

sketed door has stay-cool latch; opens 180° for easy access

justable chrome-plated steel wire shelves (16¾ × 17⅜" [44 × 42.5cm])

nskid rubber feet elevate cabinet for ventilation

ee Sizes

all: 2.5 cu. ft. chamber volume; supplied with one shelf (hold up to 5)

edium: 3.75 cu. ft.; with one shelf (hold up to 8)

rge: 5.0 cu. ft.; with two shelves (hold up to 11)

ced-Air Ovens

liver more uniform heating for better temperature control and ster drying

ower circulates air throughout chamber; fresh air is mixed in d recirculated

ed air vented through top of oven

vity-Flow Ovens

rtical airflow for uniform sample heating

ed air expelled through top-mounted vent

th includes thickness of door; does not include handle.

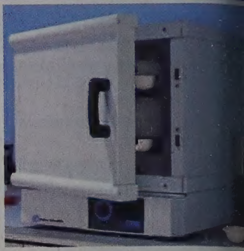
s require a 20-amp outlet (NEMA 5–20R).

Fisher Scientific* Isotemp* Standard Lab Ovens

Gravity-flow convection ovens with electronic control, ideal for general laboratory drying

- Temperature range: 50° to 225°C (122° to 437°F)
- Three sizes available
- Quick, easy temperature setting
- Backup temperature control
- Fast temperature recovery time
- Indicator lights show which thermostat is controlling oven temperature
- Durable powder-coated steel exterior
- Corrosion-resistant, easy to clean, stainless-steel interior
- Exterior remains at safe temperature
- Adjustable shelf heights
- Oven temperature can be monitored in port on top

13-247-625G Panel



13-247-62

- Door opens 180° and features grabber-type latch
- Nonslip black synthetic rubber feet

Fisher Scientific* Isotemp* Model 500 Economy Lab Ovens

Ideal for small drying and sterilizing jobs

Sturdy, reach-in gravity convection ovens are well suited to bacteriological, clinical, educational, and industrial labs on a tight budget. Light enough to move as needed.

13-246-506GAQ

- Gravity convection
- Temperature range: Ambient +5° to 210°C
- 0.7 and 1.7 cu. ft. capacities
- Features front-mounted electronic temperature control, red heating cycle indicator, ON/OFF switch, and green power indicator
- Continuous temperature uniformity
- Built-in backup controller for safety
- Double-wall construction of heavy-gauge steel with 1" (2.5cm) layer of impregnated fiberglass
- Aluminum chamber
- Door opens 180°; cool-touch handle and positive dual spring-loaded latches

ORDERING INFORMATION:
Smaller oven has one-shelf capacity; larger model has three-shelf capacity.

INCLUDES:
Thermometer holder, line cord with grounded plug; 0.7 cu. ft. unit comes with one removable chromium-plated metal shelf, 1.7 cu. ft. unit comes with three shelves.

REQUIRED ACCESSORIES:
Thermometer (13-246; order separately)

WARRANTY:
12 months

ermo Scientific* Precision* Economy Lab Ovens

v-priced ovens, suitable for most standard heating and drying plications, offer large capacities in a small footprint

lable with gravity or mechanical convection in three sizes.

erating Features

draulic or electronic temperature control from 50° to 210°C[1]

ace-savers—occupy just over 3.5 sq. ft. (0.33m^2), yet provide up to 11.5 . ft. (1.0m^2) of usable heating/drying area

, 2.5, and 4.5 cu. ft. capacities

ass I safety thermostat with overtemperature cut-out and indicator ht prevents thermal runaway

inet Features

ainless-steel interior and rugged steel cabinet offer easy cleaning and rability; resist corrosion

sulation (2" thick [5.1cm]) provides efficient heat retention and precise mperature uniformities

p vent for optimal venting

echanical convection ovens utilize balanced centrifugal blower for iform air distribution throughout chamber

13-264F

INCLUDES:

Two corrosion-resistant, nontip, nickel-plated shelves for convenient loading and unloading, vent cap, 0° to 250°C thermometer, line cord, and plug[2]

els 13-264F and -G feature hydraulic temperature control.

els 13-254-22 and -27 come with NEMA 5-20P plug.

Thermo Scientific* Precision* Lab Oven

Economical oven for everyday use

Ideal for general heating/drying lab applications including dry sterilization; drying of plant tissue, glassware, textile, paper, and rubber; asphalt, stability and QC/batch testing; aging and curing studies; and epoxy and plastic curing.

- Chamber capacity: 2.5 cu. ft. (70.8L)
- Analog temperature control with heating indicator light maintains temperatures up to 200°C, with sensitivity of ±5°C
- Provides 11.5 sq. ft. (1.0m^2) of usable heating/drying capacity in only 3.5 sq. ft. (0.33m^2) of counter space
- Fiberglass insulation is 2" thick (5.1cm) for efficient heat retention and uniform temperatures
- Stainless-steel chamber resists corrosion and contamination; adjustable exhaust port controls airflow from chamber

ORDERING INFORMATION:
Dimensions, chamber: 15½D × 18½W × 15"H (39 × 47 × 38cm); exterior: 21½L × 24W × 28"H (55 × 61 × 71.5cm); for 115V 50/60Hz, 1200w, 10.4A

13-254-29

INCLUDES:
Non-tip stainless-steel shelf, vent cap, 0° to 250°C themometer, line cord and plug, and leveling feet

Mfr. No.	Cat. No.	Each
51221126	**13-254-29**	1000.02

Thermo Scientific* Precision* Heavy-Duty Deluxe Ovens

Freas* ovens meet ASTM* E 145 IIA standards for temperature uniformity

Typical applications include aging, life, and exposure studies, precise moisture determinations, UL wire testing, thermal setting, and sterilizing.

- 1.4, 4.0, and 10.2 cu. ft. capacities
- Maximum temperature of 325°C (617°F)
- Uniformity of ±1°C at 200°C
- Features a bright LED display for actual temperature and setpoint monitoring
- 12-hour timer
- Programmable three-term PID controller with safety cutoff and temperature deviation alerts
- RS-422 capability for computer control and datalogging
- All stainless-steel interior
- Stainless-steel exterior door with fiberglass gasket for secure, tight seal
- Cold-rolled, chemical-resistant steel cabinet with powder-coated finish

13-248B

INCLUDES:
Two nickel-plated nontip shelves

CERTIFICATIONS:
UL listed

[1] Feature RS-232-C knockout for optional data interface.

[2] At 200°C with door open for 30 seconds.

[3] Comes with NEMA 5-20P plug.

Thermo Scientific* Thermolyne* Oven/Incubator

Provides rapid heatup and excellent temperature uniformity; economical oven for drying and incubating

- Capacity: 1 cu. ft. (28.3L)
- Heats to 56°C (133°F) in 9 minutes; uniformity: ±1.25° at 37°C
- Bimetallic thermostat controls temperature, from ambient to 140°C ±1°C (284°F ±1.8°F)
- Heating element and aluminum chamber deliver heat evenly
- Chamber door has large window for easy viewing
- Aluminum-lined chamber walls clean easily
- Thermometer port accommodates any partial-immersion thermometer

ORDERING INFORMATION:
Chamber dimensions: 12D × 12¼W × 11½"H (30.5 × 31 × 29cm); overall dimensions: 13L × 13¼W × 15½"H (33 × 34 × 39cm); for 120V 50/60Hz

INCLUDES:
Line cord and plug, one removable metal shelf

13-261-40

Mfr. No.	Cat. No.	Eac
OV19225	**13-261-40**	1035.0

WARNING
Ovens are not suitable for use with hazardous vapors.

ermo Scientific* Lindberg/Blue M* Economy Gravity Convection Ovens

al for small work volumes which do not require the accelerated drying es and chamber uniformity of mechanically convected ovens

13-258-30A

for baking, drying, conditioning, curing, preheating, incubating, izing, quality control and general lab use. Compact size— 2 cu. ft.—is suitable for tabletop.

- mperature range: 40° to 220°C (104° to 428°F); uniform to within 5% setpoint
- onitoring and control features include ON/OFF switch with power licator light and LED of setpoint and chamber temperature with solution to 1°C
- tual uniformity may vary depending on load, sample placement and bient conditions
- ulated by 2" (5cm) fiberglass on all sides and door; peripheral silicon or gasket minimizes heat loss
- teriors are double-wall, heavy-gauge steel with white painted finish d adjustable door latch and hinges
- eriors are Type 304 corrosion-resistant polished stainless steel
- feguarded by factory-set overtemperature protection
- haust port (3" [7.6cm]) on top is also adjustable

ORDERING INFORMATION:
For 120V 50/60Hz, 550w.

INCLUDES:
Two adjustable, perforated stainless-steel shelves and power cord

Capacity (Chamber Volume)	Exterior L × W × H[1]	Mfr. No.	Cat. No.	Each

[1] Exterior dimensions include exhaust stack and door handle.

ermo Scientific* Lindberg/Blue M* Gravity Convection Ovens

multiple applications in analytical, hospital/clinical and industrial labs

13-258-14

rating Features

- mperature range: 40° to 260°C
- iformity ±3% at 100°C (actual performance based on load, chamber e, sample placement, ambient temperature and environmental conditions)
- egral digital control with digital LED display for chamber temperature solution to 1°C); ON/OFF switch with POWER ON light
- ertemperature protection

inet Features

- rrosion-resistant stainless-steel interior
- avy-gauge steel exterior with scratch-resistant finish (Triple-wall for neral Purpose models; double-wall for Deluxe models)
- ick 3" (76mm) fiberglass insulation on all sides with silicon door seal
- ng-life, low-watt density heating elements are enclosed and protected
- ake ports at bottom allow fresh air entry for gravity airflow
- pplied with two adjustable open wire shelves

eral-Purpose Models

- justable overtemperature protection
- e exhaust port

Deluxe Series Models

- ▸ Factory-set, independent overtemperature protection
- ▸ Two exhaust ports (except Models G01310A and G01320A, with one)

ORDERING INFORMATION:
Stainless-steel exterior models are available; to order contact your Fisher Scientific Customer Service Representative.

INCLUDES:
Oven, two adjustable open-wire nickel-plated shelves and 10' power cord

CERTIFICATIONS:
UL, cUL listed. General-purpose models are also CE marked.

Thermo Scientific* Lindberg/Blue M* Mechanical Convection Ovens

Ideal for baking, drying, conditioning, sterilizing, and quality control

Available in Deluxe or General-Purpose models with painted- or stainless-steel cabinets.

10-549-212

Operating Features

- Digital, single-setpoint controller with a simultaneous LED display
- Microprocessor automatically optimizes control parameters during operation

Cabinet Features

- Stainless-steel interiors are easy to clean
- Exteriors are available in heavy-gauge steel with painted- or stainless-steel finish (double-walled for Deluxe Series, triple-walled for General Purpose)
- Aided by a fully insulated chamber, maximize energy efficiency and allow oven exterior to remain cool to the touch
- Heating elements located in chamber bottom are shielded by a layer of stainless steel
- Adjustable exhaust vent and air intake permit airflow to and from chamber
- Side-swing door with positive sealing latch allows for convenient one-handed access

Deluxe Models

- Temperature range: 40° to 300°C; uniformity ±1% at 100°C
- Horizontal airflow
- Independent, factory-set overtemperature protection

General Purpose Models

- Temperature range: 40° to 260°C; uniformity ±3% at 100°C
- Multidirectional airflow
- Adjustable overtemperature protection

INCLUDES:

10' (3m) power cord and two adjustable open-wire shelves. Stainless-stee exterior ovens have stainless-steel wire shelves; painted-steel exterior models have nickel-plated shelves.

CERTIFICATIONS:

UL, cUL listed. General-purpose models are CE marked.

WARNING
Ovens are not suitable for use with hazardous vapors.

amato* Mechanical Convection Ovens

ogrammable, multisegment/multistep PID controller ovides accuracy and user-friendly programmability

- ow programming of up to 15 segment/30 step programs (16 segment/32 p on large-capacity oven), including automatic start/stop, ramp and soak des—all easily entered through keypad.
- emperature range: from 5° above ambient to 260°C on Model DKN-810 to 210°C on Model DKN-900)
- tore 10 preset temperatures and up to 10 set temperatures
- ettings can be locked
- ID controller compensates for temperature changes caused by fluctuat-ng loads and setting changes to ensure accuracy
- uilt-in diagnostics include automatic shutoff and audible/visual alarms
- attery backup (standard on Model DKN-900; optional on Model DKN-10) retains time and temperature stored in memory
- orrosion-resistant Type 304 stainless-steel interior
- old-rolled carbon steel exterior with baked melamine finish

ORDERING INFORMATION:

Both ovens can be retrofitted with the following customizable options: RS-422-A or RS-232-C computer interface adapter; 3" (7.6mm) exhaust port; adjustable overtemperature control; temperature output terminal; program resume function; 24-hr./7-day temperature recorder; and cable port. Contact your Fisher Scientific Customer Service Representative for more information.

INCLUDES:

Removable Type 304 stainless-steel shelves (Model DKN-810, 4 shelves; Model DKN-900, 8 shelves)

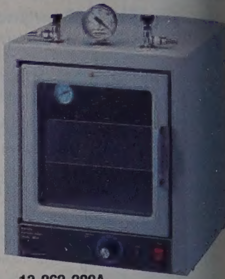
VACUUM

Fisher Scientific* Isotemp* Vacuum Ovens

Standard, large and economy ovens, suitable for a variety of drying applications



13-262-280A

Chamber capacities from 0.65 to 1.6 cu. ft.

- Wraparound elements deliver efficient, uniform heating
- Front-mounted indicator lights and controls
- Safety controller prevents temperature runaway
- Minimal leak rate
- Steel exterior with durable enamel finish
- Glass panel in door for viewing samples
- Corrosion-resistant, easy-to-clean, stainless-steel interior
- Removable shelves
- Oven floor can be used as additional shelf
- Separate inlet and outlet connectors/controls allow replacement of air with inert gas
- 7-day programmable timer (with 13-262-52 only)

REQUIRED ACCESSORIES:
13-262-285A is equipped with a 20A domestic plug; 20A service required

ACCESSORIES

Replacement Door Gasket Kit

- Includes gasket and adhesive.

Cat. No.	**Each**
SPN 50430	160.35

Thermo Scientific* Precision* Vacuum Ovens

Excellent vacuum and temperature performance for long-term lab and production needs

Ideal for production of semiconductors.

- Temperature range: 35° to 200°C
- Vacuum range: 1 atmosphere to 30"Hg within 10 microns, with adequate pump
- 0.45 and 1.6 cu. ft. models
- Stainless-steel chamber withstands corrosive vapors and aromatic hydrocarbons
- Walls insulated with 2" thick (5cm) fiberglass
- Window of ½" (1.3cm) thick tempered glass is 8 × 8" (20 × 20cm) and gasketed for vacuum sealing
- Heat-resistant silicone gaskets on window and door
- Positive door latch
- Exterior is cold-rolled steel with scratch-resistant epoxy-polyester finish

ORDERING INFORMATION:
Buna-N gaskets are recommended for volatile hydrocarbons, Viton*-B gaskets for acids; both available on special order.

INCLUDES:
Vacuum gauge, thermostat with calibrated dial, two metering valves for vacuum adjustment and bleeding, two shelves, and glass thermometer

ermo Scientific* Lindberg/Blue M* Vacuum Ovens

drying, curing, outgassing, aging, process control and other applications which require elevated temperature educed atmospheres or vacuum/purge with nonflammable and inert atmospheres

e capacities available.

rating Features

- ximum temperature: 260°C (500°F) with nominal uniformity of ±3.5% setpoint
- cuum: to 1×10^2 torr (10µm of Hg); 1" dia. (2.5cm)
- gle setpoint digital microprocessor control with simultaneous LED play of setpoint and actual temperature
- nt-mounted vacuum gauge and control valves for vacuum, gas and nt functions
- ertemperature safety system is factory set with reset pushbutton

mber Features

- rrosion-resistant stainless-steel construction
- ludes inert gas port, vacuum port and vent port
- ar-mounted vacuum manifold connects to pump (not included) or house vacuum source
- v-watt heating element extends oven life

inet Features

- avy-gauge steel exterior with choice of painted steel or stainless-steel ish
- al-wall construction with fiberglass insulation for minimum heat loss in lls and door
- gh-temperature silicone gasket is specially molded for a positive seal
- agnetic latch for positive door seal (4.5 cu. ft. capacity models include chanical latches)
- Viewing windows: ½" thick (1.3cm) in two smaller capacity models or ¾" thick (1.9cm) in 4.5 cu. ft. model; permit observation of work in progress without loss of heat
- Stainless-steel exterior models come with double door—a solid outer door over inner window door

INCLUDES:

Power cord and aluminum shelves (number of shelves based on model; see ordering table)

13-258-13

CERTIFICATIONS:

13-258-13, -13A, -13B and -13C are UL listed.

WARNING

Ovens are not suitable for use with hazardous vapor. For use with nonflammable, noncorrosive inert gases only.

Thermo Scientific* Napco* Vacuum Ovens

Provide uniform temperature

- Temperature range: +10° above ambient to 200°C (ambient +18° to 392°F), thermostatically controlled
- Vacuum range: 1 atmosphere to 30"Hg, with adequate pump
- 0.45, 1.6 and 4.5 cu. ft. (0.013, 0.045 and 0.127m^3) capacities
- Negligible loss over extended period of closed-door operation
- Two metering valves allow fine adjustment for vacuum and bleed operation
- Stainless-steel interior
- ½" thick (13mm) tempered-glass window provides excellent visibility
- Encased in thick fiberglass insulation
- Heat-resistant silicone gaskets

13-262-12, 13-262-1

ORDERING INFORMATION:

Replacement door gaskets, including Buna-N style, are offered; replacement Thermometer 13-262-3A fits Models 5831 and 5851; all accessories are available online.

INCLUDES:

Two aluminum shelves

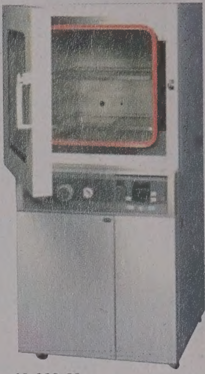
Yamato* Large-Capacity DP Series Vacuum Drying Ovens

Feature large chambers with powerful heaters that radiate heat to sample



13-263-38

- Temperature range: ambient +5° to 200°C with accuracy ±1°C at 200°C
- 3.2 and 7.6 cu. ft. capacities
- HiTEC* IV CR-Type microprocessor PID temperature controller offers 16-segment/32-step programmability, including auto start/stop, ramp and soak modes
- With overtemperature protection; if the temperature goes beyond the set limit, the user is alerted both visually and audibly, and the oven heater automatically shuts off
- Cold-rolled carbon steel exterior with baked melamine finish
- Large reinforced observation window for sample viewing
- Purge and vacuum handles are conveniently located on the front panel
- Bottom cabinet with door is ideal for storing vacuum pump
- Corrosion-resistant, durable, Type 304 stainless-steel interior

ORDERING INFORMATION:

Ovens may be customized with the following optional features: RS-422-A or RS-232-C computer interface adapter, temperature output terminal, 24-hr./7-day temperature recorder, vacuum port, vacuum pump, digital vacuum gauge and extra shelves. For more information, contact your Fisher Scientific Customer Service Representative.

CONSIDER YOUR APPLICATION

1. **Choose an instrument that fits your present *and* future applications.** The instrumen be versatile, customizable, and flexible enough to work for your applications now, and in the
2. **Consider the sensors available.** Interchangeable cable lengths, user replaceable sensors, choice of electrodes allow for ultimate versatility.
3. **Consider where your instrument will be used.** Your instrument should handle the dem continuous field sampling, with a rugged housing, mil-spec connectors, and high-quality ca

CONSIDER DATA MANAGEMENT

1. **Do you need a lot of memory?** Memory for datalogging is increasingly importan accurate data management. Make sure the instrument allows you to name the fold site lists to suit your sampling events and lets you download the data to a PC effo
2. **Do you need *any* memory?** Even if a large memory isn't necessary, it's st while to select an instrument with a smaller internal memory capability, to readings during your sampling events and ensure accurate data.

YSI Profes

YSI FEATURES TO LOOK FOR:

- IP67 waterproof rating
- Field worthy connectors (mil-spec) for instruments with detachable cables in lengths from 1 to 30m
- User replaceable probes, including BOD probes, lab-and field-grade pH and ORP probes, galvanic and polarographic DO probes and cables
- Easy calibration, auto buffer recognition
- Data management capabilities (within the instrument and via connectivity to computers)
- Backlit display and keypad
- Good Laboratory Practice (GLP) functionality
- Three-year instrument warranty, two-year cable warranty

For a full selection of YSI Meters, see pp. 1240, 1246-1249.

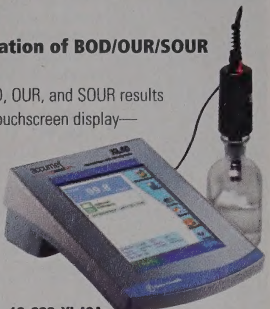
Fisher Scientific* accumet* Excel XL40 Dissolved Oxygen (DO)/BOD/OUR/SOUR Temperature Meter

Direct-read DO plus calculation of BOD/OUR/SOUR



13-636-XL40A

Powerful and versatile

- ▸ DO mode calculates five-day BOD, OUR, and SOUR results
- ▸ Windows CE*-driven, full-color touchscreen display—easy setup and operation
- ▸ 1000 data-point memory and password security

Convenient measurement of dissolved oxygen, oxygen demand and uptake

- ▸ DO measurements cover 0 to 60mg/L range (0 to 600% saturation)
- ▸ Autocalculation of temperature, pressure, and salinity corrections
- ▸ Self-stirring BOD probe
- ▸ On-screen prompts for BOD, OUR, and SOUR tests
- ▸ Easy results calculation

Extensive GLP capabilities

- ▸ Customizable printer/computer output
- ▸ 1000-reading datalog capability
- ▸ Print Setup lets you print exactly what you want, when you want
- ▸ Displays time in 12- or 24-hour format, date in U.S. or international format
- ▸ USB port lets you connect keyboard, mouse or trackball for meter control, or connect printer or PC for data output
- ▸ RS-232 serial port lets you connect to PCs or printers without USB, or frees computer USB port while meter is in use
- ▸ Ethernet allows unmatched LAN connectivity and even allows software upgrades
- ▸ Durable ABS plastic housing resists dust and chemicals

ORDERING INFORMATION:

Dimensions: 9¼L × 6½W × 3½"H (23.5 × 16.5 × 9cm)
Net weight: 2¾ lb. (1.2kg)

Self-Stirring BOD Probe and Membrane Kit

For all current Fisher Scientific* accumet* benchtop meters with dissolved oxygen mode, including XL60, XL40, AB40

Description	Cat. No.	Each
Self-Stirring BOD Probe	**13-620-SSP**	962.75
Membrane Kit for DO Probes: 6 caps, polishing disk, fill solution	**13-637-DOM**	149.81

Thermo Scientific* Orion* Star Benchtop Dissolved Oxygen and pH/Dissolved Oxygen Meters

Dedicated measurement of dissolved oxygen (DO) or pH and DO in a compact, ergonomic package

3-Star DO meter offers dedicated single-channel DO measurement; 4-Star pH/DO meter features dual channels and dual display. Both are easy to set up and use, provide reliable measurements for water testing applications.

- Display DO and temperature measurements simultaneously; display DO concentration or percent DO Saturation
- Allow meter and probe calibration to a Winkler Titration for correlation of direct Biological Oxygen Demand (BOD) readings to Winkler methods
- Easy to use three-button function
- Bright LCD display with ready indication
- Convenient built-in Quick-Start Guide
- Enhanced stability indicators, salinity correction and automatic barometric pressure compensation
- Full complement of GLP-related features
- Store up to 10 password protected methods, including setup parameters and calibrations; download additional methods and software updates via the Web
- 200 point datalogger, downloadable to printer or computer via an optional RS-232 or USB interface accessory
- SMART STABILITY* and SMART AVERAGING* functions automatically optimize accuracy, precision and response time
- IP54 dustproof and splashproof
- Mini-DIN locking probe connectors
- Advanced self-tests on meter operation, self-diagnostics
- Universal power adapter for worldwide operation

4-Star pH/DO Model adds:

- Dual-channel measurement and simultaneous display of pH and dissolved oxygen
- Selectable 1 to 5 point pH calibration to ensure accuracy
- Automatic or manual pH calibration at 1 to 5 points
- Recognizes NIST*, US and manual buffers

ORDERING INFORMATION:

More Star Series Application Packages are available for specific applications, including meter, all required accessories and Tech Notes on procedure. Contact your Fisher Scienitifc Customer Service Representative for details. Thermo Scientific Orion Multiparameter Meters with Dissolved Oxygen mode available; see pH/pX section.

INCLUDES:

3-Star Meter Only option includes meter and instruction manual. **3-Star Meter Kit** option includes meter, DO probe with 3m cable, overflow funnel and stribox, probe service kit, DO calibration sleeve, benchtop electrode stand, instruction manual. **4-Star Meter Only** option includes meter and instruction manual. **4-Star Meter Kit** option includes meter, Ross* Ultra pH electrode, Epoxy ATC probe, 475mL each of pH 4.01, 7.00 and 10.01 buffers; and pH Electrode Storage Solution; DO probe with 3m cable, overflow funnel and stribox, probe service kit, DO calibration sleeve, benchtop electrode stand, instruction manual.

WARRANTY:

Three-year replacement warranty

COMPLIANCE:

UL listed. CE marked. CSA and FCC Class A limits approved.

Thermo Scientific* Orion* Dissolved Oxygen/BOD Probe

Makes any pH meter a dissolved oxygen meter

Dissolved Oxygen/BOD Probe 13-299-80, 13-299-85

- Polarographic O_2 sensor plus solid-state circuitry in probe top; converts current to voltage for direct DO readout
- Plug probe into benchtop or portable pH meter, read DO over 0 to 14ppm range
- Accuracy, ±0.05ppm/2% of reading, whichever is greater, at 15° to 35°C (59° to 95°F) (sample temperature within 10°C of calibration temperature)
- Dual thermocompensator corrects for membrane permeability and O_2 solubility
- Ideal for BOD testing: overflow funnel supplied fits 300mL BOD bottle; built-in magnetic stir bar
- Responds to 96% of change in <30 sec.; O_2 consumption 0.1µg/hr.
- Screw-on membrane/electrolyte module; no membrane replacement—simply replace module after ~3 months of use

ORDERING INFORMATION:

Weight, 8 oz. (225g). Dimensions: 1⅞" O.D. (48mm) at top, ½" O.D. (13mm) at sensor section and 9⅝"L (240mm).

INCLUDES:

Two silver oxide 10L14 batteries, two membrane/electrolyte modules, overflow funnel, built-in stir bar, 29½"L (75cm) cable, U.S. standard or BNC connector.

Description	Mfr. No.	Cat. No.	Each
Probes			
Oxygen/BOD U.S. Standard Connector	970800	**13-299-80**	999.00

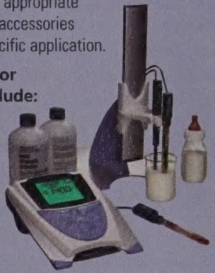
THERMO SCIENTIFIC* ORION* STAR* SERIES APPLICATION PACKS

Thermo Scientific Orion offers a large variety of Application Packs, each including a Star Series meter, appropriate probes, standards and all required accessories (including Method Notes) for a specific application.



Application Packs available for dissolved oxygen testing include:

- DO in Wine and Beer
- DO in Salt Water

Application Packs available for pH testing include:

- pH of Wine/Beer
- pH of Salt Water
- pH of Cheese
- pH of Milk

Visit www.fishersci.com and search for Orion Star Kit

THERMO SCIENTIFIC* ORION* ACCESSORIES FOR OLDER DO METERS

Additional accessories, replacements and maintenance products for Thermo Scientific Orion Benchtop Dissolved Oxygen Meters are available on our Web site, including:

13-642-130

- Polarographic Autostir BOD Probe 13-642-130
- Probe Stand/Calibration Chamber 09-357-53
- Replacement Probes for Thermo Scientific Orion 800 Series Meters
- Replacement Probe Service Kits for Thermo Scientific Orion DO Probes

Visit www.fishersci.com and search for Orion Accessories

YSI* Benchtop Models 5000 and 5100 Dissolved Oxygen Meters

Full-featured, microprocessor-controlled meters for state-of-the-art performance

Microprocessor-based, menu-driven meters measure dissolved oxygen and biochemical oxygen demand (BOD).

Model 5000 features:

- Dissolved oxygen and temperature measurement
- Large graphic LCD readout
- Audio and tactile keyboard response
- Real-time clock
- Automatic calibration
- 100 datapoint memory with date/time stamp
- Salinity and barometric pressure compensation
- Performance of all required BOD calculations when used with YSI's BOD Analyst* software (02-681-448)
- Instrument-powered probe
- Computer interface control via RS-232-C interface for direct link to your computer
- Internal software is user-upgradable via the Web

Model 5100 includes these added features:

- Built-in software that calculates dissolved oxygen uptake rate (DOUR) and specific oxygen uptake rate (SOUR) with graphic display; simplifies compliance with U.S. EPA 503 regulations for safe use of biosolids
- One-touch automatic calibration
- Built-in calibratable barometer for automatic barometric pressure compensation
- Bar code scanner interface
- Port for computer keyboard

ORDERING INFORMATION:

Compatible with all YSI BOD probes when used with 13-299-78 Adapter Cable (order separately). Dimensions: 9L × 9½W × 4½"H (23 × 24 × 11cm).

INCLUDES:

Four "C" batteries, 115VAC power supply.

COMPLIANCE:

CE marked

ACCESSORIES

YSI* BOD Analyst* Software

Exclusive Windows* software for automated five-day BOD calculations

- User-friendly, flexible software automates BOD testing
- Works with YSI 52, 5000 and 5100 Dissolved Oxygen Instruments
- Sends first-day and fifth-day results to your PC which performs the calculations and prints reports
- Saves time, automates BOD calculations, reduces errors, ensures data integrity

COMPLIANCE:

Conforms to *Standard Methods for the Examination of Water and Wastewater*

Cat. No.	Each

ACCESSORIES

FOR YSI* DO METERS

Model 5010 Self-Stirring BOD Probes

Plug-in probes for more convenient functioning

- Plug directly into Models 5000 and 5100 (no adapter cable needed)
- Operate from meter's power supply
- Built-in stirrer creates consistent flow past membrane for accurate measurement, faster response
- Designed to fit 300mL BOD bottles

INCLUDES:

15-176-17 has an adapter with 5° taper; 15-176-18 includes $ 24 funnel; 15-176-20 includes 6¾" long (17cm) shaft for use in the wine ndustry (cannot use any funnels or adapters). All include six membrane caps and KCl probe solution.

Stir Paddle Size	Mfr. No.	Cat. No.	Each
3¼" (8cm)	5010	**13-298-23**	595.00
4¼" (11cm)	5010 J	**15-176-17**	726.00
4¼" (11cm)	5010 K	**15-176-18**	625.00
6¾" (17cm)	5010 W	**15-176-20**	1046.00

Model 5750 Nonstirring BOD Probe

Nonstirring BOD bottle probe senses dissolved oxygen and temperature

- Fits neck of standard BOD bottles or other containers with 17mm opening
- Without motorized stirrer
- For use with YSI 5000 or 5100 benchtop meters when equipped with Optional Probe Adapter Cable 13-299-78
- For use with YSI portable Models 52 and 58
- Operates on 120V 60Hz

INCLUDES:

Membrane/KCl Kit 5775 found in Probe Service Kits (13-299-16)

NOTE:

Probe is not for use with Models 55, 85, 95, 550A or 556, nor is it suitable for field use.

Mfr. No.	Cat. No.	Each
5750	**13-298-80**	337.09

Model 5905 Self-Stirring BOD Probe

Fast response to DO changes

Provides vigorous stirring for fast, accurate measurements. Responds rapidly to changes in dissolved oxygen—at 20°C (68°F), 90% of change is completed in 30 seconds.

- Has easily replaceable stirring motor, silver anode, and cap membrane
- Usable with YSI* portable Models 52 and 58 (available on our Web site)
- Usable with YSI 5000 or 5100 benchtop meters when equipped with optional Probe Adapter Cable 13-299-78
- Compatible with 300mL BOD bottles

13-299-76

INCLUDES:

Six membrane caps and bottle of KCl solution; for replacements, see 13-299-77 Cap Membrane Kit; 115VAC power cord

NOTE:

Probe is not for use with Models 55, 85, 95, 550A or 556.

Mfr. No.	Cat. No.	Each
5905	**13-299-76**	635.00

Cap Membrane Kit

- Includes six cap membranes, a 1 oz. (30mL) bottle of KCl solution and one sanding disk. For use with 13-398-87, -88, and -89 (Model 5239 Field Oxygen/Temperature Probes); 13-299-76 (Model 5905 BOD Probe); and 13-298-24 through-27 (Model 85 DO/ Conductivity Meters).

Mfr. No.	Cat. No.	Each
5906	**13-299-77**	43.46

Probe Adapter Cable

Adapts Models 5750 and 5905 BOD Probes for use with Models 5000 or 5100

Mfr. No.	Cat. No.	Each
5011	**13-299-78**	78.39

PORTABLE METERS

Fisher Scientific* accumet* Waterproof AP74 Portable Dissolved Oxygen Meter

Dedicated DO meter uses galvanic probe for immediate DO measurements

- Measures DO in mg/L (ppm) or % saturation, plus temperature
- Dual display has adjustable backlight; read measured value and temperature even in dark areas
- Automatic Temperature Compensation from 0° to 50°C
- Key in salinity and pressure; meter calculates barometric pressure and salinity offsets
- Independent 100%, zero and offset adjustment capabilities
- Displays probe diagnostics, slope, offset and mV values
- Data memory for 50 readings with temperature and date/time stamp
- IP67 waterproof construction; floatable, washable to maintain reliable operation
- HOLD function, Ready indicator, and auto shutoff

ORDERING INFORMATION:
Dimensions: 7½L × 3¾W × 2¼"H (19 × 9.5 × 5.7cm)

INCLUDES:
Meter/Probe option includes meter, DO/temperature probe, electrolyte, instructions and four "AAA" batteries. **Meter Kit** option includes meter, DO/temperature probe, electrolyte, five replacement membranes and replacement tool, rinse bottle, instructions, four "AAA" batteries, and carrying case.

13-636-AP74A

13-636-AP74

WARRANTY:
Model AP74 is warranted to the end user to be free from defects in materials and workmanship under normal use for a period of three years. Call your Fisher Scientific Customer Service Representative for full details.

hermo Scientific* Orion* Star Portable Dissolved Oxygen and pH/Dissolved xygen Meters

dicated measurement of dissolved oxygen or pH and DO in a handheld, ergonomic package

Star dissolved oxygen meter offers dedicated single-channel DO asurement; **4-Star pH/Dissolved Oxygen meter** features dual nnels and dual display. Both are easy to set up and use, provide able measurements for water testing applications.

- Vaterproof, battery-operated meters stand up to demanding ield applications
- eliver over 2000 hours of continuous operation
- isplay DO and temperature measurements simultaneously; display O concentration or percent DO Saturation
- alanced, comfortable handling
- asy to use three-button function
- right, backlit LCD display with ready indication
- utomatic barometric pressure compensation
- onvenient Quick-Start Guide on back of meter
- nhanced stability indicators, salinity correction and automatic barometric ressure compensation
- llow meter and probe calibration to a Winkler Titration for correlation of irect Biological Oxygen Demand (BOD) readings to Winkler methods
- ull complement of GLP-related features
- tore up to 10 password-protected methods, including setup parameters nd calibrations; download additional methods and software updates via he Web
- 00 point datalogger, downloadable to printer or computer via an optional S-232 or USB interface accessory
- MART STABILITY* and SMART AVERAGING* functions automatically; ptimize accuracy, precision and response time
- P67 waterproof; may be immersed for up to one hour with no vater incursion
- Vaterproof mini-DIN locking probe connectors
- dvanced self-tests on meter operation, self-diagnostics
- perate on four "AA" batteries

tar pH/DO Model adds:

- ual channel measurement and simultaneous display of pH and issolved oxygen
- utomatic or manual pH calibration at 1 to 5 points

YSI* Professional Series DO and DO/Conductivity Meters

Compact, handheld instruments provide user-selectable cable lengths and probe options.

Choose the Pro20 for a dedicated, single-probe DO meter. Choose the Pro2030 to measure both DO and Conductivity. With both, you get:

- IP67 waterproof rating, even with battery cover off
- Auto temperature, salinity, barometric compensation
- Choice of 4, 10, 20, and 30m (13, 32, 65 and 98') detachable cables
- Fuel gauge continuously displays battery level
- User selectable polarographic or galvanic DO sensors with screw-on cap membranes
- EPA-approved DO methodology
- Backlit display and keypad
- User-upgradeable software via USB communications
- Graphic display with detailed messages and instructions

Pro20 features:

- DO range of 0 to 50mg/L, 0 to 500% air saturation
- User-selectable resolution of 0.1 or 0.01mg/L, 1% or 0.1% air saturation
- Temperature range of -5° to +45°C
- Choice of DO/temperature cables in 4, 10, 20 and 30m lengths
- USB connection for software upgrades
- 1000 datasets with date/time stamp plus GLP, manual or logging, user-selectable rate

Pro2030 adds:

- Conductivity range of 0 to 200mS/cm, using four-electrode cell with autoranging
- Salinity range calculated from 0.0 to 70.0ppt
- Total Dissolved Solids range calculated from 0 to 100g/L
- Choice of DO/temperature cables in 4, 10, 20 and 30m lengths
- Choice of Conductivity/temperature probes with attached cables in 4, 10, 20 and 30m lengths

ORDERING INFORMATION:

Dimensions: 8½L × 3¼W × 2¼"H (21.6 × 8.3 × 2.3cm). Net weight, with batteries: 1 lb. 1 oz. (475g). Additional YSI Professional models may be found in the Conductivity and pH/pX sections.

Description	Mfr No.	Cat. No.	Each
Pro20 DO Instrument	6050020	**15-177-452**	525.00
Pro2030 DO/Conductivity Instrument	6052030	**15-177-457**	635.00

ACCESSORIES

Probes for Pro20 and Pro2030 Meters

- DO probes come without cable; order separately
- Conductivity probes come with attached cable of length indicated in table

Description	Cable	Mfr. No.	Cat. No.	Each
Dissolved Oxygen/Temperature Probes				
Galvanic DO probe	None	605202	**15-177-458**	160.00
Polarographic DO Probe	None	605203	**15-177-459**	160.00
Conductivity/Temperature Probes with Cables				
Probe with 4m cable	13' (4m)	60530-4	**15-177-474**	375.00
Probe with 10m cable	32' (10m)	60530-10	**15-177-475**	395.00
Probe with 20m cable	65' (20m)	60530-20	**15-177-476**	445.00

DO/Temperature Cables for Pro20 and Pro2030

- Without probes; order separately

Cable Length	Mfr. No.	Cat. No.	Each
13' (4m)	60520-4	**15-177-470**	220.00
32' (10m)	60520-10	**15-177-471**	245.00
65' (20m)	60520-20	**15-177-472**	275.00

15-177-452

INCLUDES:
Meter, two alkaline C-cells, instructions

REQUIRED ACCESSORIES:
For both, DO Probe 15-177-458 or -459 and detachable cable 15-177-470, -471, -472, or -473; for Pro2030, Conductivity/Temperature Probe/Cable Combination 15-177-474, -475, -476, or -477.

WARRANTY:
Three years for the instrument; two years for the cables; one year for probes

COMPLIANCE:
EPA-approved DO methodology

Model	Pro20	Pro2030
Modes	DO and Temperature	DO, Conductivity and Temperature

I* 550A DO and 556 Multi-Probe Meters

gged, accurate, waterproof field meters for DO and more

- ssolved oxygen calibration in mg/L or % air saturation; readings tomatically compensatated for temperature
- ish-button calibration in % and mg/L, direct mperature, salinity and altitude compensated
- ccurately measure dissolved oxygen and mperature simultaneously
- eld-replaceable, weighted DO electrode has rew-on cap with PE membrane for faster sponse, lower stirring dependence
- irge, easy-to-read backlit display, low-battery dicator
- eet IP67 requirements; housing is waterproof id resists impact
- perate on four alkaline "C" cells that last over 00 hours

13-298-118

del 550A DO/Temperature Meter:

- anual salinity input; 0 to 70ppt range
- ackaged with 12, 25, 50, or 100' cables; placement DO electrode sold separately

del 556 Multi-Probe Meter adds:

- multaneous measurement of DO, pH, ORP, itoranging Conductivity/Salinity/TDS
- ores more than 49,000 time/date-stamped atasets with up to eight parameters each
- ompatible with EcoWatch* for Windows* ata analysis software (order separately; ontact your Fisher Scientific Customer Service epresentative)
- isplays graphs of parameters over time
- onforms to GLP standards
- S-232 interface to PC
- ptional user-calibratable internal barometer; displays and logs data r DO calibration and tracking pressure changes

13-298-64

DERING INFORMATION:

ensions: 2½L × 4¾W × 9"H (6 × 11.9 × 22cm). Additional accessories ilable on our Web site, including carrying cases, mounting devices, argeable battery pack and charger.

LUDES:

del 550A comes with four "C" batteries, operating manual, Temperature probe and cable of length specified in ordering table.

del 556 comes with four "C" batteries, operating manual, soft carrying e; order DO/Temperature/Conductivity probe/cable combinations and ORP probes separately.

RRANTY:

ee-year warranty on instrument and one-year warranty on aceable electrode.

MPLIANCE:

marked.

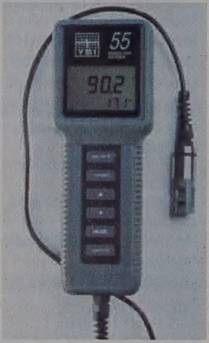
YSI* Model 55 Handheld Dissolved Oxygen Meter

With easy-to-use, push-button calibration



13-298-56

Lightweight, handheld unit is a complete system for measuring dissolved oxygen.

Easy to calibrate and operate:

- Place probe inside built-in calibration chamber
- Push both arrow buttons simultaneously
- Indicate altitude and salinity
- Place stainless-steel probe in sample; probe sinks easily for measuring convenience

Accurate measurement and compensation:

- Simultaneously displays oxygen and temperature
- 0 to 20mg/L dissolved oxygen range; accurate to ±0.3mg/L
- 0 to 200% air saturation range; accurate to ±2%
- Measures temperature from -5° to +45°C (23° to 113°F)
- Direct salinity compensation of 0 to 40ppt range means you can use meter in fresh or salt water

ORDERING INFORMATION:

Dimensions: 2½L × 3½W × 9½"H (6.4 × 8.9 × 24cm)

INCLUDES:

Rugged, floatable ABS plastic case, probe, and your choice of 12, 25 or 50' long (3.7, 7.6, or 15.2m) cable. Six "AA" alkaline batteries supply power for approximately 100 hours of operation.

Cable Length	Mfr. No.	Cat. No.	Each
12' (3.7m)	55 12	**13-298-56**	699.00
25' (7.6m)	55 25	**13-298-57**	735.00
50' (15.2m)	55 50	**13-298-62**	800.00

SPECIFICATIONS

Dissolved Oxygen	
Range	0 to 20mg/L, 0 to 200% air saturation
Accuracy	±0.3mg/L, ±2% air saturation
Resolution	0.01mg/L, 0.1% air saturation
Temperature	
Range	-5° to +45°C (23° to 113°F)
Accuracy	±0.4°C
Resolution	0.1°C

YSI* Model 85 Handheld Dissolved Oxygen/Conductivity Meter

Simultaneously measures dissolved oxygen, conductivity, salinity, and temperature

13-298-24

Rugged, microprocessor-based digital meter features:

- Automatic salinity compensation for DO readings
- Automatic temperature compensation
- Autoranging for fast, accurate DO and conductivity reading
- Push-button calibration for DO or conductivity
- Internal memory stores 50 sets of readings for on-screen recall
- Adjustable specific conductance temperature coefficient and reference temperature
- Low battery alert

ORDERING INFORMATION:

Dimensions: 2¼L × 3½W × 9½"H (5.6 × 9 × 24cm). Uses 13-299-77 Cap Membrane Kit.

INCLUDES:

Combination stainless-steel dissolved oxygen/conductivity/temperature probe; six "AA" batteries, six easy-to-install screw-on membrane caps, KCl probe solution, and waterproof case that meets IP65 requirements

ACCESSORIES

Model 5739 Field Oxygen/Temperature Probe

Can be calibrated easily and quickly

For use with YSI* portable Models 52 and 58 or with YSI 5000 or 5100 benchtop meters when equipped with optional Probe Adapter Cable 13-299-78.

- Calibrates easily in air in just seconds
- Automatic temperature compensation and pressure compensation to ±0.5% of reading at 100psi/230' (7kg/cm²/70m) of water
- Rugged plastic body, built-in sinker weight

INCLUDES:
One 13-299-16 Membrane/KCl Kit

REQUIRED ACCESSORIES:
Detachable cable; order separately

NOTE:
Benchtop meters are not recommended for field use. Not for use with handheld Models 55, 85, 95, 550 or 556.

Cable Length	Mfr. No.	Cat. No.	Each
None	5739	**13-299-43**	300.68

ACCESSORIES

Detachable Cables for 5739 Probe

- For use with Model 5739 (13-299-43) probe
- Cables available in lengths from 10 to 200' (3 to 61m)
- Cables 25' (7.5m) or longer include storage reel

Cable Length	Mfr. No.	Cat. No.	Each
10' (3m)	5740 10	**13-299-40**	185.00
25' (7.5m)	5740 25	**13-299-46**	225.00
50' (15m)	5740 50	**13-299-1**	276.72
100' (30.5m)	5740 100	**13-299-48**	328.04
200' (61m)	5740 200	**13-299-52**	448.79

Model 5239 Probe

Tough probe to accompany portable DO field-testers

Rugged field probe for use with YSI* portable Models 52 and 58 or with YSI 5000 or 5100 benchtop meters when equipped with optional Probe Adapter Cable 13-299-78.

- Weighted and protected by a heavy-duty guard; optimized for YSI microprocessor-based systems
- Uses 13-299-77 Cap Membrane Kit

NOTE:
Benchtop meters are not recommended for field use. Not for use with handheld Models 55, 85, or 95.

Cable Length	Mfr. No.	Cat. No.	Each
10' (3m)	5239 10	**13-398-87**	501.13
25' (7.5m)	5239 25	**13-398-88**	536.00
50' (15m)	5239 50	**13-298-89**	580.00

Probe Service Kits

For replenishing oxygen sensor on YSI* Dissolved Oxygen Probes

- Membrane Kits include 150 standard, 1mil PTFE membranes or 150 high-sensitivity, 0.5mil PTFE membranes, in 10 packs of 50
- Membrane/KCl Kits include 30 standard or high-sensitivity membranes, 1 oz. (30mL) dropper bottle with KCl crystals for adding distilled water and a probe contour tool
- For use with probes 13-299-43 (Model 5739), 13-298-80 (Model 5750), 15-176-50 (Model 5718), 13-298-16 (Model 5300 Biological Oxygen Monitor), and 13-298-56, -57, or -62 (Model 55 Handheld Dissolved Oxygen Meters)

Description	Mfr. No.	Cat. No.	Price
Standard Membrane Kit	5793	**13-298-82**	Pk. of 10/84.05
High-sensitivity Membrane Kit	5794	**13-298-83**	Pk. of 10/66.63

High-sensitivity Membrane/KCl Kit	5776	**13-299-32**	Ea./26.16

Mettler Toledo* SevenGo pro* SG6 Dissolved Oxygen Meter

Professional oxygen instrument; IP-67 waterproof rating

01-910-530 Series

Portable meter measures dissolved oxygen in mg/L and % saturation. Designed for easy, comfortable right- or left-handed operation. Meter is waterproof and dustproof to IP-67 standard, features large display of measured value and settings; optional rotatable electrode clip mounts left or right for single-handed operation.

- Manual or automatic air pressure compensation with built-in barometer
- High-performance O_2 sensor
- Comprehensive range of accessories
- Data memory for 200 GLP datapoints
- Backlit display
- Separate operating modes for expert and routine use
- Linear and nonlinear temperature compensation
- Record date, time, time interval
- Intuitive menu operation using softkeys
- GLP memory for 200 datapoints
- Contact-free infrared communication with notebook, printer, or PC

ORDERING INFORMATION:
All options include wrist strap, four "AA" batteries, operating instructions, test certificate, and declaration of conformity. Choose from three packaging options:

- Meter with electrode and 1.8m cable
- Meter with electrode, 1.8m cable, and field case with electrode arm and cover
- Meter with electrode, 10m cable, and field case with electrode arm and cover

Model	**SevenGo pro SG6**
Dissolved Oxygen Mode	
Range	0.00 to 99.00mg/L (ppm); 0 to 600% saturation
Resolution	0.01mg/L (ppm); 0.1% or 1% saturation
Relative Accuracy	±0.5%; max. 0.03mg/L
Temperature Mode	
Range	0.0° to 60°C
Resolution	0.1°C
Relative Accuracy	±0.1°C
Barometric Presssure	500 to 1100mbar ±1mbar
Inputs	BNC, NTC (both IP-67)
Outputs	IR to printer or PC via RS-232 or USB
Power Requirements	4 × "AA" batteries or optional 1.3V NiMH accumulators
Operating Environment	0° to 40°C, 55 to 85% rel. humidity (non-cond.)
Dimensions (L × W × H)	1¾L x 3½W x 8⅝"H (45 x 90 x 220cm)

IMPORTANT TERMS TO KNOW

Gradient PCR—For most PCR experiments, much of your overall time is devoted to optimizing the reaction. The annealing temperature must often be determined empirically in numerous experiment runs. A gradient cycler enables the testing of various annealing and, where necessary, denaturing temperatures in one run, thereby reducing your amount of work.

Licensed and authorized for PCR—Practice of the patented Polymerase Chain Reaction (PCR) process requires a license, therefore it is important that your cycler is an authorized thermal cycler.

FEATURES TO LOOK FOR

Fast Heating and Cooling Rates—The heating and cooling rates of cyclers influence the speed at which the reaction occurs. The faster the ramp rates, the quicker your protocol is finished.

Triple Circuit Technology—Three separate temperature control circuits (Peltier elements) control the block, which ensures precise control of the temperature gradient, enhances the linearity of the gradient, and reduces temperature loss in the peripheral areas.

High Throughput Flexibility—As your lab grows and you need to expand the number of cyclers you have, it's comforting to know that your cyclers can easily link together and be controlled with one device (via a control panel or computer software).

ast. Friendly. Flexible.
hat's the Eppendorf® design concept,
articularly for our Mastercyclers®
-when less is more, and it's speed,
ccuracy, and reproducibility that
ount most.

BEFORE YOU BUY THERMAL CYCLERS

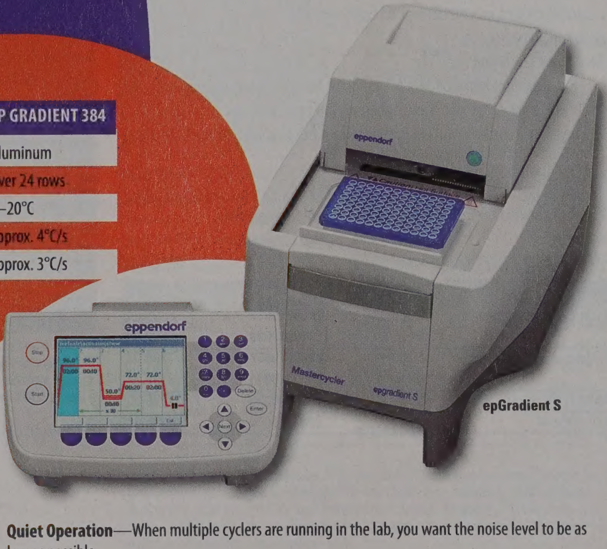
*Block Temperature.

Practice of the patented Polymerase Chain Reaction (PCR) process requires a license. The Eppendorf® Thermal Cycler is an Authorized Thermal Cycler and may be used with PCR licenses available from Applied Biosystems. Its use with Authorized Reagents also provides a limited PCR license in accordance with the label rights accompanying such reagents.

onsored by:

eppendorf
North America



epGradient S

Quiet Operation—When multiple cyclers are running in the lab, you want the noise level to be as low as possible.

Heated Lid—A heated lid minimizes formation of non-specific annealing and primer-dimers as well as reduces condensation and evaporation of your sample.

No Restrictions on Reagents/Consumables—Having an open platform is essential if you want to use kits, reagents and consumables of your choice.

Upgradeable to Real-time—As your needs change, your system's capabilities should be able to as well.

Intuitive Programming—Quickly and easily program, edit and start your protocol.

For a full selection of Eppendorf® Thermal Cyclers, see the PCR section.

Eppendorf* Mastercycler* ep Thermal Cyclers

Faster, reliable, and flexible

Key Features

- Gradient function simplifies protocol optimization
- Easy connectivity from cycler to cycler allows for modular laboratory settings
- Lids use Electronic Sample Protection (ESP) to ensure that samples are heated efficiently and evenly
- Optional motorized, one-touch automatic lids provide compatibility with robotic systems
- Control Panel with graphical user interface and color display (sold separately) controls Mastercycler ep modules

Control Panel Features

- Intuitive software tracks and reports the status of runs
- Control Panel can be operated with keypad or a user-supplied mouse to create and edit protocols in optional password-protected folders
- Protocols can be easily edited—simply type in a new time or temperature, or add or delete a step with the touch of a button
- An external printer can be attached directly to the thermal cycler to print GLP-compliant reports
- Up to five Mastercycler ep cyclers can be controlled by one Control Panel
- Up to 30 cyclers can be controlled using one PC

Additional Features

- Two block materials available
  - Aluminium block allows for efficient heat transfer to samples
  - Silver block provides enhanced heating capabilities
- SteadySlope* Technology ensures constant heating and cooling rates and allows the results of gradient experiments to be transferred seamlessly to routine applications
- Triple Circuit Technology (TCT) provides an additional heating and cooling zone for precise temperature control of all gradient profiles

Description	Lid	Cat. No.	Each
Mastercycler ep gradient	Manual lid	**E950010011**	6999.00

ermo Scientific* Hybaid MultiBlock Satellite (MBS) Thermal Cycler System

histicated thermal cycling system can be expanded as laboratory needs grow

Features

fers the ability to network satellite reaction blocks with a computer

ch system can be customized, using any combination of satellite blocks m five available formats

computer controls each satellite block independently and stores an limited number of programs, making the system suitable for ltiple users

e system can be expanded by the addition of one or many satellite ocks, up to 30 total

tware Features

arge, easy-to-use interface displays information about all of the tellite blocks in graphical and tabular formats, allowing users to see mediately which blocks are running which programs

rsonal directories and file storage offer convenient program storage for ltiple users

llite Block Features

ngradient blocks are available in 0.2mL, 0.5mL, and 384-well formats

adient blocks are available in 0.2mL and 0.5mL formats

tellite blocks can be positioned next to each other or across the oratory, providing the freedom to design a system that maximizes the ailable space

justable heated lids provide oil-free operation with all styles of PCR bes and plates

e lid pressure can be altered with the turn of a dial to ensure a firm al on both polycarbonate and polypropylene plates

tellite blocks will continue an exisiting run if the software or computer turned off, preventing sample loss

ur control modes provide accurate temperature control

- Active Tube Control measures the actual temperature of the reaction mix using a tube thermistor and enables the unit to actively compensate for differences between the programmed temperature and the actual temperature
- Simulated Tube and Simulated Plate Control achieve temperature accuracy similar to Active Tube Control for tube and 96-well plate formats, respectively, by constantly calculating the sample temperature and adjusting the block temperature as necessary
- Block Control monitors the actual block temperature

LUDES:

t-up Kits include desktop or laptop computer, authorized software, l interface card, any one or two MBS satellite units (please specify ed units when ordering)

IPLIANCE:

ware offers real-time block data and advanced data recording facilities tisfy GLP requirements.

E:

tional satellite blocks are available separately.

HBMBSKIT2L with three accessory blocks

SPECIFICATIONS

Temp. Control Modes	Active Tube Control, Simulated Tube Control, Simulated Plate Control, and Block Control
Temp. Control Range	4° to 99°C
Gradient Range†	Up to 15°C

† When used with gradient blocks.

Practice of the patented Polymerase Chain Reaction (PCR) process requires a license in certain countries. The Thermo Scientific Thermal Cycler is an Authorized Thermal Cycler and may be used with PCR licenses available from Applied Biosystems. Its use with Authorized Reagents also provides a limited PCR license in accordance with the label rights accompanying such reagents.

Thermo Scientific* Hybaid Px2 Thermal Cycler

Interchangeable reaction blocks maximize choice of sample formats

Key Features

- Personal thermal cycler accommodates six interchangeable reaction blocks (sold separately)
- Nongradient blocks are available in 0.2mL, 0.5mL, 384-well, and flat-block formats
- Gradient blocks are available in 0.2mL and 0.5mL formats
- Gradient option allows rapid protocol optimization
- Advanced temperature control and excellent uniformity allow users to reduce dwell times and achieve faster results

HBPX2

Additional Features

- Large, high-defintion display provides detailed run information
- Keypad with functional soft keys permits easy software navigation
- Software provides easy protocol editing and manipulation
- Heated lid can be adjusted to ensure a firm seal with all tube and plate types
- Five control modes provide accurate temperature control
    - Active Tube Control measures the actual temperature of the reaction mix during PCR using a tube thermistor and actively compensates for differences between the programmed temperature and the actual temperature by adjusting the block temperature
    - Simulated Tube Control, Simulated Plate Control, and Simulated Slide Control achieve temperature accuracy similar to Active Tube Control for tube, plate, and slide formats, respectively, by constantly calculating the sample temperature and adjusting the block temperature as necessary
    - Block Control monitors the actual block temperature

REQUIRED ACCESSORIES:
Reaction block, see ordering table at right

Thermo Scientific* Hybaid PxE Thermal Cycler

Economical 96-well thermal cycler

Key Features

- Compact thermal cyclers provide personal cycling in a choice of two formats
- Custom-designed software is easy to use, even for inexperienced users

Additional Features

- Automatic self-checks are run when the unit is powered up to ensure consistent performance
- Three control modes provide accurate temperature control
    - Simulated Tube Control and Simulated Plate Control calculate the sample temperature and adjust the block temperature as necessary
    - Block Control monitors the actual block temperature

HBPXE02

THERMAL CYCLERS—REAL-TIME PCR

pheid* SmartCycler* Real-Time Thermal Cyclers

forms amplification and fluorescent detection in a single unit

Features

teen I-CORE* (Intelligent Cooling/heating Optical Reaction) modules nction as independent thermal cycler/fluorometers

ch module can be programmed separately, allowing up to 16 different cling/detection protocols to be performed simultaneously in one ocessing block

to six processing blocks can be linked to one computer

phisticated optics enable the measurement of fluorescence in four annels in each module at the same time for sensitive detection and ecise quantitation

e use of multiple fluorescent dyes permits the detection of up to four gets in a single sample

litional Features

pid, accurate heating and cooling cycles produce results in as little as minutes

ultiple experimental runs can be started at different times, allowing veral operators to use the instrument concurrently

oprietary sealable reaction tubes optimize rapid thermal transfer and tical sensitivity while reducing the possibility of contamination

owth curves are displayed in real time, and the presence of nplified product is confirmed when the fluorescent signal crosses user-determined threshold

oduct can be detected over a broad range of target concentrations

- ▸ A linear standard curve can be created from a serial dilution, allowing the determination of an unknown sample concentration
- ▸ The system can be used with a variety of detection methods including Molecular Beacons probes, *Taq*Man* probes, Amplifluor* primers, and intercalating dyes such as SYBR* Green

Software Features

- ▸ Threshold settings, protocols, and graph formats can be user-defined
- ▸ Each module can be stopped after crossing a user-defined threshold, or transitioned to a melt analysis in order to obtain the concentration or purity of a product
- ▸ Two experimental runs can be monitored simultaneously and growth curves from different runs overlayed for easy comparison
- ▸ Access to protocols, graphs, and data can be controlled

INCLUDES:

SmartCycler processing block(s); laptop computer or desktop computer with a flat-panel monitor; SmartCycler Software v. 2.0; accessory kit with a mini-centrifuge, tube racks, and cooling block; carrying case (SC1600 TD Starter System only)

REQUIRED ACCESSORIES:

Proprietary PCR reaction tubes must be ordered separately.

ACCESSORIES

SmartCycler* Reaction Tubes

For use with the SmartCycler Real-Time Thermal Cycler

900-008 Series

- Proprietary polypropylene reaction tubes are designed for rapid thermal transfer and optical sensitivity
- 25µL tubes allow reduction in reagent usage; 100µL tubes provide higher sensitivity when template concentration is low
- No-leak closures seal tubes to reduce chance for amplicon contamination
- Each single-use tube is pressure tested to ensure film seal integrity
- Each lot of tubes is tested for RNase, DNA, and DNase
- Rack holds 16 tubes and can be used as a separate workstation

Capacity	Cat. No.	Pack of
25µL	**900-0085**	250/150.00

REAGENTS AND KITS—ROUTINE PCR

Fisher BioReagents* *exACTGene** Complete PCR Kit and Core Reagent Sets

Optimized for routine PCR applications

FB-6100

- Generate reliable PCR products using all genomic and cDNA templates
- Provide clean and consistent PCR yields up to 10kb
- Offer excellent specificity for all PCR amplicons
- PCR-tested to ensure reliable, reproducible, high-performance reactions
  - **Complete PCR Kit** includes positive controls for troubleshooting PCR parameters, color-coded reagent tubes for ease-of-use, and dual reaction buffers for extra flexibility in optimizing PCR reactions
  - **Core Reagent Sets** provide an economical alternative for high quality PCR
  - Kit components are also available separately

STORAGE CONDITIONS:
Store at -20°C.

Description	Quantity	Cat. No.	Each
PCR Amplification Kit	100 rxns	**TAK R011**	269.63

† *Use of this product is covered by one or more of the following U.S. patents and corresponding patent claims outside the U.S.: 5,079,352; 5,789,224; 5,618,711; 6,127,155 and claims outside the U.S. corresponding to U.S. Patent 4,889,818. The purchase of this product includes a limited, nontransferable immunity from suit under the foregoing patent claims for using only this amount of product for the purchaser's own internal research. This product is for research use only. Diagnostic uses under Roche patents require a separate license from Roche. Further information on purchasing licenses may be obtained by contacting the Director of Licensing, Applied Biosystems, 850 Lincoln Centre Drive, Foster City, California 94404, USA.*

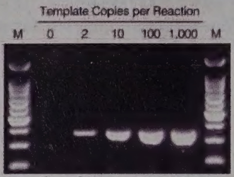
For Fisher BioReagents* *Taq* DNA Polymerase, please see the BioReagents section.

Promega* PCR Master Mix

Ready-to-use premix permits setup of PCR reactions in less than a minute

- Contains *Taq* DNA Polymerase, dNTPs, $MgCl_2$, and reaction buffers at optimal concentrations
- Optimized for use in routine PCR with templates in the range of 0.2 to 2kb
- Amplifies as little as two copies of target template
- Scalable for 10, 25, or 50µL reactions



Detection of low-copy-number templates using PCR Master Mix. Use of PCR Master Mix to detect low number of copies of the α-1-antitrypsin gene. PCR was performed on Human Genomic DNA (Cat. No. PR-G3041) using primers targeting a 360 bp fragment of the α-1-antitrypsin gene (single copy per genome). Lane M, 100 bp DNA Ladder (Cat. No. PR-G2101).

INCLUDES:
PCR Master Mix, nuclease-free water

STORAGE CONDITIONS:
Store at -20°C; can also be stored at 4°C for up to three months.

Quantity	Concentration	Cat. No.	Each
250µL (10 × 50µL rxns)	2X	**PR-M7501**	10.20
2 × 1250µL (100 × 50µL rxns)	2X	**PR-M7502**	69.20
25mL (1000 × 50µL rxns)	2X	**PR-M7505**	536.00

Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.

Promega* PCR Core Systems

Provide a set of performance-tested PCR reagents

- With optimization tools for reaction flexibility
- **PCR Core System I** includes basic PCR reaction components
- **PCR Core System II** also includes positive controls to help troubleshoot PCR parameters

STORAGE CONDITIONS:
Store all components at -20°C.

SYSTEM COMPONENTS

	PCR Core System I	PCR Core System II
Taq DNA Polymerase in Storage Buffer B	250U	250U
10X Mg-free Reaction Buffer	1.2mL	1.2mL
$MgCl_2$	1.2mL	1.2mL
10X Reaction Buffer with 15mM $MgCl_2$	1mL	1mL
PCR Nucleotide Mix	200µL	200µL
Positive Control Plasmid DNA	----	100µL
Upstream Control Primer	----	100µL
Downstream Control Primer	----	100µL

Description	Quantity	Cat. No.	Each
PCR Core System I	200 rxns	**PR-M7660**	100.50
PCR Core System II	200 rxns	**PR-M7665**	110.41

Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.

Thermo Scientific* *Taq* DNA Polymerase

94kDa ultrapure recombinant thermostable DNA polymerase obtained by high-level expression of the *Taq* DNA polymerase gene in *E. coli*

- Licensed for PCR
- 5' to 3' exonuclease (strand displacement) activity
- 3' adenylation activity
- Free of nuclease
- Reaction Buffer (Buffer IV, 10X): 750mM Tris-HCl (pH 8.8 at 25°C), 200mM $(NH_4)2SO_4$, 0.1% (v/v) Tween* 20. $MgCl_2$ supplied as a separate vial (concentration of 25mM) or included in the buffer (concentration 15mM)
- Unit Definition: One unit of enzyme is defined as the amount that will incorporate 10nmol of dNTPs into acid-insoluble material in 30 minutes 74°C under the following analysis conditions: 25mM TAPS (pH 9.3 at 25°C), 50mM KCl, 2mM $MgCl_2$, 1mM β-mercaptoethanol, 250µM of each: dCTP, dGTP, dTTP, 250µM [^{3}H]-dATP (0.05Ci/mmol) and 1.25µg/µL activated salmon sperm DNA in a final volume of 50µL

STORAGE CONDITIONS:
Store at -20°C.

Description	Quantity	Concentration	Cat. No.	Each
With 10X Buffer, separate 25mM $MgCl_2$	250U	5U/µL	**AB-0192**	99.90
	2500U	5U/µL	**AB-0192B**	906.24
With 10X Buffer containing 15mM $MgCl_2$	250U	5U/µL	**AB-1192A**	101.47

Purchase of this product includes an immunity from suit under patents specified in the product insert to use only the amount purchased for the purchaser's own internal research. No other patent rights (such as 5' Nuclease Process patent rights) are conveyed expressly, b implication, or by estoppel. Further information on purchasing licenses may be obtained by contacting the Director of Licensing, Applied Biosystems, 850 Lincoln Centre Drive, Foster C California 94404, USA.

Thermo Scientific* Thermoprime Plus DNA Polymerase

Enhanced thermal stability at DNA denaturation temperatures

- 94kDa ultrapure recombinant thermostable DNA polymerase
- 5' to 3' exonuclease (strand displacement) activity
- 3' adenylation activity
- Free of nucleases
- Proven performance in excess of 12kb for basic templates
- Licensed and optimized for use in the Polymerase Chain Reaction (PCR) process
- Storage and Dilution Buffer: 100mM KCl, 20mM Tris-HCl (pH 8.0 at 25°C 0.1mM EDTA, 1mM DTT, 0.5% (v/v) Tween* 20, 0.5% (v/v) Nonidet P40* 50% (v/v) glycerol
- Reaction Buffer IV (10X): 750mM Tris-HCl (pH 8.8 at 25°C), 200mM $(NH_4)_2SO_4$, 0.1% (v/v) Tween 20

STORAGE CONDITIONS:
Store at -20°C.

Description	Quantity	Concentration	Cat. No.	Each
With 10X Buffer, separate 25mM $MgCl_2$	250U	5U/µL	**AB-0301**	95.38
	2500U	5U/µL	**AB-0301B**	865.53

Purchase of this product includes an immunity from suit under patents specified in the product insert to use only the amount purchased for the purchaser's own internal research. No other patent rights (such as 5' Nuclease Process patent rights) are conveyed expressly, b implication, or by estoppel. Further information on purchasing licenses may be obtained by contacting the Director of Licensing, Applied Biosystems, 850 Lincoln Centre Drive, Foster Ci California 94404, USA.

ermo Scientific* Thermoprime Plus DNA lymerase with ReddyMix* PCR Buffer

h-performance, recombinant DNA polymerase with a ction buffer that allows direct loading of PCR ducts for electrophoresis

- ves valuable post-PCR analysis time—addition of loading dye not quired
- ovides 5' to 3' exonuclease (strand displacement) and 3' adenylation tivity
- ee of nucleases
- eal for PCR of genomic, viral and plasmid templates and high-roughput experiments

RAGE CONDITIONS:

e at -20°C.

tity	Concentration	Cat. No.	Each
tion buffer w/15mM MgCl$_2$			
	5U/µL	**AB-0785**	106.58
U	5U/µL	**AB-0785B**	865.53
tion buffer plus separate 25mM MgCl$_2$			
	5U/µL	**AB-0790**	106.58

ase of this product includes an immunity from suit under patents specified in the ct insert to use only the amount purchased for the purchaser's own internal research. ner patent rights (such as 5' Nuclease Process patent rights) are conveyed expressly, plication, or by estoppel. Further information on purchasing licenses may be obtained ntacting the Director of Licensing, Applied Biosystems, 850 Lincoln Centre Drive, City, California 4404, USA.

ermo Scientific* Thermoprime Plus PCR ster Mixes

h-performance DNA polymerase in a convenient and tible master mix format

- ers significant time savings in PCR of genomic, viral and plasmid nplates and high-throughput experiments
- wer reagent handling steps
- duce chance of errors
- producible results every time
- x contains: 0.025U/µL Thermoprime Plus DNA Polymerase .25U/50µL rxn); 75mM Tris-HCl (pH 8.8 at 25°C); 20mM $(NH_4)_2SO_4$; 1% (v/v) Tween*; 200µM of each dATP, dCTP, dGTP, dTTP; -4.0mM $MgCl_2$ (depending on Cat. No. selected)

RAGE CONDITIONS:

e at 4°C for up to one month; store at -20°C for up to one year.

Description	Cat. No.	Each
Thermoprime Plus with 1.5mM MgCl$_2$		
50µL rxns	**AB-0575A**	74.07

plied with KCl-based buffer. Purchase of this product includes an immunity from suit er patents specified in the product insert to use only the amount purchased for the chaser's own internal research. No other patent rights (such as 5' Nuclease Process ent rights) are conveyed expressly, by implication, or by estoppel. Further information on chasing licenses may be obtained by contacting the Director of Licensing, Applied ystems, 850 Lincoln Centre Drive, Foster City, California 94404, USA.

Ordering table contd. at right.

Thermo Scientific* Red Hot* DNA Polymerase

Original "red" thermostable DNA polymerase

- Consists of recombinant Thermoprime Plus DNA Polymerase plus an inert red dye
- Dye facilitates accurate low-volume pipetting
- Reaction mix turns to pink on enzyme addition for easy identification
- Dye has no adverse effect on the outcome of PCR
- Offers 5' to 3' exonuclease (strand displacement) and 3' adenylation activity
- Free of nucleases
- Suitable for standard PCR, high-throughput experiments, miniaturized PCR reactions
- Reaction Buffer: 10X Buffer IV with 750mM Tris-HCl (pH 8.8 at 25°C), 200mM $(NH_4)_2SO_4$, 0.1% (v/v) Tween* 20; $MgCl_2$ supplied as a separate vial at a concentration of 25mM
- Unit Definition: one unit of enzyme is the amount that will incorporate 10nmol of dNTPs into acid-insoluble material in 30 min. at 74°C under the following analysis conditions: 25mM TAPS (pH 9.3 at 25°C); 50mM KC
2mM $MgCl_2$; 1mM β-mercaptoethanol; 250μM each of dCTP, dGTP, d
250μM [^{3}H]-dATP (0.05Ci/mmol); and 1.25μg/μL activated salmon spe
DNA in a final volume of 50μL

STORAGE CONDITIONS:

Store at -20°C.

Quantity	Concentration	Cat. No.	Ea
100U	5U/μL	**AB-0406**	56.
500U	5U/μL	**AB-0406B**	191.
5000U	5U/μL	**AB-0406C**	1785.

Purchase of this product includes an immunity from suit under patents specified in the product insert to use only the amount purchased for the purchaser's own internal researc No other patent rights (such as 5' Nuclease Process patent rights) are conveyed expressl implication, or by estoppel. Further information on purchasing licenses may be obtained b contacting the Director of Licensing, Applied Biosystems, 850 Lincoln Centre Drive, Foste California 94404, USA.

Thermo Scientific* 10X PCR Buffer IV

Autoclaved and supplied sterile

- **With $MgCl_2$:** One 1.25mL vial of 750mM Tris-HCl (pH 8.8 at 25°C), 200mM $(NH_4)_2SO_4$, 0.1% (v/v) Tween* 20, 15mM $MgCl_2$
- **With Separate $MgCl_2$:** One 1.25mL vial of 750mM Tris-HCl (pH 8.8 at 25°C), 200mM $(NH_4)_2SO_4$, 0.1% (v/v) Tween 20. Separate 1.25mL vial of 25mM $MgCl_2$

Description	Quantity	Cat. No.	Ea
PCR Buffer IV with $MgCl_2$	1.25mL	**AB-0288**	16
PCR Buffer IV with Separate $MgCl_2$	1.25mL	**AB-0289**	16

Promega* GoTaq* DNA Polymerase

Provides robust amplification and streamlined analysis of PCR products

- Offers robust amplification equal to—and in some cases superior to—conventional *Taq* DNA polymerase
- Suitable for PCR, two-step RT-PCR, and T-vector cloning
- Samples can be loaded directly onto a gel after amplification
- Compatible with PCR enhancers such as betaine and DMSO
- Unit Definition: One unit is defined as the amount of enzyme required to catalyze the incorporation of 10nmol of dNTP into acid-insoluble material in 30 minutes at 74°C. The reaction conditions are 50mM Tris-HCl (pH 9.0 at 25°C), 50mM NaCl, 5mM $MgCl_2$, 200μM each of dATP, dCTP, dGTP, dTTP (a mix of unlabeled and [^{3}H]dTTP), 10μg activated calf thymus DNA and 0.1mg/mL BSA in a final volume of 50μL

INCLUDES:

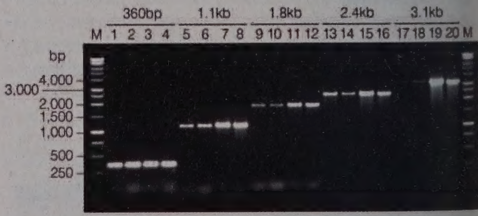
GoTaq DNA Polymerase; 5X Colorless GoTaq Reaction Buffer (Used when direct fluorescence or absorbance readings are required without prior purification of the DNA from the amplification reaction); 5X Green GoTaq Reaction Buffer (Contains two dyes that separate during electrophoresis facilitate direct-to-gel analysis of PCR products). Both buffers are supplie at pH 8.5 and contain $MgCl_2$ at a concentration of 7.5mM, giving a final concentration of 1.5mM in a 1X reaction.

Size	Concentration	Cat. No.	Each
100U	5U/μL	**PR-M3001**	26.00
500U	5U/μL	**PR-M3005**	116.00
2500U	5U/μL	**PR-M3008**	515.00

These catalog numbers are not available in Europe. Use of these products in all other countries except the U.S. is covered by one or more of the following U.S. patents and corresponding patent claims outside the U.S.: 5,079,352; 5,789,224; 5,618,711; 6,127,155 and claims outside the U.S. corresponding to U.S. Patent No. 4,889,818. The purchase of this product includes a limited, nontransferable immunity from suit under the foregoing patent claims for using only this amount of product for the purchaser's own internal research. No right under any other patent claim (such as the patented 5' Nuclease Process claims in U.S. Patents Nos. 5,210,015 and 5,487,972), no right to perform any patented method, and no right to perform commercial services of any kind, including without limitation reporting the results of purchaser's activities for a fee or other commercial consideration, is conveyed expressly, by implication, or by estoppel. This product is for research use only. Diagnostic uses under Roche patents require a separate license from Roche. Further information on purchasing licenses may be obtained by contacting the Director of Licensing, Applied Biosystems, 850 Lincoln Centre Drive, Foster City, California 94404 USA. Use of these products in the U.S. for basic PCR is outside of any valid U.S. patents assigned to Hoffman La-Roche or Applera. These products can be used in the U.S. for basic PCR in research, commercial or diagnostic applications without any license or royalty fees.

STORAGE CONDITIONS:

Store at -20°C.



Comparison of amplification reactions using *Taq* DNA Polymerase in Storage Buffer B, *Taq* DNA Polymerase in Storage Buffer A and GoTaq Polymerase (PR-M3001). A 360 bp α-1-antitrypsin fragment from 3.3ng Human Genomic DNA (Cat. No. PR-G3041), a 1.1kb IL-1β fragment from 1 Mouse Genomic DNA (Cat. No. PR-G3091), a 1.8kb APC fragment from 3.3n Human Genomic DNA, a 2.4kb APC fragment from 33ng Human Genomic D and a 3.1kb APC fragment from 75ng Human Genomic DNA were amplified using indicated amounts of template DNA. Amplifications were performed u either *Taq* DNA Polymerase in Storage Buffer B (lanes 1, 5, 9, 13, 17) with Thermophilic DNA Polymerase Buffer, *Taq* DNA Polymerase in Storage Buffe (lanes 2, 6, 10, 14, 18) with Thermophilic DNA Polymerase Buffer, GoTaq DN Polymerase (lanes 3, 7, 11, 15, 19) with Colorless GoTaq Reaction Buffer, or GoTaq DNA Polymerase (lanes 4, 8, 12, 16, 20) with Green GoTaq Reaction Buffer. Lane M, BenchTop 1kb DNA Ladder (Cat. No. PR-G7541). All amplifica tions were perfomed with PCR Nucleotide Mix (Cat. No. PR-C1141) as the d source.

*Trademark. See Trademark Reference.

Prices subject to change.

omega* GoTaq* Flexi DNA Polymerase

mbines robust amplification, streamlined downstream analysis, and the flexibility optimize Mg^{2+} concentration

ffers robust amplification equal to—and in some cases superior to—onventional *Taq* DNA polymerase

uitable for PCR, two-step RT-PCR, and T-vector cloning

tilizes a separate $MgCl_2$ solution to allow for optimization of magnesium oncentration

amples can be loaded directly onto a gel after amplification

nit Definition: One unit is defined as the amount of enzyme required to atalyze the incorporation of 10nmol of dNTP into acid-insoluble material 30 minutes at 74°C. The reaction conditions are 50mM Tris-HCl (pH 9.0 25°C), 50mM NaCl, 5mM $MgCl_2$, 200µM each of dATP, dCTP, dGTP, TTP (a mix of unlabeled and [^{3}H]dTTP), 10µg activated calf thymus DNA nd 0.1mg/mL BSA in a final volume of 50µL

Comparison of amplification reactions using GoTaq DNA Polymerase and GoTaq Flexi DNA Polymerase (PR-M8291). A 360 bp α-1-antitrypsin fragment from 3.3ng Human Genomic DNA (Cat. No. PR-G3041), a 1.1kb IL-1 β fragment from 10ng Mouse Genomic DNA (Cat. No. PR-G3091), a 1.8kb APC fragment from 3.3ng Human Genomic DNA, a 2.4kb APC fragment from 33ng Human Genomic DNA and a 3.1kb APC fragment from 75ng Human Genomic DNA were amplified using the indicated amounts of template DNA. Amplifications were performed using either GoTaq DNA Polymerase with Colorless GoTaq Reaction Buffer (lanes 1, 5, 9, 13, 17), GoTaq Flexi DNA Polymerase with Colorless GoTaq Flexi Buffer (lanes 2, 6, 10, 14, 18), GoTaq DNA Polymerase with Green GoTaq Reaction Buffer (lanes 3, 7, 11, 15, 19), or GoTaq Flexi DNA Polymerase with Green GoTaq Flexi Buffer (lanes 4, 8, 12, 16, 20). Lane M, BenchTop 1kb DNA Ladder (Cat. No. PR-G7541). All amplifications were performed with PCR Nucleotide Mix (Cat. No. PR-C1141) as the dNTP source.

---

omega* GoTaq* Green Master Mix

es time during reaction setup and PCR product analysis

emixed, ready-to-use solution contains GoTaq DNA polymerase, dNTPs, gCl_2, and reaction buffers in a single tube

ilizes an optimized enzyme and buffer formulation that offers nplification typically better than standard *Taq* DNA polymerases

n be directly substituted into existing PCR protocols without the need change cycling parameters

rves as a gel loading solution, so PCR products may be directly loaded to agarose gels

ntains a blue dye and a yellow dye that allow the monitoring of ogress during electrophoresis

LUDES:

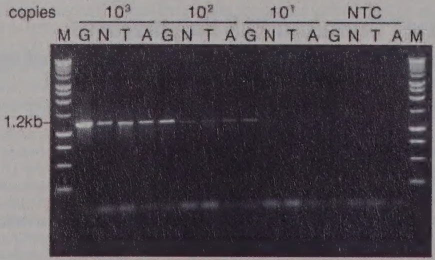
q Green Master Mix, nuclease-free water

RAGE CONDITIONS:

e at -20°C; may be stored at 4°C for up to six weeks.

tity	Concentration	Cat. No.	Each
rxns	2X	**PR-M7122**	34.00
rxns	2X	**PR-M7123**	300.00

atents above for GoTaq.



GoTaq Green Master Mix outperforms standard *Taq* DNA Polymerase. Amplification of 1.2kb fragment of α-1-anti-trypsin gene from indicated copies of human genomic DNA (Cat. No. PR-G3041). G: GoTaq Green Master Mix; N: competitor N; T: competitor T; A: competitor A; NTC: no template control; and M: BenchTop 1kb DNA Ladder (Cat. No. PR-G7541).

REAGENTS AND KITS — HOT START PCR

Thermo Scientific* Thermo-Start* DNA Polymerase

Patented, chemically modified version of Thermoprime Plus DNA Polymerase for hot-start PCR

- Inactive until "switched on" by high temperature incubation—reactions are prepared and held at room temperature
- Eliminates nonspecific priming
- Includes a proprietary buffer which ensures a maximal response from the enzyme once it has been activated, resulting in higher yields than those obtained with systems based on chemical modifications alone
- Can be activated incrementally for highest stringency
- Provides 5' to 3' exonuclease (strand displacement) and 3' adenylation activity
- Free of nucleases
- Storage and Dilution Buffer: 100mM KCl, 20mM Tris-HCl (pH 9.2 at 25°C), 0.1mM EDTA, 1mM DTT, 0.5% (v/v) Tween*, 0.5% (v/v) Nonidet P40*, 50% (v/v) glycerol
- Reaction Buffer: Available with 10X reaction buffer containing 15mM $MgCl_2$ or with $MgCl_2$ supplied in a separate vial at a concentration of 25mM
- Unit Definition: one unit of enzyme is the amount that will incorporate 10nmol of dNTPs into acid-insoluble material in 30 min. at 74°C under the following analysis conditions: 25mM TAPS (pH 9.3 at 25°C), 50mM KCl, 2mM $MgCl_2$, 1mM β-mercaptoethanol, 250µM of each: dCTP, dGTP, dTTP, 250µM [^{3}H]-dATP (0.05Ci/mmol) and 1.25µg/µL activated salmon sperm DNA in a final volume of 50µL

STORAGE CONDITIONS:
Store at -20°C.

Purchase of this product includes an immunity from suit under patents specified in the product insert to use only the amount purchased for the purchaser's own internal research. No other patent rights (such as 5' Nuclease Process patent rights) are conveyed expressly, by implication, or by estoppel. Further information on purchasing licenses may be obtained by contacting the Director of Licensing, Applied Biosystems, 850 Lincoln Centre Drive, Fos City, California 94404, USA.

Thermo Scientific* Thermo-Start* PCR Master Mix

Convenient premix for high-specificity PCR

- Eliminates nonspecific priming and primer-dimer formation
- Contains proprietary buffer for improved yields
- Reduces reagent handling steps, reducing chance of errors
- Contains all the components required for hot-start PCR (except template and primers): 0.025U/µL Thermo-Start DNA Polymerase (= 1.25U/50µL rxn); 1X Thermo-Start Reaction Buffer; 200µM of each dATP, dCTP, dGTP, dTTP; 1.5-3.0mM $MgCl_2$ (depending on Cat. No. selected)

STORAGE CONDITIONS:
Store at 4°C for up to one month; store at -20°C for up to six months.

Takara* Premium PCR Polymerases

A monoclonal antibody to *Taq* polymerase is bound to the polymerase until the temperature is elevated

- Provide the same performance as original *Taq*, *Ex Taq**, and *LA Taq** polymerases—with the added advantages of hot start
- Reduce background
- Increase specificity
- Permit room-temperature reaction assembly
- Prevent nonspecific amplification caused by mispriming and/or formation of primer-dimers during reaction assembly

NOTE:
Taq antibody is also available separately.

STORAGE CONDITIONS:
Store at -20°C.

Description	Quantity	Cat. No.	Ea
Taq DNA Polymerase	250U	**TAK R007A**	130.

Use of this product is covered by one or more of the following U.S. patents and corresponding patent claims outside the U.S.: 5,079,352; 5,789,224; 5,618,711; 6,127,155 and claims ou the U.S. corresponding to U.S. Patent 4,889,818. The purchase of this product includes a limi nontransferable immunity from suit under the foregoing patent claims for using only this amou of product for the purchaser's own internal research. This product is for research use only. Diagnostic uses under Roche patents require a separate license from Roche. Further informat on purchasing licenses may be obtained by contacting the Director of Licensing, Applied Biosystems, 850 Lincoln Centre Drive, Foster City, California 94404, USA.

LA PCR technology is covered by U.S. Patent 5,436,149 issued to TaKaRa Bio Inc.

Takara Bio's Hot Start PCR-related products are liscensed under U.S. Patents 5,338,671 a 5,587,287 and corresponding patents in other countries.

kara* PrimeSTAR* HS DNA Polymerase

ɦh-fidelity PCR enzyme ideal for demanding ning and sequencing applications

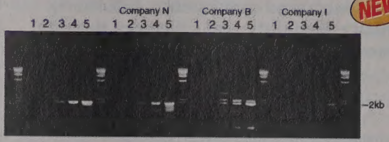
- aximum fidelity and extended product length—8.5kb for human genomic NA, 22kb for lambda DNA
- rong exonuclease activity results in an extremely low error rate—only errors per 250,000 bp as determined by DNA sequence analysis
- cellent amplification efficiency shortens reaction times
- tibody-mediated hot-start formulation prevents false initiation events ring reaction assembly
- bust performance with GC-rich templates

neSTAR HS Premix
A Polymerase

- cludes PrimeSTAR's strong exonuclease activity, high reactivity, and onoclonal-antibody mediated hot-start
- quires addition of only template, primer, and water
- duced number of pipetting steps limits reaction variation and portunities for contamination
- formulation containing PrimeSTAR HS, PCR Buffer, $MgCl_2$, and dNTPs

LUDES:
eSTAR HS DNA Polymerase, 5X PrimeSTAR Buffer (with Mg^{2+}), P mixture

RAGE CONDITIONS:
e at -20°C.



Comparison of PrimeSTAR HS Amplification Efficiency with Competitors on a 2kb Human Genomic DNA Fragment. Superior amplification efficiency was apparent using PrimeSTAR HS on a human genomic (DCLRE1A) 2kb template. Human genomic DNA was used in the following quantities: Lane 1: 0ng (dH_2O), Lane 2: 100pg, Lane 3: 1ng, Lane 4: 10ng, Lane 5: 100ng.

Takara Bio's Hot-Start PCR-related products are licensed under U.S. Patents 5,338,671 and 5,587,287 and corresponding patents in other countries.

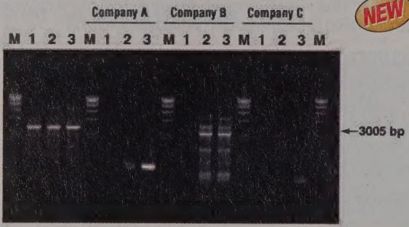
---

kara* PrimeSTAR* HS DNA Polymerase th GC Buffer

eased reproducibility and minimized risk ontamination

- eSTAR HS is a unique high fidelity DNA polymerase, offering both mal accuracy and higher amplification efficiency than *Taq* Polymerase.
- v error rate of only 25 errors per 304,000 bp (high-GC DNA, termined by sequence analysis)
- h efficiency amplification, even on GC-rich templates (75%)
- plify high GC human genomic DNA targets of up to 5kb
- reased priming efficiency results in rapid annealing times and proved specificity
- tibody-mediated hot-start prevents false initiation events during ction assembly due to mispriming or primer digestion

RAGE CONDITIONS:
e at -20°C.



Amplification of 3005 bp high-GC (73.2%) TthHB8 Genomic DNA Template. The performance of high fidelity, high-GC enzymes from Companies A, B, and C were compared with PrimeSTAR HS DNA Polymerase with GC Buffer. Lanes 1, 2, and 3: 100pg, 1ng, 10ng human genomic DNA template.

Description	Quantity	Cat. No.	Each
PrimeSTAR HS DNA	250U	**TMBR044A**	219.64

5 PRIME* HotMaster* *Taq* Polymerase

Provides increased convenience, sensitivity, specificity, flexibility, and efficiency through an innovative Hot Start technology

FP2200300

- Licensed for PCR use
- Uses a recombinant and modified form of the *Thermus aquaticus* YT1 DNA Polymerase gene expressed in *E. coli* DH 1
- Does not require the long, high-temperature preincubations associated with other Hot Start systems
- Enables both Hot Start activity during the entire PCR and Cold Stop* activity at temperatures below 60°C during the annealing step of every PCR cycle due to a temperature-dependent inhibitor that binds the polymerase
- Eliminates the need to optimize for Mg^{2+} concentration by using a reaction buffer that weakly chelates the ion, so it can be released as needed for the reaction
- Amplifies fragments up to 5kb
- Unit Definition: One unit is defined as the amount of enzyme that incorporates 10nmoles of dNTPs into acid-insoluble form within 30 min. at 74°C under the assay conditions, using reaction conditions: 25mM TAPS (N-tris-(hydroxymethyl)-methyl-3-amino-propanesulfonic acid, sodium salt) pH 9.3 (at 25°C); 50mM KCl; 2mM $MgCl_2$; 1mM β-mercaptoethanol; 200μmol each dATP, dGTP, dTTP; 100μM dCTP (a mix of unlabeled and [α-^{32}P]-labeled); 12.5μg activated salmon sperm DNA in a final volume of 50μL
- Associated Activities: No endonuclease or exonuclease activity was detected after a 14–16 hour incubation at 37°C of the polymerase with lambda/*Hin*d III fragments and purified plasmid DNA

INCLUDES:

- HotMaster *Taq* Polymerase and reaction buffer packaged in separate tubes
- Storage and Dilution Buffer: 25mM Tris-HCl pH 8.0, 35mM KCl, 0.1mM EDTA, 1mM DTT, 50% glycerol, 0.5% Tween* 20, 0.5% IGEPAL* CA-630 and stabilizers
- Reaction Buffer: 10X HotMaster *Taq* Buffer with 25mM Mg^{2+}

STORAGE CONDITIONS:

Store at -20°C.

Quantity	Concentration	Cat. No.	Each
100U	5U/μL	**FP2200300**	49.11
250U	5U/μL	**FP2200310**	110.94
1000U	5U/μL	**FP2200320**	392.27
5000U	5U/μL	**FP2200330**	1857.11

This product is sold under licensing arrangements with F. Hoffmann-La Roche Ltd., Roche Molecular Systems, Inc., and Applied Biosystems.

5 PRIME* HotMasterMix

Combines HotMaster* *Taq* Polymerase†, self-adjustin Mg^{2+} reaction buffer, and nucleotides in one tube

- HotMasterMix contains all the necessary subcomponents except for template and primer set—ideal for high throughput PCR
- PCR experiments may be set up at room temperature; no heat activati required before cycling
- Nonspecific products due to mispriming are minimized throughout the entire PCR experiment
- Preoptimized buffer that adjusts the Mg^{2+} concentration automatically no need to titrate Mg^{2+} manually

STORAGE CONDITIONS:

If used frequently, store between 2 and 8°C. For long-term storage, keep at -20°C.

Cepheid* OmniMix* HS Reagent

Ready-to-use PCR reagent bead

- Bead contains all necessary reagents for PCR, except primers and pro or intercalating dye
- Ready-to-use format eliminates extra pipetting steps and reduces contamination risk
- *Taq*-specific, monoclonal-antibody-based, hot-start technology minimi mispriming and/or primer-dimer formation before thermal cycling
- Each bead is packaged in a 0.5mL tube and contains sufficient reagen for performing two 25μL PCR amplification reactions
- When reconstituted to a final volume of 50μL, OmniMix HS contains Hot-Start *Taq* Polymerase, 200μM dNTP, 4mM $MgCl_2$, and 25mM HEP buffer pH 8.0 ± 0.1

STORAGE CONDITIONS:

Store at 2 to 8°C.

Quantity	Cat. No.	Ea
25 beads	**OMNI100N050**	125

Purchase of this product is accompanied by a limited license under foreign counterparts U.S. Patents 4,683,202; 4,683,195; and 4,965,188 to use it in the Polymerase Chain Reaction (PCR) process for research in conjunction with a thermal cycler whose use in th automated performance of the PCR process is covered by the up-front license fee, either payment to Applied Biosystems or as purchased, i.e., an authorized thermal cycler.

Licensed under U.S. Patents 5,338,671 and 5,587,287 and corresponding patents in oth countries.

PRIME* Master*Taq** Kits

cially developed to improve the amplification of ficult templates by stabilizing the enzyme during reaction procedure

FP2200200

sures improved yield of PCR products

proved results with impure templates

liable results for GC-rich templates

urce: Recombinant and modified m of the *Thermus aquaticus* YT1 IA Polymerase gene expressed in *coli* DH 1

it Definition: One unit is defined as e amount of enzyme that incorporates nmol of dNTPs into acid-insoluble form within 30 min. at 74°C under e following conditions: 25mM TAPS (N-tris-(hydroxymethyl)-methyl-3-ino-propanesulfonic acid, sodium salt) pH 9.3 (at 25°C); 50mM KCl; M Mg^{2+}; 1mM β-mercaptoethanol; 200µmol each dATP, dGTP, dTTP; 0µM dCTP (a mix of unlabeled and [α-^{32}P]-labeled); 12.5µg activated mon sperm DNA in a final volume of 50µL.

sociated Activities: Endonuclease and exonuclease activities were not tectable after one or two hours' incubation, respectively, of 1µg lambda IA and 0.22µg of *Eco*RI-digested lambda DNA at 72°C in the presence 15–20 units of 5 PRIME *Taq* DNA Polymerase

orage and Dilution Buffer: 20mM Tris-HCl pH 8.0 (at 25°C), 100mM KCl, mM EDTA, 1mM DTT, 50% glycerol, 0.5% Tween* 20

action Buffer: 10X Reaction Buffer with magnesium: 500mM KCl, 0mM Tris-HCl pH 8.3 (at 25°C), 15mM Mg^{2+}

LUDES:

laster (5×PCR Enhancer), 5 PRIME *Taq* DNA Polymerase, reaction r (10X), 25mM $Mg(OAc)_2$ solution

roduct is sold under licensing arrangements with F. Hoffmann-La Roche Ltd., Roche ular Systems, Inc., and Applied Biosystems.

5 PRIME* PCR Extender System

Three-in-one kit for PCR applications

- Unique enzyme blend, high-fidelity buffer, and Tuning Buffer* provide outstanding long-range PCR product yields and achieve fragment lengths up to 40kb
- Tuning Buffer prevents the acidic hydrolysis (strand breakage) of very long templates, thus markedly increasing the sensitivity of the PCR
- High-fidelity buffer and unique enzyme mix help ensure minimal error rates with proofreading reactions
- System successfully amplifies templates with GC content in excess of 70%
- Low error rate ensured by proofreading mix

APPLICATIONS:

Long-range PCR, High-fidelity/proofreading PCR, Templates with very high GC-content and secondary structures, PCR experiments with high number of cycles (>40 cycles), Amplification of rare targets (e.g. after reverse transcription)

STORAGE CONDITIONS:

Store at -20°C

Quantity	No. of Rxns	Cat. No.	Each

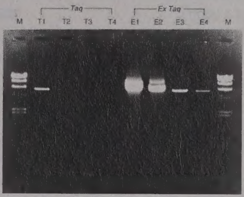
This product is sold under licensing arrangements with F. Hoffmann-La Roche Ltd., Roche Molecular Systems, Inc., and Applied Biosystems.

Takara* *Ex Taq** DNA Polymerase

For high-yield and high-fidelity PCR

- Provides efficient 3'→5' exonuclease activity
- Gives higher yields and lower mutation rates (approximately 4X lower, as determined by the Kunkel method) than does standard *Taq* polymerase
- Allows amplification of longer products than does *Taq*, with 20kb lengths possible from genomic DNA and up to 30kb possible from lambda DNA
- Generates products that are suitable for cloning into T-vectors
- Excellent for amplifying fragments from problem organisms



Amplification of a 6kb target from *E. coli* genomic DNA with Takara *Taq* and *Ex Taq* (TAK RR001A) DNA Polymerases.

Description	Quantity	Cat. No.	Each
Ex Taq DNA Polymerase (dNTPs and buffer included)	250U	**TAK RR001A**	161.98
	1000U (4 × 250U)	**TAK RR001B**	581.29

Takara* Long and Accurate (LA) PCR Products

Result in longer and more accurate genomic PCR products

- *LA Taq** DNA Polymerase facilitates amplification of large DNA templates (up to 48kb)
- Efficient 3'→5' exonuclease activity achieves 6.5-fold better fidelity than conventional *Taq*
- Products are suitable for cloning into T-vectors
- **LA PCR Kit** helps to optimize long PCR and includes polymerase, buffer system, control template and primers
- **LA *Taq*** with GC Buffers is specifically designed to increase fidelity when amplifying DNA templates with high GC content or secondary structures
- **LA PCR Genome DNA Set** contains highly purified, high molecular weight human genomic and *E. coli* DNA control templates and primers for use as controls
- **One-Shot LA *Taq*** DNA Polymerase PCR Mix contains polymerase, reaction buffer, and dNTPs at a 2X concentration; 25µL aliquots are predispensed into 0.2mL microcentrifuge tubes

Description	Quantity	Cat. No.	Ea

Thermo Scientific* Extensor Hi-Fidelity PCR Enzyme Blend

Blend of Thermo Scientific Thermoprime Plus DNA Polymerase with proprietary thermostable proof-reading enzyme that acts synergistically

- Amplifies DNA templates with at least double the yields and four times higher fidelity than standard *Taq* DNA polymerase
- Can also generate larger products than either enzyme individually (>20kb)
- Ideal for full-length amplification of sequences for cloning

INCLUDES:

Extensor Hi-Fidelity PCR Enzyme Blend; Storage and Dilution Buffer: 100mM KCl, 20mM Tris-HCl (pH 8.0 at 25°C), 0.1mM EDTA, 1mM DTT, 0.5% (v/v) Tween* 20, 0.5% (v/v) Nonidet P40*, 50% (v/v) glycerol; Reaction Buffer (two 10X alternatives): Buffer 1 for amplifications up to 12kb, Buffer 2 for amplifications longer than 12kb or problematic PCR. Both contain 22.5mM $MgCl_2$. An additional vial of 25mM $MgCl_2$ is also provided. AB-0720 Series includes controls.

STORAGE CONDITIONS:

Store at -20°C.

Prices subject to change.

ermo Scientific* Extensor Hi-Fidelity R Master Mix

nvenient, time-saving master-mix format for h-fidelity or long PCR

educes the risk of contamination and reagent handling errors

least four times higher fidelity than standard *Taq* DNA polymerase

uble the yields of standard *Taq* DNA polymerase

nplifies sequences >20kb

noice of two proprietary buffers (Extensor Buffer 1 for amplifications to 12kb or Extensor Buffer 2 for amplifications longer than 12kb or oblematic PCR), with and without Thermo Scientific ReddyMix* buffer

LUDES:

nsor Hi-Fidelity PCR Enzyme Blend, dNTPs, $MgCl_2$

RAGE CONDITIONS:

e at 4°C for up to one month; store at -20°C for up to one year.

REAGENTS AND KITS — REVERSE TRANSCRIPTION

ermo Scientific* Verso* cDNA Kit

erates high yields of full-length cDNA

AB-1453A

ermo Scientific Verso Reverse nscriptase, an RNA-dependent DNA lymerase which is active at high nperatures, is highly sensitive, and n generate long cDNA strands up to kb at temperatures from 42° to 57°C

ermo Scientific Verso Mix contains lase inhibitor to protect RNA templates m degradation

NA Synthesis Buffer is a proprietary buffer which s been optimized to improve reverse transcription oss a wide range of templates

oice of primers provides flexible RNA priming methods for cDNA synthesis

LUDES:

me Mix including RNase inhibitor, cDNA Synthesis Buffer (5X), ored oligo-dT (500ng/µL), Random hexamer (400ng/µL), dNTP mix M each)

RAGE CONDITIONS:

e at -20°C.

tity	Cat. No.	Each
20µL rxns	**AB-1453A**	103.77
× 20µL rxns	**AB-1453B**	246.01

5 PRIME* MasterScript RT Kits

Provide maximum flexibility for the demands of RT

FP2201000

- Use a recombinant homodimeric viral reverse transcriptase combined with the MasterScript RT-PCR buffer
- Allow efficient cDNA synthesis up to 12.5kb over a 99–140°F (37–60°C) temperature range
- Virtually eliminate the need for Mg^{2+} optimization by using self-adjusting MasterScript RT-PCR buffer
- Licensed for PCR

APPLICATIONS:

Generate cDNA probes for Northern Blot; label RNA samples for microarray hybridization; prepare full-length cDNA libraries; detect and quantify mRNA level from low to high throughput

STORAGE CONDITIONS:

Store at -20°C.

Quantity	Cat. No.	Each
50 rxns	**FP2201000**	222.98
200 rxns	**FP2201010**	759.20

This product is sold under licensing arrangements with F. Hoffmann-La Roche Ltd., Roche Molecular Systems, Inc., and Applied Biosystems.

Promega* AMV Reverse Transcriptase

Catalyzes the polymerization of DNA using template DNA, RNA, or RNA:DNA hybrids

- Ideal for first- and second-strand synthesis of cDNA, primer extensions and RNA sequencing, preparation of labeled hybridization probes, and RT-PCR
- Well suited for templates with high secondary structures due to its stability at higher reaction temperatures (37° to 58°C)
- Requires a primer and Mg^{2+} or Mn^{2+} for activity
- Possesses an intrinsic RNase H activity, but is free of contaminating DNases and RNases
- Stabilized in vitro by nonionic detergents and sulfhydryl compounds

INCLUDES:

5X Reaction Buffer (250mM Tris-HCl [pH 8.3 at 25°C], 250mM KCl, 50mM $MgCl_2$, 2.5mM spermidine, 50mM DTT)

STORAGE CONDITIONS:

Store at -20°C.

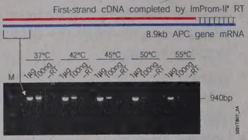
NOTE:

Provided buffer is not compatible with RT-PCR; for RT-PCR, Reverse Transcription 10X Buffer (PR-A3561) should be used in combination with $MgCl_2$ (PR-A3511).

Quantity	Concentration	Cat. No.	Each
1 × 300U	10U/µL	**PR-M5101**	82.20
1 × 1000U	10U/µL	**PR-M5108**	221.40
1 × 600U	20–25U/µL	**PR-M9004**	158.40

Promega* ImProm-II* Reverse Transcription System

Formulated for stand-alone applications or for easy transition to gene-specific target amplification



Full-length cDNA synthesis of 8.9kb template over a range of temperatures using the ImProm-II Reverse Transcription System (PR-A3800), demonstrated by selective amplification of terminal 3' sequence in two-step RT-PCR. Entire 8.9kb message must be reverse transcribed to amplify the terminal 940 bp sequence. Message was amplified from either 1µg or 100ng of total RNA. Control reactions without the reverse transcriptase (-RT) are shown as well.

- Reverse transcribes RNA templates from total RNA, poly(A)+ mRNA, or synthetic transcript RNA
- Enables robust, full-length cDNA synthesis for the analysis of rare or long messages (up to 8.9kb)
- Uses volumes of 1–20µL from the initial RT reaction in coupled or uncoupled PCR reactions
- May also be used for the incorporation of regular, Cy*3-modified, Cy5-modified, and amino-allyl-modified nucleotides for microarray applications

INCLUDES:

ImProm-II Reverse Transcriptase, buffer, $MgCl_2$, dNTPs, primers, nuclease-free water, recombinant RNasin* Ribonuclease Inhibitor

NOTE:

ImProm-II Reverse Transcriptase with buffer and $MgCl_2$ is also available separately.

STORAGE CONDITIONS:

Store at -20°C.

Description	Quantity	Cat. No.	Each
ImProm-II Reverse Transcription System	100 rxns	**PR-A3800**	362.75
ImProm-II Reverse Transcriptase	10 rxns	**PR-A3801**	15.00
	100 rxns	**PR-A3802**	108.40
	500 rxns	**PR-A3803**	417.75

Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.
U.S. Patents 4,966,964; 5,019,556; and 5,266,687; Australian Patents 616881 and 641261 and other pending and issued patents, which claim vectors encoding a portion of human placental ribonuclease inhibitor, are exclusively licensed to Promega Corporation.

Promega* Reverse Transcription System

Efficiently reverse-transcribes RNA into cDNA in just 15 minutes

- AMV Reverse Transcriptase synthesizes single-stranded cDNA from total or poly(A)+ RNA
- Both Oligo(dT)15 and Random Primers are included, allowing cDNA synthesis from virtually any RNA source
- A polyadenylated 1.2kb RNA transcript is provided as a control template

INCLUDES:

Necessary enzymes, primers, and buffers; dNTPs; nuclease-free water

STORAGE CONDITIONS:

Store at -20°C; store positive control RNA at -70°C.

NOTE:

Additional buffers are also available separately.

Description	Quantity	Cat. No.	Each
Reverse Transcription System	100 rxns	**PR-A3500**	370.7

REAGENTS AND KITS — RT-PCR

Thermo Scientific* Verso* 1-Step RT-PCR Kit

Supplies all of the reagents required to perform a rapid, sensitive, and reproducible RT-PCR in only two vials

Enzyme Mix

- Utilizes Thermo Scientific Verso Reverse Transcriptase, an RNA-dependent DNA polymerase which is active at high temperatures, is highly sensitive, and can generate long cDNA strands up to 11kb at temperatures from 42° to 57°C
- Contains RNase inhibitor to protect RNA templates from degradation

AB-1454LDA

1-Step PCR Master Mix

- Includes Thermoprime Plus DNA polymerase which is stable at high temperatures and has 5' to 3' polymerization and exonuclease activity
- Uses a proprietary reaction buffer which has been optimized to allow both reverse transcription and PCR amplification to occur in the same reaction mix across a wide range of templates
- Also includes $MgCl_2$ and dNTP mix
- Available with Thermo Scientific ReddyMix* buffer system for loading of PCR products directly onto an agarose gel

INCLUDES:

Thermo Scientific Enzyme Mix including RNase inhibitor, 1-Step PCR Master Mix (2X)

STORAGE CONDITIONS:

Store at -20°C.

Description	Quantity	Cat. No.	Ea
1-Step RT-PCR Kit	40 × 50µL rxns	**AB-1454A**	150.
1-Step RT-PCR Kit	200 × 50µL rxns	**AB-1454B**	675.
1-Step RT-PCR Kit with Thermo Scientific ReddyMix Buffer	40 × 50µL rxns	**AB-1454LDA**	165.
1-Step RT-PCR Kit with Thermo Scientific ReddyMix Buffer	200 × 50µL rxns	**AB-1454LDB**	742.

Purchase of this product includes an immunity from suit under patents specified in the product insert to use only the amount purchased for the purchaser's own internal researc No other patent rights (such as 5' Nuclease Process patent rights) are conveyed expressly, implication, or by estoppel. Further information on purchasing licenses may be obtained by contacting the Director of Licensing, Applied Biosystems, 850 Lincoln Centre Drive, Foster California 94404, USA.

ermo Scientific* Verso* 1-Step t-Start RT-PCR Kit

NEW

plies all of the reagents required to perform a rapid, sitive, and reproducible RT-PCR with the advantages hot-start DNA polymerase in only two vials

yme Mix

lizes Thermo Scientific Verso Reverse Transcriptase, an RNA-dependent
A polymerase which is active at high temperatures, is highly sensitive,
l can generate long cDNA strands up to 11kb at temperatures from 42°
57°C

ntains RNase inhibitor to protect RNA templates from degradation

ep PCR Hot-Start Master Mix

ludes Thermo Scientific Thermo-Start* DNA polymerase, a chemically
dified hot-start version of Thermoprime Plus DNA polymerase, which
vents nonspecific amplification during cDNA synthesis and requires an
ivation step at 95°C for 15 minutes

es a proprietary reaction buffer which has been optimized to allow
h reverse transcription and PCR amplification to occur in the same
ction mix across a wide range of templates

o includes $MgCl_2$ and dNTP mix

UDES:

ne Mix including RNase inhibitor, 1-Step PCR Hot-Start
er Mix (2X)

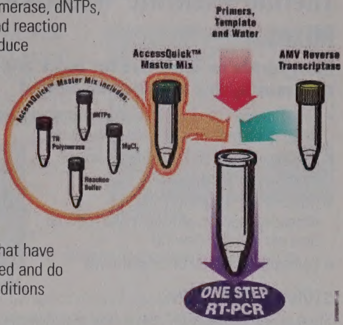
Promega* AccessQuick* RT-PCR System

Convenient master mix for routine RT-PCR applications

- Combines *Tfl* DNA polymerase, dNTPs, magnesium chloride, and reaction buffer in one tube to reduce the number of pipetting steps required
- Provides AMV RT enzyme in a separate tube to allow enzyme-free control reactions
- Amplifies as little as zeptomole (10^{-21} mol) levels of RNA template
- Intended for reactions that have been previously optimized and do not require extreme conditions



Primers, Template and Water
AccessQuick™ Master Mix
AMV Reverse Transcriptase
AccessQuick™ Master Mix includes:
dNTPs
Tfl Polymerase
MgCl₂
Reaction Buffer
ONE STEP RT-PCR

Schematic of AccessQuick RT-PCR System (PR-A1701)

INCLUDES:

AccessQuick Master Mix, 2X;
AMV reverse transcriptase;
nuclease-free water

STORAGE CONDITIONS:

Store at -20°C; stable over many freeze-thaw cycles.

Quantity	Cat. No.	Each
20 rxns	**PR-A1701**	106.40
100 rxns	**PR-A1702**	377.75

Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.
For laboratory use.

Takara* Real-Time One-Step RNA PCR Kit

Performs RT-PCR in a single tube without changing buffers or adding reagents

- Utilizes AMV Reverse Transcriptase XL (TAK 2630A) for greater thermostability and a wider range of reaction temperatures and Takara *Ex Taq** Hot Start Polymerase (TAK RR006A) for superior specificity and sensitivity with reduced background
- Minimizes the risk of contamination
- Excellent for RT-PCR using real time PCR

INCLUDES:

AMV Reverse Transcriptase XL, RNase-free dH_2O, RNase Inhibitor, Takara *Ex Taq* Hot-Start Polymerase, 2X One-step RNA PCR Buffer (Contains dNTP mixture and Mg^{2+}), ROX* Reference Dye I, ROX Reference Dye II

STORAGE CONDITIONS:

Store at -20°C.

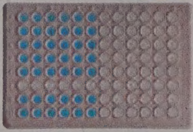
Quantity	Cat. No.	Each
100 rxns	**TAK RR026**	316.79

Use of this product is covered by one or more of the following U.S. patents and corresponding patent claims outside the U.S.: 5,079,352; 5,789,224; 5,618,711; 6,127,155 and claims outside the U.S. corresponding to U.S. Patent 4,889,818. The purchase of this product includes a limited, nontransferable immunity from suit under the foregoing patent claims for using only this amount of product for the purchaser's own internal research. This product is for research use only. Diagnostic uses under Roche patents require a separate license from Roche. Further information on purchasing licenses may be obtained by contacting the Director of Licensing, Applied Biosystems, 850 Lincoln Centre Drive, Foster City, California 94404, USA.

Thermo Scientific* ABsolute* Blue QPCR Mixes

Incorporate an inert dye for quick and easy verification that master mix has been dispensed

- Easier to see in the white opaque plastics recommended for QPCR than traditional colorless reagents
- Contain Thermo-Start* hot-start enzyme for increased sensitivity
- Utilize dTTP in the dNTP mix for increased reaction efficiency and reduced time per reaction (low Ct)
- Compatible with all QPCR platforms



AB-4000 Series

STORAGE CONDITIONS:

Store at -20°C. The ROX* dye is light sensitive; exposure to light should be minimized for vials containing ROX dye.

se of this product includes an immunity from suit under patents specified in the t insert to use only the amount purchased for the purchaser's own internal research. er patent rights are conveyed expressly, by implication, or by estoppel. Further ation on purchasing licenses may be obtained by contacting the Director of Licensing, l Biosystems, 850 Lincoln Centre Drive, Foster City, California 94404, USA.

5 PRIME* RealMasterMix

For quantitative and qualitative real-time PCR

FP2200700

Ready-to-use mix is ideal for probe-based real-time PCR assays such as *Taq*Man* or molecular beacons. The optimized formulation contains all of the components for quantitative PCR (except for template and primers/probes) in one tube for fast, easy handling and results with high reproducibility.

- Utilizes HotMaster* *Taq*† for Hot Start/Cold Stop* activity
- Uses Mg^{2+} self-adjusting buffer, eliminating the need for optimization of magnesium
- Offers anti-primer-dimer formation technology‡
- Enhances the signal release by nucleolytic probe degradation, so more signal can be generated with the same amount of target DNA
- Optimized for sequence-specific probes
- Available with and without ROX* passive reference dye for reference dye dependent and independent instrument platforms
- Any of the enzymes, labels, dyes, and methods mentioned may be covered by third party patent rights.

STORAGE CONDITIONS:

Store at -20°C for long-term storage. Stable at 4°C for up to three months. Products containing ROX should be protected from light.

Description	Quantity	Cat. No.	Each
RealMasterMix Probe	200 × 50µL rxns	**FP2200700**	314.25
	2000 × 50µL rxns	**FP2200710**	2836.55
RealMasterMix $Probe_{Rox}$	200 × 50µL rxns	**FP2200720**	314.25
	2000 × 50µL rxns	**FP2200730**	2822.98

---

† *This product is sold under licensing arrangements with F. Hoffmann-La Roche Ltd., Roche Molecular Systems, Inc., and Applied Biosystems.*

‡ *Patent pending.*

5 PRIME* RealMasterMix for SYBR* Green

Optimized for SYBR Green and single-plex, probe-based assays

- Ready-to-use MasterMix format (2.5X)
- HotMaster* enzyme technology: Hot Start-Cold Stop* feature for continuous specificity control during the entire PCR
- No enyzme activation step necessary; ideal for high-speed PCR
- High reproducibility and sensitivity
- Self-adjusting Mg^{2+} buffer technology
- Primer-dimer reducing formulation
- Contains ROX* dye for optional passive reference dye normalization

STORAGE CONDITIONS:

Store at -20°C for long-term storage. Stable at 4°C for up to three months. Protect from light.

2000 × 50µL rxns	**FP2200810**	2836.55

Thermo Scientific* Verso* 1-Step QRT-PCR Kit

Combines Verso RT enzyme and ABsolute* Blue QPCR master mix to produce sensitive results from low copy number template

AB-4100A

Verso RT Enzyme Mix Features

- Has a superior dynamic range, allowing the detection of 10pg to 1µg of total RNA or 1pg to 10ng mRNA
- Performs the RT step quickly, reducing the cDNA transcription time between 5 and 15 minutes
- Eliminates primer dimer formation, increasing sensitivity and efficiency
- Includes RNase inhibitor, significantly reducing RNase contamination while simplifying setup

RT Enhancer Features

- Eliminates the need for DNase treatment of samples

ABsolute Blue QPCR Master Mix Features

- Includes an inert blue dye that offers an immediate check that the correct amount of master mix has been added
- Utilizes Thermo-Start* *Taq* DNA polymerase, which remains inactive until an incubation at 95°C is performed, increasing specificity
- Uses a buffer system that has been optimized to work across a wide range of RNA templates for both transcription and amplification and incorporates special enhancers and additives which allow both RT and *Taq* polymerase to work optimally

INCLUDES:

Verso Enzyme Mix including RNase inhibitor, RT Enhancer, ABsolute Blue QPCR Master Mix, stain or dye as indicated in ordering table

STORAGE CONDITIONS:

Store at -20°C.

Thermo Scientific* Verso* 2-Step QRT-PCR Kit

Combines Verso RT enzyme and ABsolute* Blue QPCR master mix for convenient 2-Step QRT-PCR

AB-4109A

- Produces sensitive results from low copy number template
- Includes anchored oligo dT and random hexamer primers, allowing for an increase in both the amount of cDNA produced and the diversity of the cDNA pool
- Uses dTTP in the nucleotide mix instead of dUTP, increasing reaction efficiency by more than 5%
- Uses a buffer system that has been optimized to work across a wide range of RNA templates for both transcription and amplification and incorporates special enhancers and additives which allow both RT and *Taq* polymerase to work optimally

Verso RT Enzyme Mix Features

- Has a superior dynamic range, allowing the detection of 10pg to 1µg total RNA or 1pg to 100ng mRNA
- Performs the RT step quickly, reducing the cDNA transcription time to 15 minutes
- Eliminates primer dimer formation, increasing sensitivity and efficienc
- Includes RNase inhibitor, significantly reducing RNase contamination while simplifying setup

RT Enhancer Features

- Eliminates the need for DNase treatment of samples

ABsolute Blue QPCR Master Mix Features

- Includes an inert blue dye that offers an immediate check that the corr amount of master mix has been added
- Utilizes Thermo-Start* *Taq* DNA polymerase, which remains inactive u an incubation at 95°C is performed, increasing specificity

INCLUDES:

Verso Enzyme Mix including RNase inhibitor, cDNA Synthesis Buffer (5X), anchored oligo dT (500ng/µL), random hexamers (400ng/µL), RT Enhance ABsolute Blue QPCR Master Mix, dNTP mix (5mM each), stain or dye as indicated in ordering table

ts for the foundational PCR process, European Patents 201,184 and 200,362; expired
rch 28, 2006. In the U.S., the patents covering the foundational PCR process expired on
29, 2005.

roduct is designed and sold for use in the multiplex PCR process covered by U.S. Patent
,989; Canadian Patent 1,339,731 and Australian Patent 634,175. A limited license has
granted under the patent to use only this amount of the product to practice the multiplex
rocess and is conveyed to the purchaser by the purchase of this product.

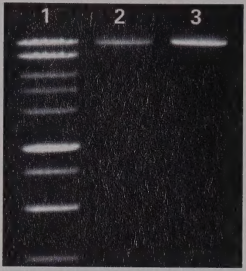
urchase of this product conveys to the buyer the limited, nonexclusive, nontransferable
without the right to resell, repackage, or further sublicense) under U.S. Published Patent
20020150900 and U.S. Patents 5,432,272; 6,617,106 and 6,140,496 to use the
ct. No other license is granted to the buyer whether expressly, by implication, by
pel or otherwise. In particular, the purchase of this product does not include or carry any
r license to sell this product. For information on purchasing a license for other uses,
contact Promega Corporation, Business Development, 2800 Woods Hollow Road,
on, WI 53711, or EraGen Biosciences, Corporate Licensing, 918 Deming Way, Suite
Madison, WI 53717.

REAGENTS AND KITS — NUCLEOTIDES

Fisher BioReagents* *exACTGene** dNTPs

Ultrapure dNTPs ideal for use in PCR, DNA labeling, and DNA sequencing

- >99% triphosphate
- Chemically synthesized to meet a high purity standard
- Ensure consistent results and optimum sensitivity for many rigorous applications
- Tested for purity by HPLC, performance in long-template PCR, and absence of DNase, RNase, and protease activity to ensure dependable performance and lot-to-lot consistency
- Ultrapure dNTPs will enhance results for the following procedures: QPCR, high-fidelity PCR, long template (>8kb) PCR, RT-PCR, fluorescent sequencing, cDNA synthesis, Pyrosequencing*, and in vitro mutagenesis



Performance of ultrapure dNTPs in long template PCR. Impurities in PCR reagents can often inhibit PCR reactions. To demonstrate this effect, a 10kb fragment from Lambda DNA was amplified using *exACTGene* PCR dNTP Mix (BP2595-200) (lane 3) and a competitor's standard dNTP mix of lower purity (lane 2).

STORAGE CONDITIONS:

Store at -20°C.

Description	Concentration	Quantity	Cat. No.	Each
dATP	100mM	250µL	**BP2590-250**	78.34
dCTP	100mM	250µL	**BP2592-250**	78.34

dNTP Mixture	1.28mL	**TAK 4030**	54.19
dNTP Set	100µmol each	**TAK 4025**	542.34

Promega* Ultra Pure Deoxynucleotide Triphosphates (dNTPs)

High-quality dNTPs for cDNA synthesis, sequencing, and labeling

PR-U1330

- Triphosphate content is >98%
- No detectable DNase or RNase activity
- Performance is tested using AMV reverse transcriptase, DNA polymerase, and *Taq* DNA polymerase
- dNTPs are assayed to ensure the absence of contaminating dUTP
- Combination Packages include individual tubes of each dNTP
- Premixed Solutions contain equal amounts of each dNTP in a single tube

STORAGE CONDITIONS:
Store at -20°C.

Description	Concentration	Quantity	Cat. No.	Each

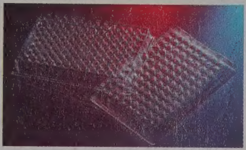
Costar* Thermowell* 96-Well PCR Plates

Ultrathin polypropylene or polycarbonate for fast, consistent heat transfer



07-200-613

Polypropylene Plates

- ▸ Fit a variety of heat blocks
- ▸ Sealable with 8-cap strips or sealing mat
- ▸ Autoclavable
- ▸ Robotic-friendly with wide skirt for bar code compatibility

Polycarbonate Plates

- ▸ Low protein-binding surface prevents loss of sample
- ▸ For oil-free operation, use polyethylene or aluminum sealing tape in conjunction with heated-lid cyclers; also accommodate silicone reusable sealing mat
- ▸ Withstand temperatures to 135°C without warping
- ▸ Various well shapes fit popular thermal cyclers
- ▸ Surface of DNA-BIND* plate allows covalent attachment of ssDNA at 5' and 3' end
- ▸ Nonsterile

CERTIFICATIONS:

Polypropylene plates are certified DNase- and RNase-free.

ACCESSORIES

Costar* Thermowell* Plate Cap Strips and Sealing Tape

Eight-Cap Strips

- For 96-well polypropylene Thermowell plates
- Made from thin-wall polypropylene
- Certified DNase- and RNase-free
- Autoclavable at 121°C (250°F)
- Supplied nonsterile

Clear Polyethylene Sealing Tapes

- For polycarbonate plates only
- Supplied nonsterile
- Allows sample viewing and is thermally stable up to 100°C (212°F)

Description	Mfr. No.	Cat. No.	Case of
Eight-cap Strips	6556	**07-200-639**	300/54.32
Polyethylene Sealing Tape	6524	**07-200-542**	100/49.85

Costar* Aluminum Sealing Tape

- Prevents sample evaporation
- Pierceable for access to reaction mix
- Removes easily without tearing

For Use with	Mfr. No.	Cat. No.	Case of 100
96-well Plates	6570	**07-200-684**	54.80
384-well Plates	6569	**07-200-683**	54.92

Costar* Thermowell* Plate Sealing Mat

- Fits Thermowell P (Cat. No. 07-200-541), Thermowell M (Cat. Nos. 07-200-245 and -691) and all Thermowell 96-well polypropylene plates
- Minimizes evaporation, condensation, and prevents cross-contamination
- Eliminates need for oil overlays in thermal cyclers with heated lids
- Reusable silicone rubber
- Autoclavable

Mfr. No.	Cat. No.	Pack of 1	Case of 25 Pk.
6555	**07-200-614**	5.36	92.11

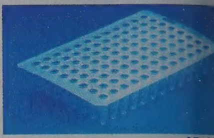
Costar* Thermowell* Plate Lids

- For Thermowell polycarbonate plates
- Designed for use as covers or as additional protection to oil overlays only; lids do not prevent evaporation
- Thermally stable up to 135°C
- Polycarbonate

Fits	Mfr. No.	Cat. No.	Case of 25
Style M	6520	**07-200-250**	82.03

Thermo Scientific* ABgene* Thermo-Fast 96-Well Unskirted Plates

Fit all 0.2mL thermal cyclers and ABI Prism* 310, 3100 and 3700 capillary sequencers



AB-0

- Highly rigid plate deck
- Clear well bottom for sample visibility
- Sealable using Thermo-Mat*, adhesive films and foils, heat seals and flat and domed cap strips
- 0.3mL maximum well volume (when used with adhesive and heat seals)
- Cut-away corner

ermo Scientific* Automated Laboratory Plate Sealer (ALPS) 300

s a wide range of plates—even those of different heights and without plate adapters†

- al for medium- to high-throughput applications
- ls approximately six plates/min.
- cesses up to 5000 plates automatically (3000 with Thermo-Seal and ar Seal Diamond 370m rolls) without user intervention
- ers flexible control mechanisms and compact dimensions for manual as l as robotic integration
- rks with most commercially available plate stackers
- d with sealing material (sold separately) the same width as a roplate (78mm) and cut to the exact length of the plate, leaving no seal rhang to interfere with robotic stacking—length of seal can be changed eave a tab for removal
- erates manually via touchscreen, by footpedal (for hands-free use), by ote start, or by RS-232 connection, which allows time and temperature ings to be monitored and adjusted, checks a remote system for l-level detection, and reports fault diagnosis settings

ERING INFORMATION:
ical requirements: 110–120V, 50/60Hz, 650w. Air pressure ements: Minimum 80psi (5.5 bar), clean and dry. Minimum airflow ement: 50L/min. at 5.5 bar; compressor output rating depends on duty cycle. L × W × H: 22⅜ × 10⅞ × 16⅛" (56.9 × 27.5 × 41.0cm). Weight: 48½ lb. (22kg).

INCLUDES:
240V to 110V power transformer (if required), plate carrier for nonskirted PCR plates, three plate carrier inserts, 2 × 1A and 2 × 5A antisurge fuses, four vacuum cups, 3m air line, 5mm Allen key, film-loading tool

Costar* 8-Well PCR Tube Strips

Fit precisely in thermal cyclers for optimal heat transfer

- Strips are formed of eight 0.2mL thin-wall polypropylene tubes
- Dual connectors between each tube eliminate inadvertent breakage during sample handling
- Tested and certified to be free from DNase and RNase contamination
- Nonsterile
- Autoclavable at 121°C

ORDERING INFORMATION:

Cap strips are packaged together with tube strips.

Thermo Scientific* ABgene* 8- and 12-Strip Low-Profile Thermo-Strips*

Recommended for use with reaction volumes below 20µL

Low-profile design reduces 'dead space' between cycler heated lid and sample, eliminating condensation on tube side, preventing reduction in PCR volume, and increasing reaction efficiency.

AB-0771

- Suitable for 0.2mL thermal cycler blocks
- 0.15mL maximum tube capacity when capped
- Labeled A-H end tabs (8-strip) and 1-12 end tabs (12-strip)
- Sealable with flat- and domed-cap strips

12-575 Series

- Virgin polypropylene
- Withstand temperatures from -20° to +121°C
- V-shaped tubes with uniformly thin walls
- Offer uniform heat transmission for maximum yield
- Compatible with most 0.2 or 0.5mL thermal cycler formats
- Available in 0.2mL strips or as 0.2 and 0.5mL individual tubes
- Dome-shaped caps for good contact with heated lids of cycler
- Flat caps for easy closure and sample labeling

CERTIFICATIONS:

Certified free from DNase and RNase.

CLEANUP

Millipore* Montage*-PCR Filter Unit

Removes primers, salts, and unincorporated dNTPs with a single, 15-minute spin

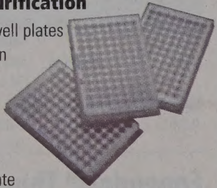
UFC7 PCR 50

- Typically recovers 90% of PCR products
- Accommodates 100µL of sample diluted with 400µL water or buffer
- Ideal for one-up or "middle throughput" (10 or more) sample preparation before sequencing or cloning

Cat. No.	Pack of
UFC7 PCR 50	50/104.00
UFC7 PC2 50	250/468.00

Millipore* MultiScreen* PCR$_{\mu 96}$, PCR$_{96}$, and PCR$_{384}$ Filter Plates

Fully automatable PCR product purification



MSNU 030 Series

- Nonsterile, clear polystyrene 96- and 384-well plates
- Size-exclusion proprietary membranes retain DNA products at the surface
- Complete (vacuum-based protocols) in 10 to 12 minutes without centrifugation, binding, or eluting
- Suitable with 96- or 384-tip liquid handlers capable of pipetting ≤25µL/sec. or with plate shakers that have a 0.12" orbit at 1100rpm
- Working well volume, 10 to 300µL; nonrecoverable volume, <2µL
- High-throughput format meets SBS (Society of Biomolecular Screening) standard
- High-purity PCR product is ready for microarray spotting, sequencing, and cloning

Description	Volume Range	Cat. No.	Price
MultiScreen PCR$_{\mu 96}$ Filter Plates	Up to 150µL/well	**LSKM PCR 10**	Pk. of 10/423.00

5 PRIME* GelElute DNA Extraction Kit

For batch purification of DNA fragments from agarose gels and solutions

NEW

- Provides convenient extraction of DNA from 40 bp to 50kb
- Suitable for use with both agarose and polyacrylamide gels
- Free of sodium iodide—no interference with downstream applications
- No DNA shearing
- Maximum binding capacity: 5µg DNA per 10µL GelElute Suspension

FP230040

APPLICATIONS:

Restriction digestion, Labeling, Ligation, PCR

INCLUDES:

Kits include GelElute DNA Extraction Suspension, Buffer GX1 with pH indicator, Buffer GE concentrate

Description	Quantity	Cat. No.	Each
GelElute DNA Extraction Kit	150 preps	**FP2300400**	103.58
GelElute DNA Extraction Kit	500 preps	**FP2300410**	239.34
GelElute DNA Extraction Suspension	1.5mL	**FP2300420**	81.41

omega* Wizard* PCR Preps DNA Purification System

in-based system purifies double-stranded PCR-amplified DNA using 5-minute batch column purification method

- covers 70–90% of DNA fragments from low-melting agarose gels and –99% of products from PCR reactions
- es not bind fragments smaller than 200 bp, so primers and primer-ners are removed from the reaction
- tes DNA from the DNA Purification Resin in water or TE buffer, free of ts or macro molecular contaminants
- commended for DNA fragments between 200 and 3200 bp
- n easily process multiple PCR Preps at one time with the Vac-Man* oratory Vacuum Manifold (Cat. No. PR-A7231)

UDES:

rd SV Purification Resin, Direct Purification Buffer, Wizard columns, 3cc syringe barrels

PR-A7170

Quantity	Cat. No.	Each
50 preps	**PR-A7170**	80.40
250 preps	**PR-A2180**	343.43

U.S. Patent 5,075,430.

U.S. Patents 4,966,964; 5,019,556; and 5,266,687; Australian Patents 616881 and 641261 and other pending and issued patents, which claim vectors encoding a portion of human placental ribonuclease inhibitor, are exclusively licensed to Promega Corporation.

---

omega* Wizard* SV Gel and PCR Cleanup System

fies DNA from agarose gels or PCR reactions in as little as 15 minutes

- brane-based system purifies DNA fragments from standard or nelt agarose gels in either Tris acetate (TAE) or Tris borate (TBE). Also es products directly from PCR reactions, removing excess nucleotides rimers.
- covers up to 95% of fragments or amplification products in as little as uL elution volume
- table for spin or vacuum purification formats; no phenol extraction or anol precipitation required
- ted to ensure performance of purified products in automated rescent sequencing to at least 700 bp with 78% accuracy

UDES:

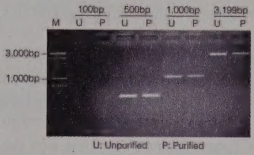
rd SV Minicolumns, collection tubes, membrane binding solution, rane wash solution, nuclease-free water

REQUIRED ACCESSORIES:

Vacuum protocol requires vacuum adapters (PR-A1331, sold separately).

STORAGE CONDITIONS:

Store at room temperature.



Gel analysis of PCR products before and after gel extraction using the Wizard SV Gel and PCR Cleanup System (PR-A9281)

Quantity	Cat. No.	Each
50 preps	**PR-A9281**	74.20
250 preps	**PR-A9282**	340.75

Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.

---

pendorf* PCR Clean Microcentrifuge Tubes

ose from Safe-Lock or Flex-Tube* styles—both are ideal for DNA sample prep prior to PCR

- ypropylene; rated to 25,000xG
- e-Lock tubes feature a patented (U.S. Pat. 4,713,219) lid-lock that ses securely
- -Tube tubes are easy to open and close
- h volume graduations and etched marking surfaces
- tified free from human DNA, DNase, RNase and PCR inhibitors
- nufactured under cleanroom conditions

PENETROMETERS

Koehler* Microprocessor-Based Digital Penetrometer

Microprocessor-based digital penetrometer tests the consistency of lubricating greases, petroleum waxes, bitumens, pastes, creams, food products, and other solid to semi-solid materials

User-friendly Operation

- Separate keypad controls for each parameter
- Choice of programmable or full manual operation using coarse and fine push-button controls
- Can also be programmed with four sample surface height presets, automatically timed penetration measurements and test intervals, and a curing or temperature stabilization period for delayed penetrator release
- Memory stores selected parameters for automatic use in subsequent tests until changed by user
- Built-in circuit senses sample surface for automatic placement when testing electronically conductive samples
- Audible signal and visual error messages
- Test results can be communicated to a printer or computer via a built-in RS-232 interface
- Optional Software Package provides additional features—see 14-210-36, below

Other Features

- Built-in magnifier and illuminator arms
- Large digital display located on head of unit displays all functions, countdown of penetration and delay intervals, and test results
- Detachable machined base with large platform accommodates many sizes of sample containers or constant temperature cylinders

INCLUDES:

47.5g standard plunger; 50g and 100g weights; rechargeable, built-in battery pack or AC operation

COMPLIANCE:

Conforms to all ASTM*, IP, ISO 9001, and related specifications

Penetrometer

22-172-592

Description	Cat. No.	Mfr. No.	Eac
Digital Penetrometer	**22-172-592**	**K95500**	6948.0

SPECIFICATIONS

Penetration Range	0 to 62.0mm (0 to 620 penetration scale) in 1⁄10mm scale reported in user-defined 1⁄10mm or 1⁄100mm increments
Penetration Interval	5-second default or operator variable from 0.1 to 9999.9 seconds (in 0.1-second increments)
Electrical Reqts.	115V 50/60Hz
Overall Dimensions (L × W × H)	12½ × 14 × 18" (31.7 × 35.6 × 45.7cm)
Net Weight	21 lb. (9.5kg)

Koehler* Penetrometer Software Package

Windows*-based software automatically downloads full test parameters and final results on each penetration test

- Determines averages, standard deviation, and ASTM* test repeatability
- Automatic real-time data acquisition via RS-232

INCLUDES:

Installation CD and cables

y approved ISE Methods

iods provide simpler, more economical and faster measurement

Orion
Thermo
ORION

In March of 2007, the EPA released the Methods Update† Final Rule, which approved four new Ion Selective Electrode (ISE) methods for analysis in wastewater and for NPDES permitting. The newly approved EPA methods are:

Parameter	Methodology	Approved Method(s)
Chloride	Ion Selective Electrode	ASTM* D512-89 (1999)
Cyanide	Ion Selective Electrode	SM 4500-CN-F; ASTM D2036-98 A
Sulfide	Ion Selective Electrode	SM 4500-S2-G; ASTM D4658-03 (1996)
Nitrate	Ion Selective Electrode	SM 4500-NO3-D

nd Measurement

tive Electrode (ISE)
e been popular for many
iods and applications are
ng developed.

lective. The most widely
glass-membrane pH
ech Note discusses
pes of ISEs.

the indicator electrode—
electrode are placed in
onnected to a pH/ion
a potentiometric cell.

At equilibrium, the meter measures the potential difference between the ISE and the reference electrode. This potential is proportional to the activity of the ion of interest, and the relationship is described by the Nernst equation:

$$E = E^0 \pm 2.3\ (RT/nF)\ (\log A)$$

where E is the measured electrode potential; E^0 is the standard potential of the system; R is the gas constant; T is the temperature in °K; n is the number of electrons involved in the reaction; F is Faraday's constant; and A is the activity of the ion being measured.

Activity [A] is not the same as concentration. The activity of an ion is strongly influenced by the total ionic strength of the solution. When ISE measurements are made, a determination in concentration units is usually desired. This is done by adding an Ionic Strength Adjuster (ISA) to samples and standards. When ionic strength is held constant, the Nernst Equation reduces to:

$$E = E^0 \pm 2.3\ (RT/nF)\ (\log C)$$

where C is the concentration of the ion of interest. This form of the Nernst equation states that the electrode potential varies directly with the log of the concentration, in a straight-line manner. The slope of the line is equal to the value of:

$$2.3\ (RT/nF)$$

The table below gives theoretical slope values at 25°C:

Species	Slope (mV/decade)
Monovalent cation	+59.16
Monovalent anion	–59.16
Divalent cation	+29.58
Divalent anion	–29.58

The equation is as follows:

$$S = E^0 \pm 2.3\ (RT/nF)$$

where S is the electrode's slope.

The Nernst equation thus reduces to:

$$E = E^0 \pm S\ (\log A)$$

Thermo Scientific* Orion* ISEs are designed to provide you with optimum performance and reliability.

Analysis by ISE methods with a pH/ISE meter quickly displays results in concentration units at a cost of a few cents per test. The ISE methods are adaptable to either lab or field, and turbidity and color do not affect the measurement.

No one knows ISEs like Orion.

Trust the name that developed ISE technology to provide you with electrode options, quality standards and solutions, and experienced application notes. The new methods detailed above join the list of Thermo Scientific Orion ISE EPA-approved methods for Ammonia, Chlorine, and Fluoride—methods that provide a simpler, more economical and faster measurement.

lus Excel Models dedicated to Conductivity and Dissolved Oxygen Measurements

sher Scientific* accumet* Excel 30 onductivity Meter

- Conductivity, Resistivity, Salinity tests
- Accepts two-cell and four-cell probes
- Windows* CE driven—color touchscreen
- Three-year warranty
- See page 510, Conductivity Section

XL30

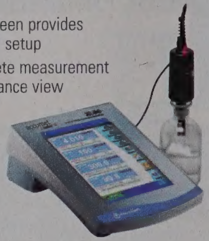
Fisher Scientific* accumet Excel 40 DO/BOD Plus Meter

- DO/BOD/OUR/SOUR tests
- Salinity/pressure compensation
- Windows CE driven—color touchscreen
- Three-year warranty
- See page 1235, Oxygen Analysis Section

XL40

Fisher Scientific* accumet* Excel XL60 pH/mV/Temperature/DO/ISE/Conductivity Meter

A complete electrochemistry lab in one instrument, with unrivaled usability and connectivity



- Windows CE*-driven, full-color touchscreen provides unmatched ease of use in operation and setup
- Switchable numeric display with complete measurement data or graphic display mode for at-a-glance view of measured data over time
- User prompts and context-specific HELP screens easily guide user through operation
- Extensive setup screens allow you to customize the meter precisely to your needs

Top-of-the-line, research-grade meter

- Measures and displays four parameters simultaneously
- DO mode calculates 5-day BOD testing, OUR, and SOUR
- Conductivity mode accepts 2-cell and 4-cell probes
- ISE mode offers direct and indirect measurements
- pH mode accepts standard or Fisher Scientific accuFet* nonglass electrodes

XL60 gives you two pH/mV/ISE inputs, 2- or 4-cell conductivity input, plus dissolved oxygen input

- Advanced circuitry and shielding prevent crosstalk and other interference
- 1000-datapoint memory storage, unprecedented connectivity to printer, computer and LANs
- Password security protects your data from accidental deletion

Full-function pH and mV capabilities

- Extended pH range: -2 to +20pH
- Resolution to 0.001pH
- Calibration at up to 6 points for exceptional accuracy

ISE measurements are easy and versatile

- Ion name is displayed right on the screen—you'll never have the wrong curve
- Automatically runs direct or addition/subtraction methods
- Screen prompts allow easy volume/concentration entry, providing concentration data without tedious paper calculations

Dissolved Oxygen mode features extra flexibility

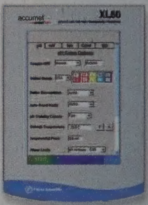
- Optional self-stirring BOD probe and on-screen prompts make BOD, SOUR, and OUR methods easy
- Easy to use for simple dissolved oxygen measurements from 0-60 mg/L, 0 to 600% saturation
- Temperature, salinity, and pressure corrections are calculated automatically

Measure Conductivity, Salinity, or Resistivity

- Selectable temperature coefficients, cell constants, and display units ensure accurate readings throughout a broad range of samples
- Measure conductivity from 0 to 5 x 10^5 µS/cm, salinity from 0 to 90ppt, resistivity from 3ohms·cm to 100megohm·cm

Extensive GLP capabilities

- Customizable printer/computer output
- 1000-reading datalog capability
- Print Setup lets you print exactly what you want, when you want
- Displays time in 12- or 24-hour format, date in U.S. or international format
- USB port lets you connect keyboard, mouse, or trackball for meter control, or connect printer or PC for data output
- RS-232 serial port lets you connect to PCs or printers without USB, or frees computer USB port while the meter is in use
- Ethernet allows unmatched LAN connectivity plus software upgrades



ORDERING INFORMATION:

- Durable ABS plastic housing resists dust and chemicals
- Dimensions: 9¼L × 6½W × 3½"H (23.5 × 16.5 × 9cm)
- Net weight: 2¾ lb. (1.2kg)

Choice of packaging options:

- **Meter Kit/pH-DO** package includes meter, Fisher Scientific accuCap* combination pH electrode (13-620-130), self-stirring BOD probe (13-620-SSP), ATC probe (13-620-19), electrode support arm and bracket, 110V/220V power supply and operation manual.
- **Meter Kit/pH** package includes meter, Fisher Scientific accuCap combination pH electrode (13-620-130), ATC probe (13-620-19), electrode support arm and bracket, 110V/220V power supply and operation manual.
- **Meter Only** package includes meter, electrode support arm and bracket, 110V/220V power supply and operation manual.

Note: Each package is also available with Certificate of Traceability to NIST* Standards.

WARRANTY:

Three-year warranty: Model XL60 is warranted to the end user to be free from defects in materials and workmanship under normal use for a period of three years. Call your Fisher Scientific Customer Service Representative for full details.

Fisher Scientific* accumet* Excel XL50 pH/mV/ Temperature/ISE/Conductivity Meter

Multiparameter meter with research-grade capabilities, unrivalled usability and connectivity

- Windows CE*-driven, full-color touchscreen provides unmatched ease of use in operation and setup
- Switchable numeric display with complete measurement data or graphic display mode for at-a-glance view of measured data over time
- User prompts and context-specific HELP screens easily guide user through operation
- Extensive setup screens allow you to customize the meter precisely to your needs

Three-channel measurement and display for fast and flexible research-grade analyses

- Conductivity mode accepts two-cell and four-cell probes
- Automatic temperature correction: ATC probe in two channels
- ISE mode offers direct and indirect measurements
- pH mode accepts standard or Fisher Scientific accuFet* nonglass electrodes
- Provides two pH/mV/ISE inputs, two ATC inputs, an input for the Fisher Scientific accuFet nonglass electrode, plus inputs for two- and four-cell conductivity probes
- Advanced circuitry and shielding prevent crosstalk and other interference
- Password security protects your data from accidental deletion

Direct and indirect ISE measurements

- Three-channel capability: no need to recalibrate when switching from ISE to pH testing
- Displays name of ion of interest on the measurement screen: you'll never have the wrong ISE curve
- Incremental known and analyte addition and subtraction methods are almost foolproof
- Meter prompts you through the method steps, allows easy entry of volumes and concentrations, calculates sample concentration automatically

Measure Conductivity, Salinity, or Resistivity.

- Measures conductivity from 0 to 5 × 10^5µS/cm, resistivity from 3ohms·cm to 100megohms·cm, salinity from 0 to 90ppt
- Selectable temperature coefficients, cell constants, and display units ensure accurate readings over a broad sample range

Full-function pH and mV capabilities

- Extended pH range: -2 to +20pH

l channel measurement and display for fast and flexible earch-grade analyses

tomatic temperature correction: ATC probe in each channel

E mode offers direct and indirect measurements

l mode accepts standard or Fisher Scientific accuFet* nonglass electrodes

ovides two pH/mV/ISE inputs, two ATC inputs, plus an input for the Fisher ientific accuFet nonglass electrode

lvanced circuitry and shielding prevent crosstalk and other interference

ssword security to protect data from deletion

l channel capability

need to recalibrate when switching from ISE to pH testing

splays name of ion of interest on the measurement screen: you'll never ve the wrong ISE curve

cremental known and analyte addition and subtraction methods are most foolproof

eter prompts you through the method steps, allows easy entry of volumes d concentrations, calculates sample concentration automatically

-function pH and mV capabilities

tended pH range: -2 to +20pH

solution to 0.001pH

libration at up to six points for exceptional accuracy of ±0.002pH

ensive GLP capabilities

stomizable printer/computer output

talog capability: 1000 readings

nt Setup lets you print exactly what you want, when you want

splays time in 12- or 24-hour format, date in U.S. or international format

B port lets you connect keyboard, mouse, or trackball for meter control, connect printer or PC for data output

-232 serial port lets you connect to PCs or printers without USB, or frees mputer USB port while meter is in use

ernet allows unmatched LAN connectivity plus software upgrades

ERING INFORMATION:

rable ABS plastic housing resists dust and chemicals

mensions: 9¼L × 6½W × 3½"H (23.5 × 16.5 × 9cm)

t weight: 2¾ lb. (1.2kg)

UDES:

eter Kit/pH package includes meter, Fisher Scientific accuCap* mbination pH electrode (13-620-130), ATC probe (13-620-19), electrode pport arm and bracket, 110/220V power supplies and operation manual

eter Only package includes meter, electrode support arm and bracket, 0/220V power supply and operation manual

: Each package is also available with Certificate of Traceability to * Standards.

Package	Electrode(s)	Cat. No.	Each
Meter Only	None	**13-636-XL25A**	1780.25
Meter Only with NIST-Traceable Certificate	None	**13-636-XL25AC**	1892.75
Meter Kit/pH	Fisher Scientific accuCap 13-620-130; ATC Probe 13-620-19	**13-636-XL25**	2029.18
Meter Kit/pH with NIST-Traceable Certificate	Fisher Scientific accuCap 13-620-130; ATC Probe 13-620-19	**13-636-XL25C**	2141.68

SPECIFICATIONS

Model	**XL25**
Modes	pH, mV, Concentration, Temperature
Display	640 × 480 pixel STN Color LCD; 4½W × 6"H (11 × 15cm). Measurement Characters: ¾"H (1.9cm). Other Data: ¼"H (0.6cm)
Keypad/Controls	Touchscreen and External Keypad
Menus	Microsoft Windows CE* pull-down menu options; extensive Help screens.
Remote Access	Parameters remotely controllable and monitorable via Windows CE Remote Application Interface.
Connectivity	Ethernet port connectivity to LAN. USB Host/Device 1.1 connectivity to printer, PC, bar code scanner, mouse, keypad etc.
Data Memory	Internal: 1000 Data points. External: USB storage device connectivity, SDCARD Memory Interface ver 1.0, RS-232 connectivity.
Data Output	On Stable; via timer; Manual
Special Features	User upgradable software (Flash ROM via Ethernet). Powerup self test; error messages; alarm, real-time clock/calendar.
pH Mode	
Range/Resolution	-2.000 to +20.000pH/0.1, 0.01, 0.001pH; auto lock
Relative Accuracy	±0.002pH + 1 least significant digit
Buffer Recognition	Manual or Automatic: U.S., Euro, NIST or Custom.
Calibration Points	1 to 6
FET Electrode Input	Yes
mV Mode	
Range/Resolution	0 to ±2000mV (absolute or relative)/0.1mV
Relative Accuracy	±0.2mV + 1 least significant digit
Temperature Mode	
Range/Resolution	-10.0° to +110.0°C (14° to 230°F)/0.1°C
Relative Accuracy	±0.2°C
Compensation	Automatic or Manual
Ion Mode (Concentration)	
Range/Resolution	1×10^{-6} to 9.99×10^{10}/0.1, 0.01, 0.001
Relative Accuracy	±0.17n% (where n = the number of electrons exchanged in the electrode reaction process)
Calibration Points	5
Incremental Methods	Known addition, analyte addition, known subtraction, analyte subtraction
Inputs	2 BNC/pin, 2 ATC, 1 DIN (FET)
Outputs	USB Host/Device, Bidirectional RS-232, Ethernet, SDCARD
Electrical Requirements	110V/220V 50/60Hz

Fisher Scientific* accumet* Excel XL20 pH/mV/Temperature/Conductivity/ Resistivity Meter

Unrivaled usability and connectivity:

- Windows CE*-driven, full-color touchscreen provides unmatched ease of use in operation and setup
- Switchable numeric display with complete measurement data or graphic display mode for at-a-glance view of measured data over time
- User prompts and context-specific HELP screens easily guide user through operation
- Extensive setup screens allow you to customize the meter precisely to your needs

Dual channel measurement and display for fast and flexible research-grade analyses

- Automatic temperature correction: ATC probe in each channel
- Accepts two- and four-cell conductivity probes
- Built-in replatinizing circuit
- Provides inputs for two- and four-cell conductivity probe, pH/mV electrode, ATC probe, plus an input for the Fisher Scientific accuFet* nonglass electrode
- Advanced circuitry and shielding prevent crosstalk and other interference
- Password security to protect data from deletion

Versatile Conductivity Mode

- Measure conductivity from 0 to 5×10^5µS/cm, resistivity from 3ohms·cm to 100megohms·cm, salinity from 0 to 60ppt
- Selectable temperature coefficients, cell constants and display units ensure accurate readings throughout a broad range of samples
- Accepts simple two-cell probes or versatile four-cell probes for greater linearity over a wide range
- Use k=1 cells for general purpose, 0.1 cells for high purity water, or 10 for brines or other concentrated solutions

Full-function pH and mV capabilities

- Extended pH range: -2 to +20pH
- Adjustable resolution to 0.001pH
- Reads to 0.1mV for accurate titrations and ORP readings, too
- Calibration at up to six points for exceptional accuracy of ±0.002pH

Extensive GLP capabilities

- Customizable printer/computer output
- 1000-reading datalog capability
- Print Setup lets you print exactly what you want, when you want
- Displays time in 12- or 24-hour format, date in U.S. or international format
- USB port lets you connect keyboard, mouse, or trackball for meter control, or connect printer or PC for data output
- RS-232 serial port lets you connect to PCs or printers without USB, or frees computer USB port while meter is in use
- Ethernet allows unmatched LAN connectivity plus software upgrades

ORDERING INFORMATION:

Durable ABS plastic housing resists dust and chemicals. Dimensions: 9¼ × 6½W × 3½"H (23.5 × 16.5 × 9cm). Net weight 2¾ lb. (1.2kg).

INCLUDES:

Choice of packaging options:

- **Meter Kit/pH** package includes meter, Fisher Scientific accuCap* Combination pH electrode (13-620-130), ATC probe (13-602-19), electrode support arm and bracket, 110/220V power supplies and operation manual
- **Meter Only** package includes meter, electrode support arm and bracket, 110/220V power supply and operation manual

Note: Each package is also available with Certificate of Traceability to NIST* Standards.

WARRANTY:

Three-year warranty. Model XL20 is warranted to the end user to be free from defects in materials and workmanship under normal use for a period of three years. Call your Fisher Scientific Customer Service Representative for full details.

Fisher Scientific* accumet* AB15+ Basic and BioBasic pH/mV/°C Meters

Compact, affordable pH/mV meters

Intuitive operation and improved user interface

- Large LCD guides user with plain-language prompts and error messages
- Display indicators keep you apprised of menu choice, measuring units, buffers standardized (in pH mode), and temperature
- No cryptic icons to learn: prompts and status/error messages are displayed in plain language
- Store up to 100 datapoints in nonvolatile memory
- Selectable resolution to 0.1, 0.01 or 0.001pH
- Five-button, soft-key input simplifies data entry
- Internal diagnostics
- Automatic recognition of 15 buffers and five-point calibration
- BNC and reference pin inputs, input for Fisher Scientific accuFet* Electrode, ATC probe input, plus bidirectional RS-232 port

ORDERING INFORMATION:

Dimensions: 7½L × 5½W × 3¼"H (19 × 14 × 8cm). Net weight: 1⅞ lb. (0.8kg).

INCLUDES:

Meter Only package includes meter, power supply, electrode support (13-637-671), and operation manual.

Meter Kit package includes items above plus an Fisher Scientific accumet liquid-filled, glass body single-junction combination pH Ag/AgCl Electrode (13-620-285) and separate ATC probe (13-620-19).

BioBasic Meter Kit package for the life science lab includes meter, power supply, manual, electrode support and Fisher Scientific accuTupH* rugged bulb, liquid-filled, glass body double-junction combination pH Combination Electrode (13-620-183) and separate ATC probe (13-620-19).

NOTE:

Each package is also available with a Certificate of Traceability to NIST* Standards.

WARRANTY:

Three-year warranty. Model AB15+ is warranted to the end user to be free from defects in materials and workmanship under normal use for a period of three years. Call your Fisher Scientific Customer Service Representative for full details.

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Thermo Scientific* Orion* 5-Star pH/ISE/ORP/DO/Conductivity Benchtop Meter

Multiparameter measurements in one compact unit

13-642-058

Highly versatile, competitively priced, multi-channel, multi-display meter is easy to set up and use while delivering exceptional, long-life performance for demanding R&D and QA/QC applications.

- Easy to use three-button function
- Bright LCD display with ready indication
- Convenient built-in Quick-Start Guide
- Stores up to 10 methods with password protection
- BNC pH, ORP and ISE connectors and mini DIN locking DO and conductivity probe connectors
- Automatic or manual pH calibration with one to five calibration points; auto-buffer-recognition of NIST/US and DIN buffers
- Uses polarographic DO probe
- Automatic or manual temperature compensation
- Manual ISE calibration with 1 to 5 calibration points
- Point-to-point ISE calibration, high and low concentration range; automatic blank correction
- Automatic barometric pressure compensation
- Auto-read/hold function
- Star Navigator 21 software for Windows* provides 21 CFR Part 11, GLP IQ/OQ documentation; see p.1301 for details
- Advanced self-tests on meter operation, self-diagnostics
- 200 point datalogger, downloadable to printer or computer via RS232 connection; optional USB interface

INCLUDES:

Meter Only package includes meter, power supply, Star Navigator 21 software, instructions.

Meter Kit includes meter; Thermo Scientific Ross* Ultra* pH Electrode; Epoxy ATC probe with 3.5m cable; conductivity cell with 1.5m cable; conductivity/TDS standard 1413µS/cm, 5 x 60mL; electrode storage solution, 475mL; DO Probe with 3m cable; overflow funnel with stirbox; Probe Service Kit; DO calibration sleeve; power supply; Star Navigator 21 software, instructions.

COMPLIANCE:

21 CFR Part 11 Compliant.

Thermo Scientific* Orion* 4-Star pH/ISE Benchtop Meter

Reliable measurement of pH and ionic concentrations for quality control and general analysis applications.

13-642-055

Features dual channels and dual display. Easy to set up and use, provides reliable measurements for water testing applications.

- Displays pH or ISE reading and temperature measurements
- Simultaneously accepts ISFET (Ion Selective Field Effect Transistor) electrodes
- Automatic or manual pH calibration with one to five calibration points
- Manual ISE calibration with one to five calibration points; point-to-point ISE calibration, high and low concentration range; automatic blank correction
- Easy to use three-button function
- Bright LCD display with ready indication
- Convenient built-in Quick-Start Guide
- Full complement of GLP-related features
- Stores up to 10 password-protected methods, including setup parameters and calibrations; download additional methods and software updates via the Web
- 200 point datalogger, downloadable to printer or computer via an optional RS-232 or USB interface accessory
- SMART STABILITY* and SMART AVERAGING* functions automatically optimize accuracy, precision and response time
- IP-54 dustproof and splashproof

LOOKING FOR THERMO SCIENTIFIC* ORION* 5-STAR APPLICATION KITS?

Application Kits include meter, solutions, all necessary accessories plus Technical Notes for each procedure, such as Conductivity of Water USP 645. For more information,

Visit www.fishersci.com and search for Orion Application kits

Thermo Scientific* Orion* Star Navigator 21* Software

Complete software for 21 CFR Part 11 compliance

Data collection software allows users to uphold FDA guidelines and to effectively operate to varying specification requirements world-wide. Provides significant savings in time and productivity associated with data management.

13-645-127 (meter and computer not included)

User friendly Windows* interface

- Easy to install and operate
- Complete control from your computer
- Quick operation of custom Star Series methods
- Convenient report templates

Electronic records and signatures

- Enables paperless record system
- Framework for compliance reporting
- Tools for 21 CFR Part 11 compliance
- Saves time and money in the approval process

Convenient, thorough documentation

- Unique user name and password provided by operating system for each user
- Account lockout after predetermined number of unsuccessful login attempts
- Automatic password protected screensavers
- Complex password capabilities
- Audit Trail records important events; lists user, date, time, severity of event, application, description and details
- All changes are recorded with a digital signature; users must provide reasons for changes
- Data Security: data cannot be removed or altered in an uncontrolled manner; database can only be accessed with proper tools and user rights; data integrity is verified each time data is accessed

ORDERING INFORMATION:

For use with the Thermo Scientific Orion 3, 4 and 5-Star electrochemistry meters; compatible with Windows XP* operating system.

Packaged as a standalone accessory product; also included in:

- 5-Star Benchtop Meter packages
- 5-Star Benchtop Meter Wastewater Sulfide Application Kit (13-643-022)
- 5-Star Benchtop Meter Wastewater Conductivity USP 645 Application Kit (13-643-060)
- 4-Star Benchtop Meter pH of Tablets Application Kit (13-643-062)
- 4-Star Benchtop Meter pH of Capsules Application Kit (13-643-063)
- 4-Star Benchtop Meter pH of Ointments Application Kit (13-643-064)

INCLUDES:

Thermo Scientific* Orion* 4-Star pH/Conductivity Benchtop Meter

Dual channel, dual display pH/conductivity meter for reliable, accurate measurements in soil and water analysis applications

- Displays pH or conductivity reading and temperature measurements simultaneously
- Provides accurate pH,conductivity, resistivity, salinity, TDS and temperature measurements
- Accepts both four-electrode and two-electrode cells
- Automatic or manual pH calibration with one to five calibration points
- Auto-buffer-recognition of DIN and NIST/US buffers
- Automatic or manual temperature compensation
- Easy to use three-button function
- Bright LCD display with ready indication
- Convenient built-in Quick-Start Guide
- Meets all U.S. Pharmacopeia (USP) requirements
- Full complement of GLP-related features
- Stores up to 10 password protected methods, including setup parameters and calibrations; download additional methods and software updates via the Web
- 200 point datalogger, downloadable to printer or computer via an optional RS-232 or USB interface accessory
- SMART STABILITY* and SMART AVERAGING* functions automatically optimize accuracy, precision and response time
- IP-54 dustproof and splashproof
- BNC pH electrode and Mini-DIN locking conductivity probe connectors
- Advanced self-tests on meter operation, self-diagnostics
- Universal power adapter for worldwide operation
- Recognizes NIST, US and manual buffers

INCLUDES:

Meter Only option includes meter and instruction manual.

Meter Kit option includes meter; Thermo Scientific Triode* pH/ATC electrode; 475mL each of pH 4.01, 7.00 and 10.01 buffers and pH Electrode Storage Solution; conductivity cell and 1.5m cable; conductivity/TDS standard 1413µS/cm, 5 x 60mL; benchtop electrode stand; instruction manual.

WARRANTY:

Three-year replacement

COMPLIANCE:

CE, CSA, UL and FCC Class A limits approved

Model	4-Star pH/Conductivity Benchtop Meter
pH Mode	
Range	-2.000 to +19.999pH or 0 to 14pH in aqueous solutions
Resolution	0.1/0.01/0.001pH
Relative Accuracy	±0.002pH
Conductivity Mode	
Range	0.000 to 3000mS/cm, auto resolution, cell constant depende
Resistivity	0.0001 to 100megohms/cm
Salinity	0.01 to 80.0ppt NaCl equivalent
TDS	0 to 19,999
Reference Temperature	15°, 20° or 25°(default), autoranging
Cell Constant	0.001 to 199.9
Temperature Mode	
Range	-5° to +105°C
Resolution	0.1°C up to 99.9°C, 1.0 over 99.9°C
Relative Accuracy	±0.1°, ±1 digit
Compensation	-5° to +105°C
Meter Only	
Mfr. No.	1117000
Cat. No.	**13-642-057**
Each	1187.00

Thermo Scientific* Orion* 4-Star pH/DO Benchtop Meter

Measure pH and DO in a compact, ergonomic package

13-642-056

- Easy to set up and use, provides reliable measurements for water testing applications.
- Dual channel measurement and simultaneous display of pH and dissolved oxygen
- Displays pH, DO and temperature measurements simultaneously; display DO concentration or percent DO Saturation
- Allows meter and probe calibration to a Winkler Titration for correlation of direct Biological Oxygen Demand (BOD) readings to Winkler methods
- Easy-to-use three-button function
- Bright LCD display with ready indication
- Convenient built-in Quick-Start Guide
- Enhanced stability indicators, salinity correction and automatic barometric pressure compensation
- Full complement of GLP-related features
- Stores up to 10 password protected methods, including setup parameters and calibrations; download additional methods and software updates via the Web
- 200 point datalogger, downloadable to printer or computer via an optiona RS-232 or USB interface accessory
- SMART STABILITY* and SMART AVERAGING* functions automatically optimize accuracy, precision and response time
- IP-54 dustproof and splashproof
- Mini-DIN locking probe connectors
- Advanced self-tests on meter operation, self-diagnostics
- Universal power adapter for worldwide operation
- Selectable one to five point pH calibration to ensure accuracy
- Automatic or manual pH calibration at one to five points
- Recognizes NIST*, US and manual buffers

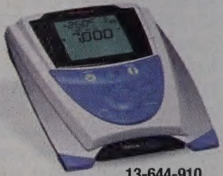
Thermo Scientific* Orion* 2-Star Benchtop pH Meter

Value priced pH Meter for general purpose applications

Economical, accurate measurement of pH, mV and temperature



13-644-910

- Displays pH or mV and temperature measurements simultaneously, plus calibration points and electrode condition
- Bright LCD display with ready indicator
- Simple push button keypad
- Convenient built-in Quick-Start Guide pulls out for rapid setup and sample measurement
- Automatic or manual calibration with 1 to 3 calibration points
- Auto buffer recognition, including pH 1.68, 6.86, 9.18 and 12.46 buffers; USA and EURO buffers; custom buffers
- Electrode condition indicator monitors electrode slope
- Smart Stability and Smart Averaging for faster response time, better accuracy and precision without user intervention
- GLP electrode verification
- Stores up to 50 datapoints, including calibrations, with time/date stamp
- IP54 dustproof and splashproof
- Mini-DIN locking probe connectors
- Advanced self-tests on meter operation, self-diagnostics
- Universal power adapter for worldwide operation

INCLUDES:

Meter Only option includes meter and instruction manual.

Meter Kit option includes meter, electrode(s) specified in ordering table, pH 4.01, 7.00 and 10.01 buffers, universal AC power supply, instruction manual.

Meter/Electrode Package option includes meter, electrode(s) specified in ordering table, universal AC power supply, instruction manual.

Meter/Electrode,Stand Package option includes meter, electrode(s) specified in ordering table, benchtop electrode stand, universal AC power supply, instruction manual.

hermo Scientific* Orion* Microprocessor pH/mV/ISE Benchtop Meters

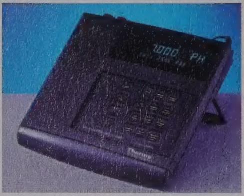
irect ISE and pH readout
imultaneous data/temperature display
tability display
electable resolution
bsolute and relative mV modes
djustable isopotential point
H autocalibration; calibrate at up to five pH/ISE points
uto blank correction
Manual or automatic temperature compensation with optional probe
elf-diagnostics and user prompts
hoice of printout options at ready, at timed intervals, or on demand
Memory storage for calibration and data points
wo-way RS-232-C port
lodel 920Aplus* permits incremental ISE techniques; gives tempera-ure-corrected ISE readout and electrode identification; has calibration dit function for changing one or more calibration points without doing a omplete calibration
lodels 920Aplus and 720Aplus provide dual inputs, store two sets f calibration in memory; have recorder and KF outputs and numeric eypad; have autobuffer recognition and 25-point datalogging including me/date of last calibration; have vacuum fluorescent display

INCLUDES:

- **Meter Only** option has meter, electrode holder, instruction manual, cord and plug for required voltage
- **Meter/Electrode** option includes meter, Thermo Scientific Ross* Ultra combination electrode, instruction manual, cord and plug

WARRANTY:

Three-year warranty.



13-641-224

Key to Special Features:

B. Two-color VF display; 17-character prompt line
C. Custom liquid crystal display
D. Dual inputs for simultaneous measurements
E. Incremental ISE analyses
F. Autoblank correction with 3 or more ISE calibration points
G. O_2/BOD measurement with optional probe (13-299-85)
I. Autocalibrates with 5 pH buffers
J. Timer; high/low alarm limits
K. Internal logging of 25 data points
L. User-friendly prompts and self-diagnostic programming
M. Three print options: when electrode signal is stable; at selected timer interval; on demand
N. Works with optional Model 900A printer, available separately

Thermo Scientific* Orion* LogR* Benchtop pH/pX Meters

Patented digital circuitry provides ATC with or without an ATC probe

Multiparameter meters with large LED provide easy, accurate measurement and are easy to operate.

13-642-553

- Use your favorite BNC-plug electrodes—without an ATC probe—and get temperature-compensated pH measurements
- Use the Thermo Scientific PerpHecT* Combination Electrode included with the meter for enhanced pH and ATC accuracy
- Use a separate ATC probe and the electrode of your choice when temperature accuracy to 0.1°C is critical
- Rugged tactile keypads
- Autocalibration
- Autorecognition of pH buffers 4.01, 7.00 and 10.01 (or three user-defined values)
- Selectable pH resolution
- Automatic slope calculation and display
- Include Thermo Scientific PerpHecT Combination Electrode, power supply and manual
- **Model 320** adds mV mode, enhanced eight-button keypad, and simultaneous display of pH or mV and °C
- **Models 350 and 370** offer simultaneous display of pH, absolute or relative mV, and °C; GLPcheck* electrode data printout; and Ross Resolution* to 0.001pH units
- **Model 370** features Concentration mode for ISE measurements that allows two-point calibration and direct measurement in a variety of concentration units

ORDERING INFORMATION:

All meters accept PerpHecT electrodes, and most other pH electrodes with BNC plug or adapter. All meters also accept separate ATC probe for critical temperature measurement.

ıkton* pH 1100 and pH 2100 Benchtop Meters

th many customizable features and a user-friendly interface

ıly versatile benchtop meters ideal for many applications including er quality, soil, and geological testing, food processing, and metal ing—suitable for most ASTM* and EPA test procedures. Measure and mV plus temperature in °C or °F; pH 2100 also features ion centration mode with direct display of values in ppm, ppt, %, or er units.

- acklit, alphanumeric two-line and 20-character LCD display
- electable manual or automatic temperature compensation
- gh/low setpoint alarms signal when readings are outside preset limits
- noose up to five pH calibration points, or select from four standard uffer sets (USA, NIST*, Bf1, Bf2)
- larm signals when meter recalibration is needed—user-defined interval nsures regularly scheduled maintenance for ISO and GLP compliance
- utomatically calculate and display electrode slope/offset and check ectrode quality
- dvanced setup mode allows customization of meter parameters
- tore up to 100 readings either manually or on programmable intervals
- uilt-in real-time clock with timer and alarm stamps stored data with ate and time—suitable for GLP documentation
- leters can also store data of last calibration with date and time
- S-232 output enables meters to send data to printer or PC on e-programmed intervals, when reading is stable, or manually ith a push of a button
- cluded Windows*-compatible software allows user to download ata in a format easy for import into spreadsheet programs
- ompact housing maximizes valuable benchtop space
- etachable electrode holder can be mounted to either side of meter r left- or right-handed use
- andy instruction card in storage compartment underneath meter
- lanufactured using ISO 9001: 2000-certified processes

ter includes CSA-/UL-listed 110V 50Hz and 220V 60Hz adapters, ware, and instructions.

ter Kit includes includes CSA-/UL-listed 110V 50Hz and 220V 60Hz pters, software, instructions, double-junction glass-bodied pH electrode h 3′ (0.9m) long cable (13-620-324), and stainless-steel temperature be with 3′ (0.9m) long cable (15-500-003).

Oakton pH 1100/2100 Series

Model	pH 1100	pH 2100
pH Mode		
Range	-1.000 to +14.000pH	-1.000 to +14.000pH
Resolution	±0.001 or ±0.01pH (selectable)	±0.001 or ±0.01pH (selectable)
Accuracy	±0.002 or ±0.01pH	±0.002 or ±0.01pH
Calibration Points	Up to five customizable calibration points, or USA (1.68, 4.01, 7.00, 10.01, 12.45), NIST (1.68, 4.01, 6.86, 9.18, 12.45), Bf1 (1.68, 4.01, 7.01, 9.18, 12.45), or Bf2 (1.68, 4.01, 6.86, 10.01, 12.45) standard buffer sets	
mV Mode		
Range	0 to ±1850 to +1850	0 to ±1850 to +1850
Resolution	0.1mV	0.1mV
Accuracy	±0.2mV	±0.2mV
Calibration	Offset up to ±150mV	Offset up to ±150mV
Temperature		
Range	-5° to +105°C (23 to 221°F)	-5° to +105°C (23 to 221°F)
Resolution	0.1°C/°F	0.1°C/°F
Accuracy	±0.5°C/±0.9°F	±0.5°C/±0.9°F
Compensation	Manual or Automatic	Manual or Automatic
Ion Concentration Mode		
Range	----	0.000 to 19,999
Resolution	----	0.001, 0.01, 0.1, or 1 (depending on resolution mode)
Accuracy	----	±0.5% of reading
Calibration	----	Up to five customizable calibration points
Meter Only		
Cat. No.	**13-620-320**	**13-620-322**
Each	639.83	931.39
Meter Kit		
Cat. No.	**13-620-321**	**13-620-323**
Each	747.63	1076.42

ACCESSORIES

Replacement Electrodes and Probes

Description	Cat. No.	Each
Glass Body, Ag/AgCl reference, Double Junction,	**13-620-324**	120.35
Stainless-Steel ATC Probe	**15-500-003**	38.19
All-in-One Single-Junction Combination pH Electrode/Temperature Probe	**15-500-016**	77.53
All-in-One Double-Junction Combination pH Electrode/Temperature Probe	**13-620-327**	115.14

pH Calibration Buffer Bottles

pH Value	Ingredients	Cat. No.	Each
1.68	Potassium chloride and hydrochloric acid	**13-300-155**	8.50
4.01	Potassium acid phthalate	**13-300-154**	8.50
7.00	Monobasic potassium phosphate and disodium phosphate	**13-300-153**	8.50
10.00	Sodium carbonate and sodium bicarbonate	**13-300-152**	8.50
12.45	Potassium chloride and sodium hydroxide	**13-300-151**	9.81

Oakton* 510 Series Benchtop Meters

Choose basic pH meter or more advanced models for biological applications, mV, ion concentration, conductivity, and TDS measurements

15-500-013

15-500-019

15-500-017

- Dual display of measured parameter with temperature reading
- Selectable automatic or manual temperature compensation (0° to 100°C)
- Hold function, ready indicator, and error messages

pH 510 Basic Benchtop Meter

- An economical benchtop pH meter
- Easy to use, ideal for students and technicians who need to take quick, accurate readings
- Three-point pH calibration
- Recorder output for hard copies of readings

pH 510 Meter and pH 510 BIO Meter

- Set up in minutes
- Memory stores up to 50 pH or mV readings with temperature (°C)
- Three-point pH calibration
- Built-in electrode holder arm holds probe firmly in place
- Recorder output for hard copies of readings

Ion 510 Meter

- Measure pH, mV, ion concentration and °C, with direct readout of ion concentration
- LCD display shows pH or mV and °C reading, or ppm and mV in ion mode
- Store up to 50 readings in memory
- Preprogrammed ion calibration points; three-point pH calibration
- Recorder output for hard copies of readings
- Built-in electrode holder arm holds probe firmly in place

pH/CON 510 Meter

- An economical way to measure pH, mV, conductivity, and TDS in the lab
- Adjustable temperature coefficient and conductivity-to-TDS conversion factor
- Advanced set-up mode lets you view calibration points, pH electrode slope and offset, and conductivity/TDS effective cell constants
- Five-point calibration for pH and either conductivity or TDS
- Built-in electrode holder arm holds probe firmly in place

INCLUDES:

pH 510 Basic Meter: Gel-filled epoxy-body electrode, 100V/220V adapters, and instructions. Electrode support arm and temperature probe not included; purchase separately. (Fisherbrand* Electrode Holder 22-286439 . ATC probe 15-500-003.)

pH 510 Meter: pH 510 meter includes All-in-One combination pH electrode/temperature probe, 100V/220V adapters, and instructions.

pH 510 BIO meter includes temperature probe and Calomel single-junction epoxy-body pH electrode—ideal for aplications with organics, proteins, metals, and Tris buffers. Also includes 100V/220V adapters, and instructions.

Ion 510 Meter: All-in-One combination pH electrode/temperature probe, 100V/220V adapters, and instructions. Ion selective electrode not included; accepts most ion selective electrodes with BNC connector (order separately).

pH/CON 510 Meter: All-in-One combination pH electrode/temperature probe; conductivity/TDS/temperature probe, K = 1.0; 100V/220V adapters; and instructions.

ORDERING INFORMATION:

Electrical Requirements (all meters): 9V, 0.5A with AC adapter (included); 110V 60Hz or 220V 50Hz. Dimensions (all meters): 9 × 7 × 2" (23 × 18 × 6cm).

Mettler Toledo* Seven Series Multifunction pH Meters

Innovative design and impressive functionality

Covering pH/ISFET, conductivity, ion concentration, ORP/mV, and temperature measurements, the Seven series includes both basic instruments (SevenEasy series) and advanced instruments (SevenMulti series).

- Expansion units for pH/mV/ORP, conductivity, ISFET, and ISE measurement provide flexibility
- Add a second channel without buying a new meter
- Turn a pH meter into a conductivity meter or vice versa
- Add USB and TTL communication micro modules to enable connection of peripherals such as sample changers and bar code readers, as well as integration into computer networks
- Each model is offered as a basic package and as a "kit," i.e., including sensors and accessories (K catalog number). See below and on facing page for for complete product and ordering information for models, expansion units and micro modules.

WARRANTY:
Two-year warranty on meters; one-year warranty on probes

SevenMulti Series Meters

Upgradable modular systems

Modular design enhances instrument versatility. Optional plug-in expansion modules can be changed quickly and easily, providing expanded functionality with a single meter. Units automatically recognize the module in use. Each meter includes at least one module.

- Back-lit display and text menus with online Help
- Simultaneous pH or mV and temperature display; relative mV available
- Limited ISE function to determine ion concentration
- Up to nine-point pH calibration with auto buffer recognition; five selectable sets, plus user-definable set of up to nine buffers
- Graphic display of calibration curve and last 25 readings with high/low limits; calibration reminder
- Selectable resolution: 0.001/0.01/0.1pH
- Manual -30° to +130°C or automatic -5° to +130°C temperature compensation with Pt1000 or 30k NTC thermistor
- Temperature reference is selectable at 20°C or 25°C with choice of linear, nonlinear, or no correction
- Acquire results using auto-read, manual-read, or timed-read functions
- Built-in self-diagnostics
- Stores up to 10 calibrations, 10 methods, 1000 measurement/temperature data pairs; includes clock to save last 1000 data pairs with date and time; power loss memory protection
- Secure data management; PIN code password protection prevents unauthorized deletion of calibration/measurement data; full GLP menu
- BNC, Mini-DIN, conductivity, 2mm pin, ATC, and power inputs
- Bidirectional RS-232 interface and analog output (pH/mV and temperature); RS-232 interface supports bar code reader for sample or sensor ID
- Optional USB and TTL communication modules; TTL output can be sent to sample changer or titrator (one-channel measurement only)

INCLUDES:
Basic Instrument Package includes meter, select modules, electrode support arm, power supply, and instructions. Kit adds in-use cover, electrode, and calibration sachets. See ordering chart on following page for specific components.

SevenMulti Model S40 High Performance pH/mV/°C Meter

- Standard modes: pH, temperature, mV

Standard features: all features as described above.

Optional modular upgrades: ion, conductivity, ISFET, or dual-channel pH.

01-913-80

SevenMulti S47 Dual-Channel pH/Conductivity Meter

- Standard modes: pH, temperature, mV, conductivity

Standard features: Dual-channel model with all features of model S40, plus conductivity and custom buffer capability. USP-compliant.

Optional modular upgrade: ion, ISFET

01-913-80

SevenMulti Model S80 High Performance ISE/pH/mV/ORP Meter

- Dual-channel model for direct ISE/pH readout

01-913-81

SevenEasy Model S20 Basic pH/mV/°C Meter

Offers precise electrochemical measuring technology, innovative design, and easy operation.

- Large LCD displays pH, mV and temperature values, the buffers being used, and the electrode condition
- Offers two- and three-point calibration with automatic buffer recognition
- Selectable automatic (ATC) or manual temperature compensation
- Automatic endpoint feature improves reproducibility of readings
- Built-in self-diagnostics ensure proper operation
- RS-232 data transfer port included
- Battery operation available (four "AA" batteries required)

Model S20 (basic instrument package) includes meter, electrode support arm, power supply, and instruction book. **Model S20K Kit** adds InLab* 413 electrode and buffer sachets. See ordering chart on following page.

sher Scientific* accumet* AP85 Portable Waterproof pH/Conductivity Meter

rable, waterproof, dustproof—ideal for rough field applications

asures pH, conductivity and TDS temperature. Switches between conductivity and TDS with the ss of a button. Dual-display LCD ws all parameters with tempera- ; recalls previous calibration ts too.

dvanced set-up mode for istomizing meter parameters

electable automatic endpoint eezes reading immediately ter stabilization

OLD button freezes reading

elf-diagnostic: meter indicates hen it is ready to operate; ror messages alert operator problems

anufacturered using ISO 9001: 00- certified processes

13-636-AP85A

verful pH Mode

ecalls pH electrode slope and offset

as five-point calibration with automatic buffer recognition

nductivity and TDS Modes

ecalls and customizes effective cell constants for each range

utoranging for conductivity across five ranges

utoranging for TDS across six ranges

ve-point calibration for ±1% full-scale accuracy

xible Temperature Mode

elect temperature in °C or °F

et coefficient from 0 to 10% for accurate compensation in most any solution

anual or automatic temperature compensation

LUDES:

ter/Probe package includes meter, 1.0cm^{-1} conductivity/temperature stic-bodied probe with 3' (0.9m) long cable (13-620-AP54), All-in-One temperature probe (13-620-AP55), four "AAA" batteries, and instruction ual.

ter Kit package includes meter, 1.0cm^{-1} conductivity/temperature stic-bodied probe with 3' (0.9m) long cable (13-620-AP54), All-in-One temperature probe (13-620-AP55), 4.00 and 7.00pH buffer solutions, 3µS conductivity calibration solution, sample bottle, four "AAA" eries, instruction manual, and hard plastic carrying case.

RRANTY:

ee-year warranty: AP85 is warranted to the end user to be free from ects in materials and workmanship under normal use for a period of e years. Call your Fisher Scientific Customer Service Representative for details.

Model	**AP85**
pH Mode	
Range	-2.00 to +16.00pH
Resolution	0.01pH
Relative Accuracy	±0.01pH
Calibration	5 points (pH 1.68, 4.01, 7.00, 10.00, 12.45)
Conductivity Mode	
Range	0.00 to 19.99µS, 0.0 to 199.9µS, 0 to 1999µS, 0.00 to 19.99mS, 0.0 to 199.9mS
Resolution	0.01µS, 0.1µS, 1µS, 0.01mS, 0.1mS
Relative Accuracy	±1% of FS
Cell Constant	1.0cm^{-1}
TDS Mode	
Range	0.00 to 9.99ppm, 10.0 to 99.9ppm, 100 to 999ppm, 1.00 to 9.99ppt, 10.0 to 99.9ppt, 100 to 200ppt
Resolution	0.01ppm, 0.1ppm, 1ppm, 0.01ppt, 0.1ppt, 1ppt
Relative Accuracy	±1% of FS
Temperature Mode	
Range	0.0° to 100.0°C; 32° to 212°F
Resolution	0.1°C; 0.1°F
Relative Accuracy	±0.5°C; ±0.5°F
Compensation	Manual or Automatic
Display	Backlit dual-display LCD
Special Features	Displays calibration points, slope/effective cell constant, auto endpoint; auto shutoff, Hold function, Ready indicator, error messages
Dimensions (L x W x H)	7½ × 3¾ × 2¼" (19 × 9.5 × 5.7cm)

Replacement Probes for AP85 Meter

Description	Cat. No.	Each
Conductivity/TDS/Temperature Probe	**13-620-AP54**	246.36
pH/ATC Probe	**13-620-AP55**	184.00

Fisher Scientific* accumet* Waterproof AP84 Portable pH/Dissolved Oxygen Meter

Wide-range pH and rapid DO readings

13-636-AP84

13-636-AP84A

Model	AP84
DO Mode	
Range	0.00 to 20.00mg/L (ppm); 0.0 to 200.0% saturation
Resolution	0.01mg/L (ppm); 0.1% saturation
Relative Accuracy	±1.5% full scale
Calibration	One or two points
pH Mode	
Range	-2.00 to +16.00pH
Resolution	0.01pH
Relative Accuracy	±0.01pH
Calibration	5 points (pH 1.68, 4.01, 7.00, 10.00, 12.45)
Temperature Mode	
Range	0.0° to 50.0°C; 32° to 122°F
Resolution	0.1°C; 0.1°F
Relative Accuracy	±0.3°C; ±0.5°F
Compensation	Automatic; 0° to 50°C; 32° to 122°F
Display	Backlit dual display LCD
Special Features	Displays Probe diagnostics; auto shutoff; Hold function; Ready indicator
Dimensions (L x W x H)	7½ × 3¾ × 2¼" (19 × 9.5 × 5.7cm)
Shipping Weight	1.4 lb. (0.6kg)
Meter/Probe	
Cat. No.	**13-636-AP84A**
Each	1293.91
Meter Kit	
Cat. No.	**13-636-AP84**
Each	1417.11

Powerful pH Mode:

- Five-point pH calibration with auto-buffer recognition
- Ranges fron -2.00 to +16.00pH, ±0.01pH
- Automatic temperature compensation for DO and pH measurements

Versatile Dissolved Oxygen capabilities:

- Galvanic probe design for immediate DO measurements in mg/L (ppm) or % saturation,
- On entering salinity and pressure values, meter automatically calculates barometric pressure and salinity offset values
- Ensures high accuracy with independent 100%, zero and offset adjustment capabilities

Extra-convenient operation:

- Adjustable backlit display, ideal for taking readings in dark areas
- Displays probe diagnostics, slope, offset and mV values
- Features HOLD function, Ready indicator, and auto shutoff
- IP67 waterproof construction: floatable, washable, easy to keep clean

INCLUDES:

Meter/Probe package includes pH electrode, dissolved oxygen/temperature probe, electrolyte solution, instructions and four "AAA" batteries. **Meter Kit** package includes meter, pH electrode, DO probe, pH buffer solutions, electrolyte solution, two replacement membrane caps, 50mL each pH 4 and pH 7 standard solutions, rinse bottle and carrying case.

WARRANTY:

Three-Year Warranty. AP84 meter is warranted to the end user to be free from defects in materials and workmanship under normal use for a period of three years. Call your Fisher Scientific Customer Service Representative for full details.

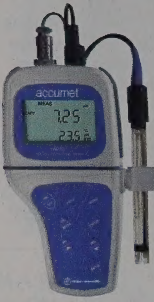
ACCESSORIES

Fisher Scientific* accumet* Replacement Probes for AP84 DO/pH Meter

Description	For	Cat. No.	Each
pH Combination Electrode	AP84	**13-620-AP56**	143.74
DO/Temperature Probe	AP84, AP74	**15-500-034**	421.72

her Scientific* accumet* Waterproof AP71 and AP72 pH/mV/ mperature Meters

anced pH meters in waterproof, dustproof housing



13-636-AP72A

- gonomic design fits comfortably in e hand
- ctrode bracket positions electrode one-handed operation
- vanced setup mode lets user stomize meter parameters and eck electrode slope and offset assure electrode accuracy
- ad pH, absolute mV or relative mV d temperature
- curacy of ±0.01pH and ±0.02mV
- anual or automatic temperature ntrol
- e-point push-button pH calibration d automatic buffer recognition 1.68, 4.01, 7.01, 10.01, 12.45)
- LD function, Ready indicator and automatic shut-off function
- anufactured using ISO 9001: 2000-certified processes

del AP71 Features

- ad pH, mV or relative mV and temperature in °C
- emory allows storage and recall of up to 16 readings with rresponding temperatures

del AP72 Adds

- panded memory for up to 50 readings
- al-time clock that stamps stored data and calibration data with te and time ·
- -point push-button pH calibration and automatic buffer recognition
- lectable buffer sets (NIST*, DIN and Standard US)
- lectable automatic endpoint freezes reading when stable
- ads temperature in °F or °C
- atures date/time stamp, expanded memory

UDES:

er Only package includes meter, batteries and instructions.

er Kit package includes meter, pH/ATC electrode, pH calibration rs, sample bottle, and hard plastic carrying case.

RRANTY:

e-Year warranty. AP71 and AP72 meters are warranted to the end to be free from defects in materials and workmanship under normal or a period of three years. Call your Fisher Scientific Customer Service esentative for full details.

Fisher Scientific* accumet* AP60 Series Portable Meters

Rugged, accurate meters can be held and operated with one hand

Small enough to fit in a shirt pocket

- Five pH calibration points
- Waterproof to IP67 standards
- Choose the AP61 for pH-only measurements, the AP62 for pH/mV or the AP63 for pH, mV, or ion applications
- Trim shape and wraparound rubberized grips make these meters comfortable to hold

Six-button soft-key entry

- Lets you scroll through menu options with ease
- pH mode features selectable resolution to 0.01, automatic recognition of five U.S. buffers and five-point calibration
- In ion mode, the AP63 lets you standardize with five of ten standard values (0.1, 0.5, 1, 2, 5, 10, 50, 100, 500, 1000)
- Automatic Temperature Ccompensation when used with an ATC probe; otherwise assumes a temperature of 25°C (77°F)
- Press AUTO to lock on stable pH measurement or toggle for continuous read
- Onscreen prompts, stable-reading indicator and electrode error message for accurate results

Waterproof to a depth of 3¼ ft. and floatable

- BNC and ATC inputs
- ABS plastic housing with sealed keypad
- LCD is 1¾W × 2½"H (4.4 × 6.4cm)
- Operate on 9V battery or with optional adapter

INCLUDES:

Meter-Only package includes meter, 9V battery and operating manual.

Meter Kit package adds Fisher Scientific accumet liquid-filled,polymer-body combination pH/ATC Ag/AgCl Electrode (13-620-AP50, below), operating manual and hard plastic Carrying Case (13-636-AP69) with fill solution and four buffer bottles.

WARRANTY:

Two-Year Warranty AP60 Series Models are warranted to the end user to be free from defects in materials and workmanship under normal use for a period of two years. Call your Fisher Scientific Customer Service Representative for full details.

Thermo Scientific* Orion* 4-Star pH/Conductivity Portable Meter

Dual channel, dual display pH/conductivity meter for reliable, accurate measurements in soil and water analysis applications

13-642-064

- Displays pH or conductivity reading and temperature measurements simultaneously
- Provides accurate pH, conductivity, resistivity, salinity, TDS and temperature measurements
- Delivers over 2000 hours of continuous operation
- Balanced comfortable handling
- Accepts both four-electrode and two-electrode cells
- Automatic or manual pH calibration with one to five calibration points
- Auto-buffer-recognition of DIN and NIST*/US buffers
- Automatic or manual temperature compensation
- Easy to use three-button function
- Bright LCD display with ready indication
- Meets all U.S. Pharmacopeia (USP) requirements
- Full complement of GLP-related features
- Stores up to 10 password protected methods, including setup parameters and calibrations; download additional methods and software updates via the Web
- 200 point datalogger, downloadable to printer or computer via an optional RS-232 or USB interface accessory
- SMART STABILITY* and SMART AVERAGING* functions automatically optimize accuracy, precision and response time
- IP67 waterproof: may be immersed for up to one hour with no water incursion
- Waterproof BNC pH electrode and Mini-DIN locking conductivity probe connectors
- Advanced self-tests on meter operation, self-diagnostics
- Recognizes NIST*, US and manual buffers

INCLUDES:

Meter Only option includes meter and instruction manual.

Meter Kit with 1.5m Cables option includes meter, low-maintenance epoxy pH/ATC Thermo Scientific Triode* with 1.5m cable (13-642-250), 10-pack each of pH 4.01, 7.00 and 10.01 buffers; conductivity cell (13-642-226) and 1.5m cable; conductivity/TDS standard 1413µS/cm, 5 × 60mL, instruction manual.

Meter Kit with 3m cables option includes meter, low-maintenance epoxy pH/ATC Thermo Scientific Triode* (13-642-222) with 3m cable, 10-pack each of pH 4.01, 7.00 and 10.01 buffers; conductivity cell (13-642-226) and 3m cable; conductivity/TDS standard 1413µS/cm, 5 × 60mL, instruction manual.

LOOKING FOR THERMO SCIENTIFIC* ORION* 4-STAR APPLICATION KITS?

Application Kits (including meter and all necessary accessories and solutions) available with Thermo Scientific Orion 4-Star pH Meters include:

- Cyanide in Drinking Water
- pH of Wastewater
- ORP of Wastewater
- Sulfide in Wastewater

Check our Web site for details.

Visit www.fishersci.com and search for Orion Application Kits

SEE ALSO...

Thermo Scientific* Orion* 4-Star pH/ Dissolved Oxygen Meters listed in this catalog in the Oxygen Analysis section.

ermo Scientific* Orion* 3-Star Portable pH Meter

nds up to the most demanding field applications

13-642-059

- aterproof, battery-operated pH eter delivers over 2000 hours of ntinuous operation
- splays pH and temperature easurements simultaneously
- ight LCD display with ready dication
- lanced comfortable handling
- tomatic or manual calibration th 1 to 5 calibration points
- ito-Buffer Recognition (ABR) of N and NIST*/US buffers
- fers a full complement of P-related features
- ores up to 10 password protected methods, including setup parameters d calibrations; download additional methods and software updates via e Web
- 0 point datalogger, downloadable to printer or computer via an optional -232 or USB interface accessory
- ART STABILITY* and SMART AVERAGING* functions automatically timize accuracy, precision and response time
- 7 waterproof: may be immersed for up to one hour with no water ursion
- C connector
- vanced self-tests on meter operation, self-diagnostics

LUDES:

er Only option includes meter and instruction manual.

er Kit option includes meter, low maintenance epoxy pH/ATC mo Scientific Triode* (13-642-250), beaker, electrode storage solution ack of pH 4.01, 7.00 and 10.01 buffers, instruction manual.

er Kit with No-Cal Electrode option includes meter, No-Cal pH rode (13-644-939), electrode storage solution 10-pack of pH 4.01, 7.00 10.01 buffers, hard case, instruction manual.

Oakton* pH 110 Advanced Portable Meter

Easily track and review large volumes of pH, mV and temperature data

13-620-239

- Dual pH (or mV) and °C/°F temperature display
- Advanced setup mode can display previous pH, mV, and temperature calibration data
- Push-button five-point pH calibration and offset mV calibration
- Ready indicator alerts when reading has stabilized
- Recalls electrode slope, electrode offset, and 100 sets of stored readings
- Selectable manual or automatic temperature compensation
- Downloads readings to computer or printer via RS-232 connection
- Supplied software creates PC data files; data can be printed continuously
- Ergonomic design; meter fits easily in the hand
- Electrode bracket positions electrode for one-handed operation

ORDERING INFORMATION:

AC adapter sold separately. Accessories include replacement pH/ATC electrode (15-500-016), temperature probe (15-500-003); and double-junction electrode (13-620-327).

INCLUDES:

Meter Only includes built-in stand, instructions and four "AAA" batteries.

Meter Kit includes meter, pH electrode, temperature probe, 20 solution pouches, sample bottle, batteries, instructions and carrying case

Oakton* pH 11 Standard Portable Meter

13-620-235

Ergonomically designed, portable meter measures pH and mV with high resolution and accuracy; also reads in millivolts for taking ORP measurements. All meter functions are accessible from the water-resistant membrane keypad.

- Large dual-display LCD shows measurement plus temperature in °C
- Five-point push-button calibration with auto-buffer recognition and selectable manual or automatic temperature compensation
- Choose from USA or NIST* buffer
- Press HOLD button to freeze measurements
- Ready indicator shows when reading has stabilized
- Diagnostic error messages alert operator of problems
- Meter can store and recall up to 50 data sets
- With a built-in stand and electrode bracket to position electrodes for one-handed use
- pH 11 accepts standard pH or ORP electrodes with a BNC connector
- Manufactured using ISO 9001:2000-certified processes

ORDERING INFORMATION:

Dimensions: 7½L × 3½W × 1¾"H (19.1 × 8.9 × 4.4cm). Electrical requirements: four "AAA" batteries or 115V 60Hz AC adapter (13-300-126 sold separately).

INCLUDES:

Meter Only includes instructions and four "AAA" batteries.

Meter Kit includes meter, single-junction epoxy-bodied pH/ATC electrode with 3′ (0.9m) long cable (15-500-016), 20 solution pouches (five each of p 4.00, 7.00, 10.00, and rinse water), sample bottle, four "AAA" batteries, instructions, and carrying case.

Oakton* Waterproof Big Display pHTestr* Models 10, 20 and 30

Pocket pH meters with large display make taking readings easy

- Microprocessor-based, with accurate readings to 0.1 or 0.01pH
- Replaceable electrode (13-200-222) lets you use Testr body many times over, save money
- Unique double junction design and extra reference gel volume for significantly longer electrode life, especially in harsh applications
- Automatic temperature compensation
- Push-button three-point calibration
- Auto buffer recognition: selectable buffer sets
- Hold function; auto-off; error messages
- Waterproof, dustproof and floatable; certifiable to IP67 standards

YSI* Professional Plus Multiparameter Meter

Versatile handheld instrument for pH, DO, conductivity and ISE measurements

Compact, handheld instrument provides true versatility in a multiparameter platform. Simply choose the cable length and probes to suit your application; then determine what you want the instrument to display.

15-177-450

- Two mV inputs for combinations of Ammonium, Chloride, Nitrate, pH and ORP
- Choice of lab or field grade pH and ORP probes
- IP67 waterproof rating, even with battery cover off
- Choice of 1, 4, 10, 20, and 30m (3, 13, 32, 65 and 98') detachable cables (available separately; see p. 1328)
- Automatic buffer recognition
- Automatic temperature, salinity, and barometric compensation for dissolved oxygen measurements
- Continuous battery level display
- Backlit display and keypad
- User-upgradeable software via USB communications
- Graphic display with detailed messages and instructions
- 2000 data-set memory with additional GLP event logging
- Interval or single event logging capability
- Data Manager desktop software to manage all your data

ORDERING INFORMATION:

Dimensions: 2¼L × 3¼W × 8½"H (2.3 × 8.3 × 21.6cm). Waterproof case, IP-67 rated with shock resistant rubber overmold. Weight with batteries, 1.05 lb. (475g). Power: two alkaline "C" cells; 300-600 hours depending on usage and parameters. Cables available: 1, 4, 10, 20, 30m (3, 13.1, 32.8, 65.6, 98.4') lengths; longer lengths on DO/temp only

INCLUDES:

Meter, two alkaline "C"-cells, instructions, communications saddle, USB cable and YSI Data Manager* software for Windows*

REQUIRED ACCESSORIES:

pH, ORP, DO, or ISE probe and cable; conductivity probe/cable combination (see p. 1328)

WARRANTY:

Three years for meter; two years for cables; six months for Ammonium, Nitrate, and Chloride probes; one year for all other probes.

YSI* Pro1020 Dual pH or ORP/DO Portable Meter

Measure with pH or ORP and DO probes simultaneously

15-177-455

Dual inputs: one for pH or ORP electrodes, one for dissolved oxygen probe

- IP67 waterproof rating, even with battery cover off
- Choice of 1, 4, 10, 20, and 30m (3, 13, 32, 65 and 98') detachable cables (available separately; see p. 1328)
- Automatic buffer recognition
- Automatic temperature compensation
- Continuously displays battery level
- Backlit display and glowing keypad
- User-upgradable software via USB
- Measurement with YSI pH or ORP electrodes
- DO measurement with choice of probes; DO Temperature compensation range of –5° to +45°C
- 50 dataset memory

ORDERING INFORMATION:

Dimensions: 8½L × 3¼W × 2¼"H (21.6 × 8.3 × 2.3cm). Net weight, with batteries: 1 lb. 1 oz. (475g). Additional YSI Professional models may be found in the Conductivity and Oxygen Analysis sections.

INCLUDES:

Meter, two alkaline "C" cells, instructions

REQUIRED ACCESSORIES:

pH or ORP probe; DO probe; and separate cables (order separately; see p. 1328)

WARRANTY:

Three years for meter; two years for cables; one year for probes

ttler Toledo* SevenGo* pH and SevenGo pro* pH/Ion Meters

t-in data memory and automatic functions for outstanding performance

ble meters measure pH, mV and erature; SevenGo pro Model SG8 ion concentration. Designed for comfortable right- or left-handed ation. Choice of two models, four aging options. Both models are rproof and dustproof to IP-67 lard, feature large display of sured value and settings, and rotatable electrode clip that ts left or right for single-handed ation.

01-910-514

01-910-518

nGo SG2

- 67 pH meter with 0 to 14pH ge for routine use
- tinuous indication of electrode l battery status
- omatic endpoint and buffer ognition
- omatic temperature compensation
- a memory for 30 GLP data points
- ee-point calibration with predefined or user-defined buffers

nGo pro SG8

- 67 pH/Ion meter with expanded range for the highest demands
- ple ion concentration determination
- mented or linear calibration as desired
- e-point calibration with choice of six predefined and one user-defined fer set
- ord date, time, time interval
- itive menu operation using softkeys
- P memory for 200 datapoints
- tact-free infrared communication with notebook, printer or PC
- /OFF backlit display

ERING INFORMATION:

aging Options

clude wrist strap, four "AA" batteries, operating instructions, ertificate, and declaration of conformity:

- ter Only, without electrode
- ter with electrode and 1.2m cable
- ter with electrode, 1.2m cable, and field case with electrode arm and er
- ter with electrode, 1.2m cable, field case with electode arm and cover, l ErGo* field assistant that:
  - onverts SevenGo meter into mobile benchtop instrument or lets you vear it around your neck for hands-free operation on the go
  - an be used for a variety of functions
  - tores pH electrodes wet for immediate use without watering caps

FEATURES TO CONSIDER

Body style—Consider both material and dimensional specifications. Glass body electrodes provide greater chemical and temp
resistance. Plastic body electrodes are often less expensive and resist breakage. A variety of lengths and diameters are av
take measurements in beakers, test tubes or even microwell plates.

Fill type—Simple fill formulations like KCl are appropriate for general purpose applications. Advanced fo
like Thermo Scientific* ROSS* and ROSS Ultra* provide the highest level of stability, performance at
temperatures, and resistance to contamination. Both Thermo Scientific ROSS and Thermo Scient
Ultra are mercury free. Liquid filled electrodes offer faster response; gel-filled electrodes offe
maintenance but are slower and cannot be serviced. On refillable electrodes, features like
Scientific accumet* fill-hole cover can make maintenance easy.

Junction design—Pin-type junctions provide consistent electrolyte flow in sim
applications. Flushable junctions like the Thermo Scientific Orion* Sure-Flow* (
Scientific accu•pHast* provide fast response, are virtually clog-free, and easy
Open designs such as the accuCap* capillary reference can maximize samp
reference contact.

Temperature compensation—Accurate results are highly tempera
dent. Temperature elements can be built into an electrode for conven
may result in slower response. Separate temperature probes are oft
with meters. The Thermo Scientific Orion LogR* and perpHect* se
unique system that determines temperature from changes in the

Successful pH measurement begins with selecting the right pH electrode. Many applications present challenges that can produce measurement errors and premature electrode failure. Be sure to consider the following information when making your selection.

BEFORE YOU BUY pH ELECTRODES

MATCHING ELECTRODES AND APPLICATI

Clean Water Applications—While simple, single-junction
will often work well, problems can arise in very low ionic s
solutions; consider high flow electrodes like a Thermo S
Orion Sure-Flow.

Dirty Water Applications—At a minimum, c
junction designs should be used. For best per

ELECTRODE CARE AND CALIBRATION

Buffer solutions—Calibration is required for compliance with EPA, ASTM*, and many other procedures. Fresh buffers are critical to ensure accurate calibration.

Electrode cleaning solutions—Many samples can clog and coat the bulb and junction of even the best designed electrode, resulting in slow response and unstable readings.

Electrode storage solutions—For accurate readings and fastest response, both the bulb and junction must be properly hydrated. To ensure your electrode is always ready for testing, be sure to keep the bulb in a storage bottle or beaker filled with storage solution.

For a full selection of Fisher Scientific accumet and Thermo Scientific Orion electrodes, see pp. 1334-1360.

ELECTRODES—pH/ORP/TITRATION

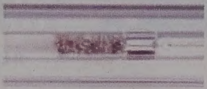
her Scientific* accuCap* Capillary Junction pH Combination Electrodes

ge junction for increased flow, minimal clogging

ter junction:

Capillary Junction

- ngle-pore capillary junction is 00 times larger than typical ramic junctions
- most impossible to clog, even in ficult samples
- creased electrolyte flow, greater ntact between sample and ference, fast and stable readings



Double Junction with diffusion barrier

ter reference design:

- uble junction design for enhanced rformance
- fusion barrier separates silver chloride reservoir from reference electrolyte
- rmits use of silver-free electrolytes, prevents silver chloride loss from mperature-induced variations
- sult: an extremely stable reference potential, providing long electrode

t accurate

- sting at German Federal Physical Technical Institute in Braunschweig termined this electrode design to be the most accurate laboratory ctrode
- e *Traceability of pH Measurement* by Petra Spitzer

er Scientific accuCap Glass Body Fluid Gel Refillable trode

- ique fluid-gel electrolyte and accuCap junction provide faster flowrate, proved contact between electrolyte and sample
- ster response time and very accurate readings
- uble-liquid-junction further extends diffusion barrier for increased ctrode life in aggressive samples
- o performs well in liquids with low ion concentration and in partly ueous samples

er Scientific accuCap Glass Body Gel-Filled Electrode

- ndard glass body and pH membrane
- id polymer-gel electrolyte offers the advantages of the accuCap tem in a maintenance-free version
- vides a more stable matrix than other gelled electrode reference tems
- es reliable results in very dirty, ion-weak or protein samples
- iable even at low pH or in presence of most organic solvents

er Scientific accuCap Plastic Body Gel-Filled Electrode

- ndard plastic body and glass pH membrane
- id polymer-gel electrolyte offers the advantages of the accuCap tem in a maintenance-free version
- vides a more stable matrix than other gelled electrode reference tems
- es reliable results in very dirty, ion-weak or protein samples
- iable even at low pH or in presence of some organic solvents eck compatibility before measuring)

Glass Body Refillable 13-620-130

Glass Body Gel-Filled 13-620-131

Fisher Scientific accuCap Glass Body Gel-Filled Spear Tip Electrode

- Glass body and pH membrane
- Rugged spear tip is ideal for soft foods
- Polymer gel electrolyte provides reliable performance with difficult samples

ELECTRODES

Fisher Scientific* accumet* Combination pH Electrodes

Fisher Scientific accu•pHast* R Variable Temperature Electrodes†

Innovative reference system prevents precipitation of solution components at reference element from 0 to 100°C. Internal electrolyte has minimal temperature coefficient.

- Electrodes are predictable, reliable, and quick to respond at any temperature
- Cycled between samples at 25° and 80°C, reach reproducible pH in 30 seconds
- Read pH in <20 seconds, correct to ±0.02pH; pH value stays constant at any temperature
- Read pH consistently at elevated temperatures, without premature loss in performance
- Choose from glass body double-junction model, or from glass and epoxy body models with Fisher Scientific accuFlow* flushable junction

accu•pHast Variable Temperature Electrodes

Patented design with dual ceramic junctions, sealed Ag/AgCl reference and special electrolyte to eliminate slow response when measuring samples at different temperatures in quick succession.

- Accurate to ±0.01pH at 25°C and ±0.05pH from –5° to +100°C
- Response time, 20 seconds or less; negligible drift
- Isolated reference element and outer KCl fill solution eliminate clogging from silver compound precipitates; no silver or mercury to contaminate samples
- Choice of standard and Fisher Scientific MicroProbe* glass or extra-long epoxy bodies

Fisher Scientific* accumet* Combination pH Electrodes, Contd.

Fisher Scientific accumet Standard-Size Glass Body Combinations

Perfect for routine pH and titration measurements in small samples, small vessels, where a separate electrode pair maybe impractical.

- Constant distance between the glass bulb and the reference junction maintains high reproducibility in nonaqueous as well as aqueous pH and titration samples
- Choice of models with Ag/AgCl or Calomel reference element

INCLUDES:
All come with removable bulb protector.

Fisher Scientific* accumet* Combination pH Electrodes, Contd.

Fisher Scientific accumet Liquid-Filled Polymer Body Combinations

- Rugged polypropylene or epoxy body—ideal for handheld use with aqueous samples
- All have porous ceramic junction
- Polypropylene body models are available with single-junction Calomel or Ag/AgCl reference; or with double-junction Ag/AgCl reference
- Epoxy body models are available with standard-size body and Calomel reference[1] or in flat-surface model with Ag/AgCl single-junction reference
- Two pH/ATC models are available with Calomel or Ag/AgCl reference

Fisher Scientific accumet Gel-Filled Polymer Body Combinations

Filled with gelled 4M KCl saturated with AgCl for low maintenance.

- Polypropylene or epoxy body
- With Ag/AgCl internal reference element, porous ceramic junction
- Standard-size models are available in single-junction or double-junction pH/ATC models
- Pencil-thin epoxy body model has ¼" dia. for narrow, thin vessels

[1] *For Mercury alert, see page 1316.*

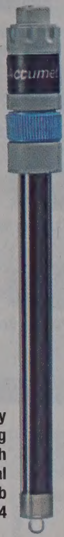
accuTupH* Cat. #13-620-187

A Glass Body pH Indicating Half Cell with Rugged Bulb 13-620-187



B Epoxy Body pH Indicating Half Cell with Universal Glass Bulb 13-620-294

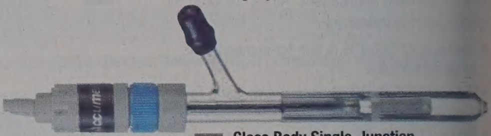
Reference Half Cells

Fisher Scientific gives you a generous choice of reference half cells.

- With Ag/AgCl or Calomel elements
- In a variety of junction types to provide a selection of flowrates—including ceramic, annular, single, double, cracked bead and sleeve junctions
- In glass bodies plus liquid-or gel-filled epoxy bodies

C Glass Body Single-Junction Ag/AgCl Reference 13-620-53

D Glass Body Double-Junction Ag/AgCl Reference 13-620-273



E Glass Body Single-Junction Side-Arm Ag/AgCl Reference 13-620-45

F Epoxy Body Annular Junction Ag/AgCl Reference 13-620-46

Fisher Scientific* accumet* Metallic Electrodes for ORP and Titrations

Fisher Scientific accumet Metallic Indicating Half Cells

Cover –5° to +100°C (23° to 212°F) range.

Platinum Indicating Model

- For ORP measurements and redox titrations
- Glass body and large area platinum element

Silver Billet Model

- For silver and halide titrations
- Extra-large silver billet area and glass body

ORDERING INFORMATION:
Dimensions: 5½"L (14cm)

REQUIRED ACCESSORIES:
13-640-150 Pin-jack Adapter for U.S. Standard inputs or 13-620-490 BNC Input Adapter for BNC inputs.

Don't leave accuracy to chance!

Instrument calibration to NIST*-traceable standard helps meet ISO, FDA, USDA, and EPA quality assurance guidelines. Have your equipment pretested and calibrated before using it in your critical processes. Testing is performed by an A2LA-accredited laboratory and includes a NIST-traceable certificate.

Service is available for temperature, humidity, pH, refractometers, and much more.

Contact your Fisher Scientific Customer Service Representative at 1-800-766-7000 for details.

Fisher Scientific* accumet* pH Combination Biotech Electrodes

13-620-2004

Accurate, reproducible result

- Ideal for fermentor pH monitoring
- Feature 0–13pH range
- Double-junction ceramic reference design prevents fouling of electrodes
- Eliminate problems with Tris buffers and sulfides
- Available in a variety of lengths to fit most fermentors ("A" lengths)
- FS-5 glass formulation provides durable, long life
- Autoclavable to 135°C
- Withstand pressures up to 150psi at 25°C

Thermo Scientific* Orion* Ross* Ultra* pH Combination Electrodes

Unique reference system provides longer life, more stability, virtually no drift, and fast results.

Ideal for any application when the use of a metallic reference electrode would contaminate the sample—measuring biological media, pharmaceuticals, foods, and more. Choose from six combination electrodes with glass or epoxy bodies and one half-cell reference electrode with a glass body.

Unique internal element system replaces Ag/AgCl or Hg_2Cl_2 internals with platinum wire and redox-couple filling solution. Double-junction reference cells have porous ceramic or glass fiber outer junction. Design provides stable potential, independent of temperature, and stable readings even when samples vary by 50°C (90°F) or more. Minimizes drift, stirring effects, clogged junctions; no need for frequent standardization so samples are analyzed faster.

Orion Ross Ultra Standard Bulb Combination 13-642-237

Thermo SCIENTIFIC
Orion
Orion Ross Ultra Rugged Bulb Combination 13-642-239

Thermo SCIENTIFIC
Orion
Orion Ross Ultra Semimicro Combination 13-642-238

81-02U Combination Electrodes

- Glass bodies; for general purpose, quality control, and research applications

81-03U Combination Electrodes

- Glass bodies; feature semimicro bulbs to fit test tubes and measure samples as small as 0.2mL
- Use in pharmaceutical, clinical, or food laboratories wherever sample size is a constraint

81-04U Combination Electrodes

- Glass bodies with rugged bulbs for tough laboratory use
- Ideal for precise quality control measurements

81-15U Combination Electrodes

- Epoxy bodies with semimicro bulbs
- Use to measure aqueous samples that are as small as 0.2mL

81-35U Combination Electrodes

- Epoxy bodies with flat surface to measure solid and semisolid soft, moist surfaces like agar plates and various foods

81-56U Combination Electrodes

- General-purpose epoxy bodies for durability and ruggedness

Specifications for Thermo Scientific Orion Ross Ultra pH/Reference Combination Electrodes

- 0 to 14pH
- 0° to 100°C (32° to 212°F) range
- Slope, 92 to 102%; isopotential point, pH 7
- When standardized in 6.86pH buffer at 25°C (77°F), accuracy is ±0.03pH for the buffer from 0° to 100°C (32° to 212°F) (using ATC); response is stable to 0.01pH within 30 seconds at 25°C (77°F) and 75°C (167°F) and stable to ±0.002pH within 15 seconds when cycling between pH 6.86 and 4.01 buffers at 25°C (77°F)
- Max. cap dia. (top): ¾" (19mm); collar dia. ⅝" (16mm); Cable length is 39⅜" (1m)

WARRANTY:
24 months

ermo Scientific* Orion* Ross* Series pH, Reference and Combination Electrodes

que internal element system replaces Ag/AgCl or Hg_2Cl_2 internals with platinum wire and redox-couple filling tion.

ence cells have double junctions. Design provides stable potential endent of temperature and stable readings even when samples oy 50°C (90°F) or more. Minimizes drift, stirring effects, clogged ons—no need for frequent standardization.

Reference Pair

ndard-size glass body electrodes for general-purpose or research use
erence cell has porous ceramic frit junction
nes with bottle of 3M KCl filling solution

bination Electrodes

ne in glass or epoxy body models
able epoxy body models have glass fiber junction; all others have ous ceramic junction

HecT* Combination Electrodes

ide excellent accuracy with PerpHecT LogR* meters
also be used with any meter having BNC inputs

Flow* Reference and Combination Electrodes

e special free-flowing junction you can clean just by pressing the cap
xy body models have removable protective sleeve to guard bulb

Choice of body styles and sizes

- All models have cap diameter of ⅝" (16mm); maximum body diameter of 7⁄16" (12mm); cable length of 39⅜" (1m)

Standard-size Models have 4¾" long (12cm) body.
Semimicro Models have 6½" long (16.5cm) body, ¼" diameter (16mm) at tip.
Spear Tip Models have 4⅜" long (11cm) or 4¾" long (12cm) body, ⅛" (5mm) to 1⁄16" (3mm) maximum tip diameter (see table for individual models).

ıermo Scientific* Orion* Standard Series pH, Reference and Combination Electrodes

Combination Electrodes

ave Ag/AgCl internals, 39⅜″ long (1m) cable, 7/16″ (12mm) maximum ɔdy diameter, ⅝″ diameter (16mm) cap

ccept as noted, all measure 0 to 14pH and 0° to 90°C (32° to 194°F)

ass Body Combination Models all have ceramic junction except ıre-Flow models

ɔoxy Body Combination Models come as refillable or gel-filled models, ith glass fiber junction

iode* types incorporate ATC probe; Series A Triode is for Series A eters, has -5° to +105°C (23° to 221°F) temperature range; PerpHecT* ode is for PerpHecT Series meters

rpHecT Combination Electrodes provide excellent accuracy with rpHecT LogR* meters; may also be used with any meter having VC inputs

ıre-Flow Combination Electrodes have free-flowing junction that cleans sily by pressing the cap; epoxy body models have removable protective ɜeve to guard bulb

ıs Body pH Electrodes

andard size for general-purpose or research use

- Measure 0 to 14pH
- 0° to 90°C (32° to 194°F) temperature range
- 39⅜″ long (1m) cable, 4¾″ long (12cm) body

Epoxy Body Reference Electrodes

- 0° to 100°C (32° to 212°F) temperature range
- Ag/AgCl internals, sleeve junction, 39⅜″ long (1m) cable, pin connector, 4 9/16″ long (11cm) body
- Double-Junction Model is useful in ISE determinations; takes a variety of fill solutions
- Single-Junction Model handles routine pH, many ISE measurements
- Reservoir Model has filling solution reservoir to eliminate frequent refilling in prolonged testing

Choice of body styles and sizes

- All models have cap diameter of ⅝″ (16mm); maximum body diameter of 7/16″ (12mm); cable length of 39⅜″ (1m)
- Standard-size Models have 4¾″ long (12cm) body
- Semimicro Models have 5½″ long (14cm) body, ¼″ diameter

Mettler Toledo* InLab* pH and Metallic Electrodes

InLab electrodes meet a wide variety of applications, from simple pH measurements in the field to stringent research protocols

Each InLab electrode is supplied with a quality certificate detailing slope, zero point, membrane resistance, and response time, while an individual serial number helps ensure that traceability requirements are met. InLab pH electrodes offer a wide range of pH measurement—0 to 14 for all electrodes listed except the special pH combination models **426** (pH 1 to 11) and **427** (pH 2 to 11). Comprehensive instructions in seven languages are provided.

pH Half-cell and Reference Electrodes

- Use the **201** half-cell pH electrode in conjunction with reference electrode **301** to measure pH in organic liquids, corrosive acids or alkalis, or general aqueous media
- Internal Argenthal* reference is complemented by a specially designed silver ion trap that prevents blockage of the diaphragm with silver salts

Basic pH Combination Electrodes

- Use the **407** electrode with portable or field pH meters for general pH measurement in aqueous media
- Features a durable polysulphone shaft and gel electrolyte for low maintenance operation
- Fixed 3.9 ft. (1.2m) lead with BNC connector is included

Standard pH Combination Electrodes

- **409** Ag/AgCl electrode is for general aqueous pH measurements or use in organic liquids or corrosive acids/alkalis
- **412** electrode with Argenthal reference and silver ion trap is for samples with high sulphide content, dairy applications or samples in which silver ion contamination would be a problem
- Both feature glass shafts and ceramic diaphragms; the **409** electrode includes a fixed 3.9 ft. (1.2m) cable with BNC connector

Standard 3-in-1 Electrodes

- Automatically correct for the effects of temperature on slope with an integrated 30kΩ temperature sensor—no need for a separate temperature probe
- Temperature sensor is housed in fast-conducting stainless steel and is positioned outside the electrode body, ensuring rapid response
- Unique symmetric design virtually eliminates differential warming of the pH and reference elements
- **410** electrode has an Argenthal reference with silver ion trap and features a multipin connector, which allows simultaneous connection to the meter of pH, reference, and temperature sensors with just one cable—and electrode release with one short twist
- **413** electrode features a maintenance-free, open-junction diaphragm and a unique polymer reference material that slowly leaks KCl, giving extremely stable values in difficult samples
- **413** also includes a fixed 3.9 ft. (1.2m) cable with BNC/cinch connector, and a PEEK (poly ether ether ketone) shaft

Special pH Combination Electrodes

For more specific applications

- **420** electrode with Teflon* fluorocarbon resin-sleeve is ideally suited for low ionic strength solutions, viscous liquids, and semi-aqueous reagents
- **421** electrode with its 7⅞" (200mm) length and ¼" diameter (6mm) is for longer reaches required to access deep vessels, flasks, or test tubes
- **423** electrode (2⅜" [60mm] length; ⅛" diameter [3mm]) is for very small sample sizes and access to microtitration plates, ampules, and NMR tubes

pH Half-Cell and Reference Electrodes: pH Half-Cell 201

Standard pH 409

Reference 301

Basic and Standard pH Combination Electrodes: Basic pH 407

- **426** electrode (pH 1 to 11) is specially suited to small samples (droplet method) and surface measurement
- **427** electrode (pH 2 to 11) is used to puncture measurement of semisolids such as foodstuffs or soil

Metallic Electrode

- Use **501** platinum redox electrode for reliable monitoring of oxidation/reduction reactions

Fluoride with TISAB Standard
ORION

In March of 2007, the EPA released the Methods Update† Final Rule, which approved four new Ion Selective Electrode (ISE) methods for analysis in wastewater and for NPDES permitting. The newly approved EPA methods are:

Parameter	Methodology	Approved Method(s)
Chloride	Ion Selective Electrode	ASTM* D512-89 (1999)
Cyanide	Ion Selective Electrode	SM 4500-CN-F; ASTM D2036-98 A
Sulfide	Ion Selective Electrode	SM 4500-S2-G; ASTM D4658-03 (1996)
Nitrate	Ion Selective Electrode	SM 4500-NO3-D

he indicator electrode—
electrode are placed in
nnected to a pH/ion
a potentiometric cell.

At equilibrium, the meter measures the potential difference between the ISE and the reference electrode. This potential is proportional to the activity of the ion of interest, and the relationship is described by the Nernst equation:

$$E = E^0 \pm 2.3\ (RT/nF)\ (\log A)$$

where E is the measured electrode potential; E^0 is the standard potential of the system; R is the gas constant; T is the temperature in °K; n is the number of electrons involved in the reaction; F is Faraday's constant; and A is the activity of the ion being measured.

Activity [A] is not the same as concentration. The activity of an ion is strongly influenced by the total ionic strength of the solution. When ISE measurements are made, a determination in concentration units is usually desired. This is done by adding an Ionic Strength Adjuster (ISA) to samples and standards. When ionic strength is held constant, the Nernst Equation reduces to:

$$E = E^0 \pm 2.3\ (RT/nF)\ (\log C)$$

where C is the concentration of the ion of interest. This form of the Nernst equation states that the electrode potential varies directly with the log of the concentration, in a straight-line manner. The slope of the line is equal to the value of:

$$2.3\ (RT/nF)$$

The table below gives theoretical slope values at 25°C:

Species	Slope (mV/decade)
Monovalent cation	+59.16
Monovalent anion	–59.16
Divalent cation	+29.58
Divalent anion	–29.58

The equation is as follows:

$$S = E^0 \pm 2.3\ (RT/nF)$$

where S is the electrode's slope.

The Nernst equation thus reduces to:

$$E = E^0 \pm S\ (\log A)$$

Thermo Scientific* Orion* ISEs are designed to provide you with optimum performance and reliability.

Analysis by ISE methods with a pH/ISE meter quickly displays results in concentration units at a cost of a few cents per test. The ISE methods are adaptable to either lab or field, and turbidity and color do not affect the measurement.

No one knows ISEs like Orion.

Trust the name that developed ISE technology to provide you with electrode options, quality standards and solutions, and experienced application notes. The new methods detailed above join the list of Thermo Scientific Orion ISE EPA-approved methods for Ammonia, Chlorine, and Fluoride—methods that provide a simpler, economical and faster measurement.

ELECTRODES—ION SELECTIVE

Fisher Scientific* accumet* Ion-Selective Electrodes

Feature continuous electrical shielding and insulation of internal elements, cable and connectors for extremely stable, reproducible readings, with a minimum of electrical noise—and with lower detection limits than many conventional ISEs. Their rapid response time lowers your cost per test. Each electrode is individually tested, serialized to meet GLP requirements, and backed by Fisher Scientific's Technical Applications staff.

Choose from the following types, described here and on pp. 1354-1360:

- Polymer Membrane ISEs
- Glass Membrane ISEs
- Gas-sensing ISEs
- Solid-state ISEs

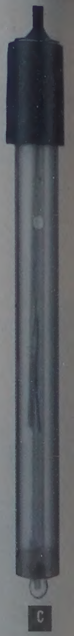
13-620-500
13-620-501



Glass Membrane Sodium Epoxy Body Combination ISEs
13-620-502
13-620-503

Polymer Membrane Combination ISEs for Calcium, Nitrate and Potassium Testing

Feature rugged epoxy bodies and refillable reference section. Sensing modules contain a liquid internal filling solution in contact with a gelled organophilic membrane impregnated with a selective ion exchanger for the ion of interest. Sensors are sealed into a durable epoxy body with built-in reference half cell. Permit fast, precise measurements in aqueous solutions over a wide range of concentrations.

Glass-Membrane ISEs for Sodium Determinations

Available in a glass body sodium indicating half cell and an epoxy body sodium combination model. Both have a specially formulated sodium-responsive glass bulb that permits direct measurement of active sodium ion concentration in a wide variety of applications. Feature low drift, fast response, high selectivity ratio, good thermal stability and wide operating range.

Gas-Sensing Combination ISEs for Ammonia and Carbon Dioxide Analysis

Feature tough, chemical-resistant body and permanently bonded membrane/cap assembly. No difficult user assembly required; preassembled and tested membrane/cap unit assures optimum membrane tension and alignment, and no-leak operation. Capable of extended use in wastewater samples and process streams. Noncrystallizing fill solution won't impede performance or cause membrane rupture. Come with three membrane caps, 50mL fill solution and three 2 oz. (59mL) bottles of standard solution. With 39" (1m) lead.

Solid-State Half-Cell ISEs for Bromide, Chloride, Fluoride and Silver/Sulfide

Feature a homogenous sensing membrane for wide application, rapid response, minimum sample retention, improved precision, and lower detection limits.

With epoxy bodies, sensing membrane with low microporosity and mirror-like finish to minimize sample retention.

Solid-State Combination ISEs for Bromide, Chloride, Copper, Fluoride, Lead and Silver/Sulfide

Feature a homogenous sensing membrane for wide application, rapid response, minimum sample retention, improved precision, and lower detection limits.

Glass bodies, excellent range and precision.

ACCESSORIES

Membrane Caps for Gas-Sensing Combination ISEs

- For Ammonia Gas-Sensing Combination ISEs 13-620-508, 13-620-509; Carbon Dioxide Gas-Sensing Combination ISEs 13-620-510, 13-620-511
- Set of three replacement membrane caps
- With O-rings

Type	Cat. No.	Each
For Ammonia Electrode 13-620-508, 13-620-509	**13-620-512**	124.90
For Carbon Dioxide Electrode 13-620-510, 13-620-511	**13-620-513**	106.04

Ammonia Calibration Standard, 1000ppm NH_3

- 500mL

Cat. No.	Each
ACCU-080-1500	37.24

Ammonia pH/Ionic Strength Adjuster, 10M NaOH

- 500mL

Cat. No.	Each
ACCU-080-2500	37.08

Filling Solution for Ammonia ISE, 0.1M NH_4Cl

- 500mL

Cat. No.	Each
ACCU-080-0500	37.24

Thermo Scientific* Orion* Ion-Selective Electrodes

Gas-Sensing Combination Electrodes

Ammonia, Carbon Dioxide, Nitrogen Oxide combination electrodes have sensing element separated from the sample by a membrane

Use screw-on caps with bonded membrane or loose membranes secured by separate cap.

- Epoxy body, 5⅞" long (15.1cm); 29½" (75cm) cable
- Measuring range: 0° to 50°C (32° to 122°F) range
- Ammonia and Carbon Dioxide types come with Standard/Pin or BNC connectors
- Nitrogen Oxide type comes with BNC connector

Solid-State Electrodes

Bromide, Cadmium, Chloride, Chlorine, Cupric, Cyanide, Fluoride, Iodide, Lead, Silver/Sulfide and Thiocyanate types have solid-state sensing membrane

- 5½" long (14cm) epoxy body; 29½" (75cm) lead
- Ionplus combination models have Sure-Flow* sleeve-junction reference
- Models with Standard connector have separate pin for reference jack
- Chlorine and Thiocyanate types have 0 to 50°C (32° to 122°F) range; all others to 80°C (176°F)

Plastic-Membrane Electrodes

Calcium, Fluoroborate, Nitrate, Nitrite, Potassium, Water Hardness types come with 5⅜" long (13.5cm) electrode body, screw-on sensing module with plastic membrane

- 29½" (75cm) cable
- Water Hardness type has 0 to 50°C (32° to 122°F) range; all others, 0 to 40°C (32° to 104°F)
- Ionplus SureFlow Combination electrodes are available in Calcium, Nitrate, Nitrite and Potassium models
- Replacement sensing modules for these electrodes, as well as Ammonium, Chloride and Perchlorate sensing modules, are available separately; may be used interchangeably in any 93 Series Electrode body. See p. 1359 for ordering information.

Ross* Glass-Membrane Electrodes

- Sodium Half-cell and Sure-Flow Combination types have sodium-sensing glass bulb, Ross internals for stability
- 29½" (75cm) cable, BNC connector
- Combination model also has Sure-Flow sleeve junction to prevent clogging

Mettler Toledo* Ion-Selective Electrodes

Ion-selective and gas-sensing electrodes allow the quick and easy determination of concentration and activity of a variety of dissolved ions and gases

Ion-selective electrodes are available in two configurations with built-in reference system or as a half cell. All are 4¾" long (120mm) and ½" (12mm) in diameter. For other ion-selective electrodes and membrane kits not listed here, contact your Fisher Scientific Customer Service Representative.

Ion-selective Half Cells

- Choice of polymer, solid-state or glass membrane for precise determination of specific ions
- Consist of a universal shaft and interchangeable ion-specific membrane module
- Membrane kit specific to ion comes with new module to mount on shaft of half cell
- All ion-selective half cells require InLab* 302 reference cell (see 01-920-101, available separately)
- All have sturdy polyoxymethylene (POM) bodies except the sodium-specific half cell that comes with glass body and membrane

Ion-selective Combination Cells

- With polymer-matrix, or solid-state membrane for precise determination of specific ions
- Come with epoxy bodies and reliable built-in driTEK* reference system
- No filling solution required

Gas-sensing Combination Electrodes

- Sturdy polyphenylsulfide (PPS GF 40) shafts with 40% glass fiber content
- Chemical-resistant PPS GF 40 withstands any known organic chemical present whose temperature is less than 392°F (200°C)
- Optimized membrane module tip is cone shaped to eliminate trapped air bubbles

InLab* 302 Reference Electrode

Ag/AgCl reference electrode for use with Mettler Toledo* pH and Ion-selective Half Cells (see 01-911-230, -231, -233, -235, -236, -238 and 01-920-48, -145)

- Glass body measures 4¾" long (120mm) and ½" (12mm) in diameter.
- Operates over a wide temperature range from 32° to 140°F (0° to 60°C)
- Movable PTFE sleeve junction
- Uses 3M* KCl solution saturated with AgCl and 3M KCl bridge electrolyte

REQUIRED ACCESSORIES:

Cable (01-911-279), sold separately

Fisher Scientific* BufferPac* Buffers

- 500mL each of color-coded pH 4.00, 7.00, and 10.00 buffers

Cat. No.	Pack of 3	Case of 6 Pk.
SB105	71.86	349.74

Fisher Scientific* Assorted pH Buffer Pouches

Economical, accurate, convenient

- ±0.01pH accuracy at 25°C (77°F)
- Pack of 20 pouches: five pouches each of pH 4, 7, and 10 buffers and rinse solution

CERTIFICATIONS:

All solutions are certified traceable to NIST* standards.

Description	Cat. No.	Each
Assortment of 5 each: pH 4, pH 7, pH 10 Buffers and Rinse Solution	**13-300-147**	21.70

Fisher Scientific* Electrode Filling Solutio

- In 16 oz. (500mL) bottles

Solution	Use with	Cat. No.	Each	Case
Filling Solution/ Electrolyte; 4M KCl saturated with AgCl	All single-junction Ag/AgCl electrodes, including Calcium Combination ISEs 13-620-536 and 13-620-537; inner chamber of many double-junction electrodes, except Fisher Scientific accupHast*, accupHast R, accuTupH*+, accuTupH*	**SP135-500**	44.95	215
Filling Solution/ Electrolyte; Saturated KCl	All Calomel single-junction models; outer chamber of Ag/AgCl double-junction models; fluoride and sod-ium combination ISEs; Fisher Scientific accupHast, accupHast* R, accuTupH*, accuTupH*+ outer chambers	**SP138-500**	37.24	176.

Hydrion* Buffers

Powdered ingredients make precision buffers: ±0.02pH at 25°C

13-640 and 14-200 Series

- In capsules or pouches; dissolve in distilled water: 100mL for capsules, 500mL for pouches
- **Standard Capsules** come in vials of 10, five vials per pack.
- **Tri-Chek Capsule Set** includes one vial of 10 capsules each for pH 4, 7, and 10 buffers
- **Tri-Chek Chemvelope Set** includes three pouches each for pH 4 and 10, four pouches for pH 7
- Tri-Chek sets also include dispensing vial of Color Key/Buffer Preservative; add to buffer to inhibit mold and to color-code solution: red-orange for pH 4, green for pH 7, blue for pH 10
- Tinted buffers change color if contaminated

Thermo Scientific* Orion* perpHect* Buffers and Rinse

Ideal for accuracy and traceability

- Certified, ready-to-use pH 4, 7, and 10 liquid buffers
- Electrode Rinse Solution gives added protection against contaminants
- Single-use sealed pouches are easy to carry, assure accuracy, eliminate waste
- Accurate to ±0.01pH, certified NIST*-traceable
- Lot number and accuracy certification date on each pouch, for attachment to batch records
- Calibrate right in the pouch, so every calibration is as accurate as with a newly opened bottle of buffer
- Solutions are sealed against air, light, and other contamination
- Ideal for field kits

rmo Scientific* Orion* Pure Water pH fers and pHISA* Adjustor

rate calibration for water measurements

13-641-164, -165, -722

ide accurate calibration when suring samples of low ionic ngth

ful for samples from boiler feed and cooling towers, distilled deionized water, well water or water

ommended for applications re pH electrodes typically bit drift, noise and instability

ers supplied in 475mL (1 pt.) les with buffer/temperature es for accurate calibrations

SA Adjustor increases sample ionic strength without changing comes in 50mL bottle

Test Kit provides fast, accurate pH results in high-purity waters

INCLUDES:

Pure Water pH Test Kit includes four 475mL bottles pH Buffer A, two 475mL bottles pH Buffer B, two 50mL bottles pHISA Adjustor, one 1mL syringe, instruction card, and application procedure No. 501, "pH Measurement in Low Ionic Strength Solutions."

CERTIFICATIONS:

Traceable to NIST* Standard Reference Materials.

Congo Red	**14-861**	57.85

Special Test Papers

- **Lead Acetate** paper turns black in presence of hydrogen sulfide and other soluble sulfides
- **Potassium Iodide/Starch** paper turns blue to deep purple in the presence of low levels of chlorine, iodine, peroxide and ozone

ORDERING INFORMATION:

100 strips per vial

Description	Cat. No.	Pack of 24 Vials
Lead Acetate	**14-862**	21.86
Potassium Iodide/Starch	**14-860**	19.60

Decon* Phenazine pH Test Paper

Packaged in a convenient plastic dispenser with comparative color chart

- Phenazine paper designed for determining pH values in obstetrical applications
- Provides sharp, clear changes within pH range of 4.5 to 7.5
- For in vitro diagnostic use

L x W	Cat. No.	Each
15' × ¼" (4.6m × 6.4mm)	**04-355-76**	57.70

Whatman* Acid/Alkali Test Papers

- **Litmus Blue** turns red in acid
- **Litmus Red** turns blue in base, at pH 5 to 8

ORDERING INFORMATION:

20 leaves per book. 10 x 10 books per pack.

09-876 Series Test Papers and Indicator Strips

Description	Mfr. No.	Cat. No.	Pack of 20
Litmus Blue	2600 601	**09-876-6**	70.72
Litmus Red	2600 602	**09-876-7**	70.72

Whatman* pH Indicator Papers

Type CF Strips

- Hydrophobic plastic supports that retain stiffness in liquids, protect against accidental contact with toxic/hazardous solutions
- Paper segments on each strip have chemically bonded dyes; can't leach into solution
- Complementary indicator charts provide clear comparison
- Full-range strips (0 to 14) graduated in 1pH units; wide-range strips (4.5 to 10pH) in 0.5pH units
- Packs of 100; each strip is approximately ¼ × 3" (6 × 80mm)

Type CS Strips

- Integral color chart, eight or more color segments graduated in 0.2 or 0.3pH units
- Central segment changes color in solution; match color chart for value
- Hydrophobic barrier
- Packs of 200; each strip is 7⁄16 × 3 15⁄16" (11 × 100mm)

Type TC Ribbon

- Three color bands; gives unique color combination for each test
- Compare with 11 color-coded values in chart for reading
- Feed system exposes short length, retracts ribbon when not in use
- Graduated in 1pH units
- In dispenser; ribbon is ⅜" × 16' (10mm × 5m)

Book

- Includes 20 wide-range (pH 1 to 11) strips graduated in 1pH units
- Color-comparison chart inside cover
- 20 leaves per book; 10 sets of 10 books per pack

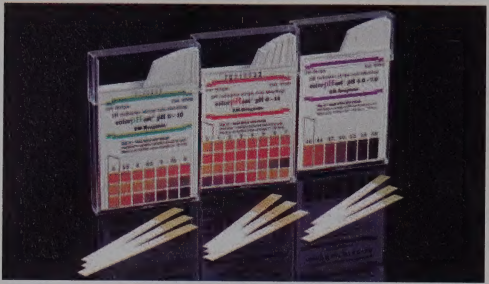
12.5–14.0	14-853-140	7.11	59.23

EMD colorpHast* pH Strips

Accurate results are achieved even in weakly buffered, turbid and colored samples



M95883, M95903, M95823

- Unique pH test papers feature covalently bound indicators that will not bleed, dilute, or contaminate trace samples
- Strips give sharp, clear color changes for easy comparison to color scale provided on the colorpHast package
- **Full-range (Universal) Strips** measure 0 to 14pH range in a single test with 0.5pH sensitivity—each strip includes four squares with different indicators
- **Intermediate-range Strips** with three squares each have a sensitivity of 0.3 to 0.5
- **Narrow-range Strips** with one pad have a sensitivity of 0.2 to 0.3

pH Range	Cat. No.	Pack of 100	Case of 6 Pk.
Full Range (Universal)			
0 to 14pH	**M95903**	17.19	103.12

4 to 7pH	**M95823**	17.19	103.12
6.5 to 10pH	**M95833**	17.19	103.12
11 to 13pH	**M95853**	17.19	103.12

Set of colorpHast* pH Strips

Includes 13 packs of 100 pH strips: two packs each of 0 to 6, 5 to 10, 7.5 to 14 and 0 to 14pH test strips; one pack each of 0 to 2.5, 2.6 to 4.5, 4 to 7, 6.5 to 10.0 and 11.0 to 13.0pH test strips. Total of 1300 test strips per pack.

pH Range	Cat. No.	Pack of 13
0-13	**M7001812**	186.16

FisherChemical* Universal pH Indicator System

For pH determinations between 4.0 to 10.0

- Rapid determinations of approximate pH of aqueous solutions
- Color chart features 12 translucent color standards permanently mounted next to openings of the same size
- pH value of each color standard is printed on included chart

S160-500

ORDERING INFORMATION:

Packaged in amber glass bottles in two sizes. Replacement color chart available separately.

Description	Cat. No.	Each	Case of 6
500mL Solution	**SI60-500**	73.20	349.96
1L Solution	**SI60-1**	93.21	446.05
Replacement Chart			
Color Chart	**I-180**	41.10	----

Fisher Scientific* pH Indicator Solutions

For use in a variety of pH test sets

- Standardized to Clark and Lubs specifications
- In 500mL (1 pt.) amber bottles

Indicator	pH Range	Cat. No.	Each	Case of 6
Thymol Blue, 0.04%	1.2–2.8, 8.0–9.2	**SI6-500**	44.05	210.63

P* BioDoc-It* Imaging Workstations

nd-alone gel documentation workstations for rescent and colorimetric imaging

for routine acquisition of DNA and protein gels and for multiple-user atories with large volume image capture requirements. No computer ired. Network connectivity is available for image transfer.

Camera
- -chip interline transfer CCD sensor
- mposite monochrome output with 752 × 582 PAL
- 8 zoom lens
- and IR bandpass locking filters
- nsitivity to 0.1ng of ethidium bromide-stained DNA
- nal-to-noise ratio, >56db; dynamic range, >2 orders of magnitude

grated processor and LCD monitor
- -button, touch-control keypad controls camera integration
- preset integration times from 0.04 to 10 sec. at 30fps
- splay live preview of images on the integrated 6⅜" (16.2cm) t-panel LCD
- tosave images in TIFF and JPEG formats to either memory card or twork-retrievable storage
- ersaturation flash warning

ce-saving benchtop darkroom
- ique gel window opens for quick sample viewing without opening e door
- al overhead white lights provided for overhead illumination
- ll access door with safety switch that turns UV off when door is opened
- mensions: 27L × 14W × 12¾"H (68.6 × 35.6 × 32.3cm)
- 5V 60Hz

DERING INFORMATION:

onal Accessories (available separately) include: Doc-It LS Software 0185-02), recommended for use with this system for analysis of gels, es and membranes; Mitsubishi* Thermal Printer (UVP89 0069 02), mmended for low-cost thermal printout of images.

LUDES:

monochrome CCD camera; large 6⅜" (16.2cm) LCD viewing screen for preview of gels; CompactFlash* memory card (64MB) and card reader ave and transfer images; compact darkroom with overhead white light ss door and unique UV-blocking gel viewer; choice of single- or iple-wavelength UV transilluminators or FirstLight* Uniform UV illuminator; ly accessible filter tray for quick exchange of ethidium bromide filters

TE:

refers to its midrange UV products as 302nm; other manufacturers may ify 300nm, 310nm or 312nm. The spectral output of these units is the e as UVP 302nm.

Description	Cat. No.	Each
Thermal Analog Printer	UVP89-0069-02	1859.39
Thermal paper, 4 rolls	UVP89-0038-01	108.25

UVP* DigiDoc-It* Imaging System

Economical gel imaging system with digital color camera, compact hood, sample viewer

Camera-hood system provides low-cost image acquisition and documentation of gels, plates and membranes. Combines 5.1 megapixel digital color camera and compact hood enclosure. Uses your existing computer with Doc-It* capture software on supplied CD.

- High-quality images with low-light capability
- Software enables acquisition, complete camera control, enhancement, annotation and archiving of digital images for publication or quantitative analysis
- Use with a variety of UVP transilluminator models; connect to suitable computer for analysis and printing

Camera and Capture Software

- CCD with 5.1 megapixel effective resolution
- 4:1 zoom lens (5.7 to 22.8mm); maximum field of view, 29.5 × 22.2cm
- Apertures from f/2.8 to f/8.0; automatic or manual focus and exposure; 1⁄4000 to 16 seconds exposure times
- Focusing ranges: normal, 8 to 31" (0.2 to 0.8m); close-up, 1 to 8" (0.03 to 0.2m)
- Multiple image resolution settings from 640 × 480 to 2592 × 1944; interpolated print resolution to 3264 × 2448
- High or low image compression with multiple file formats: JPEG, BMP, TIFF, GIF, TGA, PNG
- Capture software is compatible with Windows* 98SE, ME, XP, 2000
- Camera operates on lithium-ion rechargeable battery
- Additional camera functions available when software is not in use: multi-mode exposure controls, 1⅞" (4.6cm) wide-view color LCD monitor, variable shutter speeds, flash controls, QuickTime Movies, Smart Memory Card, utility and photo software, NTSC video output cable
- Camera measures 4⅜L × 3W × 2¾H" (109.2 × 76.2 × 68.6mm); weight, 11 oz. (307g)

Hood

- Lightweight compact hood with viewport and easy access door
- Measures 12D × 17¾W × 16⅝"H (305 × 451 × 422mm)

INCLUDES:

Digital camera with 55mm ethidium bromide filter and USB interface; Doc-It Capture Software on CD-ROM; hood enclosure; UV filter and adapter ring; battery and charger with universal voltage power supply

REQUIRED ACCESSORIES:

Transilluminator must be ordered separately. Choose from UVP High-Performance 25w transilluminators or combine the system with an 8w benchtop unit and drawer.

Description	Cat. No.	Each
UVP DigiDoc-It System	UVP97-0105-01	3245.88

WARNING

Transilluminators are powerful sources of ultraviolet radiation which can cause serious damage to unprotected eyes and skin. Read the ultraviolet Caution Information before operating any transilluminators.

UVP97-0105-01

ACCESSORIES

UVP* Doc-It* LS Analysis Software

Easy-to-use software package for 1-D analysis of gels, plates and membranes as well as colony counting

Offers many image enhancement tools, gel analysis functions, reporting capabilities; also supports 21 CFR Part 11 compliance. User-friendly design allows users to configure many features to their preferences.

- Image analysis detects straight, curved or slanted lanes and bands automatically or manually and creates histograms for detailed visual analysis
- Generates easy-to-interpret quantitative data of lanes and bands
- Colony Counting function uses wizard commands to set the automatic colony counting of user-defined areas
- Enhance images with brightness, contrast, gamma, emboss, invert and pseudo color
- Annotate with text, lines, arrows, ellipse, and highlighter tools—show, hide or burn into image
- Save images as various file formats including TIFF, JPEG, BMP and GIF for use in presentations or documentation
- Create detailed and user-configured reports
- Compatible with Windows* 2000 SP-4, Windows XP Pro SP-1 or later

Cat. No.	Each
UVP97-0185-02	1493.83

dak* Gel Logic 100 Imaging System

vides accurate detection and quantitative analysis a wide variety of biological labels and sample types

- 4 megapixel scientific-grade monochrome sensor and 6X zoom lens ovide excellent detection sensitivity and resolution
- atures real-time previewing, fast image acquisition, and umination correction
- sy setup and installation
- tended dynamic range yields improved quantitative accuracy
- mprehensive image analysis software for Windows* or Macintosh* lows easy calculation of molecular weight, mass, optical density, d intensity

DERING INFORMATION:
110V 60Hz/220V 50Hz. Optional white-light epi-illumination available.

LUDES:
tal CCD camera; imaging cabinet with integral filter slide, sized to fit t transilluminators; two packages of full feature 1-D Image Analysis ware (v. 3.6); 52mm, 590nm ethidium bromide bandpass filter; framing k kit and user's manual; camera/computer FireWire* interface cable and ware components for Windows and Macintosh platform

LOOKING FOR MORE PHOTODOCUMENTATION SYSTEMS?

Visit www.fishersci.com and search for Photodocumentation

Fotodyne* FOTO/Analyst* Luminary Workstations

Acquire and store digital images of chemiluminescent, fluorescent, and visible samples, including gels, blots, TLC plates, and Petri plates

- High quantum efficiency (QE) in the chemiluminescent emission range to maximize sensitivity
- Maximize detection of chemiluminescent and other low-signal samples
- Offer picogram-level sensitivity for both nucleic acid and protein gels and blots

FOTO/Luminary* Benchtop Darkroom

- Houses a cooled CCD camera with a hands-free motorized zoom lens
- Gliding transilluminator platform and side-opening door with interlock provide convenient and safe operation
- Choose workstations with either UV or dual light transilluminators
- Lumi/Tray is designed specifically for work with chemiluminescence and positions blots close to the camera for maximum sensitivity
- Dual visible epi-lights allow easy focusing and even illumination of opaque samples
- Dual UV epi-lights are ideal for use with samples stained with fluorescent dyes
- Front-loading filter holder allows simple exchange of filters when changing applications

FOTO/Analyst PC Image Acquisition Software

- Captures and stores images in a choice of nine file formats, including TIFF, JPEG, and BMP
- Offers background subtraction, brightness and contrast adjustment, image inversion, and a saturation indicator to determine when images are exposed beyond the limits of effective digital analysis
- Annotation feature permits labeling with text, date and time stamp, arrows, circles, and boxes
- Up to five exposure times can be set to capture consecutive images of low-signal samples for optimal results

Minimum Computer Requirements

- Windows* 2000 or XP; 2.0 GHz or faster processor, 512MB RAM; 1 GB hard drive space (additional space for images)
- One open full-size PCI slot, USB port open for thermal printer; open serial port
- 15" (38.1cm) monitor
- 800 × 600 resolution video card (1025 × 768 recommended), 24-bit true color

ORDERING INFORMATION:

Also available without thermal printer

INCLUDES:

UV workstations include FOTO/UV* 26 transilluminator. **Dual Light workstations** include FOTO/Convertible* dual-light (UV and visible) transilluminator, and Coomassie* blue interference filter; thermal printer with one roll of paper; ethidium bromide interference filter; cooled CCD camera with motorized zoom lens; FOTO/Luminary Benchtop Darkroom with dual UV epi-lights and dual visible epi-lights; Frame Grabber/Video Card; PC Image software and cable package. Choose an eight-bit, 0.4 megapixel camera for basic gel and blot documentation; choose a 12-bit, 1.4 megapixel camera for more demanding samples.

Kodak* BioMax* XAR* Film

Suitable for use with all radioisotopes and chemiluminescent probes

- Coated on both sides of a clear base, making it ideal for both direct autoradiography and exposures with intensifying screens
- Utilizes an improved formulation that eliminates the need for interleaving paper while maintaining the same performance as the original X-Omat* AR (XAR) film
- Suitable for manual and automated processing

BioMax
Kodak

05-728 Series

ORDERING INFORMATION:

Formats include: ReadyPacked film (with each sheet of film individually wrapped in a protective folder for easy handling); Bulk-packed film

ACCESSORIES

Polaroid* Film Holders

Accept all Polaroid 4 × 5" instant sheet films

- Fit most 4 × 5 standard press and view cameras and scientific/recording devices that are equipped with spring backs, lock backs and similar backs, without making any alteration to the camera or the focusing system
- Can also be used with instruments (such as microscope and oscilloscope cameras) equipped with similar backs, and with the Polaroid MP4+ Cameras, the CU-5 4 × 5 camera, and the Polaroid Miniportrait 4 × 5 cameras
- Film holder slides into the back of the camera
- No alterations to equipment or focusing system is needed

Type	For	Mfr. No.	Cat. No.	Each
Model 545i	4 × 5" Sheet film	617878	**04-441-50**	264.51

*Trademark. See Trademark Reference.

Prices subject to change.

dak* BioMax* MR (Maximum solution) Film

ommended for direct autoradiography of weak and lium energy β-radioisotopes, such as ^{35}S,^{33}P, and ^{14}C

- al for the detection of sequencing gels
- ated on only one side of a clear base
- lizes patented "T-grain" technology, which provides a two- to four-fold rease in sensitivity for direct autoradiography when compared to ner films
- proves detection of low-intensity bands
- ovides enhanced resolution and exceptional clarity
- so provides excellent resolution for ^{32}P and ^{125}I, although it offers lower nsitivity than BioMax MS film
- itable for manual and automated processing

ERING INFORMATION:

lable in either Bulk-packed film or ReadyPacked film (with each sheet m individually wrapped in a protective folder).

Kodak* BioMax* MS (Maximum Sensitivity) Film

Ideal for use with radioisotopes when detection of low-intensity samples or reduction of exposure times is required

Use for detection of Northern, Southern and dot blotting applications. Suitable for manual and automated processing.

- Coated on both sides of a clear base with an advanced technology "T-grain" emulsion
- When used in conjunction with BioMax MS or TranScreen* HE intensifying screens, film provides the fastest and most sensitive system for the detection of ^{32}P and ^{125}I radioisotopes (4 to 8 times faster than any other filter/screen combination)
- When combined with TranScreen LE intensifying screen, film provides similar speeds to BioMax XAR* with a calcium tungstate screen, but with significantly greater resolution
- When used with TranScreen LE, film offers the fastest system for the detection of ^{35}S, ^{14}C, ^{45}Ca, ^{33}P, ^{59}Fe, and even ^{3}H radioisotopes (≥5 times faster)

ORDERING INFORMATION:

Choose noninterleaved, bulk-packed film or ReadyPacked film (each sheet individually wrapped in a protective folder).

NOTE:

May be used with other intensifying screens; however, maximum sensitivity is achieved using BioMax screens.

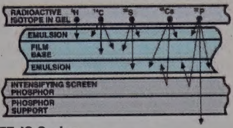
INTENSIFYING SCREENS

FisherBiotech* Intensifying Screens

Decrease exposure times and lower levels of radioactivity needed for autoradiography of gels

Particles emitted from radioactively labeled samples in gel pass through film and strike intensifying screen. Inorganic phosphors absorb energy, converting it to ultraviolet or blue light, which then exposes the film.



TF-IS Series

- For use with isotopes that emit high-energy beta particles (e.g., ^{32}P, ^{45}Ca) or gamma particles (e.g., ^{125}I)
- Fit autoradiography cassettes for common film sizes

Screen Dimensions	Cat. No.	Pack of 2
5 × 7" (13 × 18cm)	**TF-IS-57**	54.87
8 × 10" (20 × 25cm)	**TF-IS-810**	125.57
14 × 17" (35 × 43cm)	**TF-IS-1417**	371.27
14 × 36" (35 × 91cm)	**TF-IS-1436**	784.94

Kodak* BioMax* Autoradiography Intensifying Screens

MS Intensifying Screens

Conventional format intensifying screens for maximum sensitivity in detection of higher energy radioisotopes such as ^{32}P and ^{125}I

- Four to eight times faster than other autoradiography screens

Available in two formats:

- Intensifying screen only (below)
- With BioMax cassette (see 05-728-17 and 05-728-16 on p.1374)

TranScreen* HE Intensifying Screen

Patented, innovative intensifying screen developed specifically for detection of higher energy radioisotopes such as ^{32}P and ^{125}I

Equals the sensitivity of the BioMax* MS screen with improved handling features and publication-quality images

Available in two formats:

- Intensifying screen only (below)
- With BioMax cassette (see 05-728-61 on p. 1374)

Screen Dimensions	Mfr. No.	Cat. No.	Each
8 × 10" (20 × 25cm)	8563959	**05-728-63**	310.25
14 × 17" (35 × 43cm)	8811457	**05-728-62**	829.02

TranScreen* LE Intensifying Screen

Novel, patented intensifying screen designed for ^{3}H, ^{14}C, ^{33}P, ^{35}S, ^{45}Ca, and ^{59}Fe

- Achieve a 0.301 O.D. image five or more times faster than direct autoradiography
- Offer greater resolution (2X) in the same time with equal or better sensitivity as BioMax* XAR/calcium tungstate intensifying screen systems, when used with ^{32}P and ^{125}I
- Intensifying screen only

Screen Dimensions	Mfr. No.	Cat. No.	Each

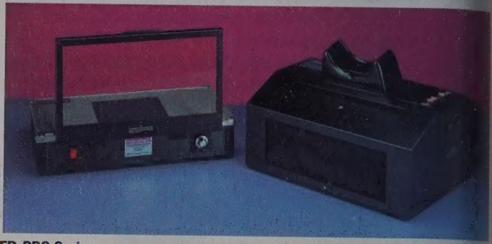
VIEWING CABINETS

FisherBiotech* Ultraviolet Viewing Cabinets

Ideal for viewing electrophoresis gels and TLC plates



FB-PDS Series

- Available with or without 365/254nm UV lamp
- Cabinet housing is sturdy aluminum with chemical-resistant polyurethane finish; removable bottom panel allows units to be placed underneath cabinet for higher UV intensity and greater fluorescent contrast
- Cabinets can be converted into benchtop photodocumentation systems using any 35mm SLR camera; snap-on adapters can be ordered through your Fisher Scientific Customer Service Representative or by visiting our Web site
- **Small Cabinets** have space to view two 20 × 20cm gels or plates; can accommodate two double-tube UV lamps
- **Large Cabinets** have space for four 20 × 20cm gels or plates; accept two larger lamps

ORDERING INFORMATION:

Small cabinet housing dimensions: 17½L × 20¼W × 9¾"H (45 × 51 × 25cm).
Large cabinet housing dimensions: 19½L × 24¼W × 12¾"H (50 × 62 × 32cm).

INCLUDES:

Built-in 25w white light source with easy-access switches

1mL	1½" (38mm)	**03-448-21**	41.73
2mL	2¼" (57mm)	**03-448-22**	42.13

*Fisherbrand** Dropper Bulbs for Pasteur Pipets

Made of natural blue rubber

Designed for use with Pasteur pipets, small-volume pipets, and medicine droppers.

03-448-26, -25

Capacity	Diameter of Opening	Length	Cat. No.	Pack of 24
1mL	0.265" (6.7mm)	1⅛" (28mm)	**03-448-25**	15.90
3mL	0.275" (7mm)	1⅝" (41mm)	**03-448-26**	29.40

*Fisherbrand** Safety Bulb Pipet Filler

Fits any size pipet; does not attach to pipets

Red rubber bulb attaches to white polypropylene piece with conical silicone adapter that fits small pipets through the largest volumetrics.

- Just squeeze bulb and touch to pipet to form a seal
- Let suction draw fluid, then lift bulb away and control fluid level with index finger
- Attaching a pipet does not require twisting bulb—minimizes the possibility of pipet breakage
- Autoclavable

03-448-23

INCLUDES:
Handy elastic band for hanging on wrist or reagent bottle

Color	Capacity	Cat. No.	Pack of 3
Red	½ oz.	**03-448-23**	27.63

MANUAL

*Fisherbrand** Pipet Filler

Lightweight pipet filler sits comfortably in the hand

Aspirate and pipet liquid samples with precise control. To use, simply squeeze the air out of the silicone bulb, then use the thumb lever to control the aspirate and delivery speeds.

- Mini button blows out the last drop of liquid from pipet when pipetting—ideal for use with blow-out pipets
- Silicone pipet holder is autoclavable and accommodates pipets from 1 to 10mL
- 0.45µm replaceable, nonsterile membrane filter prevents liquid from entering the unit

03-692-35

INCLUDES:
Integral 0.45µm membrane filter and colored pipet cones (white, mint, mauve and pink) for safety coding

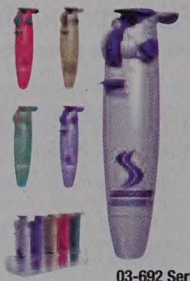
Description	Cat. No.	Price
Pipet Filler	**03-692-35**	Ea./77.50
Replacement Membrane, 0.45µm	**03-692-45**	Pk. of 5/11.90

Jencons Smoothie* Pipet Fillers

Exceptionally smooth, controllable thumb action

Unique range selector allows you to select from two dispense resolutions for maximum accuracy. One range setting delivers fast filling with optimal accuracy when used with 10 to 25mL pipets; the other setting is for use with pipets from 1 to 10mL where accuracy of fill can sometimes be difficult to control.

- Comfortable and simple to use
- Precise and accurate pipetting
- Compatible with blow-out, TD (to deliver) or gravity-dispense pipets
- Eliminate the need to use a range of different sized pipet fillers for a variety of volumes dispensed
- Fit pipets from 1 to 25mL
- Removable and autoclavable silicone pipet holder
- Acrylic stand available to hold up to five Smoothie pipet fillers
- Choose from five colors, each with its own subtle fragrance



03-692 Series

NOTE:
Over a period of time, the fragrance will gradually dissipate.

Description	Color	Mfr. No.	Cat. No.	Each

Jencons Safetypette* Pro Pipet Filler

Soft-touch bulb fills pipets from 1 to 100mL

Lightweight, large-capacity silicone bulb (55mL) provides smooth, comfortable pipetting.

- Simply squeeze bulb; thumb lever precisely controls both aspirating and pipetting speed; one-hand operation
- With button to blow out residual contents of pipet
- Integral, replaceable 0.45µm membrane filter prevents liquid from accidentally being drawn into the unit
- Autoclavable pipet holder

03-692-190

ORDERING INFORMATION: For use with all sizes of pipets, 1 to 100mL

Mfr. No.	Cat. No.	Each

MOTORIZED

*Fisherbrand** Motorized Pipet Fillers/Dispensers

Compatible with glass or plastic pipets from 1 to 100mL

Fisherbrand

03-694-164

Ultra-lightweight (just over 6 oz. [173g]) and compact, these pipet controllers operate for eight hours from a single charge; low battery light indicates one hour of use remaining. Environmentally friendly nickel metal hydride battery will not develop memory over time. During recharging, Filler/Dispensers can remain in use.

03-692-171

- Mode switch enables selection of three aspirate/dispense speeds, all of which are easily controllable by the triggers
- "High" setting to aspirate/dispense at full speed with blowout
- "Low" to aspirate/dispense at reduced speeds with blowout
- "G" to aspirate at reduced speed, dispense by gravity (for pipets designed "To Deliver")
- Comfortable, concave finger triggers give you additional variable control of pipetting speed at any setting
- Turbo model adds a powerful, yet quiet motor for faster large-volume pipetting, filling a 25mL pipet in under three seconds
- Standard controller has a streamlined shape to accommodate large or small hands
- Low-profile Plus and Turbo controllers have traditional pistol-shaped body to permit use in laminar flow hoods or biological safety cabinets

ORDERING INFORMATION:

Standard and Plus models come in six different colors, to let you color code according to user, application, and location.

INCLUDES:

Two spare filters (one each 0.45µm and 0.2µm); autoclavable pipet adapter bench stand; AC recharger; space-saving wall stand (Standard models only); and instructions. The Plus and Turbo models also come with a two-position bench stand which allows charging of the units with or without a pipet in place.

Argos* Omega* Single-Channel Pipet Controller

NEW

Combines single-handed pipetting with fast, precise liquid dispensing

03-391-253, -252, -251, -255, -250

- Available in six colors
- Lightweight (190g), ergonomic design
- Powerful, maintenance-free battery
- Aspirating and dispensing speeds can be continuously adjusted using the thumb dial
- Touch-sensitive contoured buttons enable precise filling and dispensing with one hand
- Compact design—ideal for pipeting liquids in confined spaces
- LED display indicates battery strength and when to recharge
- 45µm hydrophobic filter located in the autoclavable nosecone prevents overfilling and contamination
- Accepts glass or plastic pipets from 1 to 100mL

INCLUDES:

Rechargeable 6.5V lithium-ion battery; provides 10 hours of continuous use.

THERMO SCIENTIFIC* FINNPIPETTE* C1 PIPET AID

The new Finnpipette C1 is a portable, lightweight serological pipet aid. Designed for use with graduated and volumetric glass and plastic pipets from 1 to 100mL, it offers simple, efficient pipetting performance with maximum pipetting comfort. The large illuminated LCD shows battery charge and pump speeds for aspirating and dispensing (Cat. No. 14-487-89).

Visit www.fishersci.com and search for C1 Pipet Aid

Drummond* Portable Pipet-Aid* Filler/Dispensers

Single-speed and multispeed models

13-681-15E

Both units work with 1 to 100mL pipets and run continuously for over two hours, pipetting over 2000 times without recharging. They can be recharged nightly over 1000 times and can be used while recharging. Filter prevents detectable penetration of 0.035µm particles and prevents further use of filler/dispenser if it becomes contaminated with fluid.

Multispeed Model XP

- The smallest (5½" long [14cm]) and lightest (7½ oz. [213g]) of all Pipet-Aid Filler/Dispensers
- Fill and dispense at three speeds: medium (equivalent to normal speed of other Pipet-Aid Filler/Dispensers), slow (one-half medium speed), and fast (twice medium speed)
- Filling and dispensing speeds can be set independently, allowing nine different speed combinations: fill slow, dispense slow; fill slow, dispense medium; fill slow, dispense fast; fill medium, dispense slow; fill medium, dispense medium; fill medium, dispense fast; fill fast, dispense slow; fill fast, dispense medium; fill fast, dispense fast (within each speed designation, vacuum response is directly proportional to finger pressure on the fill/dispense buttons)

Single-Speed Model

Lightweight (<10 oz. [284g]), compact (<7" long [18cm])

INCLUDES:

Tissue Culture Nosepiece/Filter unit that eliminates cross-contamination due to overpipetting with a dual hydrophilic, hydrophobic 0.8µm filter. Both units come complete with a 110V 60Hz recharger, plus four replacement 1" diameter (2.5cm) filters. Replaceable 9V NiMH battery. Wall holster and stand.

REQUIRED ACCESSORIES:

Replacement 13-681-17 rubber inserts also are available (see below).

Drummond* Pipet-Aid* Hood Mate* Model 300 Filler/Dispenser

Compact, plug-in unit

13-682-20

Ideal for use in laboratory safety hood. Does not require recharging due to Auto-off energy saver. Two cradle options allow unit to be placed in holster, with or without pipet attached; placing handle in holster turns off pump. During operation, if no button is pushed in three minutes, the pump automatically goes into a "sleep" mode. Capacity, 1 to 100mL.

- Tissue Culture Nosepiece/Filter Unit eliminates cross-contamination due to overpipetting
- If wetted by overpipetting, filter ceases to pass air in either direction, alerting user to possible rubber-insert contamination
- Dual-layered filter permits no detectable penetration of particles and prevents further use of filler/dispenser if it becomes contaminated with liquid
- 100% effective with aqueous solutions, but not with other solvents

Conserves space

- Attaches to side wall of hood on a bracket secured with double-backed tape
- Pump housing is clipped to bracket and is easily removed for cleaning
- 3 to 4' (91 to 122cm) coiled pressure/vacuum line enters handle at top to prevent benchtop spills

Provides nine fill-and-empty speed settings

- Lightweight, 4.3 oz. (122g) handle features a multispeed valve that allows user to set both the fill and/or empty controls to slow-, medium-, or fast-speed ranges
- Fill-and-empty controls are designated by switches with up (fill) and down (empty) arrows
- Speed is selected by rotating button on axis
- Flowrate is proportional to pressure applied to button

ORDERING INFORMATION:

Drummond* Pipet-Aid* Filler/Dispensers

Safe and easy to operate

Standard Model

- Electrically powered pipetting device for dispensing 1 to 100mL volumes
- Just push button to fill and empty pipets
- Accepts most glass and plastic pipets
- Useful in confined spaces such as laminar flow hoods
- Has positive-action check valve to prevent fluid intake into handle
- Handle is autoclavable

Filler/Dispenser with 0.2µm Filter

- Same as Standard Model (13-681-15) except with dual 0.2µm filtration unit
- Filters both pressure and vacuum lines
- Protects against biohazardous materials
- With pump

Filler/Dispenser with Tissue Culture Nosepiece/Filter Unit

- Same as Standard Model (13-681-15), but also supplied with Tissue Culture Nosepiece/Filter unit
- Tissue culture unit eliminates cross-contamination due to overpipetting by using a dual hydrophilic, hydrophobic 0.8µm filter
- Filter prevents detectable penetration of 0.035µm particles and prevents further use of the filler/dispenser if it becomes contaminated with fluid
- Filler/dispenser comes with four replacement 1" diameter (2.5cm) filters

13-681-15D

Filler/Dispenser with 0.2µm Filter and Tissue Culture Nosepiece/Filter Unit

- Same as 13-681-16 model with 0.2µm filter, but also supplied with Tissue Culture Nosepiece/Filter unit
- Tissue culture unit eliminates cross-contamination due to overpipetting by using a dual hydrophilic, hydrophobic 0.8µm filter
- Filter prevents detectable penetration of 0.035µm particles and prevents further use of filler/dispenser if it becomes contaminated with fluid
- Filler/dispenser comes with four replacement 1" diameter (2.5cm) filters

Jencons Powerpette* Digital and Powerpette Pro Pipet Fillers/Dispensers

Accept glass or plastic pipets in a broad range of sizes

Ergonomic and rechargeable, with precision fingertip control.

- Can be used with either "To Deliver" or "To Blow Out" pipets
- Fitted with a 0.45µm nonsterile hydrophobic filter to protect against liquid and airborne contamination
- Manufactured in ISO 9002-certified facilities

Powerpette Digital

- Rotatable head accommodates left- or right-handed users
- Lightweight (9⅞ oz. [280g]) design and contoured shape ensure user comfort, even during extended use
- Can be used as a macro pipetter and a dispenser either with disposable tips or as a pipetting aid with all types of graduated and ungraduated pipets from 1 to 25mL
- Microprocessor-controlled functions include "multiple" and "sequenced" dispensing, controlled via keypad and LCD display

Powerpette Pro (Motorized)

- Pistol-shaped body fits the hand comfortably and permits use in laminar flow hoods or biological safety cabinets
- Powerful, yet quiet motor speeds large-volume pipetting, filling a 25mL pipet in under three seconds
- Suitable for all pipets from 1 to 100mL
- Controller uses NiMH battery that recharges, even during use
- Mode-selection switch enables selection of high or low aspirate/dispense speeds (with blow out) and gravity dispense (to deliver) in any mode setting
- Concave finger triggers provide comfortable control of suction and dispensing

INCLUDES:

Both models are supplied with two spare nonsterile filters, one each 0.45 and 0.2µm (sterile filter available separately—see chart below), AC adapter and instruction manual. **Powerpette Digital** includes a charging stand and two nose cone adapters (one to accommodate 1 to 25mL pipets, one for 5mL pipet tips). **Powerpette Pro** comes with a two-position bench stand that holds the controller on the bench or wall, with or without a pipet in place.

WARRANTY:

One year

l Art* Ergopet* Memory Pipetters

itively programmed, memory dispensing or aspirating feature

sers processing many identical samples, simply aspirate or dispense the ed volume and the pipetter will repeat as frequently as required. Multiple omic comfort adjustments and programmable pipetting conform to your ology and needs.

ures

- ee models with extended height raise tip of pipetter by up to 30cm "), dramatically lowering the hand position
- ect a model with one, two or three extensions to lift the pipet tip 10, and 30cm (4, 8 and 12") respectively, allowing user to rest their elbow the bench to support their arm and pipetter
- ler models place the pipet tip on a similar plane as the hand, reasing the precision when placing tip into small vessels; sed pipet also improves accuracy of sighting of the meniscus
- etter rapidly aspirates and dispenses either slowly and accurately with ght touch (gravity dispensing) or quickly with firmer pressure on the pensing button
- t silicone chuck accepts glass or plastic pipets from 1 to 200mL
- nply slip a pipet into the ribbed chuck for a leak-free seal; hydrophobic er within the chuck protects the pipetter from over-aspiration
- help increase pipetting throughput, dispensing and aspirating speed independently variable
- grammed pipetting accuracy: ±3.0%
- chargeable batteries allow maximum freedom of movement
- ep feature conserves battery power when pipetter is idle

gn

- onomic design avoids strain and fatigue of awkward positioning and etitive motions when working inside a hood or on the bench with sero- ical pipets

NEW

03-421-500 Series

- Engineered for lightweight, comfortable grip while feeling totally balanced in the hand
- Easy-to-set swivel head helps to reduce awkward wrist bending associated with using standard pipetters
- Head can be positioned straight ahead in line with the hand or swung up to 90° left or right; allows unobstructed viewing of the pipet while aspirating and dispensing, while maintaining a more natural hand position
- Nose or chuck can also be rotated to change the angle of the pipet from vertical to 10° outwards
- Separate soft-touch aspiration and dispensing buttons are positioned for a relaxed yet secure grip with easy reach for fine control

AVAILABLE ACCESSORIES

Weighted base or wire rack supports the pipetter vertically when not in use.

INCLUDES:

Rechargeable battery, wall battery charger

Scienceware* Minipet* Dispenser

NEW

The chemical resistance of PTFE resin in a self-filling, syringe-type repetitive dispenser

Features a unique PTFE three-way valve and fittings on a borosilicate glass barrel. Self-locking PTFE plunger adjusts over full volume range of the syringe, yet won't move from original setting even after multiple dispensings.

- Safe for use with virtually any solvent or acid except HF
- Autoclavable and suited for dispensing media and other sterile samples
- Once the 18" long (20.3cm) PTFE filling tube is placed in a liquid reservoir, reagent flows through a closed system
- Accuracy: ±0.5% (±1.0% for 30mL)
- Molded plastic handle is ergonomically designed to minimize operator fatigue when used for extended periods

INCLUDES:
Filling tube and sinker

ndard Serological Pipets

lor-coded pipets and packaging permit easy identification by size using ISO standard colors

- egative graduations on all sizes
- scending and descending graduations on all but the 1 and mL sizes
- ecyclable outer packaging

DERING INFORMATION:
ilable in multipacks, which permit easy access to several ts at a time without contaminating unused pipets. er packaging is recyclable.

MPLIANCE:
igned from ASTM* E 934; conform to ASTM E 1380 for r coding.

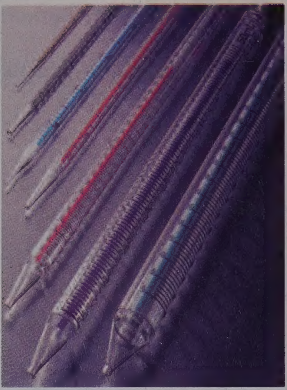
Costar* Stripettes* Disposable Polystyrene Serological Pipets

Ideal for cell culture and other applications that require aseptic liquid handling



07-200 Series

Sterile pipettes feature color-coded stripes for easy volume reading and quick size identification.

- Bidirectional graduations allow the choice of using ascending or descending scales
- Negative graduations on the 1, 2, 5, 10, 25 and 50mL Stripettes provide additional working volume.
- 100mL Stripettes allow you to perform large-volume fluid transfers safely and easily; eliminate the need for graduated cylinders and other liquid-handling vessels
- Cylindrical anti-drip tip design on 25, 50 and 100mL sizes reduces accidental drippage and assures accurate delivery
- 10mL size has a wide tip for handling viscous fluids

CERTIFICATION:
Certified nonpyrogenic

Individually wrapped in all-plastic wrap

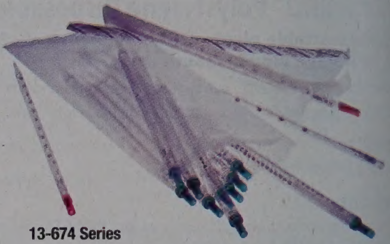
Kimble* Disposable Polystyrene Serological Pipets

Irradiation sterilized and suitable for tissue culture work



13-674 Series

- Have uniform pulled or molded tips and beveled or molded top ends with cotton plugging
- Two rings near top denote that small amount remaining in tip after delivery must be blown out and added to main volume delivered
- 5mL size now has two-piece design
- Color-coded packaging makes choosing correct pipet size quick and accurate
- With negative and reverse graduations

COMPLIANCE:
Designed from ASTM* E 934. Calibrated "To Deliver" to tip.

ORDERING INFORMATION:
Multipacked 10mL pipets available with either regular tip (1.5mm dia.) or wide tip (3.5mm dia.). All sizes available either in paper/plastic individual wraps overpacked in dispensing shelf packs, or in recloseable multipacks overpacked in shipping containers.

Individually wrapped

*Fisherbrand** Borosilicate Glass Disposable Serological Pipets

Chemically inert pipets have negative graduations as well as bidirectional scales

- Blue markings are easy to read
- Packaging meets requirements of small-, medium-, or large-volume use
- Individually wrapped pipets come in transparent plastic/paper wrappers for easy identification and tear-through, and are further overpacked in handy shelf container/dispensers; ideal for small volumes requiring sterility
- Multipack with resealable flap for larger volume use permits easy access to several pipets at a time without contaminating unused pipets
- Outer packaging is recyclable

ORDERING INFORMATION

Individually wrapped and multipacked pipets come in sterile and plugged; nonsterile, nonplugged bulk-packed pipets are also available

COMPLIANCE:

Regular-tip styles have volume tolerances that comply with ASTM* E 714. Calibrated "To Deliver/Blow Out." Color-coded packaging on all pipets, except bulk packs, allows easy identification by size using ISO* standard colors.

Serological Pipets with Regular Tip, Standard Length

Regular-tipped pipets have long, slender, tapered tips to speed pipetting

Pyrex* Wide-Tip Disposable Glass Serological Pipets

Ideal for transferring agar, emulsifying or antifoaming agents, thycelial and fermentation broths

- Sterile, plugged, wide-orifice pipets are used for testing viscous liquids or suspensions
- Wider tips allow easier filling and discharging when ground-up particulate matter is used for microbiological tests
- Packaged in plastic bags, so several can be used at a time without contaminating the entire pack
- ISO color coding is printed directly on tear strip for easy identification by size

COMPLIANCE:

Calibrated "To Deliver" (TD) with blow-out.

13-668-81

Kimble* Disposable Borosilicate Glass Serological Pipets

Sterile, plugged short-length pipets perfect for tissue culture work or procedures performed under fume hoods or in confined areas

03-340-126B

- Chemically inert
- With easy-to-read blue markings and bidirectional graduations
- Vented, recloseable multipack for larger volume use permits easy access to several pipets at once without contaminating unused pipets

ORDERING INFORMATION:

1mL size comes in two inner packs of 200 each; 5, 10 and 25mL sizes in two inner packs of 100 each. Two packs per case.

COMPLIANCE:

Calibrated "To Deliver/Blow Out". Color coded by size with ISO standard colors

DISPOSABLE—MICROPIPETS

Kimble* Disposable Micro Capillary Pipets

Color coded for selection of correct size

- Length: 5" (12.7cm) with single black capacity ring
- Clean and ready to use
- To dispense, simply cover hole on rubber bulb and squeeze

ORDERING INFORMATION:

Packaged in easy open cylinders for convenient dispensing. Each cylinder contains 250 pipets and one pipet device.

COMPLIANCE:

Calibrated "To Contain". Made of soda lime glass in compliance with ASTM* Specification E438, Type II glass requirements.

DISPOSABLE—PASTEUR

Fisherbrand* Disposable Borosilicate Glass Pasteur Pipets

Constriction near top prevents plugs from slipping into pipet body

13-678-20A

- High-quality borosilicate glass
- Plugs not supplied
- Tips held to close diameter tolerances
- Ends are square cut

COMPLIANCE:

Designed from ASTM* E 732 specifications

Approx. Length	Cat. No.	Case of
5¾" (146mm)	**13-678-20A**	720/64.14
5¾" (146mm)	**13-678-20B**	1440/117.23
9" (229mm)	**13-678-20C**	720/65.48
9" (229mm)	**13-678-20D**	1440/122.75

Fisherbrand* Disposable Controlled-Drop Pasteur Pipets

13-678-30 (top), 13-678-6C (bottom).

Perfect for blood typing and crossmatching procedures in blood bank laboratories

- Deliver 22 to 26 drops per mL
- Correspond to drop size from antisera reagent bottle droppers
- Can be cotton plugged (plugs not included)
- Borosilicate or flint glass

ORDERING INFORMATION:

250 pipets per pack, 4 packs per case.

Approx. Length	Glass Type	Cat. No.	Case of 1000
5¾" (146mm)	Borosilicate	**13-678-30**	104.11
5¾" (146mm)	Flint	**13-678-6C**	116.20

Fisherbrand* Disposable Cotton-Plugged Borosilicate-Glass Pasteur Pipets

Made of N-51A borosilicate glass

13-678-8A

- Straight-cut tips and smooth, fire-polished tops to facilitate bulb attachment
- A positive constriction at approximately 1" (2.5cm) from top holds supplied cotton plug in place, thereby reducing the chance of aspirating liquid into rubber bulb
- Patented easel box, made of nonlinting material, folds to become a dispenser for easy access to pipets
- Foam pad at bottom of box preserves tips

Approx. Length	Cat. No.	Pack of 250	Case of 4 Pack
5¾" (146mm)	**13-678-8A**	26.79	89.27
9" (229mm)	**13-678-8B**	31.97	106.58

*Fisherbrand** Disposable Soda-Lime Glass Pasteur Pipets

Ideal for transferring samples to sample cups and for drop counting

13-678-6A

- Uniform bore
- Tip openings range from 0.80 to 1.20mm
- Top and tip free of sharp edges
- Can be cotton plugged (plugs not included)
- Carton top folds back—tilts carton into convenient dispensing position

COMPLIANCE:
Conform to government specifications in design, style

Approx. Length	Cat. No.	Pack of 250	Case of 4 Pack
5¾" (146mm)	**13-678-6A**	26.41	88.01

*Fisherbrand** Disposable Flint-Glass Pasteur Pipets in Stand-Up Case

Tip openings range from 0.80 to 1.40mm

22-230-490

- High-quality flint glass pipets in convenient stand-up case
- Saves bench space
- Approximate volume: 2mL
- Can be cotton plugged (plugs not included)

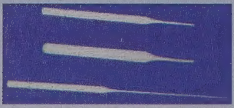
ORDERING INFORMATION:
100 pipets per pack, 10 packs per case

COMPLIANCE:
Designed to meet ASTM* E 732 specifications

Approx. Length	Cat. No.	Case of 1000
5¾" (146mm)	**22-230-482**	100.17
9" (229mm)	**22-230-490**	140.97

*Fisherbrand** Pasteur Pipets

Excellent for use in blood banks, hematology, chemistry, bacteriology and all general laboratory applications



Top to bottom: 22-209-353, 22-063-156, 22-209-361

Strong corrugated packaging is used to provide maximum protection from external shock and each pack contains a foam pad to protect the pipet tips.

- Manufactured from borosilicate or soda lime glass to conform to rigid specifications
- Straight-cut tips and smooth, fire-polished tops to facilitate bulb attachment
- I.D., top: 7mm; tips: 0.9 to 1.25mm
- Positive constriction approximately 1" (25mm) from the top to prevent cotton plugs from slipping into pipet barrel
- Easel configuration of each pack keeps pipets orderly and easily accessible

Corning* Disposable Glass Pasteur Pipets

Ideal for rapid nonvolumetric transfer work

- Available in convenient bulk packs
- Made from economical soda lime glass
- One-time use eliminates the danger of cross-contamination of valuable specimens or laboratory reagents
- Pipets have a constriction one inch below the top to facilitate plugging
- For nonvolumetric transfer work in bacteriology, immunology, hematology and serology studies, as well as blood bank and clinical chemistry procedures

13-678 Series

DISPOSABLE—TRANSFER

*Fisherbrand** Disposable Transfer Pipets

Unbreakable all-in-one pipets eliminate the hazards of broken glass and exposure to infectious materials

13-711-5AM

13-711-6M

13-711-7M

13-711-9 Series

Put an end to matching rubber bulb with glass pipet. Since entire unit is disposable, these pipets prevent cross-contamination to samples and reduce airborne contamination to personnel.

- Molded in one piece from see-through low-density polyethylene
- Inert to biological fluids and most acids
- Work well in hematology, urinalysis, chemistry, blood banking—anywhere there is a need for quick, safe transfer of fluids
- In four ready-to-use styles
- One squeeze draws from 2.0 to 3.3mL (depending on style used)
- Overall capacities from 4.6 to 7.5mL
- All deliver repeatable drop sizes
- Can be sealed and refrigerated for sample storage (seal with 02-678 Hemato-Seal* Tube Sealant)

Samco* Polyethylene Transfer Pipets

Single-unit design features a built-in pipet bulb that eliminates need for plugging, packaging, autoclaving; prevents cross-contamination

- Made of shatterproof, nontoxic polyethylene
- Low-affinity surface reduces loss of cells and valuable proteins due to binding
- Can be frozen in liquid nitrogen, or heat sealed for storage

General-Purpose Transfer Pipets

13-711-37

- Excellent for routine sampling of serum and plasma
- Ideally suited for blood culture and urine analysis
- 8⅞ and 11 13/16" long (22.5 and 30.0cm) pipets designed for safe and easy sampling from large containers
- Cat. Nos. 13-711-37 and 13-711-40 are extra-long pipets

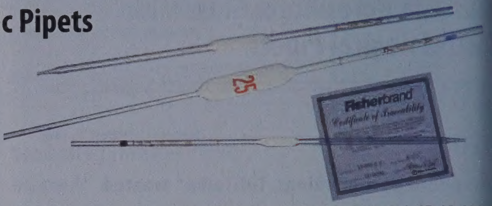
Standard or serialized

- Borosilicate glass
- Volume accuracy marked on each pipet
- Permanent amber markings
- Tuf-Temp*–treated tempered tips reduce chipping



(Top to bottom) 13-650-3F, 13-650-3P, 13-650-3C

ORDERING INFORMATION:

All pipets are available as PersonaPet* personalized pipets.

COMPLIANCE:

Standard Pipets meet all Class A requirements of ASTM* E 969-95. Letter A near top signifies compliance with requirements for laboratory certification by CAP and other certifying groups. Calibrated "To Deliver". **Serialized Pipets** with Certificates of Traceability are calibrated in accordance with ASTM E 542 and meet accuracy requirements of ASTM E 969. Glass meets the requirements of ASTM E 438 for Type I, Class A.

CERTIFICATIONS:

Serialized Pipets are NIST traceable, and are supplied with individual fused-in serial numbers and Certificates of Traceability, which indicate that each pipet is individually calibrated and certified against equipment whose calibration is traceable to the National Institute of Standards and Technology (NIST). Certificates list the weight set used, the test number, and date of testing.

*Fisherbrand** Reusable CulturTek* Volumetric Pipets

Large tip opening fills and drains quickly, speeds cell transfers

13-650-30A

Originally developed for in-house tissue culture cell production at Smith, Kline and French Laboratories. Heavy borosilicate glass provides greater resistance to chipping and breakage than conventional volumetric pipets.

- Tip openings approximately 4mm, or ⅛"
- Reinforced tip and mouthpiece bulb joints
- Shorter length makes pipets easier to handle
- With permanent amber markings
- Top tooled for cotton plugs (plugs not supplied)

ORDERING INFORMATION:

Available as PersonaPet* personalized pipets.

Pyrex* Reusable Class A Volumetric Pipets

Type 1, Class A borosilicate-glass pipets with fire-polished top and tip

- All pipets have colored graduations enameled onto glass
- Sizes 1 to 25mL are color coded by size for ease in sorting and selecting
- New design of 50mL size allows better drainage

COMPLIANCE:
Calibrated "To Deliver" with tolerances in accordance with ASTM* E 542 and E 969.

CERTIFICATION:
Each serialized pipet has a permanently marked serial number and Certificate of Identification and Capacity traceable to standards provided by NIST*.

NOTE: Do not pipet by mouth. Use mechanical pipetting device.

Kimax* Reusable Class A Volumetric Pipets

Autoclavable

Meet standards of former NBS circular 602 for accuracy, appearance, quality of glass, calibration lines, and inscription.

COMPLIANCE:
Both serialized and standard volumetric pipets have tempered ends calibrated "To Deliver".

CERTIFICATION:
All pipets are marked with "A" to certify that they are designed from ASTM* Specification E 969, Class A requirements. Each serialized/certified pipet is permanently marked with an individual serial number and comes with a Certificate of Graduation Accuracy. The 20, 25, and 100mL pipets come with six certificates per case; 50mL pipets, eight per case; all other sizes are supplied with two certificates per case.

REUSABLE—SEROLOGICAL

*Fisherbrand** Dual-Purpose Pipets

Sizes through 0.3mL have twice the accuracy required for Ostwald-Folin pipets

11-382-33 Series

- Borosilicate glass, permanent amber markings, Tuf-Temp*-treated to reduce chipping
- Accuracy printed on each pipet
- Capacity marked below mouthpiece

ORDERING INFORMATION:

Available as PersonaPet* personalized pipets.

COMPLIANCE:

Calibrated "To Deliver/Blow Out" (upper graduation) and "To Contain" (lower graduation).

Capacity	Accuracy	Cat. No.	Case of 12
0.1mL	±0.003mL	**11-382-33A**	130.90
0.2mL	±0.003mL	**11-382-33B**	130.90

10.0mL	±0.02mL	**11-382-33M**	162.80

*Fisherbrand** Dye Industry Pipets

Perfect for pipetting dark-color dye solutions

13-671-109M

Just fill pipet to desired volume and read—no time-consuming draining as with conventional pipets.

- White graduations stand out against background of dark dye; easier to see and read than conventional amber markings
- Inverse scale—volume graduations start with 0 at tip
- Color coded for quick, accurate identification
- Catalog number, capacity and accuracy marked on each pipet
- Tough borosilicate glass; Tuf-Temp*-treated to reduce chipping

COMPLIANCE:

Calibrated "To Deliver/Blow Out"

Capacity	Accuracy	Color Code	Cat. No.	Case of 12
1 in 1⁄100mL	±0.02mL	Yellow	**13-671-109F**	99.70
2 in 1⁄10mL	±0.02mL	Green	**13-671-109H**	109.50

10 in 1⁄10mL	±0.06mL	Orange	**13-671-109M**	113.20
25 in ½mL	±0.10mL	White	**13-671-109N**	218.00

*Fisherbrand** Reusable Serological Pipets

Accuracy printed on each pipet

- Borosilicate glass, permanent amber markings
- Tuf-Temp*-treated to reduce chipping
- All Fisherbrand Reusable Serological Pipets also available as PersonaPet* personalized pipets

Standard-Top Pipets

Fast, uniform flow times

13-675 Series

Pipets 13-675D and 13-675E are recommended for VDRL test.

ORDERING INFORMATION:
For 5, 10 and 25mL pipets, see Fisherbrand Cotton-Plug Top Pipets.

COMPLIANCE:
Calibrated "To Deliver/Blow Out." Meet requirements of ASTM* E 1044-96, Style I-General-Purpose Top.

Capacity	Accuracy	Color Code	Cat. No.	Case of 12
1/10 in 1/100mL	±0.005mL	White	**13-675A**	85.60

2 in 1/100mL	±0.02mL	2 White	**13-675J**	145.10

Large-Tip–Opening Pipets

Ideal for viscous solutions and tissue culture work

13-671-108 Series

- Tops formed for cotton plugging (plugs not included) will fit cotton plugging machines (not available from Fisher Scientific)
- The 1mL size has approximately 0.1" (2.5mm) tip opening; other sizes have approximately 0.12" (3mm) tip opening

COMPLIANCE:
Calibrated "To Deliver/Blow Out"

Capacity	Accuracy	Color Code	Cat. No.	Case of 12
1 in 1/10mL	±0.05mL	Red	**13-671-108A**	154.80
2 in 1/10mL	±0.05mL	Green	**13-671-108B**	176.20
5 in 1/10mL	±0.10mL	Blue	**13-671-108C**	144.50
10 in 1/10mL	±0.10mL	Orange	**13-671-108D**	142.50
25 in 1/10mL	±0.20mL	White	**13-671-108E**	205.20

Cotton-Plug Top Pipets

Similar to Fisherbrand* Standard-Top Pipets with tops tooled to fit cotton-plugging machines (not available from Fisher Scientific)

13-671-102A

- Constriction in glass top prevents cotton plug from going down into pipet (plugs not included)
- Fast, uniform flow times

ORDERING INFORMATION:
Also available in economical bulk packs. Call your Fisher Scientific Customer Service Representative for ordering information.

REQUIRED ACCESSORIES:
Cotton plugs

COMPLIANCE:
Calibrated "To Deliver/Blow Out." Meet requirements of ASTM* E 1044-96, Style II-Cotton Plugging Mouthpiece.

Pyrex* Reusable Class A Mohr (Measuring) Pipets

Class A Serialized/Certified Pipets

13-650-4B

Traceable

- Top of 5, 10, and 25mL sizes is constricted (Mohr type)
- Colored graduations are permanently enameled onto the glass
- Color coded by size for easy identification and sorting

COMPLIANCE:
Class A, Type I pipets are calibrated "To Deliver". Tolerances in accordance with ASTM* E 542 and E 1293.

CERTIFICATIONS:
Each pipet has a permanently marked serial number and Certificate of Identification and Capacity traceable to standards provided by NIST*.

Kimax* Reusable Mohr (Measuring) Pipets

Intended for chemical laboratory work—tip openings are smaller than usually desired for clinical laboratory operations

- Permanent brown, graduated scale fused into uniform bore tubing ending above taper
- Color coded by size for ease in sorting
- Tempered tips

COMPLIANCE:
Calibrated "To Deliver."

Class A Serialized/Certified Pipets

Subdivisions on all sizes are 0.1mL, except 13-664-10H where subdivisions are 0.01mL

13-664-10M

COMPLIANCE:
Designed from ASTM* E 1293, Style 1, Class A requirements.

CERTIFICATIONS:
Each pipet has a permanently marked serial number and Certificate of Graduation Accuracy traceable to standards provided by NIST*. 25mL pipets come with one certificate for every two pipets; other sizes come with two certificates per case.

algene* Pipet Washers/Rinsers

r Pipets up to 16 and 24" Long (41 and 61cm)

gh-density polyethylene pipet-
ashing system provides range of
cling speeds, with water input from
to 3³⁄₁₆ gal./min. (1.5 to 12L/min.).

One piece, leakproof, weld-free

Large tubing diameter permits faster
cycles and allows water to drain
completely

Water inlet eliminates back
siphoning of contaminated water
into water line, even if pressure
drops

Slower cycling is achieved without
attachments

Work well on low water pressure

LOOKING FOR PIPET JARS?

Fisher Scientific offers a selection of Pipet Jars, ideal for soaking or storing pipets and glassware.

Visit www.fishersci.com and search for Pipet Jars

Boekel* Stainless-Steel Pipet Washers

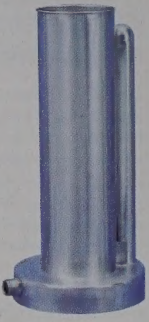
Complete water change occurs every 60 to 70 seconds, depending on flowrate

Pipet Washer

- Uses intermittent siphon to set up turbulent "fill-and-empty" action to wash away dirt and grime from serological and other pipets
- Water inlet above chamber creates air gap to prevent backflow of contaminated contents into water supply in case of sudden system-pressure loss
- Hot or cold water enters bottom of washer through ½" (1.3cm) IPS inlet; drains through 1" (2.5cm) IPS outlet at base

Combination Washer and Dryer

- Includes 195w immersion heating unit to dry pipets in one hour
- When washing and rinsing are completed, water supply is turned off and heated air circulates through cylinder



15-350-5

ORDERING INFORMATION:

Combination Washer and Dryer electrical requirements: 115V, 195w.

INCLUDES:

Washers include pipet holder; cleaning jar sold separately

Description	Diameter × Height	Mfr. No.	Cat. No.	Each
Washer Only	6 × 25¼" (15 × 64cm)	137400	**15-350-5**	822.53
Combination Washer and Dryer	6 × 25¼" (15 × 64cm)	137100	**15-350-15**	1092.85

Boekel* Stainless-Steel Pipet Dryer

Evaporates moisture from pipets by circulating hot air over all surfaces

- Holds 200 pipets up to 14¾" long (37.5cm)
- Accepts any standard pipet holder up to 5½" in diameter (14cm)
- Mounted on 10½" diameter (27cm) base

ORDERING INFORMATION:

For use with 15-350-5 Pipet Washer and metal baskets only. Electrical requirements: 115V, 275w

INCLUDES:

Neon pilot lamp and toggle switch, without pipet rack

PIPETTERS

SINGLE-CHANNEL, AIR DISPLACEMENT

*Fisherbrand** Finnpipette* II Single-Channel Pipetters

Fully autoclavable—for absolute sterility

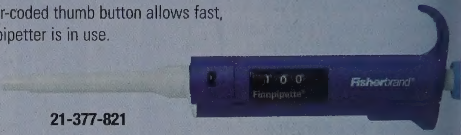
Eleven models with adjustable volumes ranging from 0.2µL to 10mL. Large, color-coded thumb button allows fast, accurate volume setting that is digitally displayed and easy to read even when pipetter is in use.

Feature

- Fast-dial system allows 0.1µL fine adjustment
- Microsize pipetters include "super blow-out" feature that ensures a high level of precision and accuracy at low-volume settings
- Telescopic piston boosts the power of the blow-out step, preventing the capillary action that can hinder delivery of residual liquid
- Soft-touch tip ejection—a gearing mechanism that produces increased downward force for tip release—also helps relieve hand stress
- Reverse pipetting mode allows pipetting of viscous and surface-active solutions
- Easy in-lab calibration using provided tool
- Adhesive safety label can be personalized to ensure easy identification

Design

- Lightweight, ergonomic design with modified "grippy" finger rest and rounded handgrip defends against fatigue
- Slim body allows entry into narrow vials
- Made from inert, biologically inactive polymers
- Pipetter easily disassembles for cleaning or parts replacement
- Stick-on hanger allows storage on shelves, counters, or almost any surface with a square edge



21-377-821

ORDERING INFORMATION:
For optimum performance, use Fisherbrand SureOne*, Fisherbrand Sure Fit* Ergo F tips or Thermo Scientific* Finntip* pipet tips. Also compatible with the following Fisherbrand tips: Redi-Tip* Pipet Tips, Standardization, Low Retention, Micro Tips, SureSeal* Barrier Tips, Aerosol Barrier Tips, Large Orifice, Gel Loading, Stack Rack Space-Saver, and SureGrip*.

INCLUDES:
Calibration certificate, in-lab calibration tool

Fisherbrand* Finnpipette* II Fixed-Volume Pipetters

uperior comfort, accuracy and precision

day's laboratories require sophisticated and reliable liquid handling chnology that allows its users to cope with the ever-increasing demands their daily work. This fixed-volume pipetter combines a sleek, ergonom- design, advanced features and uncompromising performance to better spond to those needs.

- Ideal for a variety of general pipetting applications
- Comfortable, lightweight handle with finger rest
- Fully autoclavable
- Patented soft-touch tip ejector (50% reduced force)
- Easy in-lab calibration and service

RDERING INFORMATION:

r optimum performance, use Fisherbrand SureOne*, Fisherbrand ureFit* Ergo F tips or Thermo Scientific* Finntip* pipet tips.

so compatible with the following Fisherbrand tips: Redi-Tip* pet Tips, Standardization, Low Retention, Micro Tips, SureSeal* rrier Tips, Aerosol Barrier Tips, Large Orifice, Gel Loading, ack Rack Space-Saver, and SureGrip*.

ACCESSORIES

ipetter Stand

- Stand holds up to eight pipetters (six when equipped with shelf hangers)—any combination of Thermo Scientific* pipetters and Fisherbrand* Finnpipette* single-channel and multichannel pipetters
- Mini stand holds three pipetters

Description	Mfr. No.	Cat. No.	Each
Pipetter Stand (holds 8)	9420-290	**14-387-14**	45.00
Mini Pipetter Stand (holds 3)	9420-320	**14-387-15**	35.00

Thermo Scientific* Finnpipette* Digital Fixed-Volume Pipetters

Ideal for pipetting of a single volume

Design takes advantage of user's natural pipetting movements; facilitates repetitive routine pipetting of a single volume by saving the user from constant physical strain and other work-related injuries.

- Offer the same features as other Thermo Scientific Finnpipette Digital pipetters
- Streamlined ergonomic design
- Super blow-out feature on micro-size pipetters (1-50µL) ensures accuracy and precision at low-volume settings
- Soft-touch tip ejection produces increased downward force for tip release, relieving hand stress
- Disassembles easily for cleaning or parts replacement
- Adhesive safety label can be personalized for easy identification
- Fully autoclavable

ORDERING INFORMATION:
Accessory stand is available for storage of up to six pipetters (Cat. No. 14-387-14, see p. 1405). Optimize performance by using Thermo Scientific Finntip* Pipetter tips (p. 1429-1430). Also compatible with all Fisherbrand* universal-fit tips, SureOne*, SureFit Ergo F, Extended Length, and Large-Orifice tips.

Thermo Scientific* Finnpipette* Focus Pipetters

Available with long or short tip cones

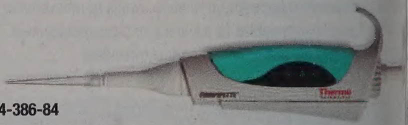
Model with short tip cone is ideal for microplate pipetting or work under fume hoods; longer tip-cone version allows access into deep vessels.

Fixed-Volume Models

- Ideal for repeated pipetting of a single volume
- 1 to 25µL models feature "super blow-out"
- New streamlined design, soft-touch tip ejection
- Constructed of tough, lightweight polymers; fully autoclavable for absolute sterility
- Easily disassembled for cleaning

Adjustable-Volume Models

- Feature "fast-dial" system with 0.01µL fine adjustment on microvolumes
- Large, color-coded thumb button allows fast, accurate volume setting
- Digital display is easy to read even while pipetter is in use
- "Super blow-out" feature on microsize pipetters ensures a new level of accuracy and precision at low-volume settings
- Telescopic piston boosts the power of the blow-out step, overcoming the capillary action that can hinder delivery of residual liquid
- Constructed of tough, lightweight polymers; fully autoclavable for absolute sterility



14-386-84

- Lightweight, ergonomic design defends against user fatigue
- Soft-touch tip ejection, an innovative gearing mechanism that produc increased downward force for tip release, also works to relieve hanc stress
- "Grippy" finger rest ensures a secure grip and correct pipetting angle
- Calibration certificate guarantees accuracy and precision
- Calibration is simply performed using tool (provided)
- Pipetter disassembles easily for cleaning or parts replacement
- Stick-on shelf hanger allows you to store pipetter on a shelf, counte almost any surface with a square edge

ORDERING INFORMATION:
For use with Finntip* tips. Also compatible with all Fisherbrand* Unive Fit tips, Fisherbrand SureOne*, Fisherband Ergo-F, Large Orifice, Large Orifice/Genomic Aerosol Barrier, and Low-Retention tips.

Thermo Scientific* Finnpipette* Digital GLP Kits

Everything you need to start using the Finnpipette Digital pipetter

Kit 1 Includes:
- Three Thermo Scientific Finnpipette* pipetters from 0.5 to 1000µL
  - Digital 0.5-10µL Micro
  - Digital 10-100µL
  - Digital 100-1000µL
- Three-position linear benchtop stand
- Three Thermo Scientific Finntip* racks, each with 96 tips
- Good Laboratory Pipetting Guide and full documentation

Kit 2 Includes:
- Three Thermo Scientific Finnpipette* pipetters from 2 to 1000µL
  - Digital 2-20µL Micro
  - Digital 20-200µL
  - Digital 100-1000µL
- Three-position linear benchtop stand
- Three Thermo Scientific Finntip racks, each with 96 tips
- Good Laboratory Pipetting Guide and full documentation

WARRANTY:
Five years

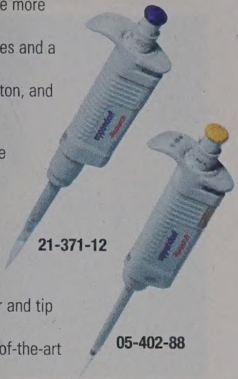
ppendorf Research* Series 2100 Pipetters

signed for high performance, reliability and er comfort



21-371-12

05-402-88

nnovative features make everyday use more fficient, comfortable and strain-free

esigned with reduced operating forces and a arger, separate, tip-ejector button

ounded grip, reshaped operating button, and onger hand rest hook for better, more rgonomic handling

ower portion of pipetter can easily be emoved, cleaned and autoclaved

pendorf PhysioCare Concept teria focuses on all relevant pects of pipetting—the whole rson and process, not just the nd or device.

tegrated systems: Complete pipetter and tip ogram to fit any application

xceptional durability: Made of state-of-the-art aterials

ptimized form and function: Easy operation through all work steps

erfectly balanced: Fit comfortably in the hand, with models weighing to 30% less than other brands

tuitive operation: Color-coded pipetter and tip matching system for asy identification

inimal user exertion: Minimize stress; manual models require up to 0% less pipetting force

mple maintenance: Easy to clean, autoclave and repair

otal support: Certified and ready to use; calibration services also available

DERING INFORMATION:

patible with Eppendorf pipet tips (epTips). Pipetters are color coded rating button and volume display) to make it easy to recognize tip s in color-coded Eppendorf tip racks.

patible Fisherbrand* tips include all Universal-Fit tips, Extended-Length, Loading Aerosol Barrier, Large Orifice, Low-Retention, SureOne*, Grip*, and Aerosol-Barrier.

TIFICATION:

plied with an individual Certificate of Conformity

Eppendorf Reference* Series 2000 Pipetters

Compact design includes a single, multifunctional button that controls both pipetting and tip ejection

Designed for pipetting accuracy, a smooth stroke, and superior operating comfort.

- Eppendorf pipetter/tip system ensures outstanding accuracy and precision
- Ejection sleeve can be removed to fit into smaller vessels
- Smooth-running piston is corrosion-free and chemically resistant
- Lateral volume locking safeguards volume selected
- UV-resistant and completely autoclavable without any impairment of accuracy or precision
- Supplied with individual labels for identification
- User calibratable

Eppendorf PhysioCare Concept* Criteria focuses on all relevant aspects of pipetting—the whole person and process, not just the hand or device.

- Integrated systems: Complete pipetter and tip program to fit any application
- Exceptional durability: Made of state-of-the-art materials
- Optimized form and function: Easy operation through all work steps
- Perfectly balanced: Fit comfortably in the hand, with models weighing up to 30% less than other brands
- Intuitive operation: Color-coded pipetter and tip matching system for easy identification
- Minimal user exertion: Minimize stress; manual models require up to 50% less pipetting force
- Simple maintenance: Easy to clean, autoclave and repair
- Total support: Certified and ready to use; calibration services also available

MULTICHANNEL, AIR DISPLACEMENT

*Fisherbrand** Finnpipette* II Digital Multichannel Pipetters

Advanced pipetting performance in a lightweight, ergonomic design

- 8- and 12-channel pipetters, ideal for multiplate applications
- Patented minimum force allows tips to be ejected with just a gentle push
- Reverse pipetting mode allows pipetting of viscous and surface-active solutions
- Made from inert, biologically inactive polymers
- Easy to disassemble for routine maintenance and cleaning
- Serial number and calibration certificate included
- Easy, in-lab calibration

21-377-830

Superior Design

- Rounded hand grip and modified grippy finger rest ensure secure grip and correct pipetting angle; help minimize hand fatigue
- Large digital display is easy to read, even when pipetting
- Large color-coded knob makes it easy to set and identify desired volume; fast-dial system allows 0.1µL fine adjustment
- Separate soft-touch tip ejector relieves hand stress, prevents accidental detipping
- Super blowout feature on micro models ensures highest level of accuracy and precision at low-volume settings

ORDERING INFORMATION:

For optimum performance, use Fisherbrand SureOne*, Fisherbrand SureFit* Ergo F tips or Thermo Scientific* Finntip* pipet tips. Also compatible with the following Fisherbrand tips: Redi-Tip* Pipet Tips, Standardization, Low Retention, Micro Tips, SureSeal* Barrier Tips, Aerosol Barrier Tips, Large Orifice, Gel Loading, Stack Rack Space-Saver, and SureGrip*.

Thermo Scientific* Finnpipette* Focus Plus Multichannel Pipetters

Speed up repeat dispensing of reagents into microplates

Available with 8, 12, or 16 channels in 1-10, 5-50 and 30-300µL volume ranges.

- Outstanding accuracy and precision
- Super blow-out for 0.1-10µL volumes
- Comfortable, ergonomic design; same advantages as the Finnpipette Focus single-channel pipetter
- Grippy finger rest lets pipetter balance at optimum pipetting angle
- Soft, snap-on handle can be selected from three sizes: small, medium, or large
- More comfortable and less tiring over long periods of repetitive pipetting
- Soft-touch tip ejection requires less effort
- Fully autoclavable

ORDERING INFORMATION:
For use with Thermo Scientific Finntip* tips. Also compatible with all Fisherbrand* universal-fit tips, Large Orifice, Large Orifice/Genomic Aerosol Barrier, and Low Retention tips.

WARRANTY:
Three years

Thermo Scientific* Finnpipette* Digital Multichannel Pipetters

Ideal where sterility in liquid handling is a must

- Set volume by turning the thumb button and observing the big digital display—no scales to align
- Thumb button is color coded according to volume range
- "Super-blow-out" feature on microvolume models (Cat. Nos. 21-377-198 and 21-377-365) prevents capillary action and ensures clean delivery of micro-sized drops; provides greater accuracy/precision of low-volume deliveries, and less waste of expensive reagents
- Tips can be ejected with just a gentle push, thanks to an innovative gearing mechanism
- Fully autoclavable (no disassembly required)
- Marked with a serial number to aid in traceability, and supplied with calibration certificate to verify accuracy and precision
- Can be recalibrated in the lab using supplied tools

Design

- Lightweight construction and rounded hand grip help prevent hand fatigue
- Tip ejector is separate from the operating button to prevent accidental detipping
- Modified "grippy" finger rest ensures correct pipetting angle
- Can be easily disassembled for routine maintenance or cleaning
- Clear plastic window on top of finger rest covers an adhesive label where you can write your name or other identifying information

ORDERING INFORMATION:
Microvolume models accept Thermo Scientific Finntip* Micro tips; all other models accept Thermo Scientific Finntip Universal and Finntip 300 tips. Also compatible with all Fisherbrand* universal-fit tips, Fisherbrand Sure One*, Fisherbrand Sure-Fit* Ergo F, Extended Length, and Large Orifice tips. Storage stand is available (Cat. No. 21-377-206).

INCLUDES:
Rack of 96 Thermo Scientific Finntip 300 tips (except the microvolume models which include a rack of 96 Thermo Scientific Finntip Micro tips); four reagent reservoirs (two V-shaped, two 8-channel); 96-well Cliniplate* microplate; stick-on hanger that lets you store pipetterwithout needing a stand—on any lab surface with a square edge such as a shelf or benchtop.

ppendorf Research* Multichannel Pipetters

eal for applications in immunology, cell culture, serology

vide high performance and reliability in a multichannel format from 0.5 300µL. Innovative design features make everyday use more efficient, nfortable and strain-free.

atures

esigned with reduced operating forces

arger, separate tip-ejector button

lanifold can be rotated 360° to let user find the most omfortable pipetting position

ounded grip, reshaped operating button and onger hand rest for better, more ergonomic andling

ower portion of pipetter can easily be emoved, cleaned and autoclaved

13-688-501

pendorf PhysioCare Concept* teria focuses on all relevant aspects pipetting—the whole person and ocess, not just the hand or device.

tegrated systems: Complete pipetter and p program to fit any application

xceptional durability: Made of state-of-the-art materials

ptimized form and function: Easy operation through all work steps

erfectly balanced: Fit comfortably in the hand, with models weighing up 30% less than other brands

- ▶ Intuitive operation: Color-coded pipetter and tip matching system for easy identification
- ▶ Minimal user exertion: Minimize stress; manual models require up to 50% less pipetting force
- ▶ Simple maintenance: Easy to clean, autoclave and repair
- ▶ Total support: Certified and ready to use; calibration services also available

ORDERING INFORMATION:

Compatible with Eppendorf pipet tips (epTIPS). Also compatible with all Fisherbrand* universal-fit tips, Extended Length, Gel Loading, Large Orifice and Low-Retention tips. Pipetters are color coded (operating button and volume display) to make it easy to recognize tip sizes in color-coded Eppendorf tip racks.

ELECTRONIC PIPETTER FEATURES TO CONSIDER

Ease of Use—Intuitive menu and simple button layout are features that allow you to rapidly pro begin using the pipetter. Full graphical display ensures that there are no errors in selecting the app ate pipetting function. The ability to store programs that are commonly used enables fast and effi pipetting for every task. If English is a second language, multilingual options eliminate the chanc programming errors.

Bright and Clear Display—By eliminating surrounding light reflections and improving contrast light conditions such as safety cabinets and fume hoods, backlit displays ensure that the high-res menu characters are shown with more clarity.

Ergonomics—Repetitive strain injuries (RSI) are more common today than ever before. Electronic pipetters allow you to minimize the chance of RSI.

- Trigger action pipetting and adjustable finger rest ensure the most efficient pipetting position.
- Lightweight construction also helps prevent upper body stress and strain, a you to work longer without fatigue.
- Soft touch tip ejection mechanisms lower the force required to eject tip increasing the ergonomics of the pipetter.

BEFORE YOU BUY ELECTRONIC PIPETT

Service and Calibration—Maintaining your electronic pipetter c a time consuming and costly event. Selecting an electronic pipett allows you to do your own service and calibration will eliminate additional cost of owning the pipetter.

Warranty—Electronic pipetters are an investment that you ensure are protected by the best warranty possible. Most electronic pipetters carry a one-year warranty with th exception of the Novus pipetter which has a two-year warranty.

isherbrand* Electronic Pipetters

lectronic tip ejection combined with unique rgonomic design

ser-friendly design takes the effort out of pipetting and duces the risk of work-related upper limb disorders at are common in mechanical pipetting. Choose single, and 12-channel models in a variety of volume ranges.

- Clear LCD readout and easy-to-use keypad
- Electronic tip-ejection buttons, located for eft- or right-handed operation, eliminate tip release pressure
- User-programmable modes, storable routine pipetting protocols, and fully adjustable speed settings for all operations
- Electronic start button activates all piston actions, educing strain on thumb joints and carpal tunnel
- Computerized drive system lets you work more efficiently than with mechanical or other electronic pipetters
- Replaceable tip cone filter on most models helps minimize risk of internal contamination
- Operations include pipetting, reverse pipetting, pipetting with mixing, pipetting with cycle counter, manual pipetting, multi-dispensing, diluting, diluting with mixing, sequential dispensing, multi-aspirating, and automatic multi-dispensing
- Can be charged using single-pipetter charging stand, four-pipetter carousel charging stand, or AC-charging adapter; replacement NiMH battery packs are available

21-165-81

DERING INFORMATION:

adapter and charging stand sold separately. Compatible with all herbrand universal-fit tips.

Thermo Scientific* Finnpipette* Novus Pipetters

Combine simplicity, comfort and functionality in an exceptionally intuitive, ergonomic design

Features

- Clear, easy-to-read, menu-driven display for instant usability
- 10 pipetting options; nine aspirate/dispense speeds
- Functions include forward, reverse, diluting, stepper pipetting, mixing, sequential stepping and more
- Programmable for your own custom applications
- Backlight technology eliminates surrounding light reflections and improves contrast in low-light conditions

Ergonomic Design

- Extremely lightweight construction
- Adjustable finger rest for balance and comfort
- Trigger-action pipetting—index finger controls dispensing with just a soft press of a button
- Soft-touch tip ejection minimizes thumb strain; can be operated by either hand
- Easy in-lab calibration for accuracy and precision
- Fully autoclavable tip cone ensures sterility and avoids cross-contamination
- Long-life battery allows approximately 4000 pipetting operations; recharged in about one hour

ORDERING INFORMATION:
For use with Thermo Scientific Finntip* pipet tips. Also compatible with all Fisherbrand* universal-fit tips.

ppendorf Research Pro* Pipetters

ovide a variety of programmable application parameters, while still remaining simple to use and easy to handle

- eadily programmable modes allow the user to achieve accurate and recise results for all applications
- ndividual aspiration and dispensing speeds can be programmed for each pplication
- ipetting Mode allows the user to perform standard pipetting functions vith a variety of options (reverse pipetting, blow-out, manual pipetting, nd rinsing)
- ixed-Volume Mode allows the user to program up to five of their most ommonly used volumes for quick recall
- ispensing Mode provides repetitive dispensing of a constant volume
- ipetter can store up to five programs containing specified pipetting nd dispensing sequences
- ser-calibratable; ideal for use with solutions of differing viscosities

sign

- asy-to-read display screen is set at a 45° angle for quick reference, and ll controls are large and easily accessible
- ocker switch controls volume and speed options
- ibbed handle makes the pipetter easy to grip
- eparate tip ejection lever can be adjusted for left- or right-handed users
- ower half of the pipetter is removable and autoclavable

ORDERING INFORMATION:

For use with Eppendorf Geloader* tips, epTIPS tips. Compatible Fisherbrand* tips include: all universal-fit tips, Extended-Length, Gel-Loading Aerosol Barrier, Large Orifice, Low Retention, SureOne*, SureGrip*, and Aerosol Barrier.

Available with or without charger. Charger easily attaches to the top portion of pipetter and ensures that battery is charged when connected.

Note: If purchased without a charging unit, a single or four-place charging stand must be purchased.

INCLUDES:

Rechargeable NIMH battery

21-378-90 (tips not included)

REPEATING, POSITIVE DISPLACEMENT

Thermo Scientific* Finnpipette* Stepper Pipetter

Lightweight, easy-to-use repeater pipetter—designed for one-handed dispensing

- Makes up to 45 deliveries before refilling is necessary
- Positive displacement design ensures accurate results, even for viscous, volatile, or other problematic liquids
- Lightweight, ergonomic handle and wide "grippy" finger rest minimize operator hand strain
- Operation is simple—just attach the appropriate tip size, fill and prime the tip, and dial the selected volume
- Volume is easy to set, with the aid of the convenient volume-setting chart located on the handle and duplicated here (see Volume Setting Chart for Thermo Scientific Finntip* Stepper tips, p. 1443)

21-377-147

ORDERING INFORMATION:

Universal Stepper handle is also available with an eight-channel module. For convenient storage of the Stepper Pipetter, see Pipetter Stand 14-387-14 on p. 1405.

INCLUDES:

Unit comes with one adapter (nonsterile) necessary for use with 25 or 50mL tips.

REQUIRED ACCESSORIES:

Uses the Thermo Scientific Finntip Stepper tip, a plunger-style tip available in nonsterile or sterile (individually wrapped) form. This tip comes in seven sizes from 0.5 to 50mL, each with five different delivery volumes, for an overall dispensing range of 10 to 5000µL. Only the disposable tip comes in contact with the sample, eliminating the risk of contaminating the pipetter body.

Thermo Scientific* Finnpipette* Multistepper Pipetter

Reduces the risk of error and increases productivity in immunoassay applications

Eight-channel air-displacement pipetter, designed especially for work with microplates. Easy to use—simply attach, fill, and prime the module and dial the selected volume.

- Delivers 50, 100, 150, 200, or 250µL[†]
- With a single loading, it can deliver 24 × 50µL=192 wells, 12 × 100µL=96 wells, 8 × 150µL=64 wells, 6 × 200µL=48 wells, or 5 × 250µL=40 wells
- All eight channels are calibrated to simultaneously dispense exactly the same volume of liquid
- Pipetter capacity: 1250µL
- Accuracy: ±5.0 to 2.0%; precision: 5.0 to 2.0%[‡]
- Handy volume chart on the handle lets you know the maximum number of deliveries possible at a given volume setting

Design

- Universal handle also fits the seven single-channel Thermo Scientific Finntip* Steppers
- Lightweight construction minimizes hand fatigue during repetitive dispensing
- Separate tip ejector for safe and effortless tip disposal
- Wide "grippy" finger rest minimizes operator hand strain

21-377-370

ORDERING INFORMATION:

Accept Thermo Scientific Finntip Multistepper* 1500µL tips. They are ext long, with more air space between the liquid and tip cone to prevent contamination.

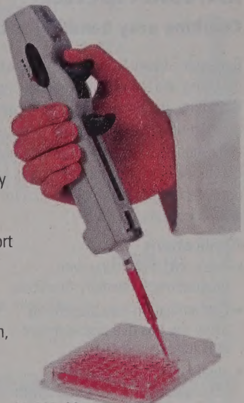
Brand* HandyStep* Repeating Pipetter from BrandTech*

Compatible with all standard repeating pipet tips

- Makes serial pipetting quick and easy
- Perfect for filling individual wells in microtiter plates
- Delivers up to 49 repetitive dispensings from a single aspiration
- Positive displacement mechanism is ideal for dispensing difficult samples such as foaming, viscous, high density or high vapor pressure liquids—can also be used for routine dispensing
- Ergonomic shape contoured for comfort
- Durable construction
- Easy to operate
- Five settings to control dispensing volume; a dispensing lever for smooth, consistent dispensing; and a rugged, multifunction lock/filling lever for trouble-free operation



03-837-30

ORDERING INFORMATION:

Tips must be purchased separately. Suitable for Brand PD-Tips* Disposable Tips; Fisherbrand* Dispenser Tips; Combitips* Tips; and Combitips Plus Tips.

ELECTRONIC REPEATING, POSITIVE DISPLACEMENT

Eppendorf* Repeater* Stream and Xstream Pipetter

NEW

Combine easy handling with a broad range of features

05-401-041

Repeater Stream is suitable for all standard pipetting and dispensing applications; for added versatility, the Repeater Xstream can also perform titrations, sequential dispensing and aspiration of supernatants. When used with Combitips Plus* tips, both systems form an unbeatable and essential lab tool for all applications.

Applications

- Electronic dispensing with programmable memory functions
- Contamination-free dispensing using the positive displacement principle
- Ideal for viscous solutions (e.g., glycerol, oil) or liquids with high vapor pressure (e.g., acetone, ethanol)
- Dispensing in long series

Features: Repeater Stream and Xstream

- Positive displacement dispensing and pipetting
- Automatic dispensing
- Rapid and ergonomic dispensing with motorized piston
- Single-button tip ejector
- Li-ion battery
- Function selection wheel
- Automatic Combitips Plus tip recognition
- IvD conformity
- Charging possible during operation

Brand* HandyStep* Electronic Repeatin Pipetter from BrandTech*

Combines all the benefits of a standard electronic repeating pipetter with broad tip compatibility

13-688-401
(microplate not includ

Ensures accurate and reliable pipetting and dispensing of many liquids for pharmaceutical, industrial and research laboratories.

- Dispenses volumes from 1.0µL to 50mL, including traditional and nonstandard volumes such as 9.2, 25, 260, 1250µL and more
- Operates in three different modes: single-volume pipetting; repeat dispensing; and Autodispense mode
- Autodispense mode detects operator dispensing rhythm for the first three dispensings, then continues to dispense at that interval for as long as the dispense button is pushed—no time-interval preprogramming required
- Aspirating and dispensing speeds are independently adjustable to en optimal accuracy with different liquids
- Large, easy-to-read LCD readout facilitates referencing of volume, operating mode, dispensing/aspirating speeds, battery charge, and remaining dispensings during operation
- Automatically recognizes and displays the size of Brand PD-Tips* dispenser tips upon insertion; if using alternative tips, just scroll to input the correct tip size
- Lateral tip recognition system ensures long-term reliability
- Motorized design ensures effortless operation, reducing hand strain and error
- Comfortable for use with either hand

Brand* Transferpettor* Positive Displacement Pipetters from BrandTech*

Accurately pipet high-viscosity, high surface tension, and high vapor-pressure liquids

Ideal for oils, glycerins, solvents, protein solutions, or ether. Handle difficult-to-pipet media such as viscous, foaming, or high vapor pressure liquids with precision and accuracy. Four color-coded models cover range from 100μL to 10mL.

- Tightly fitted piston with seal is in direct contact with the aspirated liquid so results are reproducible
- Walls are wiped clean to the last drop, and tips can be used repeatedly
- Accuracy: ≤±0.5%
- Reproducibility: ≤0.2%

13-688-121

INCLUDES:

One tip and one seal; additional tips are available

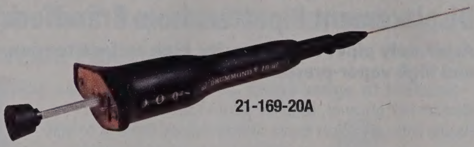
Drummond* Digital Microdispensers



21-169-20A

Positive displacement piston eliminates source of errors found with air displacement types

One-hand-operated positive displacement pipetter with digital reading of delivery volume to 0.01, 0.1, or 1.0µL. Five adjustable models cover volume range 0.01 to 1000µL.

- Adjustable to any volume within capacity rating
- Easy-to-set micrometer-type barrel for exact setting of volume to be pipetted
- Accuracy to ±1% at full volume
- Machined slot in barrel allows visual check for glass bore seating
- Color-coded calibration mark on bore lines up with plunger at full-capacity setting
- Stainless-steel plunger in 10µL size; all others are TFE
- Use with all reagents (except hydrofluoric acid)

ORDERING INFORMATION:

See replacement glass and plastic bores. Microdispenser 21-169-10A converts to a multichannel dispenser with the addition of a stainless-steel manifold.

INCLUDES:

Microdispenser 21-169-20D is supplied with 50 glass bores; 21-169-10A is supplied with 7 polypropylene bores; all other models supplied with package of 100 glass bores.

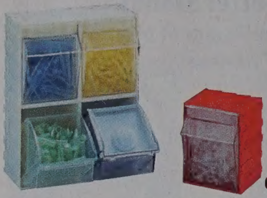
Brinkmann* Pipet Tip Storage Boxes

Organizer for small laboratory items, including pipet tips, microcentrifuge tubes, filters, vials, stir bars, and stoppers

- Transparent inner compartment allows quick product identification, tilts out for filling or cleaning
- Tight-fitting polypropylene lid
- Both nonautoclavable and autoclavable boxes available; autoclavable boxes are ideal for sterilizing and storing consumables
- For space savings, boxes can be connected or wall mounted

ORDERING INFORMATION:
Approximately the size of a 600mL beaker: 6½L × 4¾W × 5¼"H (16.5 × 12.1 × 13.3cm).



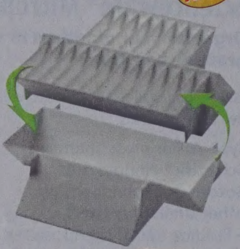
03-491, 03-492

Style	Color	Mfr. No.	Cat. No.	Case o
Nonautoclavable	White	22 36 453 7	**03-491**	56.
Autoclavable	Orange	22 36 455 3	**03-492**	86.

*Fisherbrand** Autoclavable Pipet Basins

Eliminate the need for multiple reagent containers—save bench space

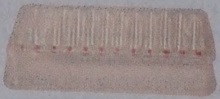
V-shaped basins facilitate easy withdrawal of sample solutions. Numbered chambers ensure accurate sample reference. Chemical-resistant polypropylene.



13-681-802 on the 8- and 12-channel compartment side

12-Channel Pipet Basins

- Designed for serial dilutions or pipetting individual reagents using up to a 12-channel pipetter
- Each chamber holds up to 5mL
- Withstand temperatures from -80° to +121°C (-144° to +218°F)
- Tight-fitting lid minimizes evaporation or contamination during incubation or storage
- Sterile or nonsterile; individually wrapped in easy-open bags
- L × W × H: 5 × 2¼ × 1" (12.7 × 5.7 × 2.5cm)



13-681-800

Multichannel Pipet Basin

- Unique design features three separate compartments: a 50mL single compartment with graduation marks at 10, 25, 40, and 50mL on one side; on the other side, an 8-channel compartment with eight 5mL reagent channels, and a 12-channel compartment with twelve 5mL reagent channels
- 5mL channels are numbered for easy reagent identification
- Use with all brands of multichannel pipetters
- Also ideal for filling multitube blocks and plates
- L × W × H: 4¾ × 4½ × 1" (12.1 × 11.3 × 2.5cm)

*Fisherbrand** Disposable Pipet Basins

Disposable basins are convenient, allowing fast cleanup

- Printed graduations for more accurate filling
- Easy-pour corners for quick disposal of excess sample solution
- Nonsterile basins are constructed of clear PVC
- Gamma-irradiated sterilized basins are made of natural polystyrene
- Packaged in easy-to-open "Snap Smartly" bags to reduce contamination risks
- Extended writing surface for product I.D.

50mL Basins

- Angled sides and V-shaped bottom permit easy withdrawal of sample solution
- Use with APET plastic lids (L × W × H: 5⅜ × 2½ × ½" [13.7 × 6.4 × 1.3cm]) to allow easy sample observation without exposing solution
- L × W × H: 5¾ × 2¾ × 1" (14.0 × 7 × 2.5cm)

100mL Basins

- Versatile design allows ample clearance for all types of 4-, 8-, and 12-channel pipetters
- Ideal for extended multichannel pipetting into microtiter plates, tubes, and deep-well blocks
- L × W × H: 5¾ × 3½ × 1¼" (14.6 × 9 × 3.2cm)

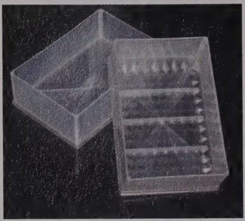
Nalgene* Disposable Robotic Reservoirs

Single-use, disposable reservoirs increase efficiency and minimize cross-contamination in automated life science applications



12-565-573

- ▸ Polypropylene construction withstands robotic liquid handling, making it easier to run automated assays and increasing walk-away time
- ▸ Compatible with most robotic arms, plate stackers (hotels), plate cranes, and platform configurations
- ▸ Reservoir volume is 300mL (345mL brim capacity), with molded-in graduations every 100mL
- ▸ Nestable, for easy automated stacking and handling
- ▸ Accept bar-coded labels on two sides
- ▸ Available sterile and nonsterile with flat bottoms or with convoluted bottoms that minimize dead volume
- ▸ Flat-bottom configuration can be used with single-, 6-, 12-, 96-, 384-, and 1536-well formats
- ▸ Convoluted-bottom design is most effective with a 96-well format

APPLICATIONS:

Molecular biology, immunology, drug discovery, biochemistry, molecular diagnostics, quality control, and cell/tissue culture

ORDERING INFORMATION:

Dimensions: 3⅜L × 5W × 1¾"H (86 × 128 × 43mm).

COMPLIANCE:

Conform to the ANSI* standard microplate footprint

*Fisherbrand** Redi-Tip* Pipet Tips

Redi-Tip Series

Redi-Tip Reference Tips

- Graduations at 10, 50 and 100µL; 10, 50, 100 and 200µL; or 250, 500 and 1000µL
- Allow visual, qualitative review of pipetting precision

Redi-Tip General-Purpose Tips

- For use with most 1–200µL and 201–1000µL single and multichannel pipetters
- Hinged racks can be stacked rack-on-rack
- Hinged closure on racks allows top lid to be partially open for steam penetration during autoclaving

Pipetter Compatibility

Universal fit for research grade pipetters.

*Fisherbrand** SureGrip* Pipet Tip Reload System

Full line of disposable pipet tips available in preloaded carriers for fast, easy loading into empty racks

Easy-to-use: just load the carrier into an empty pipet tip rack (reuse your old racks or purchase separately, below). Carrier locks onto rack with a quick, press-and-snap action. When empty, recycle or dispose of the carrier and reuse the rack.

- Compatible with most manufacturers' racks
- Reduces waste by 80%

05-408 Series SureGrip Reload System

Pipet Tips in Racks

- All tips are available racked in sturdy, reusable CellRacks
- Withstand numerous autoclave cycles
- Keep tips aligned for pipetter mounting

Several Tip Sizes Available

- 10µL pipet tip has graduation marks at 2µL and 10µL
- 10µL Long Reach tip features extended length (45mm) to reach the bottom of tubes without contaminating pipetter shaft, and graduation marks at 2µL, 5µL and 10µL
- 200µL pipet tip features a soft-fit collar for easy mounting and ejection, and graduation marks at 10µL, 50µL and 100µL
- 1250µL pipet tip features an extended length (103mm), racked on 9mm centers (multi-channel compatible), and graduation marks at 200µL, 500µL and 1000µL

ORDERING INFORMATION:

Each pack consists of 10 preloaded tip carriers of 96 tips each.

CERTIFICATIONS:

Certified DNase, RNase, Human DNA and PCR inhibitor free

*Fisherbrand** Stack-Rack Space-Saver Tips

Increase limited bench space

- Racks nest together with each rack serving as a lid for the rack below
- Rack packs contain five racks of tips, with a base and dust cover
- Available in 5 × 96, 5 × 100, or 5 × 200 formats

hermo Scientific* Finntip* Pipetter Tips

utoclavable, chemical-resistant tips, made of gh-quality polypropylene

- Smooth, uniform surface prevents liquid retention
- Volume range from 0.2µL to 10mL
- Available sterile or nonsterile
- Packaging options include racks, bags, bulk, and refill packs
- New colorful rack design with color-coded trays (see Color Code in ordering chart below)

Pipet tips are not shown to scale.

Thermo Scientific* Finntip* Filtered Pipet Tips

Sterile, disposable tips available in standard, digital, 16-channel and multichannel versions

- Fit most common 0.2µL to 10mL pipetters
- Ideal for PCR amplification applications and for pipetting radioactive, infectious, and aerosol-emitting samples
- Inert and nonsealing polyethylene filter
- Tips come vacuum sealed in irradiation-sterilized hinged tip racks
- Not autoclavable

Pipetter Compatibility

Standard tips are available to fit most common 0.2µL to 10mL pipetters. New configurations available as well: 20µL tip for Thermo Scientific Finnpipette* Digital 2 - 20µL pipetter; 50µL tip for Thermo Scientific Finnpipette* 16-channel pipetter; and 300µL tip for multichannel pipetters. Universal fit accommodates most other research grade pipetters.

Pipet tips are not shown to scale.

Eppendorf* epTIPS

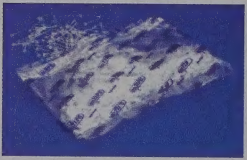
Reliable, reproducible, high-precision pipetting for a wide variety of applications

Pipet Tips

- Drop contour design
- Finely tapered and extended; ideal for small-volume pipetting
- Fine graduations make it easy to check volume
- Soft, flexible tip cone provides better seal to pipetter
- Manufactured under ISO-9001:2001-certified processes
- Available in Eppendorf Quality (for standard laboratory use) and Sterile (for all tissue culture and microbiology applications)

Packaging

- Packaging options include racks, refill trays (epTIPS Reloads), boxes, bulk packs (in resealable bags), individually wrapped tips, and sets (five refill trays and an epTIPS box)
- Box and refill trays offer simple, contamination-free handling
- Trays are color coded for easy volume identification
- Sturdy box design provides secure footprint—ideal for use with multichannel pipetters
- Environmentally friendly—all components of refills completely recyclable
- Refill trays can be autoclaved intact and stored for future use



05-403 Series

PIPETTER SPECIFIC

*Fisherbrand** Sure-Fit* Ergo-F Pipet Tips

Designed specifically for use with Fisherbrand pipetters

- RNase, DNase, and pyrogen free
- Available in three capacities, with or without aerosol barrier
- Unique wall design provides an extra-strong seal
- Require minimal ejection force

Pipetter Compatibility

For use with, but not limited to:
BrandTech* Transferpette*
Eppendorf* 3130, Eppendorf Reference* 2000, Eppendorf Research* 2100
Thermo Scientific* Finnpipette* Digital
Mettler Toledo VoluMate*
Nichiryo-Nichipet EX
Pipetman*
Rainin*
Socorex* Fixed Volume, Calibra*
Titertek* Digital

Thermo Scientific* Finntip* Extended Tips

Designed for extremely narrow or deep vessels

- Autoclavable, chemical-resistant tips, made of high-quality polypropylene
- Smooth, uniform surface prevents liquid retention
- Available sterile or nonsterile
- Packaging options include racks, bags, and boxes
- New colorful rack design with color-coded trays (see Color Code in ordering chart below)
- Finntip 200 Extended is an extra-long tapered tip that fits in extremely narrow vessels
- Finntip 1000 Extended is ideal for use with longer tubes and other deep vessels

Pipetter Compatibility

For use with Thermo Scientific Finnpipette* Focus, Fisherbrand* Finnpipette II, and most other pipetter brands

14-386-54

Range	Length	Packaging	Color Code	Mfr. No.	Cat. No.	Pack of
Finntip 200 Extended

Pipet tips are not shown to scale.

Filter Tips

For applications requiring a longer tip

- Ideal for PCR amplification applications and for pipetting radioactive, infectious, and aerosol-emitting samples
- Inert and nonsealing polyethylene filter
- Come vacuum sealed in irradiation-sterilized hinged tip racks
- Not autoclavable

Pipetter Compatibility

Thermo Scientific* Finnpipette* Focus, Fisherbrand* Finnpipette, and most other pipetter brands

Volume	Length	Packaging	Mfr. No.	Cat. No.	Case of

APPLICATION SPECIFIC — GEL LOADING

*Fisherbrand** Premium Plus Gel-Loading Tips

Narrow delivery orifice dispenses the complete sample to well bottom for higher quality data—ideal for gel electrophoresis

- Easily access bottom of narrow vessels and gel wells
- Universal fit
- Graduated marks for quick volume checks
- Certified DNase-, RNase-, and human DNA-free

Match O.D. to Gel Thickness

- Round 0.57mm O.D. tips are recommended for loading gels ≥0.6mm thick—great for SDS Page and 2-D gels
- Flat tips are recommended for gels up to 0.4mm thick
- Use flat 0.37mm O.D. tips for 0.4mm thick PAGE sequencing gels; flat 0.17mm tips for 0.2mm DNA sequencing gels

MultiFlex Tips

- ▶ 0.5 to 200µL volume
- ▶ Fit research-grade pipetters
- ▶ 83mm long
- ▶ 5µL graduation

MiniFlex Tips

- ▶ 0.1 to 10µL volume
- ▶ Fit ultra-micro pipetters
- ▶ 45mm long
- ▶ 2µL graduation

APPLICATION SPECIFIC—LOW RETENTION

*Fisherbrand** Low-Retention Pipet Tips

Help minimize sample retention

- Certified RNase, DNase, and DNA free
- Precise sample delivery
- Hydrophobic tip reduces loss of sample from adhesion to tip interior
- Natural color

Pipetter Compatibility

Universal fit for research grade pipetters unless otherwise noted.

IMPORTANT TERMS TO KNOW

Positive Displacement—The piston is located within the disposable tip, and it's the movement of the piston that draws the liquid into the tip.

Reverse Pipetting—In contrast to conventional pipetting, when aspirating the fluid, the button is pressed to the second position to include the blowout. This allows for a greater volume of fluid to be aspirated into the tip, which can be beneficial when using liquids that have high viscosity or tend to foam and/or bubble.

Aerosol—A "mist" of very fine droplets of liquid that remain in the air when aspirating.

CONSIDER SPECIAL REQUIREMENTS

Repetitive dispensing— A specified volume is continually delivered from a previously aspirated volume. In the case of handheld pipetters, it provides a very precise number of deliveries of a preselected volume into a large number of vessels and plates.

Electronic pipetters—These semiautomatic handheld devices have all the functionality of their "manual" counterparts, plus their volumes are controlled by a motorized piston, they are programmable and adjustable, designed to provide highly reproducible dispensing and reduce the fatigue associated with constant and repetitive arm/thumb movements.

Sequential dispensing—The dispensing of different volumes in a predetermined sequence, up to the maximum volume of the tip.

e quality tips. Pipet tips should be
ecisely shaped to ensure pipetting
curacy, and they must be designed
that even the tiniest drops of
uid can be dispensed accurately.
ecially designed tips with built-in
ers provide the ultimate level
protection against cross-
ntamination of samples.

PhysioCare concept

FEATURES TO LOOK FOR

Ergonomic—When products, tasks and environments optimally "fit" the person involved. For example, an ergonomic pipetter makes repetitive daily dispensing physically (and often mentally) easier and more comfortable.

Autoclavable—This thermal process of sterilization subjects a pipetter, for example, to 121°C, 100kPa for 20 minutes, which destroys microorganisms as well as inactivates viruses and enzymes.

Durability—Your pipetter should be made of the highest quality materials and backed with a good warranty that covers all parts. This helps ensure that your pipetter is robust enough to handle the rigors of everyday usage and decontamination.

(In)Accuracy & (Im)Precision—Accuracy points to the amount of scatter that a pipetter varies from its setpoint, while precision points to the scatter around its mean value. Minimizing these two parameters will produce the highest quality samples and readings.

From the earliest piston-stroke pipetter to the latest in automated liquid handling, Eppendorf is there to handle all of your dispensing needs.

APPLICATION SPECIFIC—PCR CLEAN

Eppendorf* epTIPS, PCR Clean

Nonfilter Tips

For all molecular biology applications

Features

- Free of human DNA-, DNase-, RNase- and PCR inhibitor-free
- Drop contour design at tip provides better tip sealing
- Finely tapered and extended; ideal for small-volume pipetting
- Fine graduations make it easy to check volume
- Soft, flexible tip cone provides better seal to pipetter
- Manufactured using ISO-9001:2001-certified processes

epTips Racks

Packaging

- Refill trays offer simple, contamination-free handling
- Trays are color coded for easy volume identification
- Environmentally friendly—all components of refills completely recyclable
- Refill trays can be autoclaved intact and stored for future use

APPLICATION SPECIFIC—REPEATER

*Fisherbrand** Dispenser Tips

Dispense from 8 to 48 times without refilling

- Designed exclusively to fit Eppendorf* Repeater* Pipetter
- Ideal for accurately filling a large number of sample tubes with a variety of sample volumes in minimal time
- Polypropylene tips with inner plunger of polyethylene (except 0.05mL tips which feature a stainless-steel plunger) provide adequate chemical resistance
- Large liquid reservoir stores the entire liquid volume indicated by tip's size
- Each tip permits selection of five different dispensing volumes by simply turning the dial on the Repeater Pipetter
- Reservoir graduations allow easy monitoring of liquid levels
- Long, thin shape of tips makes it easy to draw samples into liquid reservoir—even from narrow-neck containers
- Sample never comes in contact with pipetter

ORDERING INFORMATION:

Available in nonsterile or presterile packaging options.

Eppendorf* Combitips* Plus Pipet Tips

Reliable results ensured by positive-displacement system

Tips function according to the positive-displacement principle, ensuring that the correct volume is dispensed with regard to the density and viscosity of the liquid used. The positive displacement system provides safer dispensing of radioactive and toxic substances as well as solutions with high vapor pressure. No aerosols are formed.

- For use with Eppendorf Repeaters* (original, Plus, Pro, stream and Xstream); and EDOS (automatic dispensing system)
- Available in nine volumes from 0.1 to 50mL
- Fine tip of Combitip provides exact dispensing without additional pipet tip
- Polyethylene plunger and polypropylene cylinder make these tips ideal for use with aggressive reagents
- Choose from sterile and nonsterile Combitip Plus Tips and Eppendorf Biopure* tips, which are certified sterile as well as pyrogen-, RNase-, DNA-, and ATP-free

Brand* PD-Tip* Disposable Syringe Tips from BrandTech*

Syringe tips to fit common repeating pipets

- Made of high-density polyethylene and polypropylene (polypropylene and liquid crystal polymer for 0.1mL size) without lubricants or additives that can contaminate samples
- Tip size is automatically recognized by HandyStep* electronic and AutoRep E
- Available in nonsterile and Bio-Cert* sterile
- Bio-Cert tips are independently certified free from DNA, RNase, ATP and endotoxin for critical biological applications

ORDERING INFORMATION:

Pipetter Compatibility: For use with Brand HandyStep*, HandyStep Electronic, Eppendorf* Repeater*, Ripette*, Rainin* AutoRep* E, AutoRep M, Nichipette Stepper*, and most standard repeating pipetters.

Bottom to top: 13-688-420, 13-688-362 through -368

INCLUDES:

Adapter is supplied with 25 and 50mL tips.

APPLICATION SPECIFIC—RNASE-/DNASE-FREE

*Fisherbrand** SureOne* Pipet Tips

New, improved Fisherbrand SureOne Reload system offers a full line of universal fit pipet tips in both filtered and nonfiltered configurations

- All racked sterile filtered and nonfiltered tips are shrink wrapped and certified free of RNase, DNase, DNA, ATP
- Pyrogen, PCR inhibitor and bioburden free
- All nonsterile racked and bulk nonfiltered tips are certified free of RNase, DNase, DNA
- Reload packaging format reduces plastic waste by 52%
- Unique reload packaging design saves 58% bench space vs. racked packaging
- Lot traceable—all inserts contain the Fisherbrand part number, tip volume, lot number
- Multichannel design; all inserts are 96 well format
- Reversible lid acts as a hinged rack or a lift-off lid
- Inserts are easy to place into and remove from rack
- Insert clips into rack for a very secure fit preventing spilling of tips

ORDERING INFORMATION:
Packaging options include bulk, rack, rack sterile and reload. Also available in convenient removable/stackable reload decks that snap into empty racks without the need for special tools or precision hole alignment (visit our Web site).

Pipetter Compatibility
Universal fit for research-grade pipetters

*Trademark. See Trademark Reference.

Fisherbrand* SureOne* Aerosol Barrier Pipet Tips

Nase-/RNase-free tips are also pyrogen-free

- Engineered for increased accuracy and reduced plastic waste
- Compatible with single-channel, multichannel, and electronic pipetters
- Sterile
- Filter eliminates aerosol cross-contamination without sealing or trapping samples
- Tips allow for noncontaminated sample recovery
- Not autoclavable

Pipetter Compatibility

Universal fit for research-grade pipetters

Eppendorf* epTIPS, Eppendorf Biopur*, Racks and Singles

For the most stringent laboratory requirements

- Sterile; RNase-, DNA-, ATP- and pyrogen-free
- Drop contour design provides better tip sealing
- Finely tapered and extended; ideal for small-volume pipetting
- Fine graduations make it easy to check volume
- Soft, flexible tip cone provides better seal to pipetter
- Manufactured using ISO-9001:2001-certified processes
- Available in racks or individually wrapped

eppendorf
Biopur

Pipetter Compatibility

All Eppendorf pipetters; can also be used universally with most other brands of research-grade pipetters

BP* and Pure* Pipet Tips

th MicroPoint* Tip Design

croPoint* design means the tip profile is nearly 50% smaller than standard blunt end tips and significantly more narrow than eled-end tips.

ame superior quality and performance as ART* tips, except without the barrier
rystal clear tips allow you to easily see transparent samples
eference marks on many MBP tips provide a quick and convenient guide to visually establish whether you are pipetting the desired volume of liquid
ll Pure tips are racked, presterilized and certified RNase-, DNase-, DNA- and pyrogen-free; other MBP racked and bulk tips are nonsterile and autoclavable
IBP and **Pure 10** tips are ideal for low volume samples
he extended length **Pure 10 Reach*** and **Pure 1000 Reach** prevent contamination of samples, tubes, and pipetters
IBP Ultra Micro and **Pure Ultra Micro** are also well suited for work with low-volume samples
IBP 200 and **Pure 200** are equivalent to the "Universal Yellow" tip and have a reference mark at 10µL

ART* Barrier Tips

Standard Tips with MicroPoint* and SoftFit* Design

- Presterilized and precision-molded tips with the patented ART self-sealing barrier
- Certified RNase-, DNase-, and pyrogen-free
- Guaranteed to prevent carryover contamination during aspiration and delivery of samples
- Ideal for use in genetic studies, forensics, PCR, and radioisotope sampling
- Available in numerous sizes and styles to meet all of your liquid-handling needs
- SoftFit design provides easy loading for a sure fit every time and easy ejecting for reduced hand fatigue

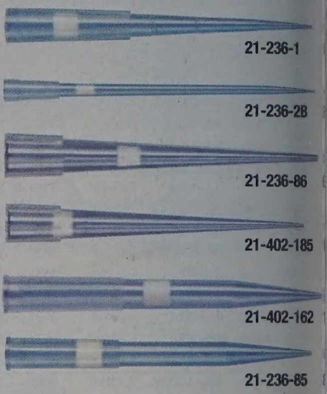
Pipetter Compatibility
Universal fit for research-grade pipetters



Pipet tips are not shown to scale.

SoftFit-L* Design for Rainin* LTS* LiteTouch* Pipetter

- SoftFit-L tips have thinner walls than conventional tips so they conform more easily to the pipetter barrel, which ensures a better seal and allows the tip to eject with less force
- MBP* tips are nonsterile; ART* and Pure* are sterile
- ART tips have a self-sealing barrier that prevents carryover contamination
- Racked

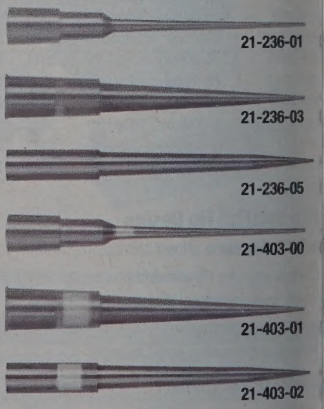
Pipetter Compatibility
Rainin LTS LiteTouch Pipetter; universal fit also accommodates most other research-grade pipetters



Pipet tips are not shown to scale.

APPLICATION SPECIFIC—ROBOTIC

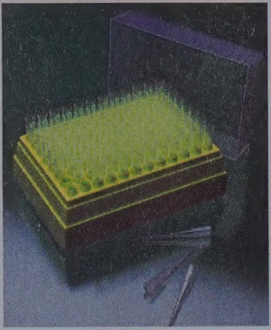
*Fisherbrand** Lab Automation Pipet Tips

isposable tips for robotic workstations—provide maximum performance, accuracy and reproducibility in laboratory utomation procedures

vailable in clear, blue tint, or carbon-black-conductive polypropylene. arbon-black, liquid-level-sensing tips are required by many automated ystems. They are constructed of a highly conductive material that is ecessary to detect presence or absence of sufficient liquid, in order to void short sampling and excessive submersion of tip during aspiration.

eatures

- Ideal for demanding HTS procedures
- Provide maximum performance, accuracy, and reproducibility in lab automation procedures
- Engineered to ensure proper fit and function with several standard and customized automated liquid-handling systems
- Choose tips in an assortment of volume sizes and styles



02-707 Series

MBP* BioRobotix* Pipet Tips for Automated Workstations

Compatible with a wide range of automated workstations

- Designed for maximum accuracy and repeatability
- Available in two colors: natural (clear) and black (liquid sensing)
- Constructed of premium-grade, virgin polypropylene
- Tips are rigorously tested on the systems for which they were designed

ART* Self-Sealing Barrier Tips

- Block contaminating liquids and aerosols from being drawn into your workstation; help maintain integrity of samples
- Sterile
- Reduce risk of cross-contamination

POLARIMETERS

lyscience Polarimeters

accurate determinations of optically active terials, such as sugar and protein

13-792, 13-793

ptically active material rotates as ht beam is passed through it; e polarimeters accurately sure such rotation in degrees. ier and magnifier directly ate the percent concentration.

curate to ±0.1° over 180° or 0° range using integral vernier

erpolation possible to 0.05°

ouding or slight coloration of test sample won't affect accuracy or clear servation of sample

rection of light beam rotation is easily determined from half-shadow sition—if half-shadow is on right, rotation is to right; if on left, tation is to left

larimeters accommodate measuring tubes of various lengths 0mm maximum)

bes have larger diameter at one end to collect air bubbles and prevent tical disturbance in measuring field

alogen source lamp enables instrument to make precise measurements er wide range of rotations and provides necessary monochromatic light combination with built-in orange filter (589nm)

models available:

alf-Circle Model comes with three-wire cord, halogen lamp, half-circle ale (0° to 90° right and left), magnifier and vernier for direct readings 0.1°, transformer, and one 8" (200mm) measuring tube

ll-Circle Model SR-6 includes three-wire cord, halogen lamp light urce, full-circle scale (0° to 180° right and left), magnifier and vernier for rect readings to 0.1°, transformer, and one 8" (200mm) measuring tube

ERING INFORMATION:

ensions (both models): 15L × 5W × 15"H (38 × 13 × 38cm). 115V 60Hz.

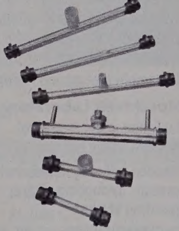
Bellingham & Stanley ADP220 Digital Polarimeter

Automatic digital polarimeter with improved optics and higher accuracy

13-645-45

- Resolution to 0.01°A
- Direct-read results can be output to printer or computer
- Push-button control for automatic read, print, scale change, zero setting
- Fixed probe monitors sample chamber temperature; second probe monitors sample temperature directly
- Selectable Angular Degree (°A) and International Sugar (ISS) scales; plus up to 5 user-defined scales
- Selectable response time: slow (~30 sec.) for high accuracy or with diluted or high-optical-density samples; fast (~5 sec.) for rapid checks
- Auto temperature compensation
- Accepts polarimeter tubes up to 220mm in length



13-645 Series Accessory Tubes

ORDERING INFORMATION:

Dimensions: (not including power supply): 5$^{15}/_{16}$ L × 11W × 2$^{5}/_{32}$"H (150 × 280 × 55mm). Net weight: 20 lb. (9.0kg).

Options include: Control Plates to verify accuracy; Water Jacketed Tubes for precise temperature control; Funnel Flow Tube for flushing previous sample away with new sample, eliminating cleaning; contact your Fisher Scientific Customer Service Representative for details, or visit our Web site.

INCLUDES:

Polarimeter, one straight center-filling tube (200mm), external temperature probe, instruction manual and external power supply (90 to 230V ±10%, 50/60Hz) for lower internal heat, rapid stabilization.

Description	Mfr. No.	Cat. No.	Each
ADP220 Automatic Digital Polarimeter	36-20	**13-645-45**	9855.00

SPECIFICATIONS

Ranges	-355 to +355°A/-255 to +255°Z ISS
Resolution	0.01°A/0.01°Z
Accuracy	±0.02°A/±0.05°Z
Light Source	LED with interference filter (589nm), 4mm dia. beam

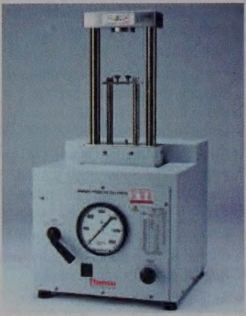
PRESSES

Thermo Scientific* IEC* French* Laboratory Press

Non-invasive technique for more uniform and complete cell disruption



05-112-158

Choose the Motor-driven Laboratory Press with either the Standard French Pressure Cell or the Miniature French Pressure Cell.

- Achieve higher pressures than with bombs or decompression systems
- Pressure cell disrupts cellular walls of sample while leaving the cell nucleus undisturbed
- No sample pretreating necessary

Motor-driven Laboratory Press

- Dual-range, single-control pressure selection
- Provides fully regulated working pressure throughout entire operating stroke
- Fine control of internal cell pressure expands system range for a variety of applications
- Three-position control and large, easy-to-read pressure gauge
- Power-driven return stroke and two pressure ratios permit precise settings at low pressure

Standard French Pressure Cell

- 35mL capacity, pressure up to 40,000psi
- Includes one package of 50 O-rings, one package of 50 backup rings, and one snap ring plier
- Requires Laboratory Press for operation
- Optional Rapid Fill Kit allows fast cell filling and processing of large sample volumes in less time; includes all components needed to mount into laboratory press

Miniature French Pressure Cell

- 3.7mL capacity, pressure up to 20,000psi
- Includes one package of 50 O-rings, one package of 50 backup rings, and one package of 100 nylon balls
- Requires Laboratory Press and Spacer (05-112-155) for operation

ORDERING INFORMATION:

Press Dimensions: 18¼L × 18¼W × 34½"H (46.4 × 46.4 × 87.6cm). Weight: 240 lb. (109kg). For 115V 60Hz.

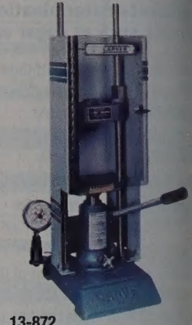
Carver* Lab Presses

Range of five automatic or manual models; clamping force up to 25 tons



13-872

Manual Pellet Press

- 12-ton clamping force unit with 4" (10.2cm) dia. platen
- Ideal for KBr pellet pressing, glove box applications, and onsite field testing
- Includes integral safety shield, buffer plates, 13mm evacuable die, and counter-bored platen for positive die alignment

Auto Pellet Press

- 25-ton self-contained, semi-automatic unit with 5" (12.7cm) dia. platen
- Rigid slab side construction maintains precise alignment
- Digital pressure display and three-stage decompress rate
- Includes integral safety shield and 13mm evacuable pellet die

Self-contained, Hand-operated Press

- 6 × 6" (15.2 × 15.2cm) work area and integral safety shield
- Dual-scale gauge calibrated in metric tons and pounds
- Adaptable for use in pressing oils, separating liquids from solids, filtering, plastic molding, compression and crush testing

Two-post 15-ton Presses

- Available with or without heated platens
- Self-contained, semi-automatic units with 6 × 6" (15.2 × 15.2cm) work areas
- Solid construction on one base frame
- 10-recipe storage of pressure and time settings
- Adjustable end-of-cycle alarm with auto opening of platens
- Can be operated in automatic or manual modes
- Model with heated platens can be ordered with manual cooling option

ORDERING INFORMATION:

Manual Pellet Press: Dimensions: 8L × 10¼W × 20¼"H (20.3 × 26 × 51.4cm). Weight: 115 lb. (52kg). **Auto Pellet Press:** Dimensions: 31½L × 22¾W × 22"H (80 × 57.8 × 55.9cm), not including handle. Weight: 400 lb. (181kg). **Self-contained, Hand-operated Press:** Dimensions: 16L × 15W × 36"H (40.6 × 38.1 × 91.4cm). Weight: 200 lb. (91kg). **Two-post 15-ton Presses:** Dimensions: 20L × 35W × 40"H (50.8 × 88.9 × 101.6cm). Weight: without heated platens, 350 lb. (159kg); with heated platens, 400 lb. (181kg).

Accessory cage equipment, heated platens, plate and cloth equipment, an swivel-bearing plates are available. Contact your Fisher Scientific Custome Service Representative or visit our Web site for details.

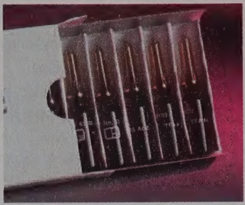
Thermo Scientific* Pierce* Trifluoroacetic Acid

Permits sensitive, nondestructive peptide detection at low UV wavelengths in reverse-phase HPLC protein and peptide separation systems



PI-28904

- Purity of 99.8%
- Exceptional clarity
- Also used in protein sequencing applications, solid-phase peptide synthesis, and as a protein/peptide solubilizing agent
- Packaged in amber glass with protective PTFE-lined fluorocarbon caps or in ampules under nitrogen

STORAGE CONDITIONS:

Store as detailed on product information sheet.

Grade	Quantity	Cat. No.	Each
Sequanal	500mL	**PI-28901**	269.00
	100g	**PI-28903**	112.00
	10 × 1mL	**PI-28904**	68.00

Promega* Trypsin Gold, Mass Spectrometry Grade

Manufactured to provide maximum specificity

Trypsin is a serine protease that specifically cleaves at the carboxylic side of lysine and arginine residues. The stringent specificity of trypsin is essential for protein identification. Native trypsin is subject to autolysis, generating pseudotrypsin, which exhibits a broadened specificity including a chymotrypsin-like activity. Such autolysis products, present in a trypsin preparation, would result in additional peptide fragments that could interfere with database analysis of the mass of fragments detected by mass spectrometry.

- TPCK treatment followed by affinity purification
- Each lot is qualified by mass spectrometry
- Conveniently provided in one vial
- Stability ensured up to five freeze-thaw cycles, thus minimizing leftover reagents

APPLICATIONS:

Tryptic digestion of peptides from 2-D gels

STORAGE CONDITIONS:

Store the lyophilized powder at -20°C. Reconstitute powder in 50mM acetic acid and store at -20°C. For long-term storage, freeze reconstituted trypsin at -70°C. Limit the number of freeze-thaw cycles to five.

Description	Quantity	Cat. No.	Each
Trypsin Gold, Mass Spectrometry Grade	100µg	**PR-V5280**	85.20

Promega* Sequencing Grade Modified Trypsin

Trypsin specifically hydrolyzes peptide bonds at the carboxylic sides of lysine and arginine residues. Unmodified trypsin is subject to autolysis, generating fragments that can interfere with protein sequencing, HPLC or mass spectrometry analysis of the peptides. In addition, autolysis can result in the generation of pseudotrypsin, which has been shown to exhibit an additional chymotrypsin-like specificity[1].

- TPCK treatment followed by affinity purification
- Resuspension buffer provided
- Five tubes of lyophilized product are provided

Component Listing for PRZV5111

- 1 × 1mL Trypsin Resuspension Dilution Buffer
- 5 × 20µg Sequencing Grade Modified Trypsin, Porcine (lyophilized)

Component Listing for PRV5113

- 1 × 1mL Trypsin Resuspension Dilution Buffer
- 5 × 20µg Sequencing Grade Modified Trypsin, Porcine Frozen (liquid 0.5mg/mL)

ORDERING INFORMATION:

Recommended Reaction Buffer: 50mM NH_4HCO_3 (pH 7.8).

STORAGE CONDITIONS:

Store lyophilized at -20°C.

Quantity	Cat. No.	Each
100µg	**PR-V5113**	33.20
5 × 100µg	**PR-ZV5111**	330.75

Takara* *Pfu* Pyroglutamate Aminopeptidase

Liberates the N-terminal pyroglutamic acid from proteins and peptides

Pfu Pyroglutamate Aminopeptidase is a thermostable pyroglutamate aminopeptidase isolated form *Pyrococcus furiosus* and produced as a recombinant protein. This enzyme liberates the N-terminal pyroglutamic a from proteins and peptides whose N-termini are blocked with pyroglutam acid residue. The N-terminal amino acid sequence of such proteins and peptides cannot be directly analyzed on protein sequencers based on Edm degradation. To analyze the N-terminal sequence of these proteins and peptides, the release of pyroglutamic acid is required and this can be effectively achieved by using *Pfu* Pyroglutameate Aminopeptidase.

- Ideal for deblocking of N-terminal pyroglutamates of proteins and peptides prior to sequence analysis using Edman degradation
- Source: *E. coli* carrying plasmids encoding the *Pyrococcus furiosus* pyroglutamate aminopeptidase gene
- Purity: ≥90% on SDS-PAGE
- Format: lyophilized
- Unit Definition: One unit of enzyme activity corresponds to the amount required to hydrolyze 1µmol pyroglutamate p-nitroanilide at 90°C in 1 minute, pH 7.0
- Reaction Buffer (5X): 250mM sodium phosphate (pH 7.0), 50mM DTT, 5mM EDTA

STORAGE CONDITIONS:

Store at -20°C.

Quantity	Cat. No.	Ea
10mU	**TAK 7334**	237.

PROTEIN LABELING AND DETECTION

QUANTITATION

Thermo Scientific* Pierce* BCA Protein Assay Kits

Faster and easier than the classic Lowry method

- Colorimetric method (read at 562nm) with less protein-to-protein variation than dye-binding methods
- Linear working range for BSA is 20 to 2000µg/mL
- Minimum detection level is 5µg/mL with the enhanced protocol
- Formulation is compatible with most ionic and nonionic detergents
- Protocol is adaptable to microplates

STORAGE CONDITIONS:

Working reagent is stable for 24 hours; all reagents are stable at room temperature for two years

INCLUDES:

Reagent A (also available separately); Reagent B (also available separate Ten 1mL ampules of Albumin Standard (2mg/mL)

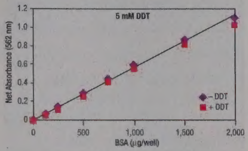
Prices subject to change.

ıermo Scientific* Pierce* Reducing jent Compatible BCA Protein Assay Kit

mpatible with reducing agents at concentrations utinely used in protein sample buffers



Reducing Agent Compatible BCA Protein Assay produces a linear standard curve in the presence of reducing agents.

vides all of the advantages of original BCA Assay, plus ıpatibility with reducing agents at centrations routinely used in tein sample buffers.

. Linear Working Range of 25-2,000µg/mL

ample Volume of 25µL

educing Agent Compatibility of : 5mM DTT, < 35mM -mercaptoethanol, < 10mM TCEP

ompatible with most ionic and nonionic detergents

olorimetric detection method; read at 562nm

:LUDES:

\ Reagent A (250mL); BCA Reagent B (25mL); Compatibility ıgent (10 × 20mg); Reconstitution Buffer 15mL; Albumin Standard g/mL, 10 × 1mL ampules)

:cription	Cat. No.	Quantity	Each
ducing Agent Compatible \ Protein Assay Kit	**PI-23250**	1 kit	190.70

ıermo Scientific* Pierce* Micro BCA* otein Assay Kit and Reagents

ecially formulated for measuring dilute otein solutions

xtra-sensitive reagent kit offers the same colorimetric-method dvantages as does the BCA Protein Assay Kit (PI-23225)

inear working range for BSA is 0.5 to 20µg/mL

rotocol is adaptable to microplates

:LUDES:

:ro BCA Reagent A (MA), 240mL; Micro BCA Reagent B (MB), mL; Micro BCA Reagent C (MC), 12mL; Albumin Standard (2mg/mL), × 1mL ampules

:cription	Quantity	Cat. No.	Each
:ro BCA Protein Assay Kit	480 tube or 3200 microplate assays	**PI-23235**	163.61
:ro BCA Reagent A (MA)	240mL	**PI-23231**	41.25
:ro BCA Reagent B (MB)	240mL	**PI-23232**	77.39
:ro BCA Reagent C (MC)	12mL	**PI-23234**	25.15

Thermo Scientific* Pierce* Modified Lowry Protein Assay Reagent Kit

The accuracy of the Lowry method in a ready-to-use formulation

- Uses a preformulated cupric sulfate-tartrate
- Yields linear results from 1 to 1500µg/mL for BSA
- Read at 750nm
- Produces less protein-to-protein variation than do dye-binding methods
- Adaptable to microwell plates

STORAGE CONDITIONS:

Reagent is stable for one year at room temperature.

INCLUDES:

Modified Lowry Protein Assay Reagent, 480mL; Folin-Ciocalteu Phenol Reagent (2N), 50mL; Albumin Standard (2mg/mL), 10 × 1mL ampules

Description	Quantity	Cat. No.	Each
Modified Lowry Protein Assay Reagent	480 tube assays or 2400 microplate assays	**PI-23240**	116.00

Thermo Scientific* Pierce* Prediluted BSA and BGG Protein Assay Standard Sets

Ideal for BCA and Bradford-based protein assays

- Eliminate the need to prepare a diluted standard series for each protein determination
- Provide seven data points within a 125–2000µg/mL range
- Contain sufficient materials to prepare 15–35 standard tube protocol curves or 175–350 standard microplate protocol curves running duplicate data points

INCLUDES:

BSA set contains Bovine Serum Albumin Fraction V diluted in 0.9% saline and preserved with 0.05% NaN_3 **BGG set** contains Bovine Gamma Globulin Fraction II diluted in 0.9% saline and preserved with 0.05% NaN_3

Description	Cat. No.	Each
BSA Set	**PI-23208**	98.00
BGG Set	**PI-23213**	94.00

Thermo Scientific* Pierce* Bovine Gamma Globulin (BGG) and Mouse IgG Standards

Ideal for IgG total protein determination

- BGG is an ideal standard for Coomassie* (Bradford) Assays
- Measures antibody concentration with any protein assay
- Ampules ensure product integrity

INCLUDES:

2mg/mL of Bovine Gamma Globulin Fraction II in 0.9% NaCl solution containing sodium azide

Description	Quantity	Cat. No.	Pack of 10
Bovine Gamma Globulin Standard	10 × 1mL	**PI-23212**	51.26

Thermo Scientific* Pierce* Bovine Serum Albumin (BSA) Standard

Ideal standard for total protein determination

- Sterile-filtered, stable and consistent
- BSA is an ideal standard for BCA Assays
- Ampules ensure product integrity
- 2mg/mL BSA solution

INCLUDES:

Ampules contain Bovine Albumin Fraction V in 0.9% NaCl solution containing sodium azide

Description	Quantity	Cat. No.	Pack of
BSA Standard	10 × 1mL (2mg/mL)	**PI-23209**	10/39.23
	50mL	**PI-23210**	1/38.23

STAINS

Thermo Scientific* Pierce* Coomassie* and Coomassie Plus— The Better Bradford* Protein Assay Kits

High-performance Bradford reagent

- Ready-to-use, dye-binding for protein quantitation; assay performs similarly to Bradford
- Micro protocol is suitable for protein concentrations from 1 to 25µg/mL
- Fast (almost immediate) color development is read at 595nm
- Reagents are compatible with reducing sugars, reducing substances, and thiols
- Protocols are adaptable to microplates

Original Coomassie Protein Assay Kit

- Detects protein concentrations from 100 to 1500µg/mL
- Stable for 12 months when refrigerated
- Includes Coomassie Protein Assay Reagent and Albumin Standard

Coomassie Plus—The Better Bradford Protein Assay Kit

- As fast as the original Coomassie assay, but substantially more accurate
- Detects protein concentrations from 1 to 1500µg/mL
- Stable for up to two years when refrigerated
- Includes Coomassie Plus—The Better Bradford Protein Assay Reagent and Albumin Standard

Description	Quantity	Cat. No.	Each
Coomassie Protein Assay Kit	630 tube assays or 3800 microplate assays	**PI-23200**	80.00
Coomassie Plus—The Better Bradford Protein Assay Kit	630 tube assays or 3160 microplate assays	**PI-23236**	135.00
Reagent			
Coomassie Plus - The Better Bradford Assay Reagent	200 standard assays or 1000 microplate assays	**PI-23238**	107.40

Thermo Scientific* Pierce* GelCode* Blue Stain Reagent

Ready-to-use, Coomassie* dye-based gel stain require no destaining step

- Saves time and preparation costs
- Reduces solvent disposal problems
- No losses from over-destaining
- Provides one-step, one-hour staining, with bands that can be viewed directly in the staining tray
- More sensitive than standard Coomassie gel stain formulations
- Uses an optional one-hour Water Wash Enhancement* step to increase staining sensitivity
- Produces a wide linear range for densitometric gel analysis
- No gel shrinkage

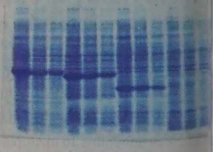
Gels stained with GelCode Blue Stain Reagent

Quantity	No. of Gels Stained	Cat. No.	Ea
500mL	Up to 25 minigels (8 × 10cm)	**PI-24590**	55.
3.5L	Up to 175 minigels (8 × 10cm)	**PI-24592**	219.

Thermo Scientific* Pierce* GelCode* 6xHis Protein Tag-Staining Reagents

Detect 6xHis-tagged protein directly on the gel

- Ready-to-use, two-reagent formula potentially eliminates the need for a membrane transfer step and Western blot detection
- Stain detects as little as 0.2µg of 6xHis-tagged protein
- Fluorescent detection is specific for 6xHis-tagged proteins
- CCD camera detection suggested for low abundance protein; UV transilluminator detection for high abundance protein



Detection of 6xHis-tagged protei in *E. coli* lysates. Gel stained wit GelCode Blue Stain Reagent.

- Formulation is compatible with subsequent staining with GelCode Blue Stain Reagent (PI-24590) for total protein profile determination
- Licensed for research use only under U.S. Patent # 4,569,794 and corresponding foreign patents. For other uses, contact Inproteo, Indianapolis, Indiana, U.S.A.

Description	Quantity	Cat. No.	Ea
GelCode 6xHis Protein Tag Stain Reagent Set	Stains 10 minigels (8 × 10)	**PI-24570**	224.
GelCode 6xHis Protein Control Set	Controls for 50–100 SDS-PAGE runs	**PI-24572**	51.
GelCode 6xHis Protein Tag Staining Kit	Stains 10 minigels; 1 kit	**PI-24575**	250.

ermo Scientific* Pierce* GelCode* Zinc* Reversible Protein Stain Kit

ady-to-use, high-sensitivity stain can be erased m gels

- oduces results in 15 minutes— gel fixing required
- ovides sensititvity to 0.25ng
- llows alternative staining of the ame gel after gel staining and estaining
- ermits protein recovery for ownstream applications
- evelops an opaque white ackground while protein bands main clear

Gels stained with GelCode E-Zinc Reversible Protein Stain

LUDES:

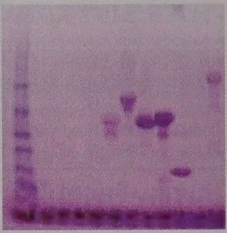
nc Stain; E-Zinc Developer; nc Eraser

ntity	Cat. No.	Each
ns up to 20 minigels (8 × 10cm)	PI-24582	95.48

Thermo Scientific* Pierce* GelCode* Glycoprotein Staining Kit

Detects glycoproteins on SDS-PAGE gels or Western blotting membranes

- Three-reagent protocol yields results in less than two hours vs. four to five hours for other staining methods
- Glycoproteins are detected as magenta bands with light pink or colorless background
- Glycoproteins, such as Avidin and horseradish peroxidase, detected to 0.625ng and 0.16µg respectively
- Stains 10 mini (8 × 10cm) gels
- Compact, easy-to-store kit



Protein gel stained with GelCode Glycoprotein Staining Kit. Magenta bands indicate location of carbohydrate-containing protein.

INCLUDES:

GelCode Glycoprotein Stain (250mL); oxidation Reagent (250mL); Reduction Reagent (250mL); Positive Control ((Horseradish Peroxidase) 1mg); Negative Control ((Soybean Trypsin Inhibitor) 1mg)

Quantity	Cat. No.	Each
Sufficient for 10 minigels	PI-24562	195.73

ermo Scientific* Pierce* Krypton* Glycoprotein Stain Kit

t and easy method for the fluorescent detection of glycoproteins in SDS-PAGE and 2-D gels

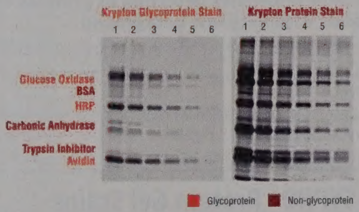
- stain exhibits sensitivity equivalent to, or greater than, other fluorescent oprotein stains and uses well-established periodate-oxidation chemistry
- preferentially reacts with glycoproteins (15- to 20-fold more binding to oproteins)
- citation/emission maxima 654/673nm
- fter glycoprotein staining, gels can be stained with Krypton Protein ain or colorimetric stains
- ghly consistent, reproducible glycoprotein staining
- near quantitative range of three orders of magnitude
- etects down to 15ng of glycoprotein
- tal protocol time of four hours
- orks with mass spectrometry analysis and common imaging systems

PLICATIONS:

ecting proteins in SDS-PAGE and 2-D gels

LUDES:

oprotein Stain Reagent 0.3mL, Staining Buffer 250mL, Oxidizing gent 2.5g, positive Control (Horseradish Peroxidase) 1mg, negative trol (Soybean Trypsin Inhibitor) 1mg



Krypton Glycoprotein Stain provides a fast and sensitive method for detecting glycoproteins in polyacrylamide gels. Lanes 1-6 contain a mixture of the indicated proteins at the following concentrations: Lane 1: 500ng, Lane 2: 250ng, Lane 3: 125ng, Lane 4: 63ng, Lane 5: 31ng and Lane 6: 15ng.

Quantity	Cat. No.	Each
Sufficient for ten 8 x 10cm minigels	PI-53074	180.00

ermo Scientific* Pierce* Krypton* frared Stains

y-to-use, high-performance fluorescent protein stain the near-infrared region of the spectrum

- citation/emission maxima 690/718nm
- mpatible with LI-COR Odyssey Instruments and other CCD strumentation
- mpatible with membrane staining and mass spectrometry
- antitative range three to four orders of magnitude
- 0.25ng protein can be detected with the basic protocol (about two hours)
- Detect down to 2ng protein with the rapid protocol (about one hour)

APPLICATIONS:

Detecting proteins in SDS-PAGE and 2-D gels

Quantity	Quantity	Cat. No.	Each
Sufficient for four minigels	20mL	PI-53070	39.00
Sufficient for twenty minigels or two to four large-format gels	100mL	PI-53071	110.00
Sufficient for one hundred minigels or ten to twenty large-format gels	500mL	PI-53072	399.00

Thermo Scientific* Pierce* Krypton* Protein Stains

Fluorescent stain detects proteins in sodium dodecyl sulfate-polyacrylamide gel electrophoresis (SDS-PAGE) and 2-D gels

- Detect as little as 2ng protein/band in just 30 min. (using rapid protocol)
- Detection limit is < 0.25ng protein/band
- Maximizes the detection of low-abundance proteins
- Minimal differential staining of proteins
- Linear response to staining for proteins of various sizes and containing post-translational modifications
- Excitation/Emission maxima of 520/580nm
- Compatible with commonly available instrumentation and filter sets
- Versatile, compatible with mass spec analysis and protein sequencing
- Linear quantitative range of three to four orders of magnitude
- Accurately and reproducibly visualize proteins over a broad range of concentrations

Quantity	Quantity	Cat. No.	Each
Sufficient reagent to stain 4 minigels	20mL	**PI-46628**	39.00
Sufficient reagent to stain 20 minigels	100mL	**PI-46629**	110.00
Sufficient reagent to stain 100 minigels	500mL	**PI-46630**	399.00

Thermo Scientific* Pierce* SilverSNAP* Stain Kit II

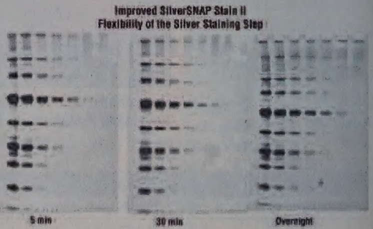
Highly sensitive preparation

- Optimal flexibility built into two key steps – fixing and staining
- Uniform minimal backgrounds with a variety of gels offer contrast to aid band/spot visualization

INCLUDES:

SilverSNAP Sensitizer (2mL); SilverSNAP Stain (500mL); SilverSNAP Enhancer (25mL); SilverSNAP Developer (500mL)

Quantity	Cat. No.	Each
1 kit	**PI-24612**	100.50



Improved SilverSNAP Stain II
Flexibility of the Silver Staining Step
5 min
30 min
Overnight

The gels were stained with SilverSNAP Stain Kit II for 5 min., 30 min. and overnight according to the SilverSNAP Stain Kit II protocol.

Thermo Scientific* Owl* DP140002 Systems Silver Stain Kit

Provides high-sensitivity detection of proteins and nucleic acids with very low background

- Stain detects proteins <10ng per band in as little as 90 minutes
- Enhanced stop solution offers more control over the endpoint of image development
- Monochromatic silver stain enhances sensitivity and eases scanning of polyacrylamide gels, even 2-D gels
- Each kit stains 20 minigels using 100mL of solution per gel

OW DP140002

Cat. No.	Each
OW DP140002	210.00

Lonza SYPRO* Protein Gel Stains

SYPRO Ruby Protein Gel Stain

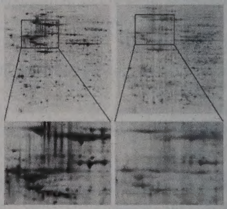
- Ideal for 2-D gel analysis
- Sensitivity rivals silver stain
- Detects nanogram levels of protein
- Broad linear quantitation range and consistent gel-to-gel staining for accurate protein expression comparisons

SYPRO Tangerine Protein Gel Stain

- Provides high sensitivity for detection of proteins in SDS-polyacrylamide gels
- Does not require the use of acids or organic solvents
- Suitable for use with saline solutions
- Ideal for use when eluting active protein complexes from gels because the mild staining conditions are unlikely to affect protein activity

SYPRO Red Protein Gel Stain

- Detects as little as 4 to 8ng of protein per band or proteins as small as 6.5kDa
- Provides linear protein quantitation up to three orders of magnitude, from ng to µg per band
- Offers complete staining in less than one hour—no fixation or destaining required
- Compatible with many types of detection systems
- Recommended for instruments that employ frequency-doubled Nd:YAG or green or red He-Ne lasers



SYPRO Ruby Gel Stain vs. silver stain for 2-D analysis. Proteins from a cell lysate were run on a 2-D gel and stained with SYPRO Ruby Gel Stain (left) or silver stain (right).

Description	Size	Cat. No.	Each
SYPRO Ruby Protein Gel Stain	200mL	**BMA50564**	65.00
	1L	**BMA50562**	221.12

Thermo Scientific* Pierce* Enhanced Chemiluminescent (ECL) Western Blotting Substrate

An entry-level Western blotting substrate at an economical price

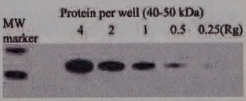
- ▸ No optimization required—switch from other entry-level ECL substrates without the need for optimization or protocol changes

INCLUDES:

Detection Reagent 1 and 2

STORAGE CONDITIONS:

Store from 2° to 8°C



Quantity	Cat. No.	Each
50mL (Sufficient for 400cm² of membrane)	**PI-32109**	40.00
250mL (Sufficient for 2000cm² of membrane)	**PI-32209**	101.00
500mL (Sufficient for 4000cm² of membrane)	**PI-32106**	139.00

Thermo Scientific* Pierce* Lumi-Phos WB Chemiluminescent Substrate (AP)

Provides high sensitivity and low background for alkaline phosphatase

- High signal: noise ratios produce clearer blots
- No need to purchase additional enhancers for nitrocellulose membranes
- Allows you to redevelop blots
- Immediate strong signal
- No mixing required with this one-component system

Description	Quantity	Cat. No.	Each
Lumi-Phos WB	100mL	**PI-34150**	150.00

References: Bruinsma, P., et al. (2004). J. Biol. Chem. 279, 39814-39823. Dhingra, A., et al. (2004). Proc. Nat. Acad. Sci. USA 101, 6315-6320. Tikhonov, I., et al. (2003). J. Virol. 77, 3157-3166.

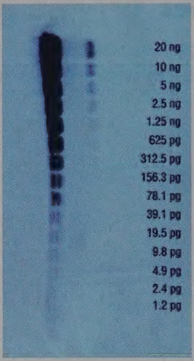


Figure 1. Attomole-range detection and crystal-clear background. Serial dilutions of recombinant mouse IL-2 were separated on a 4%-20% SDS polyacrylamide gel, then transferred to nitrocellulose membrane. After probing primary and secondary antibodies, the membrane was washed and then incubated in Lumi-Phos WB Substrate for five min. prior to film exposure.

Thermo Scientific* Pierce* 1-Step* NBT/BCIP and 1-Step NBT/BCIP Plus Suppressor

Produces intense blue-purple precipitates when reacted with alkaline phosphatase

- One-step, ready-to-use solutions
- Sensitive with low background

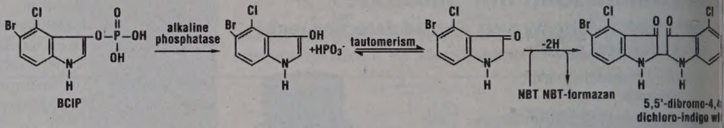
1-Step NBT/BCIP

- Ideal for immunoblotting applications
- Minimal assay-to-assay variability

1-Step NBT/BCIP Plus Suppressor

- Ideal for staining tissues assayed with calf intestinal alkaline phosphatase without the interference caused by endogenous phosphatases
- Contains 1mM levamisole to inhibit endogenous phosphatase activity

STORAGE CONDITIONS:
Store at 4°C.



Description	Quantity	Cat. No.	Eac
1-Step NBT/BCIP	250mL	**PI-34042**	97.0
1-Step NBT/BCIP Plus Suppressor	100mL	**PI-34070**	75.0

SUBSTRATES—ELISA

Thermo Scientific* Pierce* SuperSignal* ELISA Pico Chemiluminescent Substrate

Provides excellent sensitivity for use in luminometers

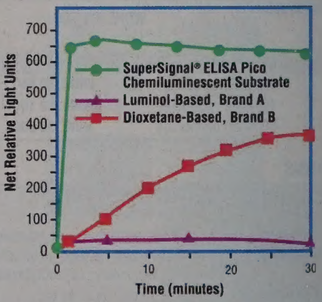
These ELISA's can take place in either a test tube or a microplate and are quantified by measuring relative light units (RLU) in a luminometer.

- Immediate light generation: intense signal is produced immediately at room temperature or at 37°C
- High signal: noise ratio: minimal background
- Detect proteins in ELISAs down to the picogram levels
- Signal can be read in black or white opaque plates
- Emits light at 425nm

INCLUDES:
Luminol/Enhancer Solution (125mL); Stable Peroxide Buffer (125mL)

Quantity	Cat. No.	Each
250mL	**PI-37069**	380.00
100mL	**PI-37070**	208.00

References: Bradley, K.A., et. al. (2004). J. Biol. Chem. 278, 49342-49347. McKevitt, M., et. al. (2003). Genome Res.13, 1665-1674.



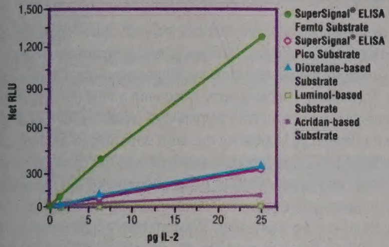
Immediate light generation with SuperSignal ELISA Pico Chemiluminescent Substrate.

*Trademark. See Trademark Reference.

Prices subject to change.

ermo Scientific* Pierce* SuperSignal* ISA Femto Maximum Sensitivity Substrate

verful substrate for high-throughput screening/ gnostic applications with high sensitivity and erior low-end linearity



dose response curve using SuperSignal ELISA Femto Maximum itivity Substrate in an IL-2 ELISA was compared to curves generated dioxetane-based substrate, another luminol-based substrate, lan-based system and TMB. SuperSignal ELISA Femto Maximum itivity Substrate demonstrated immediate light generation with imum peak intensity and high RLU values.

mediate light generation: intense signal generated immediately at both m temperature and 37°C within one minute of addition to trace ounts of soluble HRP, saving up to 30 minutes per assay

sy detection of low quantities of proteins with high signal:noise ratios d low-end linearity of dose response curves

ntogram-level detection of target proteins in an ELISA

h sensitivity allows for reduction in ELISA incubation steps

its light at 425nm

UDES:

nol/Enhancer Solution (125mL); Peroxide Buffer (125mL)

ription	Quantity	Cat. No.	Each
A Femto Chemiluminescent Substrate	250mL	**PI-37074**	399.00
A Femto Maximum Sensitivity Substrate	100mL	**PI-37075**	215.00

nces: Schwake, M., et. al.EMBO Reports4, 76 81. Bakker, A.C., et. al. Gene Therapy8, 1793. Altier, C., et. al. (2002). J. Biol. Chem277, 33598 33603.

Thermo Scientific* Pierce* Soluble TMB Substrates

Produce faster color development than other HRP substrates due to faster oxidation

TMB (3,3',5,5' tetramethylbenzidine) is a chromagen that yields a blue color when oxidized with hydrogen peroxide (catalyzed by HRP) with major absorbances at 370 and 652nm. The color then changes to yellow with the addition of sulfuric or phosphoric acid, with maximum absorbance at 450nm.

- Require less material to obtain the same sensitivity as ABTS
- Suitable for tube- or plate-based assays

1-Step TMB Substrates

- Ready-to-use, one-component substrates
- Do not require hydrogen peroxide
- Noncarcinogenic
- Do not contain DMF or DMSO
- Available in three formulations that vary by sensitivity
  - 1-Step Slow TMB has intermediate sensitivity—more sensitive than ABTS, but less sensitive than OPD or 1-Step Turbo TMB
  - 1-Step Turbo TMB has sensitivity comparable to OPD used at approximately 1mg/mL
  - 1-Step Ultra TMB-ELISA has the highest signal-to-noise ratio and sensitivity in the picogram range

TMB Substrate Kit

- More sensitive than OPD in endpoint ELISAs
- Easy to use
- Provides results in seconds

INCLUDES:

Peroxidase Substrate, (200mL); Peroxide Solution, (200mL)

Description	Quantity	Cat. No.	Each
1-Step Slow TMB	250mL	**PI-34024**	68.00
1-Step Turbo TMB	250mL	**PI-34022**	94.00
1-Step Ultra TMB-ELISA	250mL	**PI-34028**	104.00
TMB Substrate Kit	Kit	**PI-34021**	105.00

BLOCKING/STRIPPING BUFFERS

Thermo Scientific* Pierce* SuperBlock* Blocking Buffers

Provide superior blocking ability plus the ability to maintain high signal-to-noise ratios

- Proteinaceous solutions with protein stabilizers
- Blocking can be performed quickly—ELISA plates can be blocked in only two minutes compared to 30 to 90 minutes for standard blocking protocols
- Blocked ELISA plates can be stored for up to 12 months
- Blotting formulations have been optimized for use with precipitating substrates and yield high signal-to-noise ratios in most applications

Description	Quantity	Cat. No.	Each
SuperBlock Blocking Buffer in PBS	1L	**PI-37515**	127.00
SuperBlock Blocking Buffer–Blotting in PBS	1L	**PI-37517**	119.00
SuperBlock Blocking Buffer in TBS	1L	**PI-37535**	127.00
SuperBlock Blocking Buffer–Blotting in TBS	1L	**PI-37537**	114.00
SuperBlock (TBS) Blocking Buffer Dry Blend	5 pouches†	**PI-37545**	104.00

† Each pouch yields 200mL.

Thermo Scientific* Pierce* Restore* and Restore PLUS Western Blot Stripping Buffer

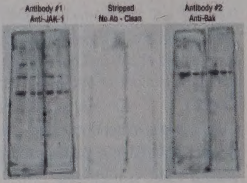
Gentle method for breaking antibody-antigen interactions allows membranes to be reprobed

Restore Western Blot Stripping Buffer

- Provides efficient removal of the primary antibody and associated reagents
- Saves time and sample by eliminating the need to rerun gels
- Does not damage target proteins after stripping
- Does not contain mercaptans, so there are no acrid odors

Restore PLUS Western Blot Stripping Buffer

- Used without dilution
- Effective with nitrocellulose and PVDF membranes, a variety of blocking buffers, horseradish peroxidase (HRP) and alkaline phosphatase (AP) antibody conjugates, and various chemiluminescent substrates
- Allows for the use of a single blot for multiple probes
- Unique formulation efficiently removes high-affinity antibodies (e.g., anti-actin), but it does not decrease the viability of other immobilized proteins, such as cyclophilin B
- Enables detection of phosphorylated and nonphosphorylated proteins on the same membrane



Reprobing with Different Antibodies. Western blots of HeLa cell lysate protein (diluted from 750 to 83.3ng) were detected with SuperSignal* West Dura Chemiluminescent Substrate. The first blot used polyclonal Rabbit anti-JAK-1 primary antibody at 1:2000 dilution with an HRP-secondary conjugate diluted at 1:350,000. The same blot was stripped for five minutes at room temperature in Restore Western Blot Stripping Buffer and then reprobed with purified Mouse anti-Human Bak monoclonal primary antibody at 1:1000 with the HRP-secondary conjugate at 1:100,000. Five-percent nonfat milk with 0.05% Tween*-20 was used for blocking.

	500mL	**PI-46430**	105.00

LABELING

Thermo Scientific* Pierce* Cell Surface Protein Isolation Kit

For the convenient biotinylation and purification of mammalian cell surface proteins

Adherent or suspended cells are first labeled with Sulfo-NHS-SS-Biotin, a cleavable biotinylation reagent. Efficient labeling requires accessible lysine residues, sufficient sequence with extracellular exposure and minimal steri hindrance. The cells are subsequently lysed with a mild detergent and then labeled proteins are isolated with immobilized NeutrAvidin* Gel. The boun proteins are released by incubating the resin with SDS-PAGE sample buffe containing 50mM DTT. The reducing agent cleaves the disulfide bond withi the biotin label, and nearly 100% of the bound proteins are recovered. The protocol is optimized for diverse cell lines, including NIH3T3, HeLa and C6. Isolated proteins can be analyzed by Western blot, allowing for differential expression analysis between treated and nontreated cells or between two or more cell lines.

- Reduces complexity of total cellular protein
- Efficient recovery of labeled proteins, nearly 100% recovery of isolated cell surface proteins from NeutrAvidin Gel
- All reagents are provided in the kit with complete instructions for labeling, cell lysis and purification
- Proteins recovered in SDS-PAGE sample buffer are loaded directly onto SDS-polyacrylamide gels
- Protocol designed for diverse cell lines

INCLUDES:
EZ-Link* Sulfo-NHS-SS-Biotin (8 × 12mg vials); Quenching Solution (16mL); Lysis Buffer (4.5mL); Immobilized NeutrAvidin Gel (supplied as 50% slurry, 4.5mL total volume, 2.25mL settled gel); Wash buffer (34mL); Column Accessory Pack with caps and collection tubes (8 spin columns); No-Weigh Dithiothreitol (DTT) (8 × 7.7mg microtubes); BupH* Phosphate Buffered Saline 2 packs; BupH Tris Buffered Saline one pack

Quantity	Cat. No.	Eac
Sufficient for eight biotinylations and isolations of mammalian cell surface products	**PI-89881**	308.3

Thermo Scientific* Pierce* EZ-Label* Fluorescent Labeling Kits

A convenient method for fluorescent labeling of antibodies or proteins

- Easy-to-use kits designed for any size protein in volumes from 50µL to 1mL at concentrations up to 10mg/mL
- All reagents supplied premeasured—no weighing required
- Ready-to-use desalting columns handle protein samples >100µL
- Slide-A-Lyzer* Mini dialysis units are used for samples ≤100µL

INCLUDES:
Premeasured fluorescent dye; Dimethylformamide (DMF); premeasured borate and phosphate buffer powders; desalting columns; Slide-A-Lyzer Mini Dialysis Units; amber reaction tubes

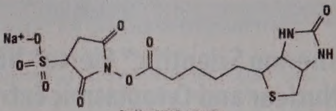
Label	Excitation Wavelength	Emission Wavelength	Quantity	Cat. No.	Eac
Fluorescein	491nm	518nm	5 rxns	**PI-53000**	239.9
Fluorescein Isothiocyanate (FITC)	494nm	520nm	5 rxns	**PI-53004**	239.9
Rhodamine	544nm	576nm	5 rxns	**PI-53002**	239.9

*Trademark. See Trademark Reference.

ermo Scientific* Pierce* EZ-Link* Sulfo-NHS-Biotin (N-Hydroxysulfosuccinimidobiotin)

tinylation reagent is amine reactive and water soluble

eacts with primary amines at pH 7 to 9 in nonamine-containing buffers such as borate, carbonate, phosphate buffers
egative charge of $-SO_3$ group prevents the reagent from passing through the cell membrane
/ater solubility eliminates the use of harmful organic solvents



Sulfo-NHS-Biotin

PI-21217

PLICATIONS:

inylation of rat IgE to study specific receptors on murine lymphocytes; Immunological assay
post-synaptic protein and receptor; Biotinylation of proteins on nitrocellulose paper after transfer from polyacrylamide gels

RAGE CONDITIONS:

e at -20°C with desiccant.

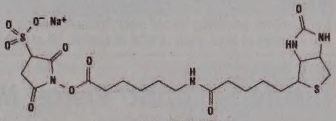
cription	Chemical Reactivity	Water Solubility	Spacer Arm Length	Cleavability	Membrane Permeability	Quantity	Cat. No.	Each
-NHS-Biotin ydroxysulfosuccinimidobiotin)	Primary Amine	Yes	13.5Å	Noncleavable	No	50mg	**PI-21217**	128.00

Patents 5,892,628 and 5,872,261.

ermo Scientific* Pierce* EZ-Link* Sulfo-NHS-LC-Biotin (Sulfosuccinimidyl-6-otinamido] hexanoate)

ine reactive, water-soluble biotinylation reagent with a longer spacer arm than Sulfo-NHS-Biotin

alog of NHS-LC-Biotin
acts with primary amines at pH 7 to 9 in nonamine containing buffers such as borate, carbonate phosphate buffers
gative charge of $-SO_3$ prevents the reagent from passing through the cell membrane



Sulfo-NHS-LC-Biotin

PI-21335

LICATIONS:

nced detection of DNA on nitrocellulose, eliminating the need for radioactive detection in hern, Northern, and dot blotting; Biotinylation of cell surface proteins; In vivo imaging and therapy es

RAGE CONDITIONS:

e at -20°C with desiccant.

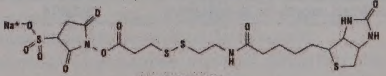
ription	Chemical Reactivity	Water Solubility	Spacer Arm Length	Cleavability	Membrane Permeability	Quantity	Cat. No.	Each
-NHS-LC-Biotin osuccinimidyl-6-namido) hexanoate)	Primary Amine	Yes	22.4Å	Noncleavable	No	100mg	**PI-21335**	164.00

atents 5,892,628 and 5,872,261.

ermo Scientific* Pierce* EZ-Link* Sulfo-NHS-SS-Biotin (Sulfosuccinimidyl 2-otinamido]-ethyl-1, 3-dithiopropionate)

ol-cleavable, amine-reactive biotinylation reagent is also water soluble

alog of NHS-LC-Biotin with cleavable disulfide linkage
ended spacer arm prevents steric hindrance
al for reversible biotinylation—biotin is separated from molecule when spacer arm is aved



Sulfo-NHS-SS-Biotin

PI-21331

LICATIONS:

esis of chemically cleavable biotinylated nucleotides and the subsequent recovery of in-DNA complexes from immobilized avidin columns; Isolation of Herpes virus proteins

RAGE CONDITIONS:

at -20°C protected from moisture.

ription	Chemical Reactivity	Water Solubility	Spacer Arm Length	Cleavability	Membrane Permeability	Quantity	Cat. No.	Each
-NHS-SS-Biotin (Sulfosuccinimidyl 2-namido)-ethyl-1, 3-dithiopropionate)	Primary Amine	Yes	24.3Å	Cleavable	No	100mg	**PI-21331**	184.00

PROTEIN PURIFICATION

EXTRACTION

Thermo Scientific* Pierce* NE-PER* Nuclear and Cytoplasmic Extraction Kit

Facilitates the separation of nuclear extracts and cytoplasmic fractions from the same set of cells in less than two hours

- Kit maintains nuclear and cytoplasmic cell compartments by lysing the cell membrane, recovering the nucleus intact, and then extracting the nuclear proteins separately
- Nuclear extracts and cytoplasmic protein fractions can be used directly in a variety of applications including reporter gene assays, enzyme activity assays, Western blotting, and gel shift assays

INCLUDES:

Cytoplasmic Extraction Reagent I (CER I), (10mL); Cytoplasmic Extraction Reagent II (CER II), (550µL); Nuclear Extraction Reagent, (5mL)

STORAGE CONDITIONS:

Store at 4°C for up to one year.

Quantity	Cat. No.	Each
Sufficient for extracting 50 cell pellet fractions having packed cell volumes of 20µL each (a total of approx. 2g of cell paste)	PI-78833	185.00

Thermo Scientific* Pierce* Mitochondria Isolation Kit for Cultured Cells

Only 40 minutes to isolate intact mitochondria with maximum yield

- Isolate intact mitochondria from 2 × 10^7 cells in approximately 40 min. (post-cell harvest)
- Process several samples simultaneously using the reagent-based method, or obtain highest possible yield with the Dounce homogenization method
- Guidelines provided for optimizing purity vs. yield with the reagent-based method
- Easy isolation performed in a microcentrifuge tube
- Isolated mitochondria may be lysed with detergent or processed for almost any downstream application, including 2-D electrophoresis

INCLUDES:

Mitochondria Isolation Kit Reagent A (50mL); Mitochondria Isolation Kit Reagent B (500µL); Mitochondria Isolation Kit Reagent C (70mL)

Quantity	Cat. No.	Each
Sufficient reagents for 50 applications	PI-89874	185.68

Thermo Scientific* Pierce* Mem-PER* Eukaryotic Membrane Protein Extraction Kit

Enables extraction and selective enrichment of integral and attached membrane proteins from cultured mammalian and yeast cells, as well as from hard and soft mammalian tissues

- Faster, easier, and less expensive than traditional methods for the isolation of membrane proteins
- Produces minimal cross-contamination (typically <10%) of hydrophilic protein into the hydrophobic (membrane) protein fraction
- Utilizes an easy and complete protocol that requires approximately one hour
- Compatible with downstream applications including SDS-PAGE, Western blotting, and protein assays

INCLUDES:

Mem-PER Reagent A, (10mL); Mem-PER Reagent B, (25mL); Mem-PER Reagent C, (40mL)

STORAGE CONDITIONS:

Store Reagent A at room temperature; store Reagent B and Reagent C at 4°

Quantity	Cat. No.	Eac
Sufficient for 50–100 mammalian cell pellet fractions	PI-89826	185.6

Thermo Scientific* Pierce* P-PER* Plant Protein Extraction Kit

Unique method performs plant cell lysis and subseque protein extraction in just 10 minutes

Organic lysing reagent and two aqueous reagents, in conjunction with mil mechanical agitation, effectively extract plant protein.

- Works with multiple plant organs (leaf, stem, root, seed and flowers); multiple plant species (*Arabidopsis*, tobacco, maize, soybeans, peas, spinach and other plant tissues); and fresh, frozen and dehydrated plant tissues
- Requires no liquid nitrogen/freeze-grinding, Dounce homogenization, blade-shearing or glass-bead agitation for cell disruption, although kit is compatible with these alternative mechanical aids
- Downstream applications include 1-D and 2-D gel electrophoresis, Western blotting, activity assays, and protein affinity purifications
- Kit extracts can be quantified using the BCA Protein Assay Kit, Reducing Agent Compatible
- Protein extract does not require filtration through cheesecloth or Miracloth, unlike homebrews
- Assays show extracted proteins are functional

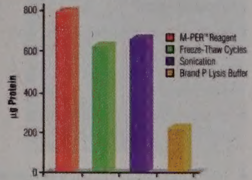
INCLUDES:

P-PER Reagent A (20mL); P-PER Reagent B (225µL); P-PER Reagent C (20m Polypropylene Mesh Bags (20) each

Quantity	Cat. No.	Ea
Sufficient for extracting 20 × 80mg of fresh/frozen plant tissue or 20 × 20mg of dried plant tissue	PI-89803	225.

ermo Scientific* Pierce* M-PER* ammalian Protein Extraction Reagent

rupts mammalian cell membranes at low icentrations without denaturing proteins



- mpletes extraction in five minutes
  room temperature—no freeze-
  aw cycles or sonication required
- oduces 25% more protein than
  eeze-thaw cycles and 20% more
  otein than sonication
- ses adherent cells without scraping
  m the culture dish, enabling use
  the reagent with 96-well plates
- itable for high-throughput cell lysis and subsequent screening assays
- mpatible with downstream reporter assays, kinase assays,
  munoassays, and protein assays

ription	Quantity	Cat. No.	Each
ER Mammalian Protein action Reagent	25mL	PI-78503	53.27
	250mL	PI-78501	217.81
	1000mL	PI-78505	589.00

Thermo Scientific* Pierce* T-PER* Tissue Protein Extraction Reagent

Mild cell-lysing reagent for protein extraction from tissue samples

- ▸ Consists of a proprietary detergent in 25mM bicine and 150mM sodium chloride (pH 7.6) which is dialyzable for quick and easy removal
- ▸ Can be used in combination with other components such as protease inhibitors, salts, reducing agents, or chelating agents
- ▸ Produces cell lysates that may be used for reporter assays, protein kinase assays, immunoassays, and/or protein purifications
- ▸ Compatible with standard protein assays

Quantity	Cat. No.	Each
500mL	PI-78510	242.91

ermo Scientific* Pierce* B-PER* Bacterial Protein Extraction Reagents

over both soluble and insoluble recombinant proteins from bacterial lysates

ER Bacterial Protein Extraction Reagent

- xible enough to use for any scale of protein extraction
- es a patented, mild, nonionic detergent in a Tris-based buffer
- es not solubilize inclusion bodies
- es not require special instrumentation—just add to a bacterial pellet
  d shake for 10 minutes
- mponents such as lysozymes and protease inhibitors may be added
- mpatible with GST, 6xHis, and other affinity purifications; can also be
  ed with baculovirus-expressed proteins

ription	Quantity	Cat. No.	Each
R Bacterial Protein Extraction Reagent	165mL	PI-78243	129.00
	500mL	PI-78248	245.00
R II Bacterial Protein Extraction Reagent	250mL	PI-78260	245.00

B-PER II Bacterial Protein Extraction Reagent

- ▸ Ideal for small-volume recombinant protein extraction
- ▸ Extracts twice the yield of both total soluble protein and recombinant green fluorescent protein after the first round than does original B-PER Reagent (after five rounds, extraction yields are similar) from 1g of bacterial extract and 5mL of reagent
- ▸ Free of enzymatic components

From left to right: Total lysate, extracted GFP, remaining protein.

ermo Scientific* Pierce* I-PER* Insect ll Protein Extraction Reagent

cient, gentle reagent that provides maximum raction of soluble proteins from baculovirus-infected ct cells

cts recombinant (eukaryotic) proteins in cell culture. Proteins
ssed in baculoviral systems can be used for structural analyses,
emical assays and a variety of other applications.

- ▸ Optimized, mild nonionic detergent provides maximum extraction of soluble proteins from insect cells
- ▸ Provides better protein extraction than sonication
- ▸ Downstream compatibility with Western blotting, 6xHis-tagged protein purification, protein assays and ion-exchange chromatography
- ▸ Useful for protein extraction from suspended or adherent cultured insect cells

Quantity	Cat. No.	Each
250mL	PI-89802	165.63

Thermo Scientific* Pierce* Halt* Protease Inhibitor Cocktail

Provides excellent inhibition of a variety of protease activities including serine and cysteine proteases, calpain proteases, and metalloproteases

- Single-use, ready-to-use packaging
- EDTA-containing and EDTA-free formulations
- Effective for suppressing proteolytic activity in detergent-based cell lysis reagents
- No loss of valuable freezer space
- Allows the user to prepare a custom cocktail or increase the concentration of a class of protease inhibitor in the formulation to improve the stability or recovery of a specific target protein

APPLICATIONS:

Protection of intact, active cellular proteins from degradation by endogenous proteases; inhibition of protease activity from lysates; screening of extracts for proteolytic activity; the study of proteolysis in the regulation of cellular processes

STORAGE CONDITIONS:

Cocktail remains stable for months under refrigeration

Description	Quantity	Cat. No.	Each
Protease Inhibitor Cocktail Kit	Sufficient for 200mL sample	**PI-78410**	145.00
Reagent			
Protease Inhibitor Cocktail, EDTA-free	Sufficient for 100mL sample	**PI-78415**	159.00

Thermo Scientific* Pierce* Halt Phosphatase Inhibitor Cocktail

Safeguarding against serine, threonine and protein tyrosine phosphatases activity

Phosphorylation and dephosphorylation is a molecular on/off switch that regulates a number of key biological pathways within the cell, including signal transduction, cell division, and apoptosis. The Halt Phosphatase Inhibitor Cocktail preserves phosphorylation of proteins in cell lysates and tissue extracts. The cocktail contains a mixture of four phosphatase inhibitors of broad specificity, including sodium fluoride, sodium orthovanadate, sodium pyrophosphate and glycerophosphate. Halt Phosphatase Inhibitor Cocktail protects phosphoproteins from both families of phosphatases.

- Compatible with standard protein assays: The BCA Protein Assay Kit and Coomassie* Plus-The Better Bradford* Assay
- Does not require frozen storage
- Convenient size: 1mL of cocktail protects up to 100mL of sample

STORAGE CONDITIONS:

Store at 2° to 8°C

Quantity	Cat. No.	Each
1mL	**PI-78420**	148.56

Thermo Scientific* Pierce* Surfact-Amps* Nonionic Detergents

Purified, prediluted solutions offer unparalleled convenience

PI-28324

- Ready-to-use ampules are packed under nitrogen for maximum shelf life and are prescored for easy opening
- Protect proteins from damaging impurities, preventing loss of protein activity
- Gentle (nondenaturing at low concentrations), clear and pure 10% solutions have less than 1.0μeq/mL peroxides and carbonyl content

STORAGE CONDITIONS:

Store as detailed on product information sheet.

Product	Active Ingredient	Aggregation #	Micelle M.W.	M.W.	CMC (mM)	HLB (mM)	Cloud Point (°C)

SAMPLE PREPARATION

Millipore* Montage* Albumin Deplete Kit

Reduces albumin levels in plasma or serum samples

montage
PROTEOM
LSKAD0004

- Uses a simple, 15-minute protocol
- Removes 65% of albumin from typical human serum samples
- Processes samples up to 100μL
- Optimized for the depletion of human albumin, but can be used with other mammalian species
- Improves the resolution of lower abundance proteins in chromatographic separations, electrophoresis, or mass spectrophotometry

INCLUDES:

Prepacked centrifugal columns; microcentrifuge tubes; buffers and reagents

STORAGE CONDITIONS:

Store at 2° to 8°C (36° to 46°F).

No. of Preps	Cat. No.	Each
24	**LSKAD0024**	332.00

ermo Scientific* Pierce* Handee* ni-Spin Columns

venient tools for the manipulation of small volumes hromatography supports

PI-69710

- omatography resin volume to 400µL
- nple volumes 50 to 80µL

dee Spin Cup Columns

- mit quick separations using icrocentrifuge

dee Mini-Spin Columns

- lude optional Luer-Lok* adapters for performing shes and elutions with a syringe
- also be used for separations with a microcentrifuge
- oclavable at 120°C

iption	Chromatography Resin Volume	Sample Volume	Quantity Per Pack	Cat. No.	Each

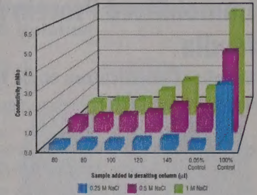
	20mL	**PI-89887**	232.00

Thermo Scientific* Pierce* Protein Desalting Spin Columns

Perform desalting or buffer exchange in less than five minutes

- No cumbersome preparation steps are required
- Provides greater than 95% salt and small molecules retention while providing excellent recovery of proteins greater than 7000 MW
- Designed to desalt or exchange buffer of protein samples with volumes from 30 to 120µL



Increasing load volumes of three different NaCl concentrations. Greater than 95% salt removal was observed for up 120µL 1M NaCl.

Quantity	Cat. No.	Price
25 columns	**PI-89849**	99.50
50 columns	**PI-89862**	163.60

Thermo Scientific* Pierce* Zeba* Desalt Spin Columns

Quickly desalt proteins using a proprietary high-performance resin that offers exceptional desalting and protein-recovery characteristics

- Process multiple samples in approximately 8 min.
- Suitable for samples containing as little as 25µg/mL of protein
- Retain ≥95% of salts and other small molecules <1000MW
- Eliminate the need to monitor fractions for protein
- Easy to use with no cumbersome column preparation or equilibration
- Require minimal sample dilution

STORAGE CONDITIONS:

Store at 4°C.

ermo Scientific* Pierce* Zeba* 96-well salt Spin Plates

-throughput removal of salt and small ecules from samples

eba 96-well Desalt Spin Plates contain a high-performance resin exceptional desalting and protein recovery characteristics. sample volumes (20 to 100µL) can be processed providing exceptional n recovery and >95% removal of salts and other small molecules 0 Da, e.g., DTT, Biotin, FITC, Biotin-FITC etc.).

- Desalt 96 samples in 5 min.
- No screening fractions for sample or waiting for samples to emerge by gravity flow
- Easy-to-use with no cumbersome plate preparation or equilibration
- Require no resin dispensing or hydration
- Minimal sample dilution

Quantity	Cat. No.	Price
2 plates	**PI-89807**	190.71
4 plates	**PI-89808**	360.45

PURIFICATION—PROTEIN A/G

Thermo Scientific* Pierce* ImmunoPure* Immobilized Protein A/G on Biosupport Media

Excellent purification tools for most immunoglobulins

- Combines the IgG binding properties of both Protein A and Protein G
- Supports utilize coupling chemistries that are leak-resistant and provide a matrix with minimal nonspecific binding
- Can be regenerated when properly stored
- Agarose supports are useful for gravity-flow procedures
- More rigid UltraLink support is used if flowrates require a pressure >25psi

ORDERING INFORMATION:

A ready-to-use kit containing prepacked columns of ImmunoPure Immobilized Protein A/G is also available online.

INCLUDES:

AffinityPak* Immobilized Protein A/G Column (1 × 2mL); ImmunoPure (A/G) IgG Binding Buffer (240mL); ImmunoPure Elution Buffer (120mL); D-Salt* Dextran Desalting Columns 5K MWCO (5 × 5mL)

Description	Medium	Capacity	Quantity	Cat. No.	Each
ImmunoPure Immobilized Protein A/G	Cross-linked 6% beaded agarose	>7mg of human IgG/mL gel	3mL 15mL	**PI-20421** **PI-20422**	299.00 1039.00
UltraLink Immobilized Protein A/G	UltraLink Biosupport Medium	>20mg human IgG/mL gel	2mL 10mL	**PI-53132** **PI-53133**	245.00 859.00
UltraLink Immobilized Protein A/G Plus	UltraLink Biosupport Medium	>28mg human IgG/mL gel	2mL	**PI-53135**	354.33
ImmunoPure (A/G) IgG Purification Kit	Cross-linked 6% beaded agarose	7mg human IgG/mL gel	Sufficient for isolating at least 6–8mg of mouse IgG	**PI-44902**	472.00

LOOKING FOR WESTERN BLOTTING SUBSTRATES?

Find them in the Protein Labeling and Detection section.

Thermo Scientific* Pierce* ImmunoPure* Immobilized Protein A on Biosupport Medi

Affinity purification supports for the isolation of a wide variety of IgG molecules from several species of mamm

- Leach-resistant coupling prevents Protein A from washing off the support
- High capacity allows efficient antibody purification
- Agarose supports are useful for gravity-flow procedures
- UltraLink Biosupport Medium and Trisacryl GF-2000 provide a stable affinity support durable enough for higher throughput volumes experienced during large-scale chromatographies

INCLUDES:

AffinityPak* Protein A or Protein A Plus Columns (5 × 1mL); ImmunoPure IgG Binding Buffer (1L); ImmunoPure IgG Elution Buffer (500mL); D-Salt* Excellulose* Desalting Columns (5 × 5mL)

Description	Medium	Capacity	Quantity	Cat. No.	E

LOOKING FOR DIALYSIS MEMBRANES?

ee the Dialysis/Devices section.

Thermo Scientific* Pierce* MagnaBind* Protein A and G Beads

An easy-to-use method for immunoprecipitation, protein purification, and cell isolation

MagnaBind Protein A and Protein G Beads are typically used to isolate antibodies from serum and cell culture supernatant and to separate cells of interest from a cell mixture. For antibody purification, the beads are incubated with the antibody solution and then magnetically separated from the supernatant. The antigens and antibodies are then dissociated from the beads using an elution buffer. For cell separation, the monoclonal or polyclonal antibody to the cell surface antigen is incubated with Protein A or Protein G magnetic beads, magnetically separated, and then incubated with the cell suspension.

- Beads respond well to magnetic fields, but have no magnetic memory
- Most separations require a short 5- to 10-minute benchtop procedure
- Cells can be sorted using either positive or negative selection
- Protein purification or immunoassays can be performed using either direct or indirect methods
- Beads can be easily sterilized
- Surface area: >100m^2/g
- Number of beads: 1 × 10^8 particles/mg
- Bead diameter: 1–4μm
- Supplied in PBS with 1mM EDTA and sodium azide, pH 7.4
- Binding Capacity: ~0.20mg rabbit IgG/mL of beads

APPLICATIONS:

Cell sorting using either positive or negative selection; protein purification or immunoassays using either direct or indirect methods

REQUIRED ACCESSORIES:

An external magnetic field is used to remove MagnaBind Beads from suspension. See Accessories for a selection of magnets.

STORAGE CONDITIONS:

Products are shipped at ambient temperature. Upon receipt, store products at 4°C. Do not freeze.

PURIFICATION—HIS

Nunc* ProPur* Metal Chelate (IMAC) Spin Columns

For simple, rapid His-tagged protein purification from cell lysate

12-656-117

Ready-to-use kits replace lengthy and expensive chromatogenic methods.

Mini Kits

- Based on microcentrifuge tubes
- Yield up to 1mg in approximately 20 min.
- Working volume: 0.65mL

Midi Kits

- Based on 50mL centrifuge tubes
- Yield up to 20mg in approximately 50 min.
- Working volume: 20mL

APPLICATIONS:

Metal chelate affinity chromatography

INCLUDES:

Prepacked spin column plugs; spin column barrels; centrifuge tubes; ultrafiltration concentrators (UFCs); PBS; imidiazole; plug insertion tool

Description	Columns per Kit	UFCs Included	Buffers Included	Mfr. No.	Cat. No.	Each

Promega* Maxwell 16* Polyhistidine Protein Purification System

Easy method for the efficient, automated purification of polyhistidine-tagged protein

Used with the Maxwell 16 Instrument for the automated purification of polyhistidine-tagged protein from bacterial cultures and other sample types including mammalian and insect cells. With minor modifications, the reagents can also be used for purification of HQ-tagged proteins from bacterial cultures.

- Purify from multiple starting cultures including bacterial culture, mammalian cells, insect cells and culture medium
- Consistent purification across all samples
- Prefilled cartridges eliminate reagent preparation, multiple pipetting steps, centrifugation and additional sample manipulation

APPLICATIONS:

Polyhistidine-tagged protein purification, HQ-tagged protein purification

Description	Samples per Kit	Mfr. No.	Cat. No.	Each
Maxwell 16 Polyhistidine Protein Purification System	48 preps	AS1060	**PI-S106**	290.00

LOOKING FOR THE PROMEGA* MAXWELL 16* INSTRUMENT?

Turn to the Nucleic Acid Research section for more information.

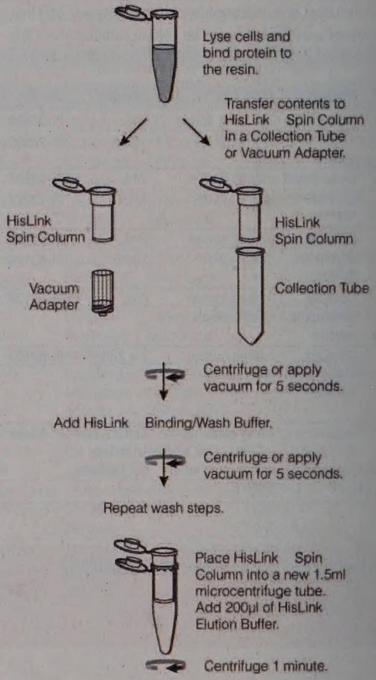
Promega* HisLink* Spin Protein Purification System

Provides a quick method of purifying polyhistidine- or HQ-tagged expressed proteins from *E. coli* using either a centrifuge or vacuum-based method

- Choose between vacuum or centrifugation formats
- Complete system contains all necessary components
- High binding capacity per column

STORAGE CONDITIONS:

Store the system at 4°C. Store spin columns, collection tubes, and FastBreak* Cell Lysis Reagent at room temperature. After reconstitution, store DNase I in aliquots at -20°C.



Lyse cells and bind protein to the resin.
Transfer contents to HisLink Spin Column in a Collection Tube or Vacuum Adapter.
HisLink Spin Column
Vacuum Adapter
HisLink Spin Column
Collection Tube
Centrifuge or apply vacuum for 5 seconds.
Add HisLink Binding/Wash Buffer.
Centrifuge or apply vacuum for 5 seconds.
Repeat wash steps.
Place HisLink Spin Column into a new 1.5ml microcentrifuge tube. Add 200µl of HisLink Elution Buffer.
Centrifuge 1 minute.

Description	No. of Samples	Cat. No.	Each
HisLink Spin Protein Purification System	25 reactions	**PR-V1320**	155.58

omega* MagneHis* Protein rification System

rapid and reliable purification of polyhistidine-tagged teins from 1mL to 1L of bacterial culture

PR-V8550

- lizes paramagnetic echarged MagneHis -Particles to isolate lyhistidine-tagged otein directly from ide cell lysate
- nds up to 1mg of lyhistidine-tagged otein per 1mL of MagneHis Ni-Particles
- mpatible with manual or automated protocol
- ntains all necessary reagents for purification
- agneHis Ni-Particles are also available separately

LUDES:

neHis Binding/Wash Buffer (50mL); FastBreak* Cell Lysis Reagent L); DNase I (lyophilized) (1 vial); MagneHis Elution Buffer (10mL); neHis Ni-Particles (2mL)

RAGE CONDITIONS:

e at 4°C (39.2°F) for up to 18 months; do not freeze MagneHis articles.

Promega* HisLink* Protein Purification Resins

Purifies His-tagged proteins from cleared or crude bacterial lysates

- High binding capacity, >15mg/mL
- Macroporous silica resin modified to contain a high level of tetradentate chelated nickel (>20mmol Ni/mL settled resin)
- Easily separated from the lysate without filtration or centrifugation
- May be used in standard gravity column chromatography or automated applications
- Also suitable for general applications requiring an immobilized metal affinity chromatography matrix (IMAC)

STORAGE CONDITIONS:

Store at 4°C.

Binding Capacity	Quantity	Cat. No.	Each

PURIFICATION—STREPTAVIDIN

ermo Scientific* Pierce* Immobilized Streptavidin Products

iperior alternative to immobilized avidin

- er high biotin affinity and low nonspecific binding
- vide a stable, leach-resistant linkage of streptavidin to the support

iunoPure* Immobilized Streptavidin

- ified recombinant streptavidin
- al for immunoprecipitation

UltraLink* Immobilized Streptavidin

- Offers faster flowrates and overall superior performance in affinity applications
- Recommended for purifying proteins that bind to a biotinylated ligand
- Suitable for the recovery of single-stranded DNA for dideoxy sequencing

ription	Medium	Capacity	Quantity	Cat. No.	Each
inoPure Immobilized Streptavidin Gel	Cross-linked 6% beaded agarose	Approx. 1–3mg biotinylated BSA/mL gel	2mL	**PI-20347**	164.00

			5mL	**PI-53117**	389.00

Thermo Scientific* Pierce* MagnaBind* Streptavidin Beads

An easy-to-use method for immunoprecipitation, protein purification, and cell isolation

PI-21344

MagnaBind Streptavidin Beads are convenient for affinity purification or separation methods involving biotin-labeled molecules. To remove the MagnaBind Beads from the suspension, an external magnetic field is used. Streptavidin is a 60 kDa protein from *Streptomycetes avidinii*. The protein is a tetramer having four biotin-binding sites. Unlike avidin, streptavidin has a low isoelectric point (pI = 5) and no carbohydrate groups, resulting in low nonspecific binding. The high-affinity interaction between streptavidin and biotin cannot be dissociated efficiently except with very harsh conditions, such as boiling in sample loading buffer for SDS-PAGE or 8M guanidine·HCl, pH 1.5. Consequently, it is often possible to elute binding partners in an interaction complex without also eluting the biotinylated component.

- Beads respond well to magnetic fields, but have no magnetic memory
- Most separations require a short 5- to 10-minute benchtop procedure
- Cells can be sorted using either positive or negative selection
- Protein purification or immunoassays can be performed using either direct or indirect methods
- Beads can be easily sterilized
- Surface area: >100m²/g
- Number of beads: 1 × 10^8 particles/mg
- Bead diameter: 1 to 4µm
- Supplied in phosphate-buffered saline (PBS), pH 7.5
- Contains 0.1% BSA, EDTA and sodium azide as stabilizers
- Binding Capacity: ~2µg biotin/mL of beads (~8nmol biotin/mL of beads

APPLICATIONS:

Cell sorting using either positive or negative selection; protein purification or immunoassays using either direct or indirect methods

REQUIRED ACCESSORIES:

An external magnetic field is used to remove MagnaBind Beads from suspension. See p. 1475.

Description	Cat. No.	E
Streptavidin Beads	**PI-21344**	229

Thermo Scientific* Pierce* Immobilized NeutrAvidin* Resins and Proteins

A biotin-binding protein with low nonspecific binding properties

NeutrAvidin Resins are prepared by covalently coupling NeutrAvidin Protein to the porous agarose or UltraLink* Biosupport using efficient and stable chemistries, resulting in NeutAvidin Agarose and UltraLink Resins that are leach-resistant and stable at pH to 2 to 11.

- Low nonspecific binding
- Provide high functionality, low nonspecific binding and leach resistance
- Agarose (polysaccharide-based) and UltraLink Biosupport (acrylamide-based) resins provide two different options for particular experimental conditions and are compatible with gravity-flow, spin and FPLC methods

Description	Capacity	Support	Qty.	Cat. No.	Eac
NeutrAvidin Agarose Resin	≥20µg or 80nmol biotin/mL resin	Crosslinked 6% beaded agarose	5mL	**PI-29200**	178.6
UltraLink Immobilized NeutrAvidin Protein	12-20µg or 48-80nmol of biotin/mL of gel	UltraLink Biosupport	5mL	**PI-53150**	219.8

PURIFICATION—GST

omega* MagneGST* Protein Purification System

ple, rapid, and reliable method for the purification of glutathione-ansferase (GST) fusion proteins from a crude or cleared lysate

ovides one-step purification of multiple samples
alable from 1mL of culture to more than 50mL of culture
oduces high yields with little or no nonspecific background
es not require high-speed centrifugation after cell lysis to clear lysate
mpatible with manual or automated protocols

LUDES:

neGST Glutathione Particles (also available separately) (4mL); athione (2mL); MagneGST Binding/Wash Buffer (80mL); MagneGST Lysis Reagent (12mL); RQ1 RNase-free DNase (1000µL); 0.5M 3.1) Tris Buffer (2mL)

UIRED ACCESSORIES:

netic separation stand, such as the MagneSphere Technology Magnetic ration Stand (PR-Z5342)

RAGE CONDITIONS:

e as detailed on product information sheet; components are stored at r 4°C or -70°C.

PUMPS

PERISTALTIC

Fisher Scientific* Variable-Flow Chemical Transfer Pump

Precise, seamless speed control with all-day performance

Achieves all-day pulseless fluid transfer at variable rates by way of stepless "continuous-sweep" variable speed control.

15-077-67

- Direct-drive engineering maximizes power for smooth-rolling pump action
- Pumps fluids from 0.12 to 2.2L/min. with viscosity to 200 centipoise (0.2 Pa•s) and demonstrates suction lift of 10' wet
- Tolerates fluid temperatures from -40° to +93°C (-40° to +200°F)
- Barbed outlet ports accommodate any type of tubing with an inside diameter of 3/16"
- Chemical-resistant, wetted parts are DuPont* Delrin*, Type 304 stainless steel, Buna N, and PTFE
- Chemical-resistant ABS case
- PURGE/PRIME switch allows for high-speed emptying and filling
- Reverses to expedite tube draining

ORDERING INFORMATION:

Dimensions: 8L × 4¾W × 4½"H (20.3 × 12 × 11.5cm).
Net weight: 1 lb. (454g).

INCLUDES:

115V wall power supply

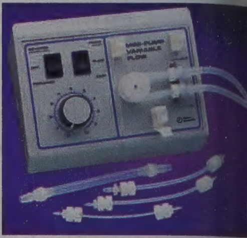
Flowrate Range	Cat. No.	Each
0.12 to 202L/min.	**15-077-67**	233.06

WHAT TUBING SHOULD I USE?

Need help in selecting the right tubing for your pump? You'll find the Tubing Selection Guide in the Tubing section.

Fisher Scientific* Variable-Flow Peristaltic Pumps

Compact peristaltic pumps for use with liquids and gases



13-876-4

- Bidirectional flow with precise measured deliveries
- Excellent flow control and flexibility for transferring and dosing liquids
- Ultralow-, low-, medium-, and medium high-flow models feature flowrates from 0.005 to 600mL/min. and accept up to five different tubing sizes
- Revolution of one roller delivers a precisely measured volume specific to tubing size and motor speed control
- Variable-speed motor control and PURGE/PRIME switch for high-speed emptying and filling
- Reverse mode permits ease in draining tubing
- Three rollers reduce flow pulsation, prevent siphoning, and eliminate the need for check valves
- Packaged in chemical-resistant ABS plastic case
- Autoclavable tubing may be used with fluid temperatures from -62° to +260°C (-80° to +500°F) and is ideal for food, pharmaceutical and other critical solutions

ORDERING INFORMATION:

Dimensions: 6⅝L × 4¾W × 4½"H (16.8 × 12 × 11.5cm).

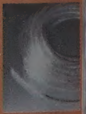
INCLUDES:

Silicone tubing (1/32, 1/16, 3/32, 3/16, and 1/4" I.D.), polypropylene fittings/nipples, 115VAC power supply and accessory battery connector (battery not supplied)

Model	Flowrate Range	Cat. No.	Each
Ultralow Flow	0.005 to 0.900mL/min.	**13-876-4**	186.03
Low Flow	0.03 to 8.20mL/min.	**13-876-1**	199.94
Medium Flow	0.4 to 85.0mL/min.	**13-876-2**	199.94
Medium-High Flow	10.0 to 600mL/min.	**13-876-3**	391.99

LOOKING FOR TUBING?

Fisher Scientific carries a large variety of plastic and rubber tubing as well as connectors and accessories. Find them in the Tubing section.



LOOKING FOR SYRINGE PUMPS?

Single, dual and multiple syringe pumps can be found in the Syringes section and on our Web site. Visit **www.fishersci.com** and search for Syringe Pumps.

ermo Scientific* Barnant* Manostat* Pumps and Dispensers

iable-flow, general-purpose pumps

ıble for pipetting, media dispensing, sampling, testing, filling, media prep, oil ysis, diagnostics, reagents, pharmaceuticals, and agrichemicals. Choose from : models (Simon* and Vera*) and dispensing models (Spencer* and Kate*).

ndard Features (for all models)

- erating temperature: 0° to 40°C
- ɡhted ON/OFF switch allows operator to maintain flow rate settings ıen pump is turned off
- 0hp motor with soft-start, reversible direction, and back EMF for 3% eed control
- emically resistant pumphead (molded of glass-filled Noryl*) has three lrin* rollers and plexiglass safety cover
- ackable painted steel housing is IP22

on Pump

- r emptying carboys or chemical containers, or for transferring distilled ıter from carboys; ideal for filtration or circulation
- ıwrate: 1 to 3450mL/min.
- e tubing from 1⁄32 to 5⁄16" I.D. (0.8 to 7.9mm)
- ıgle-direction analog speed control
- ımp motor reverses to purge lines
- mote-control model (13-874-652) has DB9 rear connector allowing ıote speed control (Requires 4 to 20mA or 2 to 10VDC input. Optional ıtswitch available; contact your Fisher Scientific Customer Service presentative)

ı Pump with Precision Digital Speed Control

- ɐal for a wide range of applications including general fluid transfer, ɛdium filtration, fluid circulation, and perfusions
- ıwrate: 1 to 3450mL/min.
- e pumped media contacts tubing only
- ature 2-digit digital speed setting for flowrate repeatability
- ck pressure capability: up to 35psi
- nensions: 10¼L × 9W × 5¾"H (26 × 23 × 15cm)

ncer Dispensing Pump

- r repetitive dispensing of volumes from 0.5 to 1700mL/cycle
- wrate: 2 to 5000mL/min.
- ır modes: Manual dispense, timed (with auto stop at preset volume), ıtinuous dispense cycle (with timed pause between discharges), and ıtinuous pump (uninterrupted)

15-078-27A

13-874-650

13-874-654

15-078-26A

- Analog single-turn speed control
- Dispense time control knob permits delay interval from 1 to 10 seconds between dispensing cycles
- Pump Status jack can operate remote relays
- Dimensions: 10¼L × 9W × 5¾"H (26 × 23 × 15cm)

Kate Dispensing Pump

- For repetitive dispensing of volumes from 0.5 to 1070mL/cycle
- Flowrate: 2 to 5000mL/min.
- Three modes: Manual dispense, timed (with auto stop at preset volume), and continuous pump (uninterrupted)
- Pump Status jack can operate remote relays
- Dimensions: 10¼L × 9W × 5¾"H (26 × 23 × 15cm)

INCLUDES:

Pumphead, removable 6' (1.8m) line cord, U.S. standard plug, tubing link; Spencer and Vera come with dispensing handle

COMPLIANCE:

IEC 1010

CERTIFICATIONS:

UL508, cUL listed.

Thermo Scientific* Barnant* CompuLab* 3 Microprocessor Programmable Dispensing System

Modular design: Controller connects to up to four RD1 or RD2 pumps operating in any combination, independently or synchronously

- Eighty-character LCD guides setup and calibration, displays flowrate, cumulative volume and complete program parameters—including setup and running functions.
- Intuitive 20-key control pad with user prompts for parameter settings: volumes, flowrates, speed, up/down ramp time, tube size, direction, units of measure, delay time (speed and volume can be changed during operation)
- Memory stores up to 30 programs which can run manually (with supplied dispensing handle or optional footswitch); semiautomatically (in cycles); automatically (by specifying cycle count from 1 to 999); or by direct control from a PC. (Software is included; compatible with Windows* 95 and Windows NT*.)
- Manual or automatic timed delay cycling from 0.1 sec. to 2.780 hr., with antidrip feature
- Audible end-of-cycle alarm

ermo Scientific* Barnant* Manostat* "Carter" Multichannel Pumps

al for virtually all pumping applications, including bioassays, electrophoresis, chromatography, and pH control

- ow ranges from 3μL to 760mL/min.
- ature remote control of speed (3.5 to 200rpm for all models), pumping ection, start/stop purge, as well as digital display of pump speed, rcent of maximum speed, or number of dispense cycles
- embrane keypad provides easy operation and protects controls from iid entry
- chometer output: 0–20mA, 4–20mA, 0–10VDC, or TTL pulse
- models come with pumphead and a set of large and/or small ssettes and feature a stainless-steel rotor, Rulon* rollers, and lysulfone ends
- mps offer offset, tangential, and adjustable occlusion
- mps 13-875-245 and -247 feature stainless-steel rollers

ORDERING INFORMATION:
230V (CE certified) models are available through your Fisher Scientific Customer Service Representative.

NEW

al for dispensing and transferring aggressive, abrasive and corrosive solvents as well as sterilized media

k easily under pressure or vacuum are self-priming with no valves eals. Choose from single-channel ultichannel configurations; pump es and heads are sold separately.

13-861-100

np Drive Standard Features

- events contamination—fluid is in ntact with tubing only
- ansports viscous media up to ,000mPa•s
- owrates from 0.3 to 3.644mL/min. $_2$O)
- ockwise and counterclockwise ections
- uble pumphead systems available
- ackable housing—two pump drives can be stacked
- erval dosing available on select drive models

np Drives for General Applications

- nvenient large dials for speed settings
- ectronic speed control with accuracy of ±2%
- otection class: IP 30
- odel PD 5001 can be equipped with single-channel, double-channel, multichannel pumpheads
- odel PD 5006 accepts single-channel pumpheads

np Drives for High Requirements

- ectronic speed control with accuracy of ±5%
- otection class: IP 55
- odel PD 5101 can be equipped with single-channel, double-channel, multichannel pump heads
- odel PD 5106 accepts single-channel pumpheads

Pump Drives for Highest Requirements

- ▸ Microprocessor-controlled
- ▸ Analog and digital RS-232C interface for speed
- ▸ Four-digit display for speed, flowrate, interval dosing and pause settings
- ▸ Calibration of flowrate and flow volume
- ▸ Flowrates of the pumpheads combinated with the various tubing are saved in the program to enable direct digital readout of flowrate/min. in display
- ▸ Dosing volume can be preselected
- ▸ Filling/emptying of tubing can be accelerated at the touch of a button
- ▸ Electronic speed control with accuracy of ±0.5%
- ▸ Protection class: IP 55
- ▸ Model PD 5201 can be equipped with single-channel or multichannel pumpheads
- ▸ Model PD 5206 accepts single-channel pumpheads

Single-Channel Pumpheads

- ▸ Allow fast and convenient tubing changes

ORDERING INFORMATION:
Pump drives and heads are sold separately; order one of each for a complete pump. (See ordering chart for possible combinations.) Pump packages (including drive, pumphead and tubing set) are available online in a variety of configurations. Dimensions (all drives): 10L × 6¼W × 8⅞"H (25.6 × 16.6 × 22.5cm).

REQUIRED ACCESSORIES:
Pumphead and tubing (sold separately); multichannel pumps require a cassette (available online)

COMPLIANCE:
DIN EN 60529 (see Ordering Chart for specific protection class)

Contd. on next page.

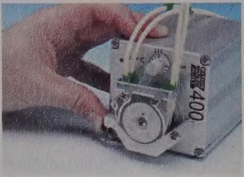
Watson-Marlow* Sci-Q 401U/D Series Variable Speed Peristaltic Pumps

Compact single-channel or multichannel pumps



14-284-122

- Feature spring-loaded tracks for consistent flows and long tube life
- Single knob controls all functions including start/stop, direction and speed
- Can be remotely controlled

401U/D1 models

- Compact, single-channel pumps flow up to 120mL/min. using continuous tubing

401U/DM2 and 401U/DM3 models

- Multiple-channel pumps accept manifold tubing to match any flow range

ORDERING INFORMATION:

Dimensions: 5⅝L × 3¼W × 3¼"H (14 × 8 × 8cm). For 110-120V 50/60Hz single phase to 15VAC power pack (supplied). Order tubing separately (online).

REQUIRED ACCESSORIES:

Tubing (sold separately)

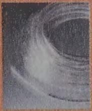
LOOKING FOR TUBING?

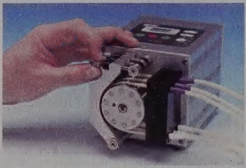
Fisher Scientific carries a large variety of plastic and rubber tubing as well as connectors and accessories. Find them in the Tubing section.



Watson-Marlow* Sci-Q 403U/VM Precision Multichannel Pumps

Precise two-, three- and four-channel pumps designed for flows from 0.001 to 17mL/min.

- Membrane keypad control with LED display for speed and direction
- Can be remotely controlled
- Accept manifold tubing to closely match the flow range
- Feature 10 stainless-steel rollers for low pulsation; spring-loaded tracks for long tube life
- With individual occlusion adjustment on each channel for precise flow control



14-284-131

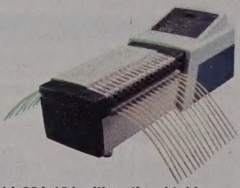
Watson-Marlow* Sci-Q 205U/CA and 205S/CA Multichannel Cartridge Pumps

Precision multichannel pumps provide accurate pulse-free flows in 4-32 channels

- Flowrate: 0.0006 to 22mL/min. (speed range 0.5 to 90rpm) per channel
- Eight roller head and specially designed cartridges minimize pulsation
- Add or remove cartridges without disturbing pumping action of remaining channels
- Auto restart option enables automatic recovery from power failures
- Cartridges can be adjusted individually for precise flow
- Autoanalysis tubing available to match any flow range (tubing sold separately)



14-284-104 with optional tubing

205U/CA Models

- Auto control by a voltage or milliamp signal

ORDERING INFORMATION:
Dimensions: 5¾W × 6⅛"H (14.6 × 15.6cm); length varies with the number of channels. Tubing sold separately

INCLUDES:
Pump only

REQUIRED ACCESSORIES:

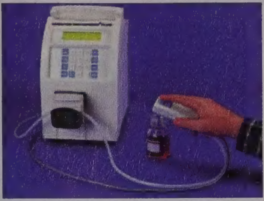
heaton Variable Speed Omnispense* Plus Peristaltic Dispensing Pump

al for dispensing everything from perfume to cell culture media, as well as numerous liquids ranging in cosity from aqueous solutions to medium syrups—all with ≤1% accuracy midrange



13-687-441

microprocessor controls, uding programmable soft start. -step volume calibration. -prompting LCD readout.

licroprocessor stores up to 00 setups for quick recall

ump supports numerous tubing zes (see chart at right) and up three pumpheads for easy ultiple dosing

ispensed liquids remain contained ithin the tubing to allow for quick, noncontaminating changes

everse-flow capability permits aspirating operations and relieves pressure the tubing to help eliminate drips.

uilt-in constant-flowrate dispenser is fully programmable and delivers a reset volume over a specific period of time

ultilanguage display prompts preset to English, but can easily be ianged to French, German, Italian, Portuguese, or Spanish

onvenient handheld tubing holder with START and STOP switch llows remote filling or use under a hood

- ▸ External connection enables remote start/stop
- ▸ Built-in tubing support securely holds the tubing required to fill containers

ORDERING INFORMATION:
Dimensions: 12L × 6W × 10"H (30 × 15 × 25cm). Weight, 15 lb. (6.8kg).

INCLUDES:
2.3mm pumphead

CERTIFICATIONS:
UL listed, CSA approved, CE marked

TUBING SIZES

Extended-life heavy-wall (2.3mm) tubing:	2, 3, 4.5, 6, and 8mm I.D.

VACUUM—OIL FREE

Fisher Scientific* MaximaDry* Oil-Free Vacuum Pumps

Clean, reliable, oil-free vacuum pumps are ideal for use with rotary evaporators, gel dryers, filtration flasks and manifolds, vacuum ovens and concentrators

Quiet, operation without the hazards of handling pump oil or contaminated water. Excellent replacement for rotary vane pumps and water aspirators, especially in applications where corrosive vapors are encountered.

- Two-stage vacuum to 1.5 torr
- Withstand aggressive gases and vapors—can be used with aggressive solvents without the risk of damaging the pump
- Single-piece diaphragm and molded pumpheads are made from PTFE to provide corrosion resistance
- High-flow multiport valves are made from tough Kalrez* elastomers to withstand pumping heavy solvent vapors and liquid condensate without a loss in performance
- Fan-cooled (TEFC) motor is rated for continuous operation and never needs lubrication
- Compact design fits easily on a benchtop or in a fume hood
- Setup and disassembly are quick and easy and do not require any special tools

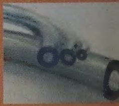
LOOKING FOR ROTARY EVAPORATORS?

Evaporation systems are available to work with your pump or for your application. Look for the Brinkmann*/Heidolph* LABOROTA 4000, and Büchi Rotavoror R-210, R-215, and RII in the Evaporators section.

LOOKING FOR TUBING?

For help selecting the right size tubing, please refer to the Tubing Guide in the Tubing section.



NEED A VACUUM OVEN?

Glassware drying, precipitates, degassing, curing, process control—whatever your application, Fisher Scientific has a vacuum oven to suit your needs. Combine it with a vacuum pump for optional performance. For more information see the Ovens section.

LOOKING FOR ROTARY EVAPORATORS?

Evaporation systems in various configurations can be found in the Evaporators section.

KNF PowerDry* Vacuum Pumps

Ideal for use in rotary evaporation, simple distillation, vacuum ovens and other applications involving wet vapor

During cleaning cycle, the electronically controlled purge valve provides a burst of ambient air that rapidly clears any accumulated moisture from the pumpheads out through the discharge port. Maintains vacuum levels by closing the pump suction valve during the purge cycle.

- Integrated controller cycle times are factory set for optimum performance and are field adjustable
- Premium, corrosion-resistant PTFE and Kalrez* resins used throughout
- Oil-free for contamination-free pumping
- Easily disassembled for occasional cleaning without special tools
- ⅜" hose barbs included

ORDERING INFORMATION:

60L/min.	3 torr	13 × 11¼ × 11" (33 × 29 × 28cm)	**13-880-10**	4450.

KNF Laboport* Filtration Pumps

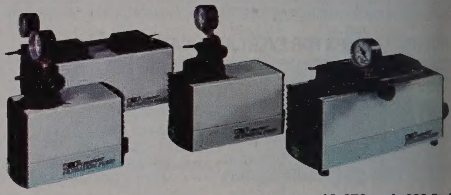
Series of compact and lightweight pumps designed for many filtration applications

No metal or coated-metal parts within the Ryton* pumpheads; prevents pitting and corroding. Structured PTFE diaphragms supply consistent, reliable vacuum levels; not dependent on water pressure or temperature. Multiport Viton* (13-880-34 and 13-878-52 only) or Kalrez* valves exhibit high tolerance to occasional liquid condensate, so a trap is not required except in those applications where large volumes of liquid are anticipated.

- Oil-free
- Low maintenance
- Small footprint; requires little bench space
- Available as stand alone or with vacuum gauge/regulator assembly
- Assembly is comprised of dampened solid-brass gauge and fine needle adjustment valve for convenient regulation of vacuum levels without needle bounce

13-878-38
- For bottletop filtration and disposable filtration assemblies with collection flasks <500mL

13-878-34
- For bottletop filtration, disposable filtration assemblies with collection flasks >500mL; glass filtration assemblies with flasks <1L; and to replace one aspirator



13-878 and -880 Seri

13-880-32
- For vacuum manifold filtration; glass filtration assemblies with flasks >1L; vacuum dot-, spot-, and slot-blots; and to replace a house vacuum port or two aspirators

13-880-30
- Ideal for solvent filtration and degassing, and vacuum desiccation

ORDERING INFORMATION:

- Wetted parts resist corrosion from moisture

ORDERING INFORMATION:
For 115V 60Hz. All pumps weigh less than 25 lb. (11.4kg).

INCLUDES:
Gauges, liquid traps on inlet/outlet with protective liquid level shutoff, vacuum/pressure gauges and adjustment valves, exhaust muffler, suction cup feet, and handles for convenient transportation

01-257-113, 01-257-93, 01-051-1A

WARNING
May be used with buffer solutions but are not recommended for use with acids, bases or organic vapors.

Edwards XDS Series Dry Vacuum Pumps for Wet Chemistry

Chemical resistant, oil-, grease- and lubricant-free pumps provide a totally lubricant-free vacuum

11-283-30

- Applications include gel drying, centrifugal concentrations, rotary evaporation and general laboratory use
- Bearings are isolated from the vacuum environment by a patented XDS bearing shield—no bearings, bearing purge grease or oil under the vacuum
- Three-position controllable gas ballast for pumping greater than 200 grams per hour of condensable water vapor
- Portable
- Air-cooled
- User-serviceable without special tools; no oil to change
- Leak tightness for all models: <7.5×10^{-7} torr/Ls

Model	XDS5-C	XDS10-C
Speed	3.5cfm (99L/min.)	6.5cfm (184L/min.)
Air Displacement	4.0cfm (113L/min.)	7.9cfm (224L/min.)
Motor Power	⅜hp	⅜hp
Vibrations	<1.5mm/sec.	<1.5mm/sec.
Noise	55dBA	55dBA
Inlet/Outlet Connections	DN25NW	DN25NW
Dimensions (L × W × H)	16⅞ × 11⅜ × 9⅞" (43 × 29 × 25.1cm)	16⅞ × 11⅜ × 9⅞" (43 × 29 × 25.1cm)
Net Weight	51 lb. (23kg)	54 lb. (24.5kg)
Mfr. No.	A725 01 906	A727 01 906
Electrical Reqts.	115-120/230-240V 60Hz, single-phase	115-120/230-240V 60Hz, single-phase
Cat. No.	**11-283-23**	**11-283-30**
Each	4200.55	5450.85

SERVICE AGREEMENTS
Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

LOOKING FOR MORE EDWARDS PUMPS?
Edwards carries a wide variety of pumps to handle various applications.

Visit www.fishersci.com and search for Edwards Pumps

*Trademark. See Trademark Reference.

cuubrand* Oil-Free Diaphragm Vacuum Pumps

vide high flowrates at working vacuum for improved process times and laboratory efficiency

lable in standard or corrosion-resistant chemical design models, ultimate vacuum as low as 0.6 torr.

mistry Design Models

tire flowpath features PTFE or other fluoropolymer components for cellent performance with aggressive vapors

mps with solvent recovery contain other chemically resistant components, ch as borosilicate glass

egrated gas ballast in multistage pumps allows continuous ndensate purge

dels ME2C and ME4C (60 torr)

itable for filtration, solid-phase extraction, degassing and evaporation volatile solvents in heated applications

dels MZ2C and MZ2C+2AK (7 torr)

cellent for rotary evaporators, most gel-drying applications, and small bletop centrifugal concentrators

Z2C+2AK adds solvent recovery accessories to MZ2C pump

del MD1C

5 torr ultimate vacuum and air displacement of 0.88cfm (25L/min.)

del MD1C + AK + EK (1.5 torr)

ree-stage design in a suitable size for benchtop rotary evaporation and l drying with an SDS-PAGE concentration greater than 10%

odel MD1C+AK+EK adds solvent recovery, including an emissions condenser

del MD4C (1.5 torr)

werful 1.5 torr, three-stage pumps evaporate nearly all solvents at om temperature

odel MD4C is excellent for large rotary evaporators and centrifugal ncentrators; as well as multiple gel dryers

odel MD12C is large enough for many pilot-plant applications

Model MV10C (0.68 torr)

- Provides the deepest vacuum available (0.6 torr) in an uncontrolled chemistry design diaphragm pump

13-878 and -688 Series

Standard Design (Aluminum FPM) Models

- Designed for nonevaporative/noncorrosive applications such as vacuum filtration, degassing and impregnation
- All parts that contact gases and vapors are made of aluminum, FPM and polyamide
- FPM double diaphragm provides high reliability and low maintenance
- Outlet silencer reduces noise

Models ME2, ME4 and ME8 (60 torr)

- Mechanical one-stage vacuum pumps provide flowrates of 1.3, 2.5 and 4.4cfm

Model MZ2 (6.8 torr)

- Flowrate of 1.3cfm

Model MD1 (1.1 torr)

- Flowrate of 0.82cfm and 6mm hose nozzle inlet

Model MD4 (1.5 torr)

- Mechanical three-stage vacuum pump; flowrate of 2.2cfm
- Has a four-head design for greater flowrate and an NW16 small flange inlet connection

ORDERING INFORMATION:

For 120V 60Hz. (Contact your Fisher Scientific Customer Service Representative for other voltage requirements.)

Vacuubrand* Chemistry VARIO* Pumping Systems and Diaphragm Pumps

Corrosion-resistant, oil-free pumps automatically find and follow boiling curves without presets

13-688-287

- Oil-free pumps made of corrosion-resistant materials
- Evaporate up to 30% faster than conventional vacuum systems
- Automatic shutoff after evaporation is complete
- Feature integral pumps constructed of corrosion-resistant fluoropolymers, such as PTFE, for corrosion resistance
- RS-232 port allows computer control and logging for process validation

PC2001 Model

- Compact, cost-effective system, with three-stage 1.5 torr performance suitable for most laboratory-sized rotary evaporators
- Includes solvent recovery system
    - Inlet catchpot to preserve pump performance by collecting condensed solvent in the vacuum line
    - Outlet condenser to reduce emissions
    - Space-saving stand

PC2003 Model

- Provide the deepest vacuum available in a diaphragm pump, as low as 0.45 torr
- Include solvent recovery system (as described above)

INCLUDES:

Pump system (where appropriate) and operating instructions

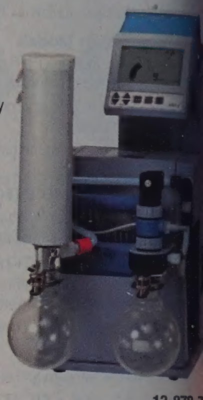
WARRANTY:

One year

Model	Ultimate Vacuum	Air Capacity	Mfr. No.	Electrical Requirements	Cat. No.	Each
PC2001	1.5 torr	0.94cfm (27L/min.)	696643	100-120V 50/60Hz	**13-688-287**	6790.00
PC2003	0.45 torr	1.5cfm (42L/min.)	683443	100-120V 50/60Hz	**13-878-59**	10,060.00

Vacuubrand* Dry Vacuum Systems

Controlled vacuum solutions for evaporation and other applications



13-878-7

Integrated systems for evaporative applications incorporate a quiet, high-performance chemistry-design diaphragm vacuum pump with vacuum control.

- All pumps are constructed with chemically resistant materials, such as PTFE, for operation without cold traps in most applications
- Integrated gas ballast continuously purges pumps of internal condensation, improving performance and significantly increasing pump lifetime
- Powered by either a Vacuubrand MZ2C (7 torr model) or MD4C (1.5 torr model) diaphragm pump for high flowrates at working vacuum
- Inlet catchpot captures most vacuum line condensation to preserve pump performance and ensure long service life
- Outlet condenser recovers solvents and controls solvent vapor emissions
- Condenser and catchpots are borosilicate glass

PC101 and PC201 Vacuum Systems

- Feature Bourdon-type dial gauges using manual flow control for vacuum regulation for general-purpose evaporative applications
- PC101 has 7 torr Vacuubrand MZ2C pump; PC201 has 1.5 torr MD4C pump

PC510 and PC610

- Upgrade the PC101 and PC201, respectively, by adding two-point electronic control and a solenoid valve for more critical applications, such as rotary evaporation

PC520 and PC620

- Compact vacuum systems for two independently controlled vacuum applications
- Incorporate all the features of the PC510 and PC610, respectively; plus a second port with PTFE solenoid valve and vacuum controller

ORDERING INFORMATION:

For other voltages, contact your Fisher Scientific Customer Service Representative.

INCLUDES:

120V pump motor

WARRANTY:

One year

CHOOSE THE RIGHT PUMP FOR THE RIGHT JOB

Applications—The features and performance profile of your vacuum pump should match your application and sample specifics. More vacuum is not always better vacuum.

Performance—Select a pump designed to produce the vacuum you need. Ultimate vacuum levels, pumping flowrates, and sustainable operation at lesser vacuum levels are common initial considerations.

Features—Look for integrated features such as solvent collectors, large oil reservoirs, and/or portability to maximize your pump's performance and utility.

Control—Many applications can be fine-tuned with control features ranging from valve-and-gauge simplicity to multi-parameter programmability.

Materials—Pump materials contacting fumes from your application should be able to resist solvent or corrosive effects.

Maintenance—Dry vacuum pumps generally require less maintenance than oil pumps. For high-vacuum applications requiring an oil pump, Belt Drive models provide the most rugged performance.

HELPFUL HINTS FOR VACUUM

Use a trap—Traps protect your pump, your lab environment, and your work. Cold traps also help drive vacuum.

Safety first—Always shield yourself from your application and ventilate hazardous exhaust.

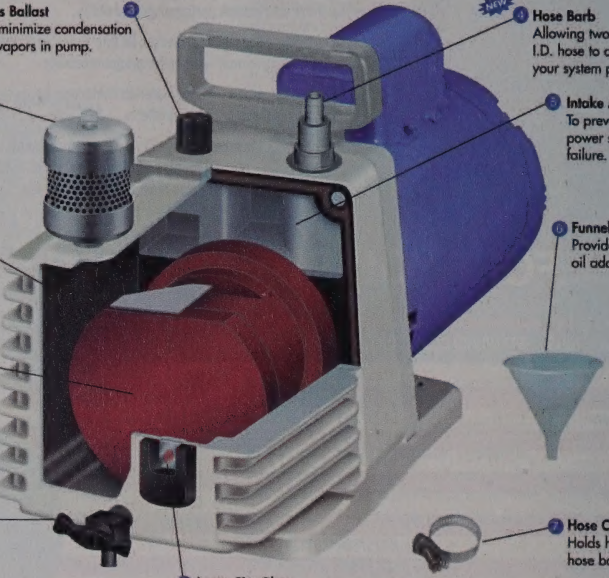
Find system leaks—Many vacuum applications use excess pumping to compensate for system leaks. Methodically isolate system segments to detect vacuum differences with a vacuum gauge and use mild pressurization with a soap bubble solution to find leak sources.

For a full selection of Welch® Vacuum Pumps, see pp. 1491-1492, 1499-1502.

VACUUM—ROTARY

Fisher Scientific* Maxima* C *Plus* Vacuum Pumps

Designed for easy use with lab equipment such as freeze dryers, vacuum ovens, and centrifugal concentrators



③ **Gas Ballast**
To minimize condensation of vapors in pump.

④ **Hose Barb**
Allowing two sizes of I.D. hose to connect to your system per pump.

② **Oil Mist Eliminator**
Trapped oils naturally fall back into the oil case via gravity after pump down.

⑤ **Intake Antisuckback Valve**
To prevent oil back flow on power shut down or power failure.

① **Teflon** Coated Oil Case**
Prevents particles and sludge from clinging to the walls of the oil case to simplify oil change.

⑥ **Funnel**
Provided to allow quick oil adds.

⑩ **Black Oxide Coated Pump Module**
Coated to prevent corrosion when exposed to vapors. Valves, fasteners, flanges and connectors are made of stainless steel.

⑨ **Easy Oil Change Valve**
Drain valve for quick and easy oil changes. No tools required.

⑦ **Hose Clamp**
Holds hose tight to hose barb.

⑧ **Large Site Glass**
Easily assures proper oil level.

01-257 Serie

Design features

- Ultimate vacuum to 1 × 10^{-4} torr
- Convenient carrying handle and nonskid base
- Overload protection on all single-phase models

Corrosion resistance

- Black oxide coating on pump interior
- Stainless-steel valves, fasteners, baffle plates, and Viton* elastomers
- Fisher Scientific Maxima Vacuum Pump Oil (included) is hydrotreated to minimize aromatics and sulfur, providing good resistance to sludge and varnish formation over time in corrosive environments

Accepts different size vacuum tubing

- Eliminates need for specialized tubing reducers
- Inlet connection on all pumps accepts two hose I.D. sizes to easily connect either a large or a smaller I.D. hose from the pump to the apparatus

Easy oil change

- Faucet-style valve opens and closes easily to allow oil to flow out of the case in a steady, controlled manner with minimal mess
- Oil case is coated with PTFE so that particulates do not cling to the side of the case

ORDERING INFORMATION:

International and explosion-proof models are available through your Fisher Scientific Sales Representative.

INCLUDES:

Pump with line cord and plug, hose clamp, funnel, change of oil, oil mist eliminator

CERTIFICATIONS:

CE marked, CSA approved

WARNING

Not recommended for filtration, aspiration, or drying electrophoresis gels. These drying processes occur in the rough vacuum level (above 30 torr [40mbar]). These vane pumps are not designed for high-pressure operation. Pumps should not be operated continuously at pressures above 10 torr.

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

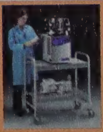
For immediate assistance, call 1-800-395-5442.

LOOKING FOR VACUUM OVENS?

Fisher Scientific carries a wide variety of vacuum ovens to meet any of your drying needs. See the Ovens section.

LOOKING FOR FREEZE DRYERS?

You'll find a selection of environmentally safe, CFC-free systems in bentchtop and floor models in the Freeze Dry section.

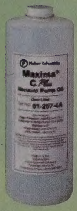


ACCESSORIES

Pump Oil

Designed to resist breakdown in Fisher Scientific* Maxima* C *Plus* pumps

Triple-distilled hydrocarbon oil using severely hydrotreated base stock. Hydrotreating minimizes aromatics and sulfur to give good resistance to sludge and varnish formation over time in corrosive environments. The oil enables pumps to maintain the highest vacuum performance over time. Clear, colorless, and odorless.



01-257-4A

Size	Cat. No.	Each	Case of
1L	**01-257-4A**	31.78	12/325.96
1 gal.	**01-257-4B**	114.87	4/392.71
5 gal.	**01-257-4D**	375.55	----

Standard Exhaust Oil Filters

As supplied with Fisher Scientific* Maxima*C *Plus* pumps

These compact, round filters simply screw into threaded exhaust port to collect oil expelled during operation. A replaceable filter element within the oil filter separates the oil into particles no larger than 0.3µm, and drops collected oil back into the oil case.

01-257-5A

- Filter element is easily replaced
- Reorder number located on filter canister

Dry Ice/Liquid Nitrogen Trap

Large cold chamber provides rapid condensation of solvent vapors

01-257-14

- Prevents oil back-streaming
- Dry ice/isopropyl alcohol slurry to produce at a temperature of -79°C or liquid nitrogen (-198°C) may be used as refrigerant
- Accepts ½" O.D. (12.7mm) tubing

For Models	Cat. No.	Each
M2C through M16C	**01-257-14**	902.62

Exhaust Oil Recycler with Built-in Filter Element

Economical mist eliminator is recommended for use when operating the pump at a continuous vacuum pressure of at least 1 torr

Continuously separates air and oil from the pump exhaust, returning captured oil to the pump via the gas ballast inlet (when gas ballast valve is open). This process effectively reduces oil consumption and minimizes maintenance requirements by extending the time between oil changes.

01-257-7B

INCLUDES:

Adapters for direct connection to the pump's threaded exhaust port and gas ballast inlet port

Fits Models	Dimensions (Dia. x H)	Cat. No.	Each
M2C and M4C[1]	2¾ × 6¼" (7 × 15.9cm)	**01-257-7A**	330.97

elch* DuoSeal* High-Vacuum Pumps

gged, durable pumps are ideal for demanding applications such as Schlenk drying es, freeze drying, vacuum distillations, concentrating and degassing

- ruggedness is a result of reduced frictional wear (less than 580rpm vs. cal 1750rpm direct-drive pumps) and high contamination tolerance (contaants diluted due to large oil capacity).
- ual-voltage models come wired for lowest voltage listed in specificaons chart; may be converted to higher voltage listed by rewiring
- /iring diagram supplied with each model
- ll models are single phase

INCLUDES:

V-belts, pulleys, belt-guard, oil supply, three-wire cord (except 01-105-1 which must be conduit wired), plug, inline switch and instructions

ernational Model for 115/230V 50Hz available on special order.

thout motor, base or belt. Pump only.

Welch* Direct-Drive High-Vacuum Pumps

Compact, portable, two-stage direct-drive pumps suitable for vacuum ovens, freeze dryers, concentrators, and chambers

Each stage is a rotor with two movable vanes. The two stages back each other on the shaft for the mostefficient vacuum possible. Gas ballast valve admits calibrated amount of air at atmospheric pressure to prevent condensation in exhaust stage.

- Available in pumping ranges of 1.8 to 11.3cfm (51 to 320L/min.)
- Ultimate pressure to 1×10^{-4} torr (based on model)
- Aluminum Unibarb* style inlet connector accepts two sets of tubing I.D. (3/16 to 13/16" [5 to 20mm]) and has a screen
- Outlet connector has a 1-20 thread (**Model 8905A** has a ¾-20 outlet connector thread)

Models 8907, 8912, and 8917

- Include integral isolation valve to prevent oil and air contamination of the system in the event of a power failure.

INCLUDES:

Line cord, switch, plug, and vacuum oil

CERTIFICATIONS:

115V models are CSA approved; 230V models are CE marked.

LOOKING FOR ROTARY EVAPORATORS?

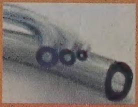
Evaporation systems in various configurations can be found in the Evaporators section.

NEED A VACUUM OVEN?

Glassware drying, precipitates, degassing, curing, process control—whatever your application, Fisher Scientific has a vacuum oven to suit your needs. Combine it with a vacuum pump for optional performance. For more information see the Ovens section.

LOOKING FOR TUBING?

For help selecting the right size tubing, please refer to the Tubing Guide in the Tubing section.



*Trademark. See Trademark Reference.

elch* Chemstar* Belt-Drive Pumps

al for pumping corrosive gases below 1 torr

osion-resistant construction resists chemical attack. Operate at tional speeds of less than 580rpm and feature a large oil reservoir to ntain pumping efficiency—even in dirty applications.

- ugged, low-maintenance pump for tough applications
- timate vacuum, 13.3MPa (1 × 10^{-4} torr)
- w temperatures, degassing and large reservoir extend oil lifetime
- as bubbler allows uniform injection of dry nitrogen into the oil reservoir, egassing the pump fluid and lowering the operating temperature of e oil
- ımp and motor are mounted on steel base

01-107-3

INCLUDES:

Pump, V-belts, pulleys, belt guard, oil supply, three-wire cord, plug, inline switch, and instructions

NOTE:

Use only DirecTorr* Gold Synthetic Pump Oil in Chemstar Vacuum Pumps

elch* Gem* Model 8890A-70 Vacuum Pump

al for rotary evaporations with high boiling point solvents

ged gear pumping mechanism operates over a wide range of ssures. Efficiently pumps vapors without condensing them into the ıp.

- ffective evaporation for DMSO and other high boiling point solvents
- djustable vacuum to prevent bumping
- ear pump mechanism is tolerant of vapors
- xhaust mist eliminator prevents oil loss
- ee air displacement: 31L/min. .1cfm)
- ltimate vacuum: 0.1 torr
- il capacity: 0.5 qt. (0.45L)
- ccepts tubing: 10mm I.D.

ORDERING INFORMATION:

Dimensions: 14½L × 5⅛W × 14⅜"H (36.8 × 13 × 36.3cm). Weight: 27½ lb. (12.5kg). For 115V 60Hz.

INCLUDES:

Vacuum gauge/regulator, exhaust mist eliminator

COMPLIANCE:

CSA approved

Welch* Freeze Dryer Pumps

Special application direct-driven pump designed for harsh chemical mixtures like TFA, TFA byproducts, acetonitrile, and HBr that are removed during sample drying

Oil is continuously filtered through micron filter paper and acids are neutralized using Al_2O_3 pellets. The large, ⅜ qt. (1.3L) oil capacity dilutes organic vapors that mix with the pump oil during the freeze drying run. Includes DirecTorr* Gold synthetic oil, which has excellent resistance to chemical attack.

01-257-91

- Continuous acid neutralization and oil filtration
- Large oil capacity extends service intervals
- 1725rpm pump speed, ½hp
- Aluminum Unibarb* style inlet connector accepts two sets of tubing I.D. (7/16 and 13/16" [11 and 20mm]) and has a screen
- Exhaust connector has a 1-20 thread

ORDERING INFORMATION:

Welch* Self-Cleaning Vacuum System

Complete oil-free vacuum system for rotovaps, concentrators and chemical-dry laboratory applications

Ideal for stripping solvents with boiling points <100°C, such as methylene chloride, alcohol, and acetone. Corrosion-resistant PTFE diaphragm pump handles up to 5L evaporation flasks.

01-129-19

- Free air displacement of 34L/min. (1.2cfm)
- Delivers a vacuum to 9 torr (29.6"Hg)
- Automatic self-cleaning purge rids pump of residue at shutdown—ensuring a longer service life and reducing downtime
- Glass inlet separator helps prevent the pump from ingesting liquids or particulates
- Exhaust separator collects any liquid droplets or particulates flushed from the pump during the purge cycle
- Dial pressure gauge and adjustable vacuum regulator enable distillation control
- Ballast switch gives instant control of bumping/foaming

ACCESSORIES

Welch* DirecTorr* Gold Synthetic Pump Oil

Designed for excellent resistance when pumping corrosive gases or vapors

Offers excellent vacuum pressure in both belt- and direct-driven vacuum pumps over time. Synthetic base stock has no aromatic compounds or sulfur, which accelerate varnishing, sludging and carbon buildup when pumping corrosives.

- Double-distilled synthetic hydrocarbon oil
- High stability in chemical environments with exceptionally low vapor pressure
- Miscible with conventional hydrocarbon oils and can be used without rebuilding the pump
- No additives or inhibitors
- Clear and colorless

wards Rotary Vane Vacuum Pumps

h-performance pumps suitable for a wide range of difficult applications

ue dual mode allows you to configure pump for very high gas loads out compromising vacuum. Easily reconfigured—even when pump is ing. Choose from models for centrifugal concentrators, rotary orators, freeze dryers, gel dryers, vacuum ovens, or general-purpose irements.

rge, clearly marked, easily accessible controls
erate at quiet 48dBA
sy to use and service (require no special tools)
st-acting inlet valve prevents oil and gas suckback in the event of wer or oil pressure loss
V25 inlet/outlet connections

h vacuum or high throughput from the same pump

sily selectable modes
gh Vacuum mode provides ultimate vacuum down to 1.5 × 10^{-3} torr with gas ballast
gh Throughput mode sustains long-term high-inlet pressures with timate vacuum as low as 2.3 × 10^{-2} torr without gas ballast

ustable gas ballast control maximizes vapor handling ability

s ballast delivered into pump prevents condensation of vapor carried pumped gases
ree user-selectable gas ballast positions—'0' Closed, 'I' Low Flow, 'II' gh Flow—meet most vapor handling requirements

11-283 Series

ORDERING INFORMATION:
For 115V 50/60Hz. Vacuum tubing sold separately.

INCLUDES:
Pump, electrical supply cable (2m), inlet screen and Ultragrade 19 oil

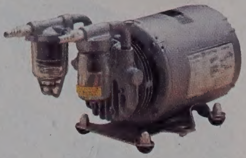
ght for RV8 and RV12 models includes attached lifting bracket.

Gast* Lubricated Rotary Vane-Type Pressure/Vacuum Pumps

Available with or without gauges and regulator



01-093

- Pressure up to 25psig (172kPag) for intermittent service and 20psig (138kPag) for continuous service
- Maximum vacuum: 27" (69cm) of Hg
- Free-air displacement: 1.3 cu. ft. (37L)/min.
- Free-air delivery, 0.9 cu. ft. (27L)/min. at 10psig (69kPag)
- ⅙hp ball-bearing motor

Standard Pump

- With combined oiler and intake filter, visible oil trap, two serrated hose connections for ¼" (6.4mm) tubing, foot bracket, and cord with switch
- Without gauges, regulators or handle

Pump with Gauges and Regulator

- Same as 01-093 pump, except with 2" (5cm) pressure gauge calibrated from 0 to 30psig (0 to 207kPag); 2" (5cm) vacuum gauge calibrated from 0 to 30"Hg (0 to 102kPag)
- Includes vacuum and pressure regulator and handle

ORDERING INFORMATION:

Dimensions: 12¾L × 8W × 7½"H (32.4 × 20 × 19cm).

Model	Electrical Requirements	Cat. No.	Each
Standard	115V 60Hz, 4.4A	**01-093**	515.15
With Gauges and Regulator	115V 60Hz, 4.4A	**01-093-5**	730.00

Gast* Lubricated Rotary Vane-Type Vacuum Pumps

Similar to 01-093-5 pump, but with higher free-air displacement

01-094 Series

- Pressure to 15psig (103kPag)
- Vacuum to 27"Hg (92kPag)
- With 128L/min. (115V model) free-air displacement or 106L/min. (230V model)
- Fan-cooling, self-adjusting vanes
- Lubricator, exhaust trap, vacuum and pressure gauges and regulators, bleeder, hose nipples
- Carrying handle and foot support
- Intake filter with 10µm filter element

INCLUDES:

Pump, power-supply cord with ON/OFF switch

Air Delivery at 15psig (103kPag)	Electrical Requirements	Cat. No.	Each
3.2cfm (91L/min.)	115V 60Hz, 7.0A	**01-094-25**	732.00
7.1cfm (204L/min.)	115/230V 50/60Hz, 10.8/5.4A	**01-094-24**	1200.65

Gast* Oil-Less Diaphragm-Type Pressure/Vacuum Pump

Pressure/vacuum pumps with ⅛hp motor for medium pressure and solid vacuum applications

Includes vacuum and pressure regulators.

01-092-

- Produce maximum gauge pressure of 60psig (413kPag)
- Vacuum to 25" (84kPag)
- Separate vacuum and pressure gauges, graduated from 0 to 60psig (5psig increments) and 0 to 25"Hg (½"Hg increments)
- ON/OFF switch on pump body
- Aluminum housing with rubber feet and handle
- Hose connection diameters: ⅜" O.D. × ¼" I.D. (9.5 × 6.4mm)

ORDERING INFORMATION:

Overall dimensions: 7¾L × 6½W × 10¾"H (19.7 × 16.5 × 27.3cm). Weight: 15 lb. (6.81kg).

INCLUDES:

Pump and power cord

Electrical Requirements	Cat. No.	Ea
115V 60Hz, 4.2A	**01-092-29**	425.

Gast* Oil-Less Piston-Type Pressure/Vacuum Pumps

For air sampling, pressure/vacuum filtration, degassin solutions

Use with therapeutic equipment and flame photometers.

01-092-

- Pressure/vacuum pumps with ⅙hp motors
- Produce maximum gauge pressure of 100psig (689kPag) or vacuum of 25"Hg (84kPag)
- Separate vacuum and pressure gauges, graduated from 0 to 30"Hg (0 to 102kPag) and 0 to 100psig (0 to 689kPag), respectively
- Free-air flow: 1.3 cu. ft. (37L)/min.

ORDERING INFORMATION:

Dimensions: 15L × 8W × 10¾"H (38 × 20.3 × 27.3cm). For 115V 60Hz.

INCLUDES:

Pump, vacuum and pressure regulators, moisture trap, intake filter, handle rubber suction-cup feet and line cord and plug with ON/OFF switch

Electrical Requirements	Cat. No.	Ea
115V 60Hz, 3.9A	**01-092-25**	582.

VACUUM—SPECIALTY

Thermo Scientific* Barnant* Air Cadet* Single-Head Vacuum/Pressure Pumps

Compact, economical pumps are ideal for filtration, evacuation, flue-gas sampling, and other gas or air-handling applications

- Maximum pressure: 23psig
- Maximum Vacuum: 23"Hg (23mmHg)
- Dacron-reinforced nitrile, Valox*, PTFE and polyethylene components
- Totally enclosed, fan-cooled⅟45hp motor
- ON/OFF switch for convenientcontrol

INCLUDES:

PTFE sealing tape, two ⅜" (9.5mm) polyethylene hose bar adapters, and 6' (1.8m) three-wire cord

CERTIFICATIONS:

UL, cUL listed; 230V model is also CE marked.

VACUUM—HAND

Nalgene* Hand Vacuum Pump

Durable, hand-operated PVC vacuum pump with gauge produces and holds 25"Hg (84kPag)

New trigger design requires one-handed operation. Ideal for siphoning, filtration, liquid transfer, bleeding fluid lines, checking for equipment leaks and adjusting vacuum-operated apparatus.

- Gauge monitors vacuum in kPa and inches and centimeters of Hg
- Fitted with removable cover on exhaust port and trigger to release vacuum without disconnecting pump from line
- Sealed, self-lubricating, corrosion resistant
- Nozzle fits ¼" I.D. (6.4mm) tubing
- Without gauge

INCLUDES:

Pump and 24" (61cm) length of ¼" I.D. (6.4mm) vinyl tubing

Pumping Rate/Stroke	Delivery	Cat. No.	Each	Case of 4
15cc	3psig[1] (21kPag)	**01-071**	113.72	303.25
36cc	3psig[1] (21kPag)	**01-071A**	143.63	383.00

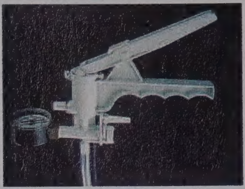
[1] *Positive pressure at outlet port.*

Nalgene* PVC Hand-Operated Vacuum Pumps with Gauge

Durable repairable, hand-operated vacuum pumps

Ideal for siphoning, filtration, liquid transfer, bleeding fluid lines, and checking for leaks.

- Gauge monitors vacuum in kPa and inches of mercury
- Trigger release disassembles for repair or replacement of internal parts
- Lightweight units are sealed and self-lubricating with removable covers on exhaust port and trigger to release vacuum without disconnecting pumps from the line



13-874-612 Series

INCLUDES:

2' (0.6m) Nalgene 180 clear plastic tubing

Pumping Rate/Stroke	Positive Pressure	Cat. No.	Each	Case of 4
15cc	3psig (21kPag)	**13-874-612A**	169.96	453.25
36cc	7psig (48kPag)	**13-874-612B**	209.82	559.50

MANUAL PUMPS

Stainless-Steel/PTFE Drum Pump

Fits 15 to 55 gal. drums

For use with chlorinated and petroleum solvents, such as trichlorethylene, xylene, freon, acetone.

- Measures uniform 8 oz. (220mL) on each upstroke
- Easily adjusts to fit any 15, 30, or 55 gal. drum (57, 114, or 208L)
- Lockable handle prevents tampering
- With 2" (5 cm) opening
- Spout height adjustable to fit various drum sizes
- Thumbscrew lock and packing nut can be tightened to stop leakage that may eventually occur with wear
- With 18" long (46cm) PTFE tube

01-007-5

Cat. No.	Each
01-007-5	176.78

Zinc-Plated Pump

For 5, 6 gal. (19, 23L) pails

Heavy zinc-plated pump fills small bottles from chemical pails without spilling.

- Dispenses 4 oz. (118mL) with each stroke
- Metal strap hooks over bottom of pails and holds dispenser while pumping

09-196

NOTE:

Inside of pump cylinder is bare steel; not recommended for use with water-based liquids.

Cat. No.	Each	Case of 12
09-196	29.07	317.15

PUMP ACCESSORIES

*Fisherbrand** 19 Mechanical Pump Oil

For belt-drive and direct-drive pumps not subject to extreme operating conditions

Also for use in the forepump of a diffusion pump system with polyphenyl ethers, silicone and ester-based pump fluids.

- Permits cooler pump operation, lower maintenance, longer fluid life, reduced power consumption
- Reduces backstreaming
- Protects O-rings
- Ultimate pressure at 25°C (77°F), 8.5 × 10^{-5} torr
- Pour point: -15°C (+5°F)
- Flash point: 212°C (415°F)

Vacuum Leak Detector

Generates high-frequency spark to pinpoint leaks in vacuum systems, electronic tubes, insulation, valves, pipes, or any nonconducting material

- Consists of an adjustable interrupter, vibrating spark gap, capacitor, resonator coil and gap tip
- With special electrically isolated electrode
- Voltage output variable from 10,000 to 50,000 at a frequency of approximately 0.5MHz

15-340-7

ORDERING INFORMATION:

Dimensions: 2½ dia. × 13½"L (6.4 × 34cm).
For 120V 50/60Hz, 0.35A, 40w.

Cat. No.	Each	Case of
15-340-75	264.81	1358.0

Dow Corning* Silicone Diffusion Pump Fluids

For demanding high- and ultra-high-vacuum applications

01-185 Serie

Chemically and thermally inert fluids.

Formula 702

- For fast pumping of large volumes of gas
- Vacuum range, 10^{-5} to 10^{-7} torr
- Can be used with vacuum ejector pumps in 10^{-4} to 10^{-5} torr range

Formula 704

- A clear, tetramethyltetra-phenyltrisiloxane, single-component fluid for high vacuums of 10^{-7} to 10^{-8} torr range (untrapped) and 10^{-11} (trapped)

Radiation-resistant Formula 705

- For heavy-duty pumping with vacuums of 10^{-9} to 10^{-10} torr (untrapped) and 10^{-11} torr (trapped)

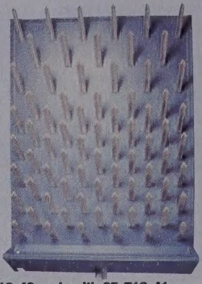
DRYING

*Fisherbrand** Polystyrene Drying Rack

Fits up to 72 pegs

- Injection-molded, high-impact, light blue polystyrene
- Pegs hold cylinders and flasks and snap in or out easily when desired
- Comes with 72 large 4" long (10.2cm) pegs, expansion hanging hooks, draining tubes and fastening stoppers for coupling with additional racks
- Interchangeable pegs for use with test tubes available separately

ORDERING INFORMATION:
Dimensions: 17W × 24"H (43.2 × 61cm) with 3" (7.6cm) ledge



05-718-40 rack with 05-718-41 pegs

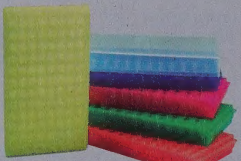
MICROCENTRIFUGE TUBE

*Fisherbrand** Microcentrifuge Tube Racks

Two frosted writing areas for sample identification

- "Reversible," autoclavable polypropylene racks
- Withstand freezer storage to -90°C (-194°F)
- Cone-shaped wells keep tubes centered and upright
- Alphanumeric index permits easy tube identification
- Choose from 13 colors and assorted packs



05-541-38

Capacity: Hold ninety-six 0.5mL tubes on one side or ninety-six 1.5 to 2.0mL microcentrifuge tubes and screw-cap microcentrifuge tubes on the other.

ORDERING INFORMATION:

05-541-28	15.60	53.33

*Fisherbrand** Polypropylene Microtube Storage Racks

Instantly organize microcentrifuge test tubes in any lab

- Color-coded racks provide easy identification of specific laboratory procedures or individual technician's trays
- Each well is numbered for easy sample location.
- Ideal for freezing
- Autoclavable
- Excellent for benchtop use, in storage or transport of samples
- Choose from 12 colors, including natural, plus assorted packs

05-541 Series

Capacity: Hold 80 screw-cap microcentrifuge tubes up to 2.0mL in a 16 × 5 array.

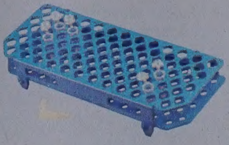
Fisherbrand* Microcentrifuge Tube Rack

or 1.5mL micro test tubes



- Blue polypropylene
- Won't float or move in circulating water baths
- Snap together securely
- Racks are stackable even when completely loaded with test tubes

14-810-31

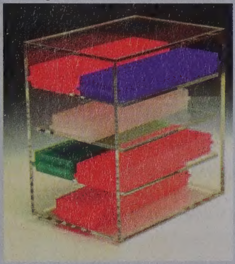
Capacity: Accommodate 50 icrotubes with lid open (without nterfering) or 100 microtubes with lid closed or without lids.

imensions (L × W × H)	Cat. No.	Case of 5
0⅜ × 4½ × 1¾" (26.4 × 11.4 × 4.4cm)	**14-810-31**	106.45

Fisherbrand* Acrylic Rack Holder

Maximizes benchtop or freezer space

- Clear acrylic rack holder has four shelves to hold up to eight trays
- Accommodates fraction collector trays and many different racks



12-009-47

imensions (L × W × H)	Cat. No.	Each
½ × 9 × 9" (16.5 × 23 × 23cm)	**12-009-47**	81.76

Fisherbrand* FlatRack* Microcentrifuge Tube Racks

conomical, disposable racks made of ecycled cardboard

05-544-4

- Easily recyclable and biodegradable—packaged in biodegradable shrink-wrap, making disposal simple and affordable
- Accommodate standard microcentrifuge tubes used in microbiological research
- Autoclavable and can be used in the refrigerator or freezer
- Numbered positions allow for quick and accurate identification
- Feature space on ends for recording notes and dates
- Environmentally sensitive inks are used in printing

Capacity: Racks for 0.5mL tubes hold 30 tubes; racks for 1.5mL tubes old 20.

or Tube ize	No. of Places	Dimensions (L × W × H)	Cat. No.	Pack of 25	Case of 4 Pk.

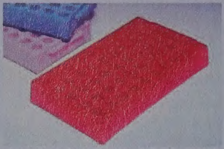
Fisherbrand* Micrewtube* Workstation Rack

Compact, stackable rack



- ▸ Autoclavable polypropylene rack
- ▸ Locking system works with many tubes with locking bases; allows you to tighten or remove caps with one hand
- ▸ Features strong handles
- ▸ Supported by five antiskid rubber feet

05-669-45

Capacity: Holds up to fifty 0.5 to 2.0mL microcentrifuge tubes.

ORDERING INFORMATION:
Dimensions (L × W × H): 4 × 8 × 1" (10 × 20 × 2.5cm)

Color	Cat. No.	Case of 4

Fisherbrand* 96-Well Rack for PCR Tubes

Autoclavable polypropylene rack for 0.2mL tubes

- ▸ Ideal for pre- or post-PCR sampling applications
- ▸ Imprinted alphanumeric grid for easy sample identification
- ▸ Removable lid provides flexibility
- ▸ Each pack contains five racks in assorted colors (blue, green, pink, yellow, and orange)

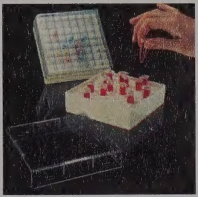
Capacity: Accommodates individual tubes or 8- or 12-tube strips in a 96-well array.

03-448-20

Dimensions (L × W × H)	Cat. No.	Pack of 5	Case of 40 Pk.
5⅛ × 3⅞ × 1¼" (13 × 10 × 3.3cm)	**03-448-20**	36.71	1174.72

Nalgene* Microcentrifuge Tube Box

Three sizes fit tubes from 0.2 to 1.5mL



- ▸ Provides safe sample storage from -135° to +121°C (-211° to +250°F)
- ▸ Bottom constructed of white polycarbonate
- ▸ Transparent polycarbonate lid has printed grid for inventory purposes
- ▸ Lid accepts marker for box and tube identification and is keyed to orient front and back of box

15-350-58

Capacity: High-temperature polyurethane foam insert securely holds sixty-four or eighty-one 0.2, 0.5, or 1.5mL microcentrifuge tubes.

ORDERING INFORMATION:
Dimensions (L × W × H): 5¼ × 5¼ × 2" (13 × 13 × 5cm)

NOTE:
Not for use in liquid phase of liquid nitrogen.

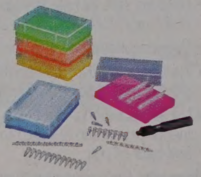
Preparation Racks for Thin-Walled PCR Tubes

For PCR preparation and storage

- Racks with covers designed for preparing and storing 0.2mL thin-walled tubes and strip caps before or after PCR sample processing applications
- Racks include alphanumeric index for easy tube identification
- Transparent plastic covers have a recessed lid that lets you stack racks
- Compatible with other manufacturers' tray/retainer sets or cycler plates, individual tubes, and 8- or 12-strip tubes
- Choice of five fluorescent colors



05-541-55 (Tube, cap strips and tool not included)

Capacity: 96 positions for 0.2mL thin-walled tubes and strip caps.

MULTIPURPOSE

Fisherbrand* Universal Tube Racks

Organize and store up to 46 tubes of varying sizes

- Polypropylene racks with numbered tube cavities make tracking tubes easy and convenient
- Autoclavable
- Available in five colors

14-809-200 through -204

Capacity: Multilevel design accommodates 24 microcentrifuge tubes (0.5 to 2mL), fourteen 12 × 75mm tubes (including culture tubes, cryovials and a variety of blood collection tubes), seven 15mL centrifuge tubes and one 50mL tube at the same time.

gos* Flexirack

NEW

rsatile polypropylene rack functions as a etting workstation

Rack shown with basin (03-395-200) and each of five different 03-395 Series tube inserts

- lodular design; allows you to create rack based on your individual quirements
- an accommodate tubes from 0.5 50mL depending upon which olor-coded insert is used
- asy-release tabs allow user to uickly change inserts for ultiple applications
- ered rack design permits simultaneous viewing of all tubes
- nall 10 × 5 × 3" (25.4 × 12.7 × 7.6cm) footprint and high tube capacity aximize valuable laboratory space

DERING INFORMATION:

k can be purchased individually or as a set of two to double tube age capacity. Disposable polystyrene basin inserts are also available.

LUDES:

nplete rack system (03-395-208) includes six 1.5mL tube inserts, two nL tube inserts, two 15mL tube inserts, two 50 mL tube inserts, two ks, and two brackets.

PIPET SUPPORTS

Scienceware* Polypropylene Support

Holds up to 50 pipets

- Keeps pipets in vertical position for safe, orderly storage
- 5 × 10 array
- Convenient hand grips on both sides
- Autoclavable to 121°C (250°F)

13-712-10

ORDERING INFORMATION:

Holes in top and middle deck are ⅝"diameter (1.6cm).

Bottom deck holes tapered from ⅝ to ¼" (16 to 6mm) prevent pipet tips from touching table beneath.

Dimensions (L × W × H)	Mfr. No.	Cat. No.	Each	Case of 6

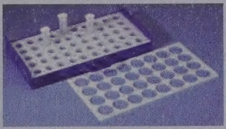
SPECIAL PURPOSE RACKS

*Fisherbrand** Scinti-Rack* System

Ideal for transport and storage of vials



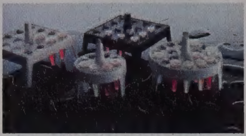
Back, 03-337-44 insert in 03-337-43; 03-337-45

- Suitable for sample preparation when adding scintillation cocktail; for use in water baths, especially for incubation, solubilization or to speed up chemiluminescence decay
- Chemically inert to scintillation liquids; decontaminates easily
- Multipurpose system consists of high-density polypropylene rack body and insert plates (sold separately)
- Holes in rack body prevent floating—assuring good heat transfer
- Insert plates easily transform rack body into convenient tray for Fisherbrand Scinti-6* vials or Fisherbrand 20mL scintillation vials

Description	No. of Places	Cat. No.	Each
Rack Body	----	**03-337-43**	21.42
6mL Insert Plate	50	**03-337-44**	15.99
20mL Insert Plate	32	**03-337-45**	16.54

Nalgene* Polypropylene Floating Microtube Racks

Especially useful in genetic cloning, microbiology and immunology labs



Back (left to right): 14-809-166, 14-809-148G; Front (left to right): 14-809-166B, 14-809-166A

- Square- and round-style racks for incubating 0.5 to 2.0mL microcentrifuge tubes at elevated or reduced temperatures in water or ice baths
- Round-style racks fit conveniently inside 400 or 1000mL beakers
- Racks will float with a full load of filled tubes
- Tubes are supported below the lip while conical ends are immersed in water
- On benchtop, rack legs prevent bottom of tubes from touching bench surface
- Molded-in handle allows convenient transport, agitation and removal from water bath
- Excellent temperature resistance from -70° to +100°C (-94° to +212°F)

ORDERING INFORMATION:

Dimensions: Square racks (L × W × H), 4 × 4 × 2½" (10.3 × 10.3 × 6.5cm); round racks, 2⅝ and 3¾" dia. (6.6 and 9.6cm) for respective 8-place and 20-place racks

Scienceware* No-Wire* Grip Racks

Ideal for decanting and water bath applications

Left to right: 14-791-9B, 14-791-9C, 14-791-9A

- Molded of autoclavable polypropylene that won't float
- Racks consist of two plates with tiny retainer fingers in each well to hold tubes firmly in any position
- Each rack features end plates for labeling and alphanumeric rows for easy tube identification
- Grid base features 3/16" wide (0.5cm) square holes and fold-up sides that lock into grip plates
- Stackable
- Easy to assemble

ORDERING INFORMATION:

Dimensions (L × W × H): 4⅛ × 9¾ × 2¾" (11 × 25 × 7cm)

Scienceware* Round Bubble Racks

Perfect racks for use in microbiology and immunology labs

14-792-15 (left), 14-792-14

- Made especially for use in beakers—incubate eight to twenty 1.5mL tubes in a beaker of water
- Molded of buoyant polymethylpentene with tiny bubbles throughout for additional buoyancy
- Racks fill at top; tubes remove easily by pressing rack down on bench until legs touch and release tubes
- Tube holes arranged in circular pattern with center rod handle
- Steam autoclavable at 121°C (250°F); can be boiled at 100°C (212°F) for 30 minutes

ORDERING INFORMATION:

Eight-place disc measures 2⅝" dia. (6.6cm); 20-place disc measures 3¾" dia. (9.5cm). Discs are ¼" thick (0.6cm). Legs are ¾" long (1.9cm).

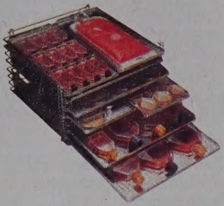
cienceware* Stak-a-Tray* Tissue ulture Racks

rmit safe transport of cultures from lab shelf to cubator or coldroom and back



Two 07-910-4 units stacked vertically with 07-910-6 and 07-910-4A trays

- Modular stainless-steel storage ystems maximize incubator, oldroom and bench space
- Stable construction keeps trays and lishes level for even settling of issue culture cells
- Allow for easy labeling and eparation of cultures
- Select 07-910-4 (with four center upports) for storing Petri dishes or maller culture flasks
- or storing larger culture flasks, hoose 07-910-4B (with two center upports) which allows 1$\frac{15}{16}$" (5cm) learance when only two levels of trays are in use
- ive racks interlock for up to 20 levels
- tainless-steel finish allows easy tray movement
- erforated trays permit air, gas and water vapor circulation
- utoclavable

pacity: Each rack holds up to four levels of 14L × 14"W (36 × 36cm) or × 7"W (36 × 18cm) trays with $\frac{15}{16}$" (2.4cm) clearance, or two levels of ys with 1$\frac{15}{16}$" (5cm) clearance.

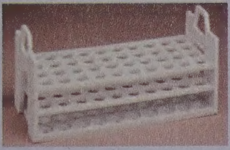
TEST TUBE RACKS

*Fisherbrand** Three-Tier Polypropylene Test Tube Racks

Won't deteriorate in bath, won't rust



14-809B

- Molded racks provide rigid support when fully loaded—reduce breakage
- Stack neatly empty or filled
- Autoclavable to 121°C (250°F)
- With convenient handles for carrying
- Rows are numbered and lettered for easy referencing

or Tube ize	No. of Places	Dimensions (L × W × H)	Cat. No.	Each	Case of 4

Fisherbrand* Poxygrid* Half Racks

Resist abrasion, rust, and corrosion

- Ideal for autoclaving—unaffected by temperatures from -223° to +121°C (-370° to +250°F)
- Constructed of high-quality steel wire, welded and coated with heat-cured, thermosetting, blue epoxy
- Unaffected by salts, weak acids, weak alkalis, and organic solvents such as toluol, heptane, turpentine, and xylol
- Resist chipping
- Two decks with square holes, reinforced edges, and slotted mesh bottom

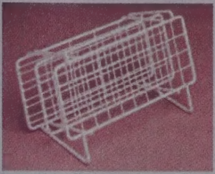
Prices subject to change.

Fisherbrand* Two-Way Slant Racks

or incubating liquid cultures on slant during tissue ulture processes



14-796-5

- Prepare either 5° or 20° agar slants in same rack
- Autoclave media in rack
- While still hot, set rack on one side for 5° tilt, or other for 20° tilt
- 5° angle usually used for aerobic cultures, 20° for anaerobic
- 20° tilt also prevents media from drying out during long-term storage
- White, epoxy-coated, heavy-gauge steel

or Tube ze	No. of Places	Dimensions (L × W × H)	Cat. No.	Each	Case of 12

Fisherbrand* Wood Test Tube Racks

our sizes to hold 16 to 26mm tubes

Left to right.: 14-755, 14-765, 14-770, 14-808-5

or 6 Tubes

- Rack has six drying pins (included)
- Base is heavy wood for stability
- Dimensions (L × W × H): 9¼ × 3 9/16 × 2¼" (23.5 × 9 × 5.7cm)

or 12 Tubes

- In two rows
- Without drying pins
- Rack joints won't warp or pull apart
- Dimensions (L × W × H): 7⅞ × 2¾ × 5⅞" (20 × 7 × 14.9cm)

or 13 Tubes

- Holds two different-sized tubes in two rows
- Upper row has seven openings, 20mm diameter
- Lower row has six openings, 26mm diameter
- Joints won't warp or pull apart
- Dimensions (L × W × H): 9 9/16 × 3⅛ × 7⅞" (24.3 × 7.9 × 20cm)

or 15 semimicro tubes

- Hardwood support block
- Holes are slotted so that liquid levels can be seen easily
- Dimensions (L × W × H): 8¼ × 2⅛ × 1¾" (21 × 5.4 × 4.4cm)

or Tube	No. of Places	Cat. No.	Each
6mm	15	**14-808-5**	27.70
0mm/26mm	13	**14-770**	30.29

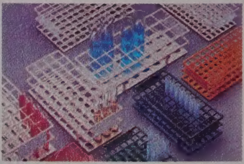
4mm	6	**14-755**	20.47

Nalgene* Unwire* Test Tube Racks

Will not float in a water bath



14-809 Series Racks

- Sturdy, durable ResMer* resin racks have no coating to chip, peel or rust
- Will withstand most lab chemicals and temperatures up to 121°C (250°F)
- Repeatedly autoclavable
- Smooth finish leaves fewer places for contaminants to lodge; no welds to break, no sharp edges
- Endplates accept large labels
- For positive tube identification, numbers and letters are molded into top tier
- Come fully assembled

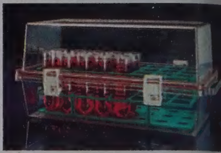
† *Autoclaving reduces strength over time.*

Nalgene* BioTransport Carrier

Offers excellent visibility of contents

- Closed-system carrier accommodates all sizes of Nalgene Unwire* test tube racks
- For transport of racks containing tubes or sample holders filled with potentially infectious materials
- Polycarbonate carrier is tough and break resistant
- Easy-to-grasp handles are molded in
- Clamps securely hold carrier closed and assure leak-resistant seal



15-251-2 (Rack and tubes not included.)

COMPLIANCE:

Meets OSHA Standard 29 CFR Part 1910.1030 for use as protection agai bloodborne pathogens.

NOTE:

To avoid exposure to biohazardous material due to accidental spills withi carrier, autoclave and dispose of carrier and contents without opening clamps.

Nalgene* Polypropylene and Polycarbonate General-Purpose Racks

With handles for easier carrying

- With molded-in numbers and letters for easy identification of tubes
- When empty, can stack with any other racks of the same length
- Autoclavable† **Polycarbonate Racks** have top two transparent tiers with white bottom tier; do not float in water baths
- All white **Polypropylene Racks** offer superior chemical resistance; not autoclavable

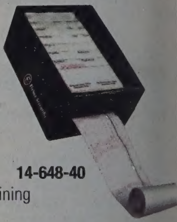
RECORDERS

RECORDERS

Fisher Scientific* Traceable* Temperature Chart Recorders

Provide a permanent record which is easy to read, duplicate, fax, scan, and file

Single-use, disposable recorders for monitoring temperatures in refrigerators, supply rooms, food storage, chemical warehouses, animal quarters, incubators, goods-in-transit, walk-in chambers, biological materials, and manufacturing plants.



14-648-40

- Shock-resistant ABS plastic case
- Eliminates messy pens, expensive instrumentation, confusing software and training
- Display temperature in both °F and °C on large 5½" dia. (14cm) chart
- Battery-operated motor turns the chart with accuracy of ±1 second per day
- Easy-to-read chart shows temperature and time/day of occurrence
- Transparent window on recorder allows viewing of current temperature and history
- Chart, marker, and battery are preloaded—simply pull tab to begin recording
- Tamper-evident seal maintains integrity of unit and results
- Form on front allows you to note start time, date, location and other information

Specifications

- Temperature range: -20° to +100°F and -28° to +38°C
- Accuracy: ±2°F (±1°C)

ORDERING INFORMATION:

Weighs 11 oz. (312g). Case measures 5¼L × 3⅞W × 2½"H (13.3 × 9.8 × 6.4cm).

INCLUDES:

One "AA" alkaline battery

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA. It indicates traceability to standards provided by NIST*.

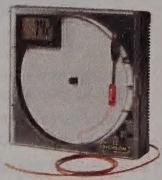
Dickson* K-Thermocouple Sensing Chart Recorders

K-Thermocouple Probe for Flexibility

NEW

User-selectable temperature ranges and recording times. Portable or wall mount.

15-074-113



15-074-115

Features

- Large 8" chart offers 84% more readable area than a 6" chart
- Available temperature range up to +2000°F
- Select from one- or two-pen models
- Large, 1" high digital display (not on KT801 model)
- Audio/visual alarms (KT803, 804, 805, 855 only)
- Compact, rugged enclosure
- Flip-up pen arm for easy chart and pen changes
- 120V AC adapter with 9V battery backup
- Relay contact (KT805 only)

Specifications

- Temperature Accuracy (recorder only): ±1.8°F (±1°C)
- Temperature Sensor: Flexible, 4" bead wire K-thermocouple probe, PTFE coated, suitable for most gas, liquids and semi-solids to +500°F (max.); KT804 6" high-temperature basic K-thermocouple probe with 4' PTFE coated cable suitable to +2100°F (max.)
- Ambient Operating Conditions: +32 to +122°F (0 to +50°C); 0 to 95% RH (noncondensing)
- Calibration: User calibration, zero point
- Recording Time: User selectable: 24 hour, 7 day or 31 day (31 day available on KT802, 803, 805, 855)

ORDERING INFORMATION:

Dimensions: 9.2 × 9.2 × 3.1" (23.4 × 23.4 × 7.9cm). Weight: Approx. 4 lb. (1.8kg) with battery.

Dickson* Temperature Chart Recorders with K-Thermocouple Probe

Eight user-selectable temperature ranges

NEW

13-904-85

New family of 6" Temperature Chart Recorders. Features a sleeker look and feel, increased shielding to eliminate electronic noise interference and smoother pen movement. Includes AC power with battery backup, and user-selectable recording times and temperature ranges.

- Temperature ranges: -100° to 0F/C, -50° to 0F/C, -50° to +50°F/C, 0 to +50°F/C, 50° to 100°F/C, 0 to 100°F/C, 0 to 250°F/C, 0 to 500°F
- Remote temperature accuracy: ±0.3% of chart range and ±1.8°F (±1°C) recorder only
- Remote sensor: standard K-Thermocouple (other K-TC probes available)
- AC adapter, 120V 50/60Hz; 9V battery backup powers unit for up to 72 hours
- LED power status indicator
- Rugged black ABS enclosure
- Recording times: 24-hour/7-day
- Response time: 2 minutes at 63% of full scale
- Resolution: 0.1° resolution -9.9° to 199.9°; 1° resolution above 200° and below -9.9°

ORDERING INFORMATION:
Dimensions: 7½ × 7½ × 3¼" (19.2 × 19.2 × 8.3cm). Chart size: 6" diameter. Weight: 7¼ oz. (205.5g). IP rating: IP21.

INCLUDES:
AC adapter, pen, 9V battery and 4' bead wire probe; charts sold seperately

WARRANTY:
12-month, limited

CERTIFICATIONS:
Comes with standard Dickson Certificate of Calibration. NIST* Traceable and A2LA Certification is available; contact your Fisher Scientific Customer Service Representative for details.

Dickson* Super-Compact SC3 Temperature Recorders

Compact recorder provides the accuracy and resolution required for regulatory compliance and quality control

15-075-100

The reusable SC3 is rugged enough to withstand the rigors of transportation and storage applications. Its low price makes temperature recording affordable for virtually any application.

Features

- Rugged case is ideal for transportation and storage applications
- Super-compact size; low cost
- F/C switchable, 24-hour/7-day switchable
- Easy user calibration
- Security slots for recorder security
- Special ranges for refrigerators, freezers, incubators and ambient conditio
- Optional tamper seals can be used to ensure the integrity of the chart
- Temperature sensor: precise spiral wound bimetallic strip transducer

Specifications

- Recorder accuracy: ±2°F (±1°C)
- Ambient operating temperature: -22° to +122°F (-30 to +50°C)
- Recording time: 24 hour or 7 day
- Power supply: one "AA" battery, up to two years average life
- Free standing, wall mounted or suspended

ORDERING INFORMATION:
Chart size: 3" (7.5cm) dia.; Dimensions: 3¾ × 3¾ × 2¼" (9.3 × 9.3 × 5.7cm
Weight: 0.5 lb. (227g).

INCLUDES:
Battery, pen and instruction manual

LOOKING FOR REFRIGERATORS?

We offer a full line of general- and special-purpose refrigerators to accommodate any application, including Fisher Scientific* Isotemp* and Isotemp Plus Lab Refrigerators, Flammable Materials Storage Refrigerators, Chromatography Refrigerators, Undercounter Refrigerators and more. For the complete selection, see the Refrigeration section of this catalog or

Visit www.fishersci.com and search for Refrigerator

Dickson* Vaccine Temperature Chart Recorder

Designed specifically for vaccine storage applications

NEW

The CDC now recommends using continuous, certified and calibrated chart recorders for vaccine storage monitoring. Easy-to-read charts clearly show when vaccines go out of acceptable temperature range and for how long. This chart recorder highlights ranges for standard refrigerator vaccines and freezer vaccines as well.

15-075-106

- Calibrated and certified
- 24/7 continuous monitoring, even during nights and weekends
- Easy-to-read vaccine chart (sold separately) measures 4" diameter
- Circular bands on chart show acceptable vaccine ranges
- Digital display for quick reference
- Compact size; perfect for refrigerator or freezer
- Pen accuracy, ±2% full scale; display accuracy, ±1.8°F (±1°C)
- Temperature sensor: precise spiral-wound, bi-metallic strip transducer
- Average response time: 11 minutes to move 63% of full scale
- Recording time: 7 days
- LCD display; resolution: 0.1°F (0.1°C)

ORDERING INFORMATION:
Dimensions: 5¼ × 5¼ × 2⅜" (13.2 × 13.2 × 6.1cm). Weight: 0.65 lb. (295g).

INCLUDES:
One "AA" alkaline battery, pen, calibration certificate.

CERTIFICATIONS:
CE approved

CONTROLLERS

sher Scientific* Traceable* Digital Temperature Controller

ntrols heating elements, cooling blocks, hotplates or incubators

is equipment on or off when temperature rises above or falls below setpoints.

/ith range of -20° to +60°C (-4° to +140°F), it permits maintenance of temeratures both above and below ambient

et in 1°C or °F increments; resolution: 0.1°C or °F

" high (13mm) LCD shows temperature and time to the second

ght indicates if attached equipment is on or off

lanual override switches equipment on or off instantly without sturbing temperature settings

15VAC, UL-rated relay

nit accepts standard three-prong plug and controls equipment to 1800w, 5A

DERING INFORMATION:

ensions: 2¾L × 5½W × 1¼"H (7 × 14 × 3cm).

INCLUDES:

Two "AAA" batteries (provide memory setting backup in case of power failure) and 3½' long (1m) sensor cable.

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA. It indicates traceability to standards provided by NIST*.

11-463-47A

Cat. No.	Each
11-463-47A	161.79

---

gi-Sense* Temperature Controllers

vide excellent control, accuracy and power capabilities

15-176-105

l for pilot process ts, R & D labs OEM requirements. as a benchtop roller or mount on with Panel Mount Kit 76-120 (sold separately).

bes

ntrollers accept J, K, T, E, N, B, R and S thermocouple-type probes ith miniconnectors

lvanced controller also accepts 400 Series thermistor probes with ¼" .3mm) phono plug and RTD probes with 3-pin connectors

d calibration offset

proves accuracy by compensating for individual probe error

esolution is 0.1°C below 999.9°C and 1°C above 999.9°C

ccuracy: for Type J, K, T, E and N probes, ±0.1% of reading, ±0.4°C 0.7°F) above -100°C (-248°F) or ±0.1% of reading, ±1°C (±1.8°F) below 00°C (-248°F); for Type R, S and B probes, ±0.1% of reading, ±1°C 1.8°F); for thermistor and RTD probes, ±0.1% of reading, ±0.4°C (±0.7°F)

grammable

vo-line alphanumeric display of set-up and operational parameters

et temperatures using Celsius, Fahrenheit, Kelvin or Rankine scales

arms are fully programmable with adjustable hysteresis and audible arm option

noose from alarms off; manual reset; or automatic reset

ocess alarms trigger if temperature goes outside a set range and can be t for HIGH, LOW or HIGH/LOW modes

- Deviation alarms trigger if temperature deviates from a single setpoint and can be set for HIGH, LOW, HIGH/LOW or BAND modes
- Advanced controller includes SPDT alarm relay to set a circuit to either open or close when triggered

Safety Features

- Fail-safe operation with adjustable overtemperature shutdown and loop break cutoff
- Output power to load device automatically shuts down if sensor or control loop breaks
- If overtemperature setpoint is exceeded, system shuts down automatically
- Output power receptacle fused separately for added safety
- Nonvolatile memory protects set-up parameters and saves parameters if power is lost

Standard Controller

- Maximum heater output is 115/230V, 10A, 1150/2300w
- Select from ON/OFF, AUTOTUNE for standard proportional integral derivative (PID) applications
- Programmable PID for nonstandard PID applications

Advanced Controller

- All the standard controller's features plus higher heater output capacity of 115/230V, 15A, 1725/3450w, up to nine programmable ramp and soak profiles, bidirectional RS-232-C computer interface, and a Windows* software program†
- Features an isolated 4 to 20mA output, scalable for positive or negative slope, 250ohm resistor for conversion to a 1 to 5V output signal, and an output connector

ORDERING INFORMATION:

Controllers are available in 115V (with 6' long power cord) or 230V (with a European-style power cord set and power output connector). Dimensions: 10L × 7⅜W × 3¾"H (25 × 18.5 × 9.4cm).

DATALOGGERS

*Fisherbrand** Exact-Temp* Dataloggers

Measure and record temperature, humidity and/or pH

Battery-powered dataloggers eliminate the need to carry, set up and operate strip chart recorders. Accurately record data in user-selectable intervals.

- Compact and lightweight
- Connect to PC for real-time monitoring
- Monitor and record in real time
- All data can be viewed graphically or exported to a spreadsheet
- All units connect to a PC through an RS-232 or serial port
- Calibrate and set reproducible parameters such as reading rates, starting time, and minimum/maximum or high/low alarm limits with Windows* 95/98/2000/NT-based software (available separately); this data acquisition software is also used to retrieve temperature, date and time readings, and calculate mean kinetic temperature, dew point and standard deviation
- Display temperatures graphically in °C, °F, °K or °R; print or export to Excel*
- All models have programmable minimum/maximum limits
- Time accuracy: ±60 seconds per month at 20°C (68°F)
- Rugged ABS plastic housing is shock resistant; one-year 3.6V battery

CERTIFICATIONS:

Certificate indicating instrument traceability to standards provided by NIST* is available separately; contact your Fisher Scientific Customer Service Representative for information.

APPLICATIONS:

Ideal for environmental studies, monitoring sensitive environments and recording temperatures of perishables throughout all stages of manufacturing, storage and transport.

Humidity and Temperature Datalogger

Accurately records and stores up to 21,845 temperature readings and 21,845 humidity readings

- Records temperatures ranging from -40° to +75°C (-40° to +167°F) with ±0.5°C (±1.0°F) accuracy and 0.1° resolution in 12 intervals from 15 seconds to 24 hours
- Records humidity over the range of 0 to 95% RH with ±3% RH accuracy and 0.5% resolution
- Automatically measures dew point and percent water vapor
- Programmable minimum and maximum limits with visual alarms

Dickson* Coin-Sized Temperature and Temp/Humidity Dataloggers

Compact, slightly larger than a quarter—fits almost anywhere

15-174 Series

Buy loggers by the dozen for mapping larger warehouses, recording temperature and humidity during shipping, HVAC/R audits, and more. View downloaded data with user friendly DicksonWare* software. It creates a graph of your data in seconds and features include customization of your graph and zooming and viewing of your data in tabular format. You can also view data from several loggers on a single graph, enabling easy comparison of multiple sets of data. Transferring the data into documents or spreadsheets is a snap.

- Easy to use
- Unfailing accuracy
- Available in cost-effective 12 packs
- The SK500 monitors temperature; the TK500 monitors temperature and humidity

APPLICATIONS:

Monitoring goods in storage; logging conditions while goods are in transit; mapping and evaluating HVAC/R systems; place in shipping containers, refrigerators, freezers, coolers, ventilation ducts, or anywhere you need to monitor temperature conditions

Model	Description	Temperature Range	Cat. No.	Each

Dickson* Vaccine Temperature Datalogger

Designed for fast-paced clinical settings

Download data in just seconds, using new USB port compared to 1½ minutes using standard serial port. Or, leave the logger in the field and use memory cards to transfer data to your PC.

- High-speed USB 2.0 connectivity and one step data transfer using removable SD Flash memory cards
- Jumbo display with min./max. option and visual/audio alarms
- Temperature range: Internal, -4° to +158°F (-20° to +70°C); external with probe, -20° to +158°F (-29° to +70°C)
- Temperature accuracy: ±1.8°F (±1°C)
- Resolution: 0.1° from 0.0° to 999.9°; 1° over 1000°
- 4' PTFE-coated, K-Thermocouple, bead-wire probe with miniconnector
- Internal sensor: thermistor
- Download: USB, serial, or memory card
- Ambient operating conditions (logger only): -4 to +158°F (-20 to +70°C); 0 to 95% RH noncondensing
- AC adapter: input voltage/current, 120VAC/60Hz/16W; output voltage/current, 9VDC/1A
- Number of samples: 32,000 (16,000 per channel) measurements
- High/Low audible alarm; visual "ALARM" on display
- Glycol bottles provide temperature stabilization, eliminating false alarms due to cycling and frequent door opening
- Wall mountable via keyhole slots

NEW
DICKSON

15-075-10

ORDERING INFORMATION:
Dimensions (enclosure): 4 × 3 × 1.6" (10.2 × 7.7 × 3.9cm).
Weight: 9 oz. (255g).

INCLUDES:
4 "AA" alkaline batteries, instruction manual, AC adapter with 10' exte cable, Velcro* mounting strip, standard certificate of validation, one or K-Type Thermocouple beadwire probes

CERTIFICATIONS:
CE approved

Description	Mfr. No.	Cat. No.
Datalogger with 1 K-Thermocouple Probe	VFC320	15-075-108
Datalogger with 2 K-Thermocouple Probes	VFC325	15-075-109

REFRACTOMETERS

BENCHTOP

Fisher Scientific* Abbe* Benchtop Refractometers

Perform a wide variety of analyses including purity studies, film thicknesses, binary mixtures, soluble sugars (Brix), dispersion studies, and refractive indices of liquids, solids, powders, and opaque materials

- Easy to calibrate and adjust; read both light transmittance and reflectance
- Select from sample illumination, momentary scale illumination, or power OFF by using the three-position switch
- Place sample directly on the measuring prism for reflection measurements
- Sample illuminator swings into position for either transmitted or reflected readings
- Internally illuminated scale gives direct readings in Refractive Index and percent dissolved sugar
- Determine optical dispersion and Nu values from dispersion dial readings

Features

- Adjustment knob sets the dividing line and allows fine adjustments for precise readings to 0.0001 for refractive index (1.30 to 1.71n_D) and 0.05% for dissolved solids readings (0 to 85% sucrose)
- Dual Amici prism compensator produces sharp dividing lines with sodium (D) illumination
- Clip assembly locks the illuminating prism in place
- Rugged, chemically resistant metal housing protects vital parts from dust, fumes, and stray liquids

13-964 Series

INCLUDES:
Glass calibration test piece (calibrated against equipment whose calibration is traceable to NIST*), bottle of 1-bromonaphthalene contact liquid, thermometer, dust cover, instructions, and dispersion table

Electrical Requirements	Cat. No.
115V 60Hz	13-964-10
220V 50Hz	13-964-11

*Trademark. See Trademark Reference.

sher Scientific* Economy Refractometers

termine relative optical dispersion, sugar concentration and total solids in preserves; identify organic mpounds and more over 1.30 to 1.90 N-range or 0 to 80% sucrose range

ccuracy is ±0.002 refractive units and ±1%; needs only 1µL sample
nique illuminated scale ensures maximum visibility

Use

amp casts light beam through 2mm to the eye
ixed glass plate with plane, parallel faces and attached glass prism rest ver aperture, forming small sample well
ight beam passing through sample well provides clear illuminated image of cale plus virtual image (due to refraction through sample prism)
olutions with RI less than glass produce virtual image above slit in cale; Refractive Indices greater than glass produce virtual images elow slit

LUDES:

t source and glass prism

WARRANTY:
12 months

Reichert* Abbe* Mark III Refractometer

Manual refractometer with computerized interpretation and data handling

13-975-150

A modern version of the classic Abbe refractometer, with operating features of the Reichert Abbe Mark II Plus and advanced features found on the Reichert Arias 500.

Simple operation

- Five-button operation, with MENU, SELECT, READ and arrow keys
- Multilingual instructions in English, German, Spanish, French
- To operate, just place the shadowline intersect in the center of the crosshair and press the READ button
- Graphic LCD, 1⅞W × 1⅞"H (4.7 × 4.7cm), gives direct measurement readout
- Accuracy is enhanced by Automatic Temperature Equilibration Detection software and Automatic Temperature Compensation
- Set Point or Set Point/Span (user definable) calibration

Modes/Temperature

- Dissolved solids, 0° to 95° Brix; Refractive Index, 1.3000 to 1.7000n_D; accuracy: ±0.0001n_D, ±0.1% solids (0.0 to 95.0%)
- Programmable with up to 14 custom scales, password protected setup, Restore to Factory option
- Temperature compensation range: 10° to 40°C (59° to 104°F); accuracy: ±0.1°C
- Temperature control range, 10° to 80°C (59 to 176°F) via ports for external circulator
- Dual RS-232-C serial ports allow direct connection to computer

Optical Features

- Focusable eyepiece and dispersion correction prism for true 589nm Refractive Index measurement
- Adjustable, built-in illumination provided by long-life LEDs
- Glass prism is sealed with epoxy to 416 Grade stainless-steel housing

APPLICATIONS:
Ideal for medical, pharmaceutical, industrial fluid, chemical, petrochemic plastic, food and beverage industries. Suitable for use with either transparent or translucent liquids and solids.

ORDERING INFORMATION:
Dimensions: 11L × 6¼W × 13¾"H (28 × 25.8 × 34.5cm). Net weight, 17¼ lb. (7.84kg). Electrical requirements: 110-220V, 50/60Hz.

INCLUDES:
Refractometer; universal 110/220V, 50/60Hz power supply; instructions

COMPLIANCE:
CSA approved

WARRANTY:
Two years

Each	5295.00

Reichert* Abbe* Mark II Plus Refractometer

Provides computerized data handling for Refractive Index measurements

- Provides testing in % solids (Brix), temperature-compensated % solids (Brix), and Refractive Index (n_D) modes
- Electronic temperature sensing and LED readout assure reliability of sample and temperature measurements—numerical result is digitally displayed when pressing READ button; press TEMP button for prism temperature display
- To use, place samples on prism surface, adjust light source and shadow line, then select operating mode via front panel control knob

Modes/Temperature

- Dissolved solids, 0° to 95° Brix and % solids; Refractive Index, 1.3200 to 1.7000n_D; accuracy: ±0.0001n_D, ±0.1% solids (0.0 to 95.0%)
- Temperature compensation range: 15° to 50°C (59° to 122°F); accuracy: ±0.1°C

Connectivity

- Serial port allows direct connection to IBM*-compatible (PC/XT* AT*) computer
- Simultaneous use of standard communications program (Windows* HyperTerminal*) allows data transfer

13-97

Features

- Focusable eyepiece and dispersion correction prism for true 589nm Refractive Index measurement
- Adjustable, built-in illumination system
- Stainless-steel prism assembly is sealed with solvent-resistant epoxy

APPLICATIONS:
Ideal for medical, pharmaceutical, industrial fluid, chemical, petrochemical, plastic, food and beverage industries. Suitable for use with either transparent or translucent liquids and solids.

ORDERING INFORMATION:
Dimensions: 10½L × 6W × 14"H (26.2 × 15.2 × 36cm); net weight, 16 lb. (7.3kg)

eichert* Arias 500 Refractometer

tomatic, dual-array, transmitted-light refractometer ted for transparent, translucent, and semitranslucent uid and solid samples

- ovides direct reading of % solids (Brix), temperature-compensated % olids (Brix), RI, temperature-compensated RI, and temperature
- leasures in RI range of 1.30000 to 1.70000 with ±0.00005 accuracy; easures % solids (Brix) from 0 to 100% with a ±0.03% accuracy; tem- erature compensation range is 10° to 40°C (50 to 104°F)
- x high-intensity monochromatic LED internal lights at standard 589nm nd built-in wavelength filter eliminate need for external light adjustment
- even calibration points—one point is water, six points are ustomizable—and automatically records more than 120 of the most cent calibrations to comply with ISO laboratory maintenance protocols
- ser-friendly 1¾W × 1¾"H display with choice of instructions in nglish, German, Spanish, or French; password-protected setup, nd easy programming of up to 15 custom channels
- vo RS-232-C serial ports allow for data output to computer or printer

Use

- ace a sample directly on the glass prism, bring shadow into the field view; press READ button
- ptiMatrixx* dual array RI system precisely etermines shadowline position by using an array to determine manual positioning of shadowline within the crosshairs, then a second array automatically detects the exact shadowline position
- Thermistor located directly at the prism/sample interface provides accurate sample temperature readings without degree variations
- Also detects thermal equilibrium point between sample and prism, and automatically initiates a reading

13-975-121

ORDERING INFORMATION:

Encased in a sturdy cast-aluminum housing. Dimensions L × W × H: 11 × 6¼ × 13⅝" (28 × 15.9 × 34.5cm); weight: 17¼ lb. (7.8kg).

COMPLIANCE:

UL listed and CE marked.

Fisher Scientific* UriSystem* Refractometer

Solidly built with high chemical resistance to urine

13-962

- Easy to use with a sharp, clear image of the Specific Gravity and Refractive Index scales
- Specific Gravity scale reads from 1.000 to 1.050 in increments of 0.005; RI scale is from 1.333 to 1.356 in 0.001 increments
- "Fisher Blue" filter in the optical path increases the dividing line contrast for extremely easy reading
- Requires only a few drops of uncentrifuged, well-mixed, fresh urine

To Use

- Place a drop of urine on the prism surface
- Close the daylight cover plate
- Point prism end of refractometer toward a bright light
- Adjust image by rotating eyepiece; scale becomes clearly visible
- Specific gravity is obtained by reading the sharp dividing line (between light and dark contrast) where it intercepts the scale values
- Calibrate by placing a few drops of distilled water on the face of the prism and read just as you would a sample
- Check to see if the boundary line coincides with the 1.000 line on the Specific Gravity scale, or 1.333 on the Refractive Index scale (if not, adjust the line by turning the scale-adjustment screw)

ORDERING INFORMATION:

Net weight, 5 oz. (143g).

Dimensions	Cat. No.	Each
7¾L × 1⅛W × 1⅛"H (20 × 3 × 3cm)	**13-962**	462.50

Reichert* r²mini Handheld Refractometer

Big features and performance in a small package!

- LCD readout switches between Refractive Index and % Brix modes
- Wide measurement ranges of 1.3330 to 1.4465 RI and 0.0 to 62.0% Brix cover most applications
- High-contrast five-digit display shows complete measurement—no scrolling of digits
- Automatic readings in seconds at the push of a button—no need to rely on user interpretation of a shadowline
- Electronic Automatic Temperature Compensation from 10° to 40°C (50° to 104°F) for accurate measurements indoors or outdoors
- Automatic power-off mode extends battery life beyond 10,000 measurements; battery life indicator is displayed when the unit is powered on
- Rugged housing has International Protection Class rating of IP65, making it water resistant and dustproof
- Rubber grips on each side provide an anti-slip grip

ORDERING INFORMATION:
Measures 3⅞L × 2⅛W × 1⅛"H (100 × 54 × 27mm). Net weight, ¼ lb. (100g). With carrying case supplied, measures 5¹¹⁄₁₆ × 2¹⁵⁄₁₆ × 1⁹⁄₁₆" (145 × 75 × 40mm). Operates on 2 × "AAA" batteries.

INCLUDES:
Meter, carrying case, batteries, instructions

WARRANTY:
One year

COMPLIANCE:
IP65 water-resistant, dustproof

CERTIFICATIONS:
RoHS and WEEE. CE marked.

Reichert* AR200 Handheld Digital Refractometer

Lightweight digital refractometer designed for the food, beverage, agricultural, industrial-fluid, chemical, petrochemical, pharmaceutical, medical, and plastic industries

Use in the lab or in the field for transparent or translucent liquids or semisolids.

- Automatically meaures refractive index from 1.3300 to 1.5600 to an accuracy of ±0.0001, and % solids (Brix) from 0 to 95% to an accuracy of ±0.1; better than most benchtop refractometers
- Results are displayed instantly on direct-reading LCD and can be stored in 225 data-point memory (retrievable using optional IR Link-Up software [13-975-130])
- Calibrate with distilled water setpoint or use up to four customizable calibration points for full compliance with NIST* standards

Accurate

- Features a special coated glass prism hardened to resist scratching from even the highest solids content samples
- 3600-cell, linear-scanned–array imaging achieves accuracy to ±0.0001n_D, 0.1% Brix
- Temperature sensors and automatic temperature compensation (15° to 40°C [59° to 104°F] per ICUMSA, user-definable in custom scales) enhance reading accuracy
- Auto off/sleep mode extends battery life; low-battery detection built in

Durable

- Prism is surrounded by a stainless-steel well; optics and sensing elements are mounted on a fully sealed, ruggedly constructed, diecast frame
- Molded, completely sealed Valox* thermoplastic-resin housing provides environmental protection and chemical resistance; drop tested from 36" (91.4cm)

13-975-111

AR200 software

- Includes single-point or multipoint calibration, four reading modes (RI, temperature-compensated RI, Brix, Brix-TC), and adjustable contrast control
- IR port allows two-way communications with a personal computer if used with optional IR communications package (13-975-130) for stored data retrieval and programming of up to thre user-defined channels

ORDERING INFORMATION:
Dimensions: 7L × 3¾W × 1⅜"H (17.8 × 9.5 × 4cm); net weight: 14 oz. (408g).

REQUIRED ACCESSORIES:
Four "AAA" batteries

CERTIFICATIONS:

ACCESSORIES

eichert* IR Communications Package

**onnects Reichert digital handheld refractometer to
ser's PC**

ncludes IR docking cradle and Reichert Link-Up Software

Combines the refractometer's built-in IR communications port with IR docking cradle and Reichert Link-Up Software to upload up to three custom channels to meet various application needs

r. No.	Cat. No.	Each
951000	**13-975-130**	395.49

- Download the day's readings directly to PC
- View current calibration history and readings with time/date stamp
- IR docking cradle plugs into the RS-232 serial port on PC for two-way communication between the refractometer and PC

13-975-130 Docking Cradle

Brix scales of Reichert's handheld refractometers are based on the International Commission for Uniform Methods of Sugar Analysis MSA) published tables relating Refractive Index to % solids using sucrose solutions. There are many published tables relating Brix readings to solids readings, including refined sugar, high fructose corn syrups (HFCS) and fruit juices. The Brix scale can also be used as an arbitrary scale uickly determine true solids when the relationship between the % solids and the Brix scale is known.

ichert* Rhino Ultra-Durable Handheld Refractometers

**igned specifically for rugged factory and field use—fully IP67 water resistant,
tproof, and impact resistant**

omatic Temperature Compensation eliminates the need for temperae correction charts

ics and instrument scales are permanently sealed inside the refraceter body

gnified scales have easy-to-read markings and divisions for true reads and accurate results

dels are offered with Brix scales of 0-30, 0-50 and 50-90%

200 is designed for wine and grape testing

60 and DC70 Duo-Chek models test engine coolant and battery charge

Rhino Series

ERING INFORMATION:

Model for Industrial Fluid Testing (RE-10440) is also available (see page).

l	Scale Reading	Scale Division	Refractive Index Range	Mfr. No.	Cat. No.	Each
0	0–30% Brix	0.2 and 0.5%	1.3330–1.3811	137530LO	**13-975-109B**	125.00
0	0–50% Brix	0.25%	1.3330–1.4200	137531LO	**13-975-110**	125.00
0	50–90% Brix	0.2%	1.4201–1.5177	137533LO	**13-975-126**	125.00
0	0–200 Oe°, 0–45% Brix, 0–40 Kl° Wine and Grape Tester	0.2 and 0.5 Oe°, 0.5%, 0.5 Kl°	1.3330–1.4100	137528LO	**13-975-129**	125.00
	1.100-1.400 Specific Gravity; 0°C to -48°C Antifreeze Protection; 0 to 70% Ethylene Glycol, 0 to 61% Propylene Glycol; 1.3330-1.4048 Refractive Index	0.01 Sp. Gr.; 3°C; 1%; 0.0001 RI	1.3330–1.4048	137564LO	**13-975-107**	100.00
